Hull & Barnsley Railway Co.'s

ALEXANDRA DOCKS, HULL

Water Area, 53½ acres. **Entrance Lock,** 550 feet long, 85 feet wide. **Depth on Sill,** 34 feet H.W.O.S.T., 28 feet H.W.O.N.T. **These Docks** are used by the **Largest Vessels** entering the Port.

DURING YEAR 1913: **Total Tonnage** of vessels entering, 2,827,552 tons net; **Grain and Seed Imports,** 6,369,809 qrs.; **Cottonseed Imports,** 210,226 tons; **Timber Imports,** 326,459 loads; **Coal Shipped,** 3,300,410 tons.

The Two Large GRAVING DOCKS have lengths on blocks of 550 and 500 feet respectively, and lead direct out of the Main Docks.

Cranage power up to **100 tons.**

Excellent Storage for Timber, Deals, Battens, Boards, &c.

Extensive **Warehouses, Sheds, Cellars,** and **Cold Stores.**

The **Seven Hydraulic Coal Hoists** are of the most modern and improved description, being capable of Shipping 370 tons per hoist per hour, and in addition there are three powerful Cranes which can be used for coal shipping purposes.

Two Electric-belt Coal Conveyors, each having a potential shipping capacity of 600 tons per hour, are situated on the Company's **River Pier** (which is available for use at any state of the tide) for the **Rapid Shipment** of coal.

The **River Pier** is also equipped with a commodious warehouse and modern electric cranes and capstans.

Regular Colliers load at the Alexandra Docks and the **River Pier.**

Railway Lines run all round the Docks and upon the Pier, being in connection with all the Leading Railways in the Kingdom.

Steamers engaged in regular trade with America (North and South), Australia, Black Sea, Canada, China, Egypt, India, Japan, North Pacific Ports, Portugal, Straits Settlements, and other parts of the World, load in the Alexandra Docks, and to ensure delivery alongside the Vessel, and avoid carting through the city from other stations, Goods should, in all cases, be consigned to "Alexandra Docks Station, Hull, per Hull and Barnsley Railway."

Low Charges.—Enquiries respecting Dock matters should be addressed to J. L. THOMPSON, Docks Superintendent, Alexandra Docks, Hull; respecting Goods and Mineral Business to J. SHAW, Goods Manager, Charlotte Street, Hull; respecting the General Business of the Company to EDWARD WATKIN, General Manager,

HULL. **Charlotte Street, Hull.**

London and South Western Railway.

SOUTHAMPTON DOCKS

One Hour and Forty Minutes from London (Waterloo).

POSITION AND FACILITIES UNRIVALLED.

Double Tides. High Water Four Times every day.
Never less than 28 ft. alongside New Ocean Quays.

Channel to Docks being dredged to 35 ft. at LOWEST LOW Water. As safe by night as by day, being lighted by Gas Buoys.

Large Ocean Liners Dock any Hour—Day or Night.

A new 16 acre dock, with a depth of 40 ft. L.W.O.S.T., is now open for the accommodation of Vessels.

Passenger and Mail Trains go alongside Steamers. No Tender required.
Docks fully equipped with Hydraulic and Electric Appliances.

The "Trafalgar" Graving Dock is 897 feet long, width at entrance 100 feet, width at cope 125 feet, with a depth to blocks of 35 feet H.W.O.S.T., or more if required.

Spacious Sheds for Wood Goods under Cover.

COMPLETE EQUIPMENT OF GRAIN ELEVATING AND CONVEYING MACHINERY.

The finest Installation of Cold Storage in the Kingdom.

WAREHOUSES, Bonded and Free, for Storage of Wine, Grain, Provisions, Tobacco, &c.

Specially-constructed Coal Barge Docks, floating 14,000 Tons of Coal in Lighters, ready for the Coaling of Line Steamers.

Full particulars as to Rates, etc., can be obtained on application to Mr. T. M. WILLIAMS, Docks and Marine Manager, Dock House, Southampton.

H. A. WALKER, *General Manager*.

London & North Western Railway

GARSTON DOCKS
(LIVERPOOL)

EVERY FACILITY FOR DEALING WITH TIMBER, COAL, MINERALS & GENERAL MERCHANDISE. Total Water Area of Garston Docks, 28½ Acres.

MODERN APPLIANCES

47 Portable Hydraulic Cranes, Lifting Capacity up to 40 Tons.

QUICK DISCHARGING & LANDING FACILITIES direct from SHIP TO RAILWAY WAGON.

COALING EQUIPMENT. Six Movable Hydraulic Coal Hoists, each of 30 Tons. Seven fixed Hoists of less capacity.

EXTENSIVE WAREHOUSE ACCOMMODATION

MINERAL STORAGE BERTHS.

TIMBER STORAGE. Forty-eight Acres of Storage Ground.

GARSTON IS A CHEAP PORT BOTH FOR SHIPOWNERS & MERCHANTS

All inquiries should be addressed to **Mr. J. Roughley, District and Traffic Dock Superintendent, Garston Docks,** who will furnish Particulars, Rates, By-laws, Port Regulations, Plans, or other information in connection with the Shipping of the Docks and Trade generally.

ESTABLISHMENT OF NEW WORKS ON THE SHIP CANAL

There are available Sites eminently suitable for Works and Depots of all kinds, with 28 feet depth of water alongside and connected with the Main Line Railways.

BARRY DOCKS

(SOUTH WALES).

Owners: THE BARRY RAILWAY COMPANY
Chairman: The Rt Hon. THE EARL OF PLYMOUTH
General Manager: T. H. RENDELL

Area. The Barry Docks are 114 acres in extent, and have accommodation for the largest vessels afloat.

The Sea Approach is remarkably easy, owing to the absence of any rocks or shoals in this part of the Bristol Channel, and to the efficient way in which the Channel is lighted. Within 700 yards of the entrance to the Docks there is a depth of 26 feet at low water Spring Tides.

Good Anchorage is obtained between the Barry and Sully Islands.

The Deep Water Lock. Vessels drawing 13 feet can enter or leave at low water Spring Tides, and during 15 days of each month vessels drawing 18 feet can enter or leave at low water. No other Dock in the Bristol Channel possesses such a Deep-sea Entrance.

Pilotage. There is a separate Pilotage Board for **Barry,** and Barry being nearer the sea the Pilotage Charges are **Lower** than for neighbouring Ports. Pilotage inwards or outwards is not compulsory.

Towage. The Docks are provided with three powerful Tug Boats for moving vessels in the Docks, which are fitted with Salvage and Fire Pumps. There is also a **Steam Fire-float** provided with water tank.

Ship Repairing, etc. There is a Public Graving Dock of large capacity (length 867 ft., width at top 113 ft. 6 in., width at bottom 100 ft., width at entrance 60 ft.) and capable of division into outer and inner Docks of different lengths, at which ship-owners can employ their own Marine Engineers. There are also two large Private Graving Docks, one capable of accommodating the largest class of vessels. Several Marine Engineering Firms are established on the Dock property.

Quayage. The Quayage is ample, and extends for a length of over 7,900 feet, irrespective of the space covered by the Coaling Appliances.

Warehousing. There is ample accommodation for Storing Goods.

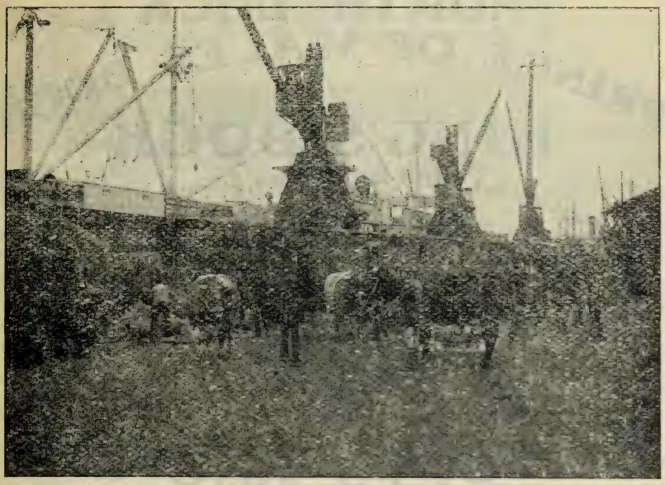
Wharf Space and Adjoining Land. There is an extensive area of land available for the stacking of timber and the storing of other Goods not requiring cover, and for **New Works.**

Machinery and Appliances. All is of the most improved type. There are **33 Fixed** and **9 Movable** Coal Tips. By means of the Movable Tips a vessel can be loaded at three hatchways simultaneously. Each Coal Tip has two Weighbridges; wagons can therefore be weighed when full and when empty. The re-taring is done free of charge.

Cranage. The cranage equipment is complete. **59** Cranes, ranging in capacity from 30 cwt. to 50 tons, including a **Floating Crane,** have been provided.

Lighting. The Docks are lighted Electrically throughout.

Dock Charges. These are much below the average of other great Ports.



Return Cargoes. A great advantage is that vessels can generally obtain an outward cargo from Barry, thus obviating the necessity of changing Ports.

Railway Accommodation. There is a complete system of Railway Lines around the Docks, and goods can be shipped direct from, or loaded direct into, Railway Trucks. The Company's Railway is connected with all the railways in the country, and the rates quoted for the Carriage of Merchandise to and from Ship at Cardiff are also applicable to and from Ship at Barry.

The Company's Passenger Trains run through to Cardiff at frequent intervals. The Shipping Tonnage frequenting the Docks annually is about 5,000,000 tons N.R.T.

The Customs and Board of Trade Offices, Post Office, and several Banks are adjacent to the Docks.

For further information please apply to the GENERAL MANAGER, Barry Dock.

Prize Cattle being shipped per liner "Spenser" at Alexandra Docks.

NEWPORT DOCKS

World's largest Single Dock.
New Entrance Lock—the largest in the world—1,000 ft. long by 100 ft. wide.
Enormous deep-water area, enabling free and quick movement of ships.
Unsurpassed rapidity of Coal Shipments.
High modern coal tips, with anti-breakage equipment.
No preferential allocation of tips.
100 miles of sidings, four miles of quays.
Docks and premises lighted throughout with electricity.
General cargo loaded and discharged with utmost despatch.
Nearest ocean port to Midlands. Ample warehouse accommodation.
Extensive stacking ground for iron ore, pitwood, general cargo, etc.
Unlimited areas available for erection of works closely adjacent to docks.
Handbook of Rates and general information on application.

J. H. VICKERY, General Manager, ALEXANDRA (NEWPORT & SOUTH WALES) DOCKS & RAILWAY, NEWPORT, MON.

NORTH DOCK
PRINCE OF WALES DOCK
KING'S DOCK

First sod cut by His Majesty King Edward VII, 1904.

SWANSEA HARBOUR TRUST.

SOUTH DOCK

AREA, &c.—The Docks have an area of 131½ acres, with 32,200 lineal feet of quays. The KING'S DOCK is designed for **vessels of the largest tonnage**, the Lock being 875 feet in length and 90 feet in breadth, with a depth of water over the outer sill of 40 feet at H.W.O.S.T., and 32 feet 3 inches at H.W.O.N.T.

COALING APPLIANCES.—The Docks are equipped with 27 fixed and movable Hoists, each capable of shipping up to 700 tons per hour.

CRANES.—There are upwards of 100 Hydraulic and Electric Cranes, with a lifting capacity up to 70 tons.

WAREHOUSES AND TRANSIT SHEDS.—These cover a floor area of 441,942 superficial feet.

RAILWAYS.—The Docks are served by the Great Western, Midland, London and North Western, and Rhondda and Swansea Bay Railways.

ENTRANCE CHANNEL.—This is lighted by means of Gas Buoys.

LAND FOR WORKS.—A considerable area is available for the erection of Works.

POWER.—**Electric and Hydraulic Power** can be obtained from the Trustees' Power Stations at reasonable rates.

STEAMSHIP LINES.—These run between Swansea and the following ports: New York, Singapore, Hong Kong, Yokohama, Nagasaki, Hiogo, Java ports, Rio de Janeiro, Santos, Rosario, Monte Video, Buenos Ayres, Ports in Chile and Peru, St Petersburg, Copenhagen, Stavanger, Stettin, Stockholm, Antwerp, Hamburg, Amsterdam, Rotterdam, Treport, Rouen, Nantes, Bordeaux, Oporto, Lisbon, Setubal, Barcelona, Genoa, Leghorn, Venice, Trieste, Fiume, Ports in Greece, Constantinople and other Turkish Ports, Galatz, Ibrail, Odessa, Batoum, Alexandria, &c.

VESSELS LAYING UP.—Enormous accommodation provided for these at the King's Dock at exceptionally low rates.

PILOTAGE.—The Trustees are the Pilotage Authority, Pilotage being non-compulsory both inwards and outwards.

For further information apply

WILLIAM LAW,

General Manager.

HARBOUR OFFICES, SWANSEA.

1/2/'11.

LLANELLY

LLANELLY possesses many advantages of great importance in its development as a **South Wales Shipping Port.**

It is an age of Steel, and any manufactured product which involves Steel in sheet, bar, or other form, could be produced with great economy and cheapness in the Town and District.

Llanelly being **directly on the Western portion of the South Wales Coalfield,** a supply of coal most suitable for all Works' purposes is assured.

Further, as the production of power will probably in the future be largely from Gas Plant, whether applied direct or through the medium of electricity, the suitability of the coal for the purpose is of great importance. The best kind for this process is undoubtedly Anthracite, and **Llanelly has an unlimited supply of the finest Anthracite Coal in the world at its very doors.**

The Water Supply is abundant and of excellent quality, the pressure ample, and the charges the lowest of any town in the kingdom, ranging from 6d to **1½d. per 1000 gallons.**

The Great Western main line runs through Llanelly, and has convenient ramifications to the surrounding coal producing District.

Other lines feeding the Town are, the London and North-Western, the Mynydd Mawr, and the Gwendraeth Valley Railways, whilst its situation as a Seaport and its various Docks (particulars of which are given in this Year Book) will never permit any railway rates to advance beyond a point at which sea freights become competitive with them.

There are **regular lines of weekly coasting traders from the port.**

The **Docks** of the Port offer every accommodation to the staple trade of the shipment of coal from the coalfield referred to, the export of **tin plates,** galvanized sheets and enamelled products, and the import of **pig and scrap iron,** pitwood, timber, etc.

There are many and excellent SITES FOR WORKS, available at most reasonable rates alongside the Great Western Railway, and the North Dock, the property of the Harbour Trustees.

Any further particulars will be readily furnished by

HENRY W. SPOWART,
Clerk to the Harbour Trustees, and Urban District Council, or

JOHN REES,
General Superintendent of the Trust, and Harbour Master.

Lancashire & Yorkshire Railway

FLEETWOOD

WYRE DOCKS

THE LANCASHIRE & YORKSHIRE RAILWAY COMPANY WISH TO DRAW THE ATTENTION OF TIMBER IMPORTERS, GRAIN SHIPPERS, IRON FOUNDERS, COAL EXPORTERS AND MERCHANT SHIPPERS GENERALLY, TOGETHER WITH TRAWLER OWNERS, TO THE EXCELLENT FACILITIES OFFERED AT THE ABOVE DOCKS FOR THE IMPORT AND EXPORT OF ALL CLASSES OF MERCHANDISE.

IN ADDITION TO DIRECT RAIL COMMUNICATION TO ALL PARTS OF THE KINGDOM THE PORT HAS THE FOLLOWING ADVANTAGES:

TO GRAIN IMPORTERS AND MILLERS

A GRAIN ELEVATOR ON THE AMERICAN PRINCIPLE HAS BEEN ERECTED ADJACENT TO THE DOCK, WITH A CAPACITY OF 150,000 QUARTERS; STORED IN 150 SILOS, EACH HOLDING 1,000 QUARTERS; WITH A DEPTH OF 72 FT.
GRAIN EXPEDITIOUSLY LIFTED FROM SHIP'S HOLD BY MEANS OF A "SHIP'S LEG," AND CARRIED BY ENDLESS BAND TO TOP OF ELEVATOR, WHERE IT IS WEIGHED IN BULK AND PLACED IN SILOS.
GRAIN PLACED IN SACKS, WEIGHED AND PUT DIRECT INTO WAGONS FOR DESPATCH ON RECEIPT OF ADVICE. UNIFORM SAMPLE SECURED THROUGHOUT BY AUTOMATIC MIXERS.
GRAIN MAY BE CHANGED FROM SILO TO SILO, AND MIXED.
LOW RATES FOR RESHIPPING INTO COASTERS.
ELEVATOR FITTED WITH "SHAKERS" AND "BLOWERS" FOR RESTORING HEATED AND DAMAGED CARGOES.

TO TIMBER MERCHANTS

DISCHARGE DIRECT EX SHIP TO WAGON, AMPLE AND POWERFUL CRANAGE ACCOMMODATION.
SPLENDID GRAVEL STORAGE GROUND AT LOW "YARDAGE."
COMMODIOUS TIMBER POND.
LOW STEVEDORE CHARGES.
UP-TO-DATE SAW MILL AND CREOSOTING WORKS ADJACENT TO THE DOCKS.

TO IRON-FOUNDERS

ORE LIFTED DIRECT EX SHIP'S HOLD ON TO WAGONS FOR DESPATCH, NO CARTAGE OR SECOND HANDLING BEING INVOLVED.
ALL HOLDS MAY BE WORKED SIMULTANEOUSLY, SECURING RAPID DISCHARGE BY POWERFUL CRANES.
LOW STEVEDORE CHARGES.
CHEAP STORAGE.

TO COAL EXPORTERS

HYDRAULIC COAL CRANE CAPABLE OF LOADING 250 TONS PER HOUR.
WAGONS LOWERED TO DECK LEVEL BEFORE BEING TIPPED, THEREBY SECURING MINIMUM BREAKAGE OF COAL.
GOOD STORAGE ACCOMMODATION.

TO IMPORTERS OF CEMENT, PULP, ESPARTO; & to Shippers Generally

TRAFFIC LOADED DIRECT EX SHIP ON TO RAIL. NO SECOND HANDLING.
GOOD AND DRY SHED ACCOMMODATION ALONGSIDE QUAY FOR CEMENT, WOOD PULP, ESPARTO GRASS, etc.
CONVENIENT RAIL FACILITIES.
NUMEROUS AND QUICK WORKING HYDRAULIC AND **STEAM CRANES.**

TO TRAWLER OWNERS AND THE FISHING INDUSTRY

MAGNIFICENT FISH DOCK. OVER 2,000 FEET OF COVERED SLADE ACCOMMODATION.
DUES ON TRAWLERS LOW. NO DUES ON FISH.
FISH LANDED DIRECT ON TO SLADES BY SHIP'S OWN TACKLE, PACKED ON SLADES AND PLACED DIRECT ON TO WAGONS RUNNING IMMEDIATELY ALONGSIDE,
ADJACENT TO THE LANCASHIRE COALFIELDS, GOOD CRANAGE; ALSO 3 COALING TRAVERSERS, REMOVED FROM THE DISCHARGING AND ICING BERTHS.
PLENTIFUL ICE SUPPLY. THREE "ICE HOUSES" FOR THE STORAGE AND CRUSHING OF IMPORTED ICE, AND AN UP-TO-DATE ICE FACTORY. ICE PLACED ON BOARD BY MEANS OF SHOOTS WORKED FROM AN OVERHEAD CONVEYOR.
AMPLE WATER SUPPLY OBTAINED FROM HYDRANTS ALONG QUAY SIDE.
PATENT "SLIPWAYS" AND "GRIDIRON" FOR REPAIRS AND PAINTING, etc.
EVERY FACILITY FOR OBTAINING STORES, AND FOR HAVING REPAIRS CARRIED OUT. ALSO DRYING, CURING AND "SMOKE" HOUSES.
RAPID RAIL CONVEYANCE AND CHEAP RATES.
OVERHEAD BOX STORAGE ACCOMMODATION.
SALT OF ALL KINDS OBTAINABLE FROM SALT WORKS ADJACENT TO DOCKS.

ALL FURTHER INFORMATION CAN BE OBTAINED FROM THE DOCK SUPERINTENDENT, WYRE DOCK, FLEETWOOD; OR FROM MR. H. MARRIOTT, CHIEF GOODS MANAGER, LANCASHIRE & YORKSHIRE RAILWAY, MANCHESTER.

JOHN A. F. ASPINALL,
GENERAL MANAGER.

HUNT'S BANK, MANCHESTER.

CALEDONIAN RAILWAY COMPANY.

GRANGEMOUTH HARBOUR & DOCKS.

SITUATION.—On the South Shore of the Firth of Forth, 25 miles North-East of Glasgow, 26 miles West of Edinburgh. Average distance from Lanarkshire Coalfield, 30 miles; from Stirlingshire Coalfield, 8 miles; from Light Castings District, 4 miles; from Steel-making and Iron Manufacturing Districts, 20 miles; and from Fire Clay Manufacturing District, 12 miles.

APPROACH.—Well lighted, buoyed and protected, ensuring safe and easy navigation. Good Anchorage within a short distance of entrance to Docks.

AREA.—Docks, 58 acres; Basin, 10 acres; Timber Ponds, 45 acres. Total water area 160 acres.

DIMENSIONS OF DOCKS—Length of Quays, Grange Dock .. 2,583 yards.
" " Carron Dock .. 1,194 "
" " Old Dock .. .. 678 "
" " Junction Dock.. 470 "

MACHINERY and APPLIANCES.—The Docks are equipped with the most modern appliances, including Hydraulic Coal Hoists, Hydraulic Cranes and Hydraulic Capstans. The Hydraulic Hoists have a lift of 45 and 50 ft., and are capable of shipping 50 wagons each per hour. They are so arranged that two or three Hoists can work into one ship simultaneously. The lifting capacity of the Hoists is 32 tons each, and of the Cranes 2 to 5 tons each. There is also a 12-ton Hydraulic Crane and a 20-ton Steam Crane. The Docks, Storage Ground, Sidings, &c., are lighted throughout by electricity.

WAREHOUSES and TRANSIT SHEDS.—Commodious Shed Accommodation has been provided, with Crane and Rail facilities, which will be extended as required.

WHARF SPACE and STORAGE GROUND.—Large provision, with Rail connections to all parts, has been made for the Storing of Timber, Deals, Iron Ore, Oil and other Merchandise not requiring cover, also Ponds for storing Timber afloat. No such extent of accommodation exists at any other Port in Scotland.

LAND FOR PUBLIC WORKS.—Within the Dock property and immediately adjoining it land is available and can be got on reasonable terms for Engineering Works, Saw Mills, Oil Storage Tanks, Creosoting and other Works, &c., in connection with the Shipping and Trade of the Port.

RAILWAY and CANAL CONNECTIONS.—The Dock Rails (of which there are many miles) are connected with the System of the Caledonian Railway Company, thus ensuring direct communication from the Ship's side, Warehouses, Storage Ground, Timber Ponds, &c., to all parts of the United Kingdom. The Forth and Clyde Canal extends from the Docks to Glasgow, the River Clyde and the heart of Lanarkshire, and affords cheap transit between the Docks and the Manufacturing Districts along its routes.

DEPTH OF WATER.—At High Water Ordinary Spring Tides, there is a depth of 26 ft. over the caisson at entrance to Grange Dock, and 30 ft. of water on the sill of the Sea Lock, which gives access to all the Docks. The Lock leads directly to the Firth of Forth; there is no river to navigate; Ships get from the Docks at once into deep water.

PILOTAGE.—The Caledonian Company are the Pilotage Authority within Harbour Limits. Pilotage non-compulsory.

DOCK and OTHER CHARGES.—On vessels to or from places in Great Britain and Ireland, 2d. per reg. ton; to or from other places, 3d. per reg. ton. Vessels entering the Docks to load Bunker Coal only, whether Foreign or coastwise, 2d. per register ton. **Harbour Lights:** For each 50 tons register, 6d. **On Goods:** Coal, Pig Iron, Iron Ore, 1d. per ton; Timber, 4d. per ton; Pit Props, 2½d. per ton; Wood Pulp, 3d. per ton; General Merchandise, 4d. per ton. **Hoist Dues:** 2d. per ton. **Crane Dues:** Under 30 cwt., per lift, 2d. per ton. **Trimming Charges:** Coal, Gum or Duff, Fire-clay, Mill Scale and Slag, 1d. to 3d. per ton; Coke, Gas Cinders, Pitch and Manure, in Bulk, all vessels, 3½d. per ton; Bunkers (ordinary), 6d. per ton; (self-trimming), 3d. per ton; Cargo or Bunker Coal may be weighed at the hoists, for which the charge is ½d. per ton, inclusive of the taring of empty wagons. **Water:** For Ships' use, 8d. per 100 gallons; for Ships' boilers, 4d. per 100 gallons; minimum charge, 1s. 8d.

Full information on all matters relating to the Docks can be obtained from Mr. JOHN NEWLANDS, Canals and Docks Superintendent, Grangemouth.

DONALD A. MATHESON

302 Buchanan Street, Glasgow. *General Manager.*

January, 1915.

North British Railway Company.

METHIL DOCKS

THE GREAT COALING PORT on the EAST COAST of SCOTLAND.

THE NEAREST PORT to the RICH COALFIELDS IN FIFESHIRE.

SPLENDID ACCOMMODATION FOR ALL CLASSES OF VESSELS.

EQUIPPED WITH THE MOST IMPROVED HOISTS AND OTHER APPLIANCES.

UNRIVALLED FACILITIES FOR THE QUICK LOADING OF COAL AND DISCHARGING OF VESSELS.

METHIL DOCKS, which are owned and worked by the North British Railway Company, are situated on the North Side of the Firth of Forth.

The first Dock, which was opened in 1887, has a water area of 4¾ acres and a depth of 23 feet. The second Dock, which was opened in 1897, has a water area of 6½ acres and a depth of 27 feet. The entrance gates to each of these Docks have a width of 50 feet. These Docks have four berths for the shipment of Coal, and also Hydraulic Cranes and other facilities for dealing with General Goods Traffic.

To provide for the great increase in the output of Coal from the Fifeshire Coalfields a new Dock has been constructed, which was opened on January 22, 1913. This Dock has a water area of 16¼ acres, with a depth of 32 feet at H.W.O.S.T., and the entrance gates are 80 feet wide. It is approached by a channel 120 feet wide and 1,800 feet long, running along the outside of the sea wall which enclosed the two old Docks. The Quay space of the new Dock is 6,000 lineal feet, and when the equipment is complete there will be nine Coal Hoists capable of lifting 35 tons to heights of from 45 to 55 feet. Anti-Breakage Appliances are fitted on all Hoists, and machines for weighing both full and empty wagons are provided at each Hoist.

The Docks are fully equipped with the most recent appliances for the quick and economical shipment of Coal.

The Docks have direct rail connection with the North British Railway, which is the largest Railway in Scotland, and is in direct communication with all parts of Scotland and England. The total length of sidings at the Docks, including those at Kirklands, is 32 miles.

For further particulars apply to Mr W. ANDREW, Chief Goods Manager, Glasgow, or to Mr J. STRACHAN, District Traffic Superintendent, Burntisland.

W. F. JACKSON, General Manager.

Burry Port and Gwendreath Valley Railway.

BURRY PORT DOCK

Most advantageously situated for the shipment of Anthracite and other Coal from the Gwendreath Valley.

GREAT WESTERN RAILWAY

PLYMOUTH DOCKS.

THE **Plymouth Great Western** Docks are **owned** by and are under the **management** of the **Great Western Railway Company**. The Docks cover the site of Mill Bay, close to the Plymouth (Millbay) terminus of the Great Western Railway. They occupy a central position in the amalgamated town of Plymouth, and are most conveniently situated for the distribution of goods.

The Docks consist of a **Floating Basin,** an **Outer Harbour,** and a **Graving Dock.**

The **Floating Basin** has a water area of 13 acres and a depth of water of 22 feet at spring tides. The entrance thereto is 80 feet wide, at which there are double gates and a swing bridge worked by hydraulic power.

The **Outer Harbour** has a water area of 35 acres. On its western side is a wharf 800 feet in length, with a depth of **24 feet** of water alongside at **low water** ordinary springs. On its eastern side are three stone piers and a floating pontoon with depths of water varying from 13 to 20 feet at low water ordinary springs.

The Docks are provided with hydraulic cranes and capstans, steam cranes, steam hoists, and other appliances for the expeditious discharge of cargoes, and also with a 25 ton hydraulic crane for lifting heavy weights, and the **Company's powerful tugs are always available for the towage of Vessels in or out.**

The **Great Western Railway Company** undertake the reception, storage, and delivery of all cargoes consigned to their care at moderate rates.

The Great Western Railway have powerful **twin-screw tenders** for the **landing** and **embarking** of **Ocean Mails, passengers, and bullion.**

The Company during the Summer Season also run Frequently Excursions by their Mail Tenders between Plymouth and the Eddystone Lighthouse and around the coast of Cornwall to Looe.

All inquiries on shipping and dock matters should be addressed to Mr. J. NICHOLAS, the Dock Superintendent, and on railway business to Mr. W. ROWED, the Divisional Superintendent, or to Mr. E. A. SCAIFE, the District Goods Manager at Plymouth.

FISHGUARD HARBOUR.

From **Fishguard Harbour,** opened within the last few years by the **Great Western Railway Company,** there are steamer services to and from Rosslare, Waterford and Cork, the vessels sailing between Fishguard and Rosslare being fast turbine boats, running twice daily.

In addition to the Irish services, Fishguard Harbour is now used as a port of call for the Atlantic Liners of the Cunard S.S. Company.

The following are only one or two particulars relating to the port :—

40 feet of water inside breakwater.

Accommodation alongside for Ocean Steamers.

Electric cranes up to 21 tons are available.

Coal, water and other necessaries can be obtained at short notice.

Fast and comfortable express and special trains connect Fishguard with London and other parts of the country.

Inquiries on harbour matters should be addressed to Captain HUMPHREYS, Marine Superintendent, Fishguard Harbour, and in regard to railway business to Mr. J. REES Divisional Superintendent, Swansea, or Mr. L. E. TRICKEY, District Goods Manager, Swansea.

FRANK POTTER,
General Manager.

Paddington Station, London, W.

BOMBAY PORT TRUST DOCKS

DRY DOCKS

HUGHES DRY DOCK.

Length 1,000 feet; width of entrance 100 feet. Depth of water on Block at entrance H.W.O.S.T., 35 feet 3 inches.

The inner portion of the Hughes Dry Dock is available for vessels requiring extensive repairs. Its length can be regulated by a caisson at 560·6 feet, 485·6 feet or 410·6 feet. The Dry Dock is entered from the Alexandra Dock.

MEREWETHER DRY DOCK.

Extreme length available, 557 feet 10 inches; width of Entrance, 65 feet 6 inches; depth of water on Block at entrance H.W.O.S.T., 26 feet 2 inches. The Dry Dock is entered from the Prince's and Victoria Docks.

RATES.

The charge for the first 24 hours will be according to a scale which varies with every 50 tons, the tonnage being the gross registered tonnage of the vessel, or when more than one are docked at the same time, the aggregate gross tonnage of the vessels. The minimum charge for a vessel is Rs. 400.

	RS.	A.	
For a vessel of 3,000 tons the charge is ...	937	8	
,, ,, 4,000 ,, ,, ,, ...	1,037	8	
,, ,, 5,000 ,, ,, ,, ...	1,137	8	
For every succeeding 6 hours or part thereof, up to 8 days	50	0	
For every succeeding 6 hours or part thereof, from the ninth day of occupation up to the twentieth day	75	0	
Thereafter a charge not exceeding	500	0	per day.

For docking or undocking on a Sunday or other general holiday an extra charge will be made.

The above charges include all expenses in connection with docking from the time the vessel reaches the Dry Dock entrance; all pumping, shoring and undocking, also the use of blocks, shores, stages, stage ropes and poles.

No commission or fee is levied on stores or materials brought into the Dock for cleaning, painting or repairing vessels.

The Trustees do not undertake the work of cleaning, painting and repairing vessels themselves, but they issue licences to approved persons to carry on such work in the Dock, and the large Engineering firms in Bombay are competent to execute almost any repairs that may be required to hull and machinery.

PREFACE

TO THE TWENTY-NINTH EDITION

THE Great War in Europe, so far from contracting our pages, has actually increased them, both directly and indirectly, and the new information contained in this TWENTY-NINTH EDITION of the "SHIPPING WORLD" YEAR BOOK gives little indication of the profound political and economic crisis through which the world is now passing. But it is impossible entirely to arrest the law-giving functions of nations or to change the great trade routes even by a devastating war. Consequently, in such days as these, the Republic of Colombia has evolved a new Tariff; we ourselves have found leisure and capacity to give legislative approval to the International Convention on Safety of Life at Sea; and our Board of Trade, busy as that Department of State is at present, has issued new Life-Saving Appliances Rules. All these important new features of 1914 will be found incorporated in this new Edition, as well as many other items of commercial and shipping interest. On the other hand, we have had, perforce, to leave untouched the Tariffs of enemy countries—Germany, Austria-Hungary and Turkey; although, in view of the fact that they are practically cut off from all direct participation in oversea trade, any modifications made in their Tariffs since the outbreak of War are, more or less, of an academic character. Similarly the information relating to their seaports is of relatively small commercial value at the present hour. Otherwise our facts and figures of the seaports and Tariffs of our Allies and of all neutral Powers have been thoroughly revised according to the latest information supplied to us.

The TARIFFS OF ALL NATIONS have demanded minute care in revision during the past twelve months. We have incorporated an entirely new Tariff of Colombia. All the Tariffs here published have been revised according to the latest official authorities received, and "declared values" have also been carefully checked.

THE COMPLETE PORT AND HARBOUR DIRECTORY OF THE BRITISH ISLES AND A DIRECTORY OF ALL THE COMMERCIAL PORTS OF THE WORLD, arranged in Alphabetical Order, giving the particulars gathered from official and other sources, of the Accommodation, Charges, Tides, Trades, Pilotage and Towage, has been revised up to the hour of printing. Many alterations and additions have been made in the list of foreign ports; and particulars of the British Ports have been revised up to the latest possible date.

Among the important new features contained in the GENERAL SECTION of this TWENTY-NINTH EDITION are:

The Tables of Freeboard, revised to date by the Board of Trade; the present position of European nations in respect of an International Load Line, and also of Life-Saving Regulations. The Convention of the International Conference on Safety of Life at Sea is now incorporated in this Edition, as well as the Act of Parliament which has given it legislative sanction in this country.

A Digest of the Merchant Shipping Acts from 1894 to 1914, with all Orders in Council and Board of Trade Regulations pertaining thereto. The most important of the new legislation affecting shipping, apart from the International Convention already mentioned, is the Pilotage Act. In view of its bearing on all port authorities in the United Kingdom, and on all ships, British and foreign, which enter and leave

General 16 April 1915 Stechert 2 Sep 1915 Continuation
302493

English, Scottish and Irish ports, we have given the measure *in extenso*. The recent readjustments of the *personnel* of the Admiralty and of the Board of Trade are here embraced. The latest changes in Mr. Asquith's Cabinet and in the Government will be found on page 4; but at the time of going to press two vacancies remain to be filled.

Other new and revised matters include a Complete List of the Post Office Radio-telegraphic Stations in the British Isles, cost of sending Radio-telegrams, and how to address them; New Tables of Foreign Money, Weights and Measures, with English Equivalents; Abstract of the Suez Canal Regulations, with a list of the principal shipowners and their tonnage that pay dues; a Complete List of the Submarine Bells round the coasts of the British Isles; British Mail Payments and Subsidies to the Cunard and Royal Mail Steam Packet Companies; Shipbuilding and Shipping Bounties and Subsidies in Foreign Countries, based on a Board of Trade Return, dated June, 1913; an enlarged and corrected Table of Tidal Constants; Examination Days and Fees for Masters and Mates; the new and modified Sight Tests—Examination Places and Times; Light Dues Reductions; a complete list of the Chambers of Commerce and Shipping of the United Kingdom with their secretaries; Useful Addresses; Foreign Trade statistics for 1914, embracing Tonnage, Imports and Exports, and Customs Duties; Tables giving the Approximate Numbers of the Fighting Ships at Sea, our own, our Allies, our enemies', with their armament; also a Table giving the Approximate Number and Type of the Fighting Aerial Fleets; details of the World's Mercantile Shipbuilding Output during 1914; and a list of the World's Fastest Merchant Ships now on Service. A copious Index makes all these items of information easily available.

The new Map for 1915 shows, in distinguishing colours, the Routes of Steamers and Railways throughout the world, with the East-bound and West-bound " Lanes " across the Atlantic, and the Ports, Coaling Stations, Coalfields, etc., of all Countries and Colonies. The inset maps show many of the great shipping centres and waterways of the world; and the British Empire is coloured red, so that it can be seen at a glance. An interesting and valuable new inset is that of the Panama Canal, showing the waterway and its ports from Colon to the Bay of Panama and the Pacific, as well as the Canal Zone.

We have again to make acknowledgment to the Foreign Office, the officers and publications of the Board of Trade, of Lloyd's, Lloyd's Register, the Bureau Veritas, and to many of our subscribers; to the various port authorities in the United Kingdom, the Oversea Dominions, and throughout the world, and especially to His Majesty's and the United States Consuls, for excellent and ungrudging service in supplying new facts and making the necessary corrections for this Edition of 1915.

SUGGESTIONS FROM SUBSCRIBERS AS TO FEATURES OR INFORMATION TO BE INCORPORATED IN THE " SHIPPING WORLD " YEAR BOOK OF 1916 WILL BE WELCOMED.

THE EDITOR.

Lord Advocate for Scotland	Mr. Robert Munro, K.C.
Solicitor-General for Scotland	Mr. T. B. Morison, K.C.
Attorney-General for Ireland	Mr. Jonathan Pim, K.C.
Solicitor-General for Ireland	Mr. James O'Connor, K.C.

POSTAL INFORMATION.

LETTER POST.—Letters to any part of the United Kingdom (the Channel Islands included), if not exceeding 4 oz., are charged 1d., and ½d. for every additional 2 oz. or fraction of 2 oz. An Inland letter must not exceed 24 in. in length, or 12 in. in width or depth, except it be sent to or from a Government Office. A letter addressed to a provincial post office to be called for is kept a month; if addressed to a person on board a ship expected to arrive there it is kept two months Unstamped or unpaid letters are charged double postage on delivery. Letters between the United Kingdom and her Colonies, Egypt, the United States of America, and places in Morocco where there are British Post Office Agencies, are charged 1d. per oz. Letters to all other Countries are 2½d. per first oz.; 1½d. per oz. afterwards. No letter for a Colony or Foreign Country may exceed 2ft. in length or 1ft. in width or depth. The Registration Fee for Inland and Foreign letters is 2d. The postage on letters addressed to or from H.M. ships abroad is 1d. per oz. Letters written on board British ships on the high seas may be sent prepaid by British stamps—1d. per oz.—to anywhere within the Imperial Postage system, and ordinary foreign rates to all other places. Coupons exchangeable for stamps of 25 centimes' value (2½d.) can be purchased for 3d. each for prepaying replies to letters from abroad. Certificates of posting of unregistered correspondence are issued at ½d. fee for each letter, etc.

BOOK AND NEWSPAPER POST.—A Book Packet may be sent to any part of the United Kingdom at a rate of ½d. for every 2 oz. or part of 2 oz.; a registered Newspaper, or Newspaper and Supplement ½d.; a private Card ½d. No book or newspaper packet may exceed 24in. in length or 12in. in width or depth. Newspapers, books, and printed papers may be sent to a Colony or Foreign Country, at a uniform rate of ½d. per 2 oz. Commercial papers sent abroad, 2½d. for the first 10 oz. and ½d. per 2 oz. thereafter. Advertising matter is subject to duties in some Colonies. British newspapers, magazines, and trade journals sent to Canada, 1d. per first 6 oz.; but packets not exceeding 2 oz. are transmissible for ½d.

PARCEL POST.—For an Inland Postal Parcel of a weight of—not exceeding 1lb. 3d., 2lb. 4d., 3lb. 5d., 5lb. 6d., 7lb. 7d., 8lb. 8d., 9lb. 9d., 10lb. 10d., 11lb. 11d., to be prepaid in ordinary postage stamps. Maximum length 3ft. 6in., maximum length and girth combined 6ft. No parcel may exceed 11lb. in weight. A cash on delivery service is now in operation between the United Kingdom and certain British Possessions and Egypt. (For rates of postage on parcels to Colonies and Foreign Countries see page 6).

PATTERN AND SAMPLE POST (ABROAD).—The Sample Post to Foreign Countries and the Colonies is restricted to *bona fide* trade patterns or samples of merchandise, and natural history specimens sent for no commercial purpose. Packets containing goods for sale, or articles from one private individual to another cannot be forwarded. A sample for a British Colony may weigh up to 5lb., but must not exceed 2ft. long by 1ft. in width or depth. For Foreign Countries these limits vary. The postage is 1d. for the first 4 oz., and ½d. per 2 oz. thereafter.

TELEGRAPHIC AND CABLE RATES.—Throughout United Kingdom 6d. for 12 words, including the address; ½d. for every additional word. Five figures are counted as one word. Messages to ships at sea by radio-telegraphy may be sent from any Telegraph Office for transmission from the P.O. stations at Caister, Crookhaven, Cullercoats, Fishguard, Land's End, Malin Head, Niton, North Foreland and Seaforth at 10½d a word, although lower rates of charge apply to vessels making short voyages. Long-distance radio-telegrams can be sent through the Marconi station at Poldhu at 2s. 6d. a word, plus the ship charge, which is usually 4d. a word. Radio-telegrams from ships are also received at the P.O. stations. Radio-telegrams intended for transmission to ocean liners through P.O. coast stations in the United Kingdom are accepted with simplified addresses, consisting of the name of the addressee and the name of the ship, with the addition of the word "wireless," thus: "Jones, Steamship *New York*, Wireless." The Post Office selects the most suitable coast station, and forwards the radio-telegram accordingly. The sender may still, however, if he chooses, insert the name of a coast station. The name of the appropriate coast station is still necessary in the address of radio-telegrams to packet steamers. Wireless communication was opened between Ireland and Canada, Oct. 17, 1907. Non-urgent plain language cables to the British Oversea Dominions and other extra-European places are sent at half-rates with delivery deferred not later than 24 hours in favour of full-rate telegrams; and week-end cable letters for the British Dominions and the United States at reduced rates may be handed in on Saturday for delivery on Monday or Tuesday. (For Cable Rates, see page 6.)

MONEY AND POSTAL ORDERS.—Sums up to £40 can be remitted by Money Order, such Orders to be presented for payment within 12 months. Postal Orders, payable within 3 months, are issued for every 6d. up to 20s., and for 21s. They are issued and payable at nearly all offices in the United Kingdom, and at most of the principal shipping centres abroad

TELEGRAPH MONEY ORDERS.—Money can be wired between all post offices in the United Kingdom authorised to transact Telegraph and Money Order business, in sums not exceeding £40, on payment of cost of Telegram (minimum 6d.), a supplementary fee of 2d. for each Order, and the following commission:—For sums not exceeding £1, 2d.; not exceeding £3, 3d.; £10, 4d.; £20, 6d.; £30, 8d.; £40, 10d. Telegraph Money Orders are exchanged with certain Foreign Countries at the rate of Foreign Money Orders, cost of Telegram, and a supplementary fee of 6d. for each Order.

FOREIGN MAILS, PARCEL POST, AND CABLEGRAMS.

In consequence of the War certain of these services have been modified or suspended.

COUNTRIES.	Letters per 1st oz	Post Cards.	Parcel Post. Min. charge given.	Cablegrams Per Word.	Days when mails are made up.

DEFINITION OF ASTRONOMICAL TERMS.

Aberration.—An apparent change of place in the fixed stars, which arises from the motion of the earth combined with the motion of light.

Altitudes.—The Altitude of an object is that portion of a vertical circle which is intercepted between the centre of the celestial object and the horizon.

Aphelion.—That point in the orbit of a planet in which it is at its greatest distance from the sun.

Apogee.—That point in the orbit of the moon or a planet in which it is at its greatest distance from the earth.

Azimuths.—The Azimuth of an object is its true bearing, east or west, of its nearest meridian. It is always equal to that portion of the horizon which is intercepted between the vertical circle passing through the centre of the object and the meridian of the place of observation.

Declination of a Celestial Object.—The Declination of any celestial object is its distance north or south from the equinoctial, and is measured by that portion of the celestial meridian which is intercepted between the centre of the object and the equinoctial.

Disk of the Sun or Moon.—Its round face, which, on account of the great distance of the object, appears flat as like a plane surface.

Diurnal.—Diurnal motions of the planets are the spaces they move through in a day.

Elongation.—The angular distance of a planet from the sun as it appears to us upon the earth.

Emersion.—The time when any planet which is eclipsed begins to recover its light again.

Horizon.—The visible horizon is that which is seen while the eye is elevated above the surface ; and the sensible is that which is seen when the eye is on a level with the water. The depression of the former below the latter is called the dip of the visible horizon.

Immersion.—The moment when an eclipse begins, or when a planet enters into a dark shadow.

Libration.—An apparent irregularity of the moon's motion, which makes her appear to librate about her axis in such a manner that parts of her eastern and western limbs become visible and invisible alternately.

Parallax.—Parallax is the difference between an altitude taken at the surface of the earth, and that taken at the centre at the same time. When the object is on the horizon, it is called the horizontal parallax ; but in any other case it is called the parallax in altitude.

Penumbra.—A faint shadow which accompanies an eclipse and occasions a partial obscurity of the body to that part of the earth on which it falls.

Perigee.—That point of the moon or a planet's orbit in which it is at its least distance from the earth.

Perihelion.—That point of a planet's orbit in which it is at its least distance from the sun.

Phases.—The several appearances of the moon and planets, according as a greater or less part of their illuminated hemispheres are presented to our sight.

Prime Vertical Circle.—The Prime Vertical Circle is the circle which passes from the zenith due east or west, having 90 degrees of the horizon intercepted between it and the meridian. All objects on this circle are said to be on the prime vertical.

Polar Distance.—Of any celestial object is an arc of a meridian contained between the centre of that object and the pole of the equinoctial; or, in other words, it is the distance of the object from the elevated pole.

Refraction.—Refraction is a quantity by which a body appears above its true place in the heavens.

Right Ascension.—The Right Ascension of a celestial body is that portion of the equinoctial which is intercepted by a celestial meridian passing through the centre of the body and the first point of the ecliptic. It is generally given in time.

Right Ascension of the Meridian.—The Right Ascension of the Meridian is that part of the equinoctial that comes to the Meridian with the object measured from the first point of Aries.

Terrestrial and Celestial Equators.—The Terrestrial Equator is a great circle (supposed to be described) around the earth, at an equal distance, or 90 degrees from the poles, dividing the globe into two equal parts; the part to the southward of the equator being called the southern hemisphere, and that to the northward the northren hemisphere. The Celestial Equator, commonly called the Equinoctial, is an imaginary circle described in the heavens, corresponding to and coinciding with the terrestrial equator.

Time.—Time is measured by the apparent motion of a celestial body over the surface of the globe, and is called Solar, Lunar, or Sidereal, according to the body with which it is referred; a full revolution of either of these objects is called its apparent day, and begins when the object comes to the meridian; but for the convenience of civil and commercial business, that of the sun, called solar or civil time, is from midnight to midnight, the first 12 hours of which are marked A. M., signifying ante meridian, and the last 12 hours P. M., signifying post meridian. In this and the following mode of keeping time, the day is dated as soon as it commences.

(*a*) *Astronomical Day.*—This day is also measured by the apparent motion of the sun, but for the convenience of astronomical computations, it is taken to begin at noon, that is, 12 hours after the beginning of the civil day, and end at noon of the following day. Astronomers generally reckon the hours of this day up to 24 hours, without any distinction of ante or post meridian, which they call astronomical time; hence the first 12 hours of which are the P. M. hours of the civil day on which it begins, and the last 12 hours of it are the A. M. hours of the day on which it ends.

(*b*) *The Nautical Day.*—This day, as well as the civil and astronomica day, is measured by the apparent motion of the sun. It begins just with the astronomical day, but it is dated with the noon on which it ends; hence it is 24 hours in date later than the astronomical day, the first 12 hours of which are marked in the journal with P. M., and the last 12 hours with A. M., so that occurrences which happen on the

afternoon of the civil day on which it begins, come in the journal under the date of the civil day in which it ends. The Log Book is generally kept in Nautical or Sea Time, but it may be kept in Common or Civil Time.

Tropics.—The Tropics are two circles (supposed to be described) parallel to the equator, at the distance of about 23° 28′, equal to the highest declination. The northernmost is called the Tropic of Cancer and the other the Tropic of Capricorn.

Twilight.—The Twilight is that duration of light which is apparent in the absence of the sun. It generally continues whilst he is traversing about 18 degrees below the horizon. It is caused by the column of atmosphere which surrounds the earth receiving the rays, or light, of the sun, and from which that light is transmitted to those parts of the surface of the globe opposite the sun at its rising and setting.

Vertical Circles.—Vertical Circles are circles (supposed to be described in the heavens) perpendicular to the horizon, and meeting at the Zenith. They are sometimes called circles of altitudes, circles of azimuths, and prime vertical circles.

Zenith and Nadir.—The Zenith is that point in the heavens which is directly over the observer's head; and the Nadir that which is opposite to it.

Zenith Distance.—The Zenith Distance of a celestial object is equal to that portion of the vertical circle which is intercepted between the centre of the object and the observer's zenith. It is always equal to the complement of the altitude to a quadrant, or 90 degrees.

EXPLANATION OF COMPASS TERMS.

Variation of the Compass is the angle between the True North and the Magnetic North. This difference or error arises from the Magnetic Poles not coinciding with the Terrestrial ones, and is due entirely to the influence of the earth on Magnetic Needles, which is the same at few parts of the world.

Deviation of the Compass is the angle included between the Magnetic North and the Compass North. This error is due to the disturbing influences of the iron of which the ship is built, as rudder-posts, masts, chains, funnel, etc.; her position when building, her cargo, or other causes *within* the ship.

Local Attraction is the error caused by some disturbing force *outside* the ship, and belonging entirely to the locality at which a ship may be —as mooring posts or chains, dock cranes, another iron vessel alongside, volcanic or magnetic influences, etc.

Heeling Error is the effect produced on the Compass by the heeling of an iron or composite ship, the angle increasing with the amount of Heel.

Leeway is the angle between the ship's course by Compass and the direction which she makes through the water, as shown by her wake.

Compass Course is the course steered by ship's Compass.

Magnetic Course is the Compass Course corrected for Deviation and Leeway.

The True Course of a Ship is the Compass Course corrected for Deviation, Leeway, and Variation.

AIR.

In its pure state is composed as follows:—

	By Weight.	By Volume.
Nitrogen	77 per cent.	79·19
Oxygen	23 do.	20·81
	100	100·00

1 cubic foot at 62° weighs 533 grains=1·217 oz.

The percentage of oxygen varies as follows:—

Sea-shore	21 per cent.
Mines	20·50 do.
Confined Houses	20·75 do.

Air travels in England in healthy years at the rate of about 4¼ miles per hour, and in unhealthy years about 3¼ miles per hour. Each adult inhales a gallon of air per minute, and consumes daily 30 oz. of oxygen. For the conversion of this oxygen a certain amount of food is required—say 13 oz. of carbon for a male and 11 oz. for a female—equivalent to 3lb. and 2½lb. of bread respectively.

SPECIFIC GRAVITY OF DIFFERENT SUBSTANCES.

COMPARED WITH WATER.

Liquids, &c.		Timber.		Metals.	
Water	100	Cork	24	Aluminium	256
Sea Water	103	Poplar	38	Zinc	719
Alcohol	84	Fir	55	Cast-iron	721
Olive Oil	92	Cedar	61	Tin	729
Turpentine	99	Walnut	67	Bar Iron	779
Petroleum	87	Cherry	72	Steel	786
Wine	100	Teak	74	Brass	840
Cider	102	Maple	75	Copper	869
Beer	102	Ash	84	Silver, Pure	1,047
Porter	104	Beech	85	Lead	1,135
Gravel or Sand, abt.	265	Mahogany	106	Mercury	1,357
Granite	272	Oak	117	Gold, Pure	1,841
		Ebony	133	Platina	1,950

A gallon of wine or fresh water weighs 10lb.

"THE BEAUFORT SCALE." THE FORCE OF THE WIND.

[Invented by Admiral Beaufort, 1805. Admiral Sir Francis Beaufort, K.C.B., F.R.S., was Hydrographer of the Navy from 1829 to 1855.]

Figures to denote the Force of the Wind.	Description of Wind.	POWER OF THE WIND, as regards a well-conditioned Man-of-War or First-class Clipper Ship.	Rate of the Wind per Hour in Miles.
0	Calm		0 to 2
1	Light Air	Just sufficient to give steerage way	3 — 10
2	Light Breeze	With which the above Ship (1 to 2 knots	11 — 15
3	Gentle Breeze	with all sail set and clean (3 to 4 „	16 — 20
4	Moderate Breeze	full would go in smooth water (5 to 6 „	21 — 25
5	Fresh Breeze	In which she could just carry close hauled: Royals, &c.	26 — 30
6	Strong Breeze	In which she could just carry close hauled: Single Reefs and T.G. Sails	31 — 36
7	Moderate Gale	In which she could just carry close hauled: Double Reefs and Jib, &c.	37 — 44
8	Fresh Gale	In which she could just carry close hauled: Triple Reefs, &c.	45 — 52
9	Strong Gale	In which she could just carry close hauled: Close Reefs & Courses	53 — 60
10	Whole Gale	In which she could just bear close-reefed Main Topsail and reefed Foresail	61 — 69
11	Storm	Under Storm Staysails	70 — 80
12	Hurricane	Bare Poles	above 80

"THE BEAUFORT SCALE": FORMULÆ FOR RECORDING STATE OF THE WEATHER.

B denotes Blue Sky, *i.e.*, clear or hazy atmosphere.
C ,, Cloudy—detached opening clouds.
D ,, Drizzling Rain.
F ,, Fog—FF Thick Fog.
G ,, Gloomy Dark weather.
H ,, Hail.
L ,, Lightning.
M ,, Misty or Hazy—so as to interrupt the view.
O ,, Overcast—*i.e.*, the whole sky covered with an impervious cloud.
P ,, Passing Showers.
Q ,, Squally.
R ,, Rain—continuous rain.
S ,, Snow.
T ,, Thunder.
U denotes Ugly, threatening appearance of the weather.
V ,, Visibility of distant objects.
W ,, Wet dew.
. Dot under any letter, an extraordinary degree.

By the combination of these letters all the ordinary phenomena of the weather may be recorded with certainty and brevity; *e.g.*,
BCM—Blue sky, with detached opening clouds, but hazy round the horizon.
GV—Gloomy dark weather, but distant objects *remarkably* visible.

USE OF INSTRUMENTS IN FORETELLING WEATHER.

On Barometer Scales the following contractions may be useful in North Latitude:—

RISE	FALL
FOR	FOR
N. Ely.	S. Wly.
N.W.—N.—E.	S.E.—S.—W.
Dry or Less	Wet or More
Wind.	Wind.
Except Wet	Except Wet
from	from
N.ward E.	N.Eward.

And the following summary may be useful *generally*:—

RISE	FALL
FOR	FOR
Cold, Dry,	Warm, Wet,
or	or
Less	More
Wind.	Wind.
Except Wet	Except Wet
from	from
Cold Side.	Cold Side.

In other Latitudes substitute South or Southward for North, &c.

Much inequality of atmospheric pressure or temperature, great depression or elevation of the barometer, sudden or rapid alternations, great falls of rain or snow, indicate more or less change, more or less wind, with its usual accompaniments, either in some places only, or throughout an extensive area of hundreds of miles, if not thousands.

Speaking *generally*, there is far less occasion to give warning of *southerly* storms by signal than of northerly, because those from the southward are preceded by notable signs in the atmosphere, by a falling barometer, and by a temperature higher than usual to the season; whereas, on the contrary, dangerous storms from a polar quarter (N.W. to N.E.) are sometimes sudden, and usually are preceded by a *rising* barometer, which is often misleading, especially when accompanied by a temporary lull, of perhaps a day or two, with an appearance of fine weather.

THERMOMETER.

There are four thermometer scales, Fahrenheit, Réaumur, Centigrade, and Celsius, the two latter being synonymous.

To convert one scale into either of the others:

Let F = Fahrenheit, R = Réaumur, and C = Centigrade or Celsius.

Then $F = R \times 2{\cdot}25 + 32$, or $F = C \times 1{\cdot}8 + 32$.

Then $C = \frac{F - 32}{1{\cdot}8}$ or $C = \frac{R \times 10}{8}$

Then $R = \frac{F - 32}{2{\cdot}25}$ or $R = \frac{C \times 8}{10}$

ENGINEERING FORMULÆ.

WEIGHTS OF METALS.

1 square foot of wrought iron $\frac{1}{4}$ inch thick = 5 lbs.
1 foot length " " " 1 " square = 3·333 lbs.
1 " " " " " 1 " diameter 2·62 lbs.

Weight in wrought iron	×	·348	=	weight in aluminium.
" " " "	×	·935	=	" " zinc (zn).
" " " "	×	·9375	=	" " cast iron.
" " " "	×	·962	=	" " tin.
" " " "	×	1·0208	=	" " steel.
" " " "	×	1·062	=	" " muntz metal.
" " " "	×	1·106	=	" " gun metal.
" " " "	×	1·1052	=	" " brass (2, cu. 1, zn.)
" " " "	×	1·1117	=	" " brass (7, cu. 3, zn.)
" " " "	×	1·155	=	" " copper (cu.)
" " " "	×	1·483	=	" " lead.
" " " "	×	·962	=	" " tin.

Thus a square foot of aluminium $\frac{1}{4}$in. thick would weigh 5 × ·348 = 1·74 lbs.

USEFUL CONSTANTS AND CO-EFFICIENTS.

Grains in one gramme =	15·432	1·1883	·06479
Lbs. (avoir.) in one kilogramme =	2·2046	·3433	·45359
Lbs. in one cubit foot of water =	62 452	1·7953	·016
Force de cheval in one horse power =	1·013	·0058	·986337
Foot lbs. in one horse power =	33,000	4·5185	·0000303
British heat limits in one calorie =	3·968	·5986	·252
Degrees Fah. in one degree Centigrade =	1·8	·2553	·5555
Feet per second in one mile per hour =	1·4666	·1664	·6811
Metres per second in one kilometre per hour =	2·7777	·4437	·360009
Value of g. at Greenwich in inch seconds =	386·29	2·5869	—
Length of seconds pendulum at Greenwich, in ins. =	39·139	1·5926	—

The reciprocal gives the converse of the number; thus there are 2·54 centimetres in one inch, or ·393708 inch in one centimetre.

WEIGHT OF WATER.

	Fresh.	Salt.
1 cubic inch, at 62° Fah.	252·6 grs.	259 grs.
1 cubic foot, „ „	62·35 lbs.	64·11 lbs.
1 gallon, „ „	10 lbs.	10.27 lbs.
1 ton contains	35·94 cub. ft.	35 cub. ft.
1 „ „	224 gallons	218¾ gallons.

224 gallons = 20 cwts. = 36 cubic feet. Fresh water.
218¾ „ = „ „ = 35 „ „ Salt „
A column of water 12in. high, 1in. square = ·434 lbs. pressure per sq. in.
A similar column 1in. diameter = ·341lbs. pressure per sq. in.
A pipe 3 feet long holds as many lbs. of water at 62° Fah., as the square of its diameter in inches+2 per cent.

IMMERSION IN SALT AND FRESH WATER.

To find the difference of immersion or draught in salt and fresh water. If from salt to fresh, multiply the draught of salt water by 36, and divide the product by 35. If from fresh to salt, multiply the draught of fresh water by 35 and divide the product by 36.

Example:—Required the draught of a vessel in fresh water when drawing 20ft. in salt water: 20ft. × 36 = 720 ÷ 35ft. = 20.5⅞ins.

Table of draughts worked out by the above formula:—

Fresh to Salt.		Salt to Fresh.	
Water Mark in Fresh.	Would Draw in Salt.	Water Mark in Salt.	Would Draw in Fresh.
ft.	ft. in.	ft.	ft. in.
24	23 4	24	24 8¼
22	21 4⅝	22	22 7½
20	19 5⅝	20	20 6¾

LIGHTHOUSES.

To find the height at which a Light should be put above the sea level to show a given number of miles:—

Multiply the number of miles by itself, and by 4, and divide the product by 7. Thus, a lamp required to show ten miles—

$$10 \times 10 = 100 \times 4 = 400$$

$$7)\overline{\quad\quad}$$

$$57\tfrac{1}{7} \text{ feet.}$$

The Light should be $57\frac{1}{7}$ feet above the sea level.

TABLES OF FREEBOARD.

[As Revised by the Board of Trade, 1906, 1907, and 1909].

RULES AND INSTRUCTIONS FOR APPLYING THE TABLES OF FREEBOARD TO THE VARIOUS TYPES OF STEAM AND SAILING VESSELS.

In the following tables the word Freeboard denotes the height of the side of a ship above the waterline at the middle of her length, measured from the top of the deck at the side, or, in cases where a waterway is fitted, from the curved line of the top of the deck continued through to the side. The freeboards and the corresponding percentage of reserve buoyancy necessary for flush-deck steamers not having spar or awning decks, and for flush-deck sailing vessels, are given in Tables A and D for vessels of these classes and of various dimensions and proportions. The freeboards necessary for spar and awning-deck steamers are given in Tables B and C. The latter are determined by considerations of structural strength, and they denote the limitations to depth of loading which are thereby imposed upon first-class vessels of these types. The freeboards and percentages of reserve buoyancy thus obtained being in excess of what would otherwise be required, the amounts of such percentages are not given in Tables B and C.

The exact freeboard required for a given ship of standard proportions belonging to either of the classes comprised in Tables A and D may be calculated by constructing a displacement scale to the height of the deck to which the freeboard is measured, so as to give the whole external volume up to the upper surface of that deck. The percentage of the total volume which is given in the table as the reserve buoyancy for a vessel of given type and dimensions will be the amount of volume that must be left out of the water. If a water-line be drawn upon the displacement scale aforesaid to cut off the given percentage of total volume, the height of the side above this line will be the freeboard required.

In order to simplify and reduce the work that would be involved by the above mode of determining the water-line and the consequent freeboard, that correspond to a given percentage of reserve buoyancy, an approximate method is adopted in the following tables, which enables the freeboard of a vessel to be calculated with a sufficient degree of accuracy for all ordinary working purposes. The use of this method not only saves the time and labour that would be involved by making a complete displacement scale for the whole external volume of a ship, but, what is much more important, it makes the tables easily and directly applicable in cases where such a displacement scale for a vessel is not at hand, or where the data requisite for constructing one are not procurable.

In this approximate method the form of the ship is taken into account by means of proportionate quantities, which are termed coefficients of fineness, instead of by the exact volumes that a displacement scale would give. It is found that the whole internal volume of a ship as measured for register tonnage divided by the product of the length, breadth, and depth, measured as described in the following clauses 1, 2, and 3, gives a fractional quantity or coefficient which

bears a nearly constant relation to the quantity that would be obtained by dividing the whole external volume below the upper surface of the deck by the product of the length, breadth, and depth. This fractional quantity is called the "coefficient of fineness" for freeboard purposes; and it serves the same practical object, when combined with the dimensions of the ship in the manner explained in the tables, as the volume itself would do.

In applying such an approximate method as the above, it is necessary to connect the coefficients of fineness given in the tables with a standard sheer and round of beam. The standard scales for sheer and round of beam that have been adapted for this purpose are given in clauses 18 and 19 hereafter. Descriptions are also there given of the corrections that should be made for deviations from these standard amounts.

The freeboards given in the tables are for flush-deck vessels in all cases. Such reductions in freeboard as may be allowed for deck erections of various kinds, and sizes in steamers not having spar or awning decks, and in sailing vessels, are described in paragraphs 11, 12, 13, 14, 15, 16, and 17.

No reduction of freeboard should be allowed on account of deck erection in spar-deck and awning-deck steamers except in spar deck vessels in which an allowance may be made for a long bridge-house. (See page 30).

Tables A and D give the minimum freeboards for first-class iron and steel vessels the strength of which is at least equal to the requirements of the 100A class in Lloyd's Register for three-deck and smaller vessels. The freeboard of all other iron and steel vessels, classed or unclassed, should be regulated by the same standard; the increase of freeboard required in each case being determined by the limit at which the stress per square inch upon the material of the hull amidships shall not exceed that of the standard class, of the same proportions, form, and moulded depth, when loaded to the freeboards required by Tables A and D. Tables B and C give the freeboards for vessels built in accordance with, or equal to the requirements of Lloyd's Register for the spar and awning-deck classes; and are subject to the conditions just stated for any modifications of strength in excess or diminution of the requirements of their respective classes.

1. *Length.*—The length of the vessel is measured on the load-line from the fore side of the stem to the aft side of the stern post in sailing vessels, and to the aft side of the after post in steamers.

2. *Breadth.*—The breadth used in obtaining the coefficient of fineness is the extreme breadth measured to the outside of plank or plating as given on the certificate of the ship's registry.

3. *Depth of Hull.*—The depth used in obtaining the coefficient of fineness is the depth of the hold as given on the certificate of the ship's registry. This dimension is subject to modification in determining the coefficient of fineness as explained in clause 4.

4. *Coefficient of Fineness.*—The coefficient of fineness in one, two, and three-deck and spar-deck vessels is found by dividing 100 times the gross registered tonnage of the vessel below the upper deck by the product of the length, breadth, and depth of hold. In awning-deck vessels the registered depth and tonnage are taken below the main deck.

(*a*) It is of importance in the application of the rules and tables of freeboard that the coefficient of fineness deduced from the under-deck tonnage, and the principal dimensions should be a correct index to the vessel's relative fulness of form, and that a change in any of those elements which affect the coefficient, determined in accordance with the rule set forth should be considered, and the necessary correction, having regard to the special circumstances of the case, introduced. Among the cases that have from time to time come under notice are the following:

(*b*) *Vessels having a cellular bottom throughout, or floors of greater depth than those usually fitted.*—In such a case the coefficient as determined from the under-deck tonnage is in most instances slightly greater than it would be if the vessel were framed on the ordinary transverse system with floors of the usual depth. No general rule can be given for guidance, but it is not difficult, if the depth and slope of the top of the cellular bottom or floor be compared on the midship section with the depth and slope of an ordinary floor, to determine very closely the amount of the correction necessary.

(*c*) *Vessels constructed with floors of the ordinary kind, but with a cellular bottom for a part of the length amidships under the engines and boilers.*—In such a case the registered under-deck tonnage is smaller than it would be if the vessel were framed with the ordinary floors throughout, the difference being the tonnage of the space between the top of the cellular bottom in the part amidships, and the level of the ordinary floors. The depth of hold is also measured by the Customs officials to the top of the cellular bottom, and this depth is inserted in the register. Under such circumstances, in order to arrive at the coefficient of fineness the vessel would have, if built on the ordinary system throughout, and for which the tables are framed, the tonnage of the volume between the top of the cellular bottom and the level of the ordinary floor should be calculated and added to the registered under-deck tonnage. The tonnage so corrected, used in conjunction with the depth of hold to the top of the ordinary floor, gives the coefficient to be used in the tables.

(*d*) *Vessels constructed with a cellular bottom throughout the fore and after holds but with floors of the ordinary kind fitted for a part of the length amidships under the engines and boilers.*—In such a case the tonnage of the space between the top of the ordinary floors in the part amidships and the top of the cellular bottom, if made continuous, should be estimated and deducted from the registered under deck tonnage, and the remainder employed in conjunction with the depth of hold to the top of the cellular bottom in determining the coefficient of fineness.

(*e*) Other cases may in practice arise in which the registered under-deck tonnage or the registered depth of hold or registered breadth, require modification before being used in the determination of the coefficient of fineness, but little difficulty will be experienced in making the necessary correction, if it be remembered that the coefficient sought is the coefficient the vessel would have if framed on the ordinary transverse system.

5. *Moulded Depth.*—The moulded depth of an iron or steel vessel, as given in the tables, is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the

vessel, to the top of the keel and the bottom of the frame at the middle line, except in spar and awning-deck vessels, in which the depth is measured from the top of the *main* deck beam. In wooden and composite vessels the moulded depth is taken to be the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet at the keel.

(*a*) The form at the lower part of the midship transverse section of many wooden and composite vessels being of a hollow character, as in cases where thick garboard strakes are fitted, the moulded depth in such instances should be measured from the point where the line of the flat of the bottom continued cuts the keel.

6. *Freeboard.*—The moulded depth, taken as above described, is that used in the tables for ascertaining the amount of reserve buoyancy and corresponding freeboard in vessels having a wood deck, and the freeboard is measured from the top of the wood deck at side, at the middle of the length of the vessel.

(*a*) On the same principle, in *flush-deck* vessels, other than spar or awning-decked, and in vessels fitted with short poop and forecastle, having an iron upper deck, not covered with wood, the usual thickness of a wood deck should be deducted from the moulded depth of the vessel measured as above, and the amount of reserve buoyancy and corresponding freeboard taken from the column in the tables corresponding with this diminished moulded depth. *Example.*—In a steamer fitted with an iron upper deck not covered with wood, and having a moulded depth of 19ft. 10in., 4 inches, or the usual thickness of a wood deck, must be deducted from this, leaving a depth of 19ft. 6in. The freeboard of such a vessel with a coefficient of fineness of 0.76, taken from the column under 19ft. 6in., is 3ft. 8½in., which should be measured from the top of the iron upper deck.

(*b*) In spar-deck vessels having iron spar decks, and in awning-deck vessels having iron main decks, the freeboard required by the tables should be measured as if those decks were wood covered. Also in vessels where 7-10ths. or more, of the main deck is covered by substantial erections, the freeboard found from the tables should be measured amidships from a wood deck, whether the deck be of wood or iron. In applying this principle to vessels having shorter lengths of substantial enclosed erections the reductions in freeboard in consideration of its being measured from the iron deck, is to be regulated in proportion to the length of the deck covered by such erections. Thus, in a vessel, having erections covering 6-10ths of the length, the reduction is 6-10ths of 3½ inches, or 2 inches.

7. For vessels which trim very much by the stern, through the engines being fitted aft, the freeboard, as ascertained from the tables, if set off amidships would not cut off the amount of surplus buoyancy deemed necessary, and in such cases the suitable freeboard amidships could only be determined after full information is obtained regarding the vessel's trim.

8. The following example will illustrate the *general* application of the tables:

In a steamer of the following dimensions, viz., length, 204 ft.; breadth, extreme, 29ft.; depth of hold, 16ft; registered tonnage under deck, 682 tons; and *moulded* depth, 17ft.; the under deck capacity in cubic feet is 68,200; by dividing this by 94,656, that is, the product of

the length, breadth, and depth of hold, the quotient is 0.72, or the coefficient of fineness.

If we now refer to Table A at 17.0ft. moulded depth, and trace the line opposite the coefficient 0.72 to the column corresponding with this depth, it is found that the winter freeboard given for a *first-class steam vessel without erections*, whose length is twelve times the moulded depth, is 2ft. 11in., corresponding with a reserve buoyancy of 25 per cent. of the total bulk.

9. *Vessels of Extreme Proportions.*—For vessels whose length is greater or less than that of the vessel of the same moulded depth for which the tables are framed, the freeboard should be increased or diminished as specified in the footnote to the tables. Thus, if the vessel in the example, clause 8, were 224ft. long, the winter freeboard required would be 2ft. 11in. plus 2in., or 3ft. 1in. For steam vessels coming under paragraphs 11 and 12 with enclosed erections extending over 6-10ths, or more, of the length of the vessel, the correction for length should be one-half that specified in Table A.

10. *Breadth and Depth.*—In framing the tables it has been assumed that the relation between the breadth and depth is such as to ensure safety at sea with the freeboard assigned when the vessel is laden with homogeneous cargo; for vessels of less relative breadth, the freeboard should be so increased as to provide a sufficient range of stability, or other means adopted to secure the same.

11. *Erections on Deck.*—For steam vessels with top-gallant forecastles having long poops, or raised quarter-decks connected with bridge-houses, covering in the engine and boiler openings, the latter being entered from the top, and having an efficiently constructed iron bulkhead at the fore end, a deduction may be made from the freeboard given in the tables, according to the following scale:

(*a*) When the combined length of the poop, or raised quarter-deck, bridge-house, and top-gallant forecastle is—

95-100ths of the length of the vessel, deduct 90 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

9-10ths of the length of the vessel, deduct 85 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

85-100ths of the length of the vessel, deduct 80 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

8-10ths of the length of the vessel, deduct 70 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

7-10ths of the length of the vessel, deduct 55 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

6-10ths of the length of the vessel, deduct 40 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

When the engine and boiler openings are protected only by a long raised quarter-deck, a less reduction in freeboard will be allowed.

(*b*) For intermediate lengths of erections the amount of the reduction in freeboard should be ascertained by interpolation.

(*c*) The above scale of allowance is prepared for vessels having

long poops or raised quarterdecks 3ft. high at a length of 100ft., 4ft. high at a length of 250ft., and 6ft. high at a length of 400ft. and upwards. Intermediate lengths in proportion. For raised quarter-decks of less height the length allowed is to be in proportion to the standard of height.

(*d*) It is to be understood in the application of this scale of allowance for erections on deck to vessels with long poops or with raised quarter-decks, and bridge-houses combined, that the deduction is a maximum deduction, applicable only to vessels of these types in which the erections are of a most substantial character, the deck openings most effectually protected, and the crew are either berthed in the bridge-house, or the arrangements to enable them to get backwards and forwards from their quarters are of a satisfactory character. For other vessels of the same class the amount of the deduction should be fixed only after a careful survey. Also such vessels when employed in the Atlantic trade will require to have specially provided greater freeboard than that given in the tables

(*e*) A sufficient number of clearing ports as large as practicable, and with shutters properly hung, should be formed in the bulwarks of these vessels, between the forecastle and the bridge-house, for the purpose of speedily cleaning this part of the deck of water.

12. When the erections on a vessel consist of a top-gallant forecastle, a short poop having an efficient bulkhead, and bridge-house disconnected, the latter in steamers covering the engine and boiler openings, and being efficiently enclosed with an iron bulkhead at each end, a deduction may be made from the freeboard given in the tables according to the following scale:

(*a*) When the combined length of the erections is—

95-100ths of the length of the vessel, deduct 75 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

90-100ths of the length of the vessel, deduct 70 per cent. of the difference between freeboards in Tables A (after correction for sheer) and Tables C.

80-100ths of the length of the vessel, deduct 60 per cent. of the difference between the freeboards in Tables A (after correction for sheer) and Tables C.

70-100ths of the length of the vessel, deduct 50 per cent. of the difference between the freeboards in Tables A (after correction for sheer) and Tables C.

60-100ths of the length of the vessel, deduct 40 per cent. of the difference between the freeboards in Table A (after correction for sheer) and Tables C.

50-100ths of the length of the vessel, deduct 32 per cent. of the difference between the freeboards in Tables A (after correction for sheer and length) and Tables C (after correction for length).

40-100ths of the length of the vessel, deduct 25 per cent. of the difference between the freeboards in Tables A (after correction for sheer and length) and Tables C (after correction for length).

13. When the erections on a vessel consist of a top-gallant forecastle and bridge-house only, the latter in steamers covering the engine and boiler openings, and being efficiently enclosed with an iron bulkhead at each end, a deduction may be made from the freeboard given in the tables according to the following scale:

(*a*) When the combined length of the erections is—

5-10ths of the length of the vessel, deduct 30 per cent. of the difference between the freeboards in Tables A (after correction for sheer and length) and Tables C (after correction for length).

4-10ths of the length of the vessel, deduct 24 per cent. of the difference between the freeboards in Tables A (after correction for sheer and length) and Tables C (after correction for length).

3-10ths of the length of the vessel, deduct 19 per cent of the. difference between the freeboards in Tables A (after correction for sheer and length) and Tables C (after correction for length).

14. When the erections on a steam vessel consist of a short poop or raised quarter-deck of a height not less than that laid down in paragraph 11, and top-gallant forecastle only, the former enclosed at the fore-end with an efficient bulkhead, and when the engine and boiler openings are entirely covered either by the poop or raised quarter-deck or by a strong iron or steel deck-house enclosing the machinery casings, a deduction may be made from the freeboard given in the tables according to the following scale:

(*a*) When the combined length of the erections is—

4-8ths of the length of the vessel, deduct 32 per cent. of the difference between the freeboards in Tables A (after correction for length) and Tables C (after correction for length).

3-8ths of the length of the vessel, deduct 24 per cent. of the difference between the freeboards in Tables A (after correction for length) and Tables C (after correction for length).

2-8ths of the length of the vessel, deduct 16 per cent. of the difference between the freeboards in Tables A (after correction for length) and Tables C (after correction for length).

1-8th of the length of the vessel, deduct 8 per cent. of the difference between the freeboards in Tables A (after correction for length) and Tables C (after correction for length).

For erections that cover less than 1-8th of the length of the vessel, the allowance should be in proportion to that for 1-8th covered. When, however, the engine and boiler openings are not entirely covered by the poop or quarter-deck or by a strong iron or steel deck-house, the allowance for erections should be 6-10ths of that provided by the foregoing scale

15. When a steam vessel is fitted with a top-gallant forecastle only, the reduction of freeboard is to be in accordance with the preceding paragraph for a poop not covering the engine and boiler openings and a forecastle of the same combined length. When there is a short poop only, or a raised quarter-deck of a height not less than that laid down in para. 11, enclosed at the forward end with an efficient bulkhead and covering the engine and boiler openings, the deduction from the freeboard is to be half the allowance that is given for a poop or quarter-deck of the same character and a forecastle having the same combined length. When the poop or raised quarter-deck does not cover the engine and boiler openings 6-10ths of the foregoing allowance is to be given.

16. When the erections on a sailing vessel consist of a short poop and top-gallant forecastle only, the former enclosed at the fore-end with an efficient bulkhead, the deduction from the freeboard given in the tables should be according to the following scale:

When the combined length of the erections is—

4-8ths of the length of the vessel, deduct 10 per cent. of the reserve buoyancy, or 12 per cent. of the freeboard required for the flush-decked vessel after correction for length.

3-8ths of the length of the vessel, deduct 8 per cent. of the reserve buoyancy, or 10 per cent. of the freeboard required for the vessel flush-decked after correction for length.

2-8ths of the length of the vessel, deduct 6 per cent. of the reserve buoyancy, or 8 per cent. of the freeboard required for the vessel flush-decked after correction for length.

1-8th of the length of the vessel, deduct 4 per cent. of the reserve buoyancy, or 6 per cent. of the freeboard required for the flush-decked vessel after correction for length. In cases where less than 1-8th of the length of the vessel is covered by erections the allowance should be in proportion to that given for erections covering 1-8th of the length.

17. When a sailing vessel is fitted with a top-gallant forecastle only, the reduction in reserve buoyancy should be one-half that prescribed by the previous paragraph for the case where, in addition to the forecastle, the vessel is fitted with a poop of the same length.

When there is a poop only, the allowance is to be half of that which in this paragraph is given for a forecastle only of the same length.

18. *Sheer.*—The tables are framed for vessels having a mean sheer of deck *measured at the side*, as shown in the following table:

—	Length over which Sheer is measured.						
	100	150	200	250	300	350	400
	Mean Sheer in inches over the Length specified.						
Flush-deck Vessels.—Sheer to be measured abreast stem and sternpost	20	25	30	35	40	45	50
Vessels having short poops and forecastles.—Sheer to be measured at points distant $\frac{1}{8}$th the length of the vessel from each end	14	18	22	26	30	34	38
Vessels having short forecastles only.—Sheer to be measured abreast the sternpost and at a point distant $\frac{1}{8}$th the length from the stem.....	14$\frac{1}{2}$	18$\frac{1}{2}$	23	27	31	35$\frac{1}{2}$	40

(*a*) In flush-deck vessels and in vessels to which clauses 11 and 12 apply, when the sheer of deck is greater or less than the above, *and is of a gradual character*, divide the difference in inches between it and the mean sheer provided for by 4, and the result in inches is the amount by which the freeboard amidships should be diminished or increased according as the sheer is greater or less.

(*b*) In vessels having short poops and forecastles, and in those having short forecastles only, the freeboard should be corrected in respect of the excess of or deficiency in reserve buoyancy due to variations in sheer from the standard amount over the length uncov-

ered by substantial erections, as provided in the above table. One-fourth the difference between the mean sheer specified and that measured as described is approximately the amount by which the freeboard should be modified in respect of sheer.

(*c*) The divisor 4 is to be used when the sheer is *of a gradual character*, and is not strictly applicable either to those cases in which the sheer is suddenly increased at the bow or stern, or to those in which it does not maintain its normal rate of increase to the ends of the vessel.

(*d*) In all cases the rise in sheer forward and aft is measured with reference to the deck at the middle of the length, and where the lowest point of the sheer is abaft the middle of the length, one-half of the difference between the sheer amidships and the lowest point should be added to the freeboard specified in the tables for flush-deck vessels, and for vessels having short poops and forecastles only.

(*e*) Where, as in some instances, vessels fitted with long poops or raised quarter-decks connected with bridge-houses have the deck line rising rapidly from amidships to the front of the bridge, and from that point onwards gradually approaching the normal sheer line, the freeboard may be slightly modified in consideration of the increase of height of deck in the "well."

(*f*) In flush-deck vessels, and in vessels having short poops and forecastles, the excess of sheer for which an allowance is made shall not exceed one-half the total standard mean sheer for the size of the ship.

(*g*) No decrease should be made in the freeboard of spar and awning deck vessels, in respect of excess of sheer.

19. *Round of beam.*—In calculating the reserve of buoyancy, an allowance has been made of one-quarter of an inch for every foot of the length of the midship beam for the round up. When the round of the beam in flush-deck vessels is greater or less than given by this rule, divide the difference in inches by 2, and diminish or increase the freeboard by this amount. For vessels with erections on deck the amount of the allowance should depend on the extent of the main deck uncovered. This rule for round of beam does not apply to spar or awning-deck vessels.

20. As a general illustration of the way in which the tables should be used in modifying the freeboard on account of erections on deck, extreme proportions and variations in sheer, the following may be taken as an example:—

A vessel is 234 ft. long, 29ft. broad, and has a moulded depth of 17ft. the coefficient of fineness being ·72. Suppose the vessel to have a poop and bridge-house of the united length of 121ft., and a forecastle 20ft. in length, and let the sheer forward, measured at the side, be 4ft. 6in., and aft 2ft. 1in.

	Ft.	in.
Freeboard by Tables A if of normal length, without erections, and with the normal amount of sheer	2	11
The mean sheer by rule is 33·4in, or 6in. less than that in the vessel, and the reduction in freeboard is 6in. divided by 4	0	1½
Freeboard of vessel without erections and with 39½in. mean sheer	2	9½
Freeboard by Tables C as awning-decked	0	9½
Difference	2	0

The combined length of the erections is $\frac{1}{2}\frac{1}{3}\frac{1}{4}$ths or $\frac{6}{10}$ths of the length of the vessel, and the allowance for erections under clause 11 will be therefore $\frac{6}{10}$ths of 24in., or $9\frac{1}{2}$in.

We have therefore:	Deduct in.
Amount deducted from freeboard for excess of sheer	$1\frac{1}{2}$
Amount deducted from the freeboard for erections	$9\frac{1}{2}$
Amount deducted if vessel be fitted with an uncovered iron main deck (clause 6) $= \frac{6}{10} \times 3\frac{1}{2}$	2
	13
The length being 30ft. in excess of that for which the tables are framed, the addition to the freeboard in respect of the same is one-half of $\frac{30}{10}$ of 1·1 inch	$1\frac{1}{2}$
	$11\frac{1}{2}$

That is $11\frac{1}{2}$in. to be deducted from 2ft. 11 in., leaving a winter free board of 1ft. $11\frac{1}{2}$in.

Corresponding summer freeboard 1ft. 9in.

21. Vessels loaded in fresh water may have less freeboard than that given in the several tables according to the following scale: *

Moulded depth in Feet.	Reduction in Freeboard.		
	Vessels without Erections on Deck.	Awning Deck Vessels.	Spar Deck Vessels.
	Inches.	Inches.	Inches.
6 and under 8	$1\frac{1}{2}$	—	—
9 ,, 11	2	—	—
11 ,, 13	$2\frac{1}{2}$	—	—
13 ,, 16	3	$3\frac{1}{2}$	4
16 ,, 19	$3\frac{1}{2}$	4	$4\frac{1}{2}$
19 ,, 22	4	$4\frac{1}{2}$	5
22 ,, 25	$4\frac{1}{2}$	5	$5\frac{1}{2}$
25 ,, 28	5	$5\frac{1}{2}$	6
28 ,, 31	$5\frac{1}{2}$	6	$6\frac{1}{2}$
31 ,, 34	6	$6\frac{1}{2}$	7

MEMO.—The weight of a cubic foot of salt water is taken, in the above table, to be 64 lbs., and that of fresh water 62.5 lbs.

22. The freeboards assigned by the following tables are not intended to apply to vessels when navigating inland waters or rivers, and when a stretch of such water has to be traversed such deeper loading will be permissible as may be due to the weight of fuel required for consumption between the points of departure and the open sea.

* The Board of Trade [*Circular* 1530] draw attention to the fact that it is open to the owners of any vessel to apply to the authority by whom the freeboard certificate was issued with a view to the fresh water allowance as shown on the certificate being reconsidered. Such applications must be accompanied by a copy of the displacement scale of the vessel and the scale of tons per inch immersion, these being certified by the builders. The fee to be charged for an alteration in the fresh water mark is £1. In the case of vessels loading in partially fresh water, whilst this application is still under consideration, shipowners and masters may apply to the local surveyors of the Board of Trade at the port of loading for the reduction that may be allowed at that time and place for the vessel in question, but this information can only be given on authentic particulars of the vessel's displacement and tons per inch immersion being supplied to the surveyors, and in no case must the reduction in freeboard so authorised exceed that already shown upon the certificate, *i.e.* the fresh water mark on the vessel's sides must not be submerged.

23. The freeboard of vessels having ports, scuppers, or other openings in their sides is to be regulated by the following considerations: When the openings are in the nature of watertight ports for cargo, coals, etc., and are therefore not intended to be opened except in harbour, no modification of the freeboard as determined by the foregoing tables will be necessary, provided the covers of the openings are sufficiently strong and are efficiently secured. In the case, however, of vessels having scuppers through the sides from a 'tween deck space below the upper deck or side scuttles or other openings of a similar nature, when the freeboard as determined by the foregoing tables does not provide a sufficient height from the load-line to the sills of the side scuttles, or to the deck which is drained by the scuppers, the freeboard is to be increased; and the amount of the increase, if any, is to depend on the nature of such openings and on the means adopted for closing them. In the case of hinged side-scuttles of the usual pattern, when the glass is of sufficient thickness and the scuttles are efficiently secured by metal bolts and nuts, and hinged watertight iron shutters or deadlights are provided on the inside of the glass, the load-line as determined by the centre of the disc or by the Indian summer line, if so marked, is to be not less than 6in. below the lowest side-scuttle. It is to be understood that in computing the vertical distance between the sill of the lowest side scuttle and the load-line mark, the vessel is to be assumed on even keel. When a vessel is fitted with side-scuttles, not exceeding 10in. in diameter in the clear, and when the strength and efficiency of the side-scuttles are not less than that specified in the Board of Trade *Circular* 1,485, issued December, 1909, for a 10in. side-scuttle, the freeboard is to be computed independently of the position of such side-scuttles.

24. The freeboards required by the foregoing tables are to be assigned on condition that the engine and boiler casings above the upper deck are of sufficient height and strength, with suitable means provided for closing all openings in them in bad weather; and the weather deck hatchways are properly framed with substantial coamings and strong hatch covers, the latter being efficiently supported by shifting beams and fore-and-afters suitable to the dimensions of the hatchway. When these conditions are not complied with the freeboard may require to be increased, regard being given, however, to the trade in which the vessel is intended to be employed.

25. In no case shall the deepest load-line in salt water, whether indicating the summer or Indian summer line, be assigned at a higher position than the intersection of the top of the upper deck with the vessel's side, at the *lowest* part of the deck. In the case of shelter-decked vessels the deck next below the shelter deck is to be regarded as the upper deck.

MEMORANDUM

OF

Explanatory Notes on the Application of the Tables of Freeboard, drawn up with a view to securing Uniformity of Practice on the part of those entrusted with the Assignment of Freeboard.

Deck Line.—In the case of vessels with uncovered iron or steel decks, a width of gutter waterway is to be assumed, and the point so obtained levelled out to the vessel's side. In the case of vessels of 24ft. beam and under, the width of the waterway assumed should be 12in., and in vessels of 42ft. and above, 21in. In vessels of between 24ft. and 42ft. beam the width of the gutter waterway is to be taken as half an inch for every foot in beam.

Where a wood deck maintains a uniform thickness to the sides of a vessel, the same method should be adopted.

In cases where an iron deck is partly covered with wood, the deck line is to correspond with the top of the deck amidships, whether the deck at that part be of wood or of iron, and the necessary corrections should be made in accordance with paragraph 6, page 22, as also the correction always required to the statutory deck-line.

Bridge-houses in Spar-decked Ships.—In a spar-decked ship, where an efficient bridge-house is fitted amidships, covering the engine and boiler openings, if it extends over at least 2-5ths of the vessel's length and has scantlings not less than the requirements of Lloyd's Rules (1885) for bridge-houses, it is to be taken into consideration in estimating the strength of the vessel for freeboard.

If the scantlings of the bridge-house are equal to the requirements of Lloyd's Rules (1885) the allowance on this account should not exceed that given in the following table:

Moulded Depth of Vessel to Main-deck.	Allowance.
16 feet.	4 inches.
20 ,,	3 ,,
24 ,,	2 ,,
28	1 inch.

If, however, the scantlings of the bridge-house are in excess of Lloyd's Rules (1885) the freeboard is to be determined on the basis of a comparison between the strength of the actual vessel and the strength of a vessel, of the same dimensions, built to the three-decked rule, and of a vessel built to the spar-deck rule, including a bridge-house in each case.

Tables of Freeboard.—Additional freeboard will be required in the case of vessels classed 90 A and 80 A, or in vessels of equivalent strength thereto in accordance with the following scale:

Length of vessel—

Feet.	150	175	200	225	250	275	300
	Inch.	Inch.	Inches.	Inches.	Inches.	Inches.	Inches.
90 A Additions	½	½	½	¾	¾	1	1¼
80 A ,, ...	1	1	1¼	1½	1¾	2	2½

Wherever in these explanatory notes reference is made to classes of vessels of Lloyd's various types, it is to be understood that these apply equally to all other vessels of equivalent strength, whether classed by other classifying associations, such, for instance, as the Bureau Veritas, or the British Corporation, or unclassed.

If the frame spacing be increased 1-4th, the thickness of all the shell plating, excepting garboard and sheerstrakes, should be increased by 1-20th of an inch over the thickness required in the standard ship. Other increases in spacing should be dealt with in the same proportion.

Para. 1. *Length.*—The length of erections is to be measured with reference to the length of the vessel on the load line, *i.e.*, any portion of the erections forward of the fore side of the stem on the load-line, or abaft the after side of the after post on the load-line, is not to be measured for deductions.

Para. 3. *Depth of Hold.*—The depth of hold as used in the computation for ascertaining the coefficient of fineness in iron and steel sailing vessels is to be measured to the top of the ceiling, and in steam vessels to the top of the floors.

In the case of vessels having either an excess or a deficiency of mean sheer, as compared with the standard sheer, the registered depth to be used for ascertaining the coefficient of fineness is to be increased for excess of sheer, or reduced for the deficiency of sheer, by 1-3rd of the difference between the standard mean sheer and the vessel's actual mean sheer, after being reduced to the gradual character, if necessary.

Para. 4. *Coefficient of Fineness.*—No alteration is to be made in the freeboard in consequence of the coefficient of fineness being either smaller or greater than those given on the page of the tables from which the ship's freeboard is taken.

Para. 5. *Moulded Depth.*—In cases where a wood deck of extra thickness is fitted, or where a wood deck is doubled throughout, the moulded depth should be increased by the excess of thickness. The freeboard should then be set off from the top of the deck of increased thickness at the side of the vessel.

Para. 6. *Freeboard.*—In case of the freeboard being ascertained by an actual calculation of the reserve buoyancy, the drawing used in such calculation should be verified by actual measurements at the ship, and such drawing and calculations forwarded to the Board of Trade, and whatever the results of the calculation the freeboard assigned should not be less than would be obtained by taking from the tables the freeboard corresponding to the smallest coefficient for a vessel of the same moulded depth, excepting sailing vessels with large rise of floor. (See page 44).

Freeboard as ascertained by these tables is to be measured to the intersection of the deck with the side of the vessel, but in granting certificates of freeboard this must always be corrected, so as to state the freeboard amidships when measured to the deck-line, marked in accordance with the statute.

Sub-paras. (*a*) *and* (*b*).—For vessels having iron upper-decks not covered with wood, the allowance is to be made under sub-para. (*a*), when the erections extend over less than 4-10ths of the length; but in all vessels when the erections cover 4-10ths or more of the length, and in spar and awning-decked vessels, the allowance is to be made under sub-para. (*b*).

Sub-para. (*b*)—(*b*)—In spar-decked vessels having iron spar decks, and in awning-decked vessels having iron main decks, the freeboard by the tables should be calculated as if those decks were wood covered, *i.e.*, the ordinary thickness of a wood deck, less the thickness of the stringer plate, should be deducted from the freeboard, also in vessels where 7-10ths or more of the main deck is covered by substantial enclosed erections, the freeboard found from the tables should be measured amidships from a wood deck, or, if the deck is of iron, it should be measured from the iron deck, and the ordinary thickness of a wood deck required for that size of ship, less the thickness of the stringer plate, should in that case be deducted from the freeboard. In vessels which have 6-10ths of the deck covered, 6-10ths the thickness of a wood deck, less the thickness of the stringer plate, is to be deducted from the freeboard. Between 6-10ths and 7-10ths a proportionate quantity; for example, for 65-100ths covered allow 8-10ths the thickness of the decks after deducting the thickness of the stringer plate. The remainder of the paragraph should be read as printed. N.B.—When the deductions referred to in this sub-para. (*b*) are allowed, the moulded depth is not to be reduced as per sub-para. (*a*), para. 6.

Para. 9.—In the case of vessels coming under para. 12, and having the deck erections not entirely enclosed, the effective length of the open portions is to be assessed as described in paras. 13, 14, and 15; if the length of the enclosed erections plus the length of the open portions, when assessed as above, is at all under 6-10ths of the vessel's length, the entire correction for length is to be applied.

Para. 11.—This paragraph does not apply to vessels in which the effective length of the erections is less than 6-10ths of the length, except in cases where the effective length of the after erection is at least 4-10ths of the length, and the total effective length of the erections is between 5-10ths and 6-10ths the length of the vessel. In such cases the allowances should be proportioned between that allowed for erections 5-10ths the length under para. 14 and that allowed for erections covering 6-10ths of the length under para. 11, and the corrections for length and sheer should be included in estimating this allowance. In all other cases of vessels with erections covering less than 6-10ths of the length, para. 14 is to be used. In the case of vessels having erections which are partly open or are less than the standard height the effective length of the erections is to be computed as directed elsewhere.

No allowance is to be made for a monkey forecastle which is less in height than the main or top-gallant rail, or 4ft., whichever is the least; where this condition is satisfied, or the forecastle is a sunk one having an efficient bulkhead at its after end, the length to be used in estimating the allowance is to be obtained by multiplying the length of the monkey forecastle by its height and dividing by 6 ft., the minimum height of a top-gallant forecastle. This rule, as well as that relating to the heights of raised quarter-decks, applies to vessels coming under paras. 12, 13, 14 and 15, as well as under para. 11. In case of vessels having no forecastle, but in other respects coming under this paragraph, the allowance for erections should be estimated on the supposition that there is a forecastle 1-8th the length of the vessel, deducting from this twice the allowance which the vessel would have for such a forecastle under para. 15.

Sub-para. (*a*).—The difference will not be affected by correction for length, as the allowance will be practically the same in both tables.

Sub-para. (*c*). — The engine and boiler openings, if protected only by a raised quarter-deck, will require an addition in freeboard varying from 1in. in vessels of 15ft. moulded depth to 2in. in vessels of 20ft. moulded depth. In vessels having less than 15ft. moulded depth a proportionate addition should be made.

If with a small bridge-house in front of, but not covering, the openings, an addition of half the above amount.

Sub-para. (*d*).—If the crew are not berthed in the bridge-house, and the arrangements to enable them to get backwards and forwards from their quarters are not satisfactory, an addition should be made to the freeboard of 1 per cent. of the moulded depth of the ship in the case of vessels 180ft. or more in length and having wells 70ft. or less in length. If the vessel's length does not exceed 150ft., or if the well is 80ft. or more in length, the foregoing addition will not be required. In the case of vessels between 150 and 180ft. in length, or having wells between 70 and 80ft. in length, the addition is to be found by interpolation.

Planks secured in position by lashings are not to be regarded as satisfactory arrangements; and a gangway providing access between the bridge-house and forecastle cannot be considered satisfactory, unless the following requirements at least are complied with:

The gangway to be not less than 18in. wide, and to be efficiently supported at suitable intervals. The ends to be strongly bolted to lugs riveted to the bulkheads of bridge and forecastle, or to the hatch coamings, or to iron standards bolted to the deck or to be secured in some equally efficient manner. The top of the gangway to be not less than 2ft. 6in. above the top of the deck at any part. A life-line or rail to be fitted for the entire length of the gangway and to be supported by wrought iron stanchions suitably spaced and not less than 2ft. 6in. in height. If the hatchways are at least 2ft. 6in. in height the gangway may be fitted between the hatchways and beyond them only, provided that a continuous platform of at least the required height is obtained, and the rail or life-line is fitted and efficiently supported by wrought iron stanchions for the entire distance including the hatchways. The gangway should be fitted as far inboard as practicable.

Sub-para. (*e*).—The minimum freeing port area is to be as follows:

Scale of Freeing Port Area.

Length of Bulwarks in "Well," in Feet.	Freeing Port Area on each side in Square Feet.
5	4·5
10	6·5
15	7·5
20	8·5
25	9·
30	9·5
35	10·
40	10·5
45	11·
50	11·5
55	12·
60	12·5

65 and above, 1 square foot to each 5 feet length of bulwark.

If the freeing port area is less than that stated above, an addition is to be made to the freeboard of 1 per cent. of the moulded depth.

The scale of allowance for erections on deck to vessels with top-gallant forecastles having long poop or raised quarter decks connected with bridge-houses is not to be used without modification, unless the strength of the bulkhead at the front of the poop or bridge-house is at least equivalent to the following requirements:

(*a*).—Poop of bridge bulkheads to be of the thickness of their side plating as required below for vessels under 13 depths to length, with coaming plates 1-20th of an inch thicker, and to be stiffened with bulb angles according to the following scale, spaced 30in. apart, and connected to the coaming plates and to the deck plating, or to an athwart-ship plate on the beams both below and above, with a bracket plate to each end of the stiffener.

Breadth of Ship.	Size of Stiffener.	Breadth of Ship.	Size of Stiffener.
24	5 × 3 × $\frac{8}{20}$	46	$7\frac{1}{2}$ × $3\frac{1}{2}$ × $\frac{11}{20}$
30	6 × 3 × $\frac{10}{20}$	50	8 × $3\frac{1}{2}$ × $\frac{13}{20}$
36	7 × 3 × $\frac{10}{20}$	54	$8\frac{1}{2}$ × $3\frac{1}{2}$ × $\frac{13}{20}$
42	7 × 3 × $\frac{12}{20}$	58 and above	9 × $3\frac{1}{2}$ × $\frac{15}{20}$

Intermediate sizes to be found by interpolation.

(*b*.)—Horizontal brackets or gusset plates of the same thickness as the coamings to be fitted, connecting the poop or bridge bulkheads with the bulwarks on each side of the vessel at about the height of the rail. In the case of vessels having a forecastle and raised quarter-deck only, the break bulkhead should be of the same thickness as required for bridge sides, and stiffened with angles 30in. apart, and of the size required for the main frames.

In order to obtain the allowance for deck erections provided by this paragraph, the openings, if any, in the bulkhead at the front of the long poop or bridge house must be provided with hinged iron or steel doors, or with some equally permanent means of closing such openings. When the width of the openings exceed 30in. special means are to be provided for maintaining the strength of the hinged doors.

The standard of thickness of the side plating of long poops and bridge houses is that required by Section 44 of Lloyd's Rules, as modified by the Table of Thicknesses of Side Plating of Awning-decked Vessels on page 42.

The additional freeboard for North Atlantic winter for well-deck vessels is to be as follows:

Length of Vessel.	Proportion of Length of Vessel over which Erections extend.				
	$\frac{60}{100}$ths.	$\frac{65}{100}$ths.	$\frac{70}{100}$ths.	$\frac{75}{100}$ ths.	$\frac{80}{100}$ths.
Feet.	Inches.	Inches.	Inches.	Inches.	Inches.
180	4	$3\frac{1}{2}$	3	$2\frac{1}{2}$	2
220	$3\frac{1}{2}$	$3\frac{1}{2}$	3	$2\frac{1}{2}$	2
260	$3\frac{1}{2}$	3	$2\frac{1}{2}$	2	2
300	3	3	$2\frac{1}{2}$	2	2

Para. 12.—For vessels having no forecastle, but with the other deck erections prescribed in this paragraph, estimate the allowance

for erections supposing there is a forecastle 1-8th the length of the vessel, and deduct 1½ times the allowance that would be made under para. 15 if the vessel were fitted with such a forecastle only.

This rule also applies to vessels having no forecastle, but with a bridge-house, as provided for in para. 13.

In steam vessels coming under this paragraph, and having closed erections extending over 6-10ths or more of the vessel's length, one-half the length correction specified in Table A is to be made, and the freeboard corrected for sheer only in estimating the allowance for erections, as the allowance for length will be practically the same in both tables.

For erections which extend over less than 4-10ths the length of the ship, the allowance is to be in proportion.

For instance, if 3-10ths are covered, allow 3-4ths of 25 per cent.

In the case of vessels under 15ft. moulded depth, in which the combined length of enclosed erections exceeds 5-10ths of the vessel's length, or in which the combined length of erections enclosed, and open, is equivalent to more than 5-10ths of the vessel's length, sub-paras. (*d*) and (*e*) of the preceding paragraph are to apply; but the full addition of 1 per cent. of the moulded depth under each of these sub-paragraphs is to be made only when the erections cover 6-10ths or more of the length; for lengths of erections intermediate between 5-10ths and 6-10ths, the required addition is to be in proportion; thus, when 55-100ths of the vessel's length is covered, the addition to the freeboard is to be ½ per cent. of the moulded depth under each sub-paragraph.

Paras. 12 and 13.—The allowance in a sailing ship for a bridge-house in addition to a poop or forecastle, or in addition to a forecastle only, is obtained by the rules laid down in paras. 12 and 13, as the case may be, and is calculated upon the difference between the freeboards of Tables A and C; in other words, the allowance for a forecastle, bridge-house, and poop, or for a forecastle and bridge-house in a sailing-ship, is the same as would be given for similar erections in a steamer of the same dimensions.

Para. 13.—When the combined length of the top-gallant forecastle and bridge-house is 5-10ths of the length of the ship, a deduction from the freeboard may be made of 30-100ths, and this is the maximum deduction for this type of vessel.

For erections which extend over less than 3-10ths of the length of the ship the allowance is to be in proportion.

For instance, 2-10ths covered allow 2-3rds of 19 per cent.

In all the rules governing the deductions to be made from the freeboard it is to be understood as follows:—When the top-gallant forecastle is not closed by an efficient bulkhead at the after end, the length is never to be estimated at a greater full value than 1-8th the length of the ship, but any extension beyond this may be estimated at one-half the value. For instance, if a vessel 240ft. long has an open forecastle 80ft. long, its value for deductions is 30+25=55 ft. When the top-gallant forecastle has an efficient bulkhead with an elongation abaft that bulkhead not enclosed at the after end, the full value of the closed-in portion is to be estimated either as 1-8th the length of the ship or the entire length of the enclosed portion, whichever may be the greater.

Open bridge-houses.—When the bridge-house extends from side to

side of the ship, its value for deductions must be considered on its merits, which will depend upon the security of all deck openings, doors, bunker lids, or otherwise.

Where these are all properly protected, and the bridge-house is open at both ends, one-half the length may be estimated as the value for deductions. Where, in addition, the fore end is enclosed by an efficient bulkhead, 3-4ths the length may be estimated as the value for deductions.

If the openings in a bulkhead at the after end of a bridge erection, having its fore-end closed, are efficiently protected by weather boards, properly fitted to at least half the height of the erection, the full length of the erection may be allowed in estimating its value for freeboard. This does not apply, however, to the case of a long erection falling to be dealt with under para. 11, as in well-decked vessels, having the well aft, except in shelter-decked vessels having efficient means provided for temporarily closing the openings in the shelter-deck in bad weather.

In the case of steamers coming under paras. 12 and 13, when the engine and boiler openings are not covered by an erection extending from side to side, bridge-houses may have an allowance not exceeding that which would be given for half the length of a bridge-house of the same character covering engines and boilers.

Paras. 14 *and* 15.—When the poop has no efficient bulkhead, or the bulkhead does not extend across the vessel, one-half its length may be allowed, provided always proper freeing ports are fitted.

When the openings in the bulkhead are provided with efficient weather boards or other efficient temporary means of closing, and extending the full height of the openings, then the full length of the poop may be allowed.

In no case, however, shall shifting boards or any other temporary means of closing the openings in the bulkheads at the after end of a bridge-house, or fore end of a poop be considered satisfactory, unless the means of their attachment, whether by channels, hooks, cleats, or otherwise, are permanently secured to the bulkheads.

The standard heights of forecastles and raised quarter-decks, as defined in para. 11, pages 23, 24, 32, and 33, apply also to these paras.

Paras. 16 *and* 17.—In the case of a sailing vessel having a forecastle and raised quarter-deck, or a raised quarter-deck only, the latter of less than 4ft. in height, the length of the raised quarter-deck to be allowed should be in proportion to its height as compared with the standard height of 4ft.

The provisions of the preceding paragraphs relating to the height of forecastles, bulkheads at the after end of forecastles and at the fore end of poops, and the means of closing openings in poop bulkheads, are also to be applied to sailing vessels dealt with under paras. 16 and 17.

Appliances for Closing Openings in the Bulkheads at the Ends of Deck Erections (Board of Trade *Circular* 1388, issued February, 1907).—With reference to the last clause but one of para. 11 (page 34), and to the various provisions regarding temporary means of closing on this and the previous page, the following additional rules should be complied with:

1. When an opening in the bulkhead of [a] deck erection is closed

either by a hinged door, or by a plate which is secured in place by nut and screw bolts, spaced not more than 6in. apart (centres), so as to be watertight, the opening may be regarded as completely and permanently closed.

The temporary appliances referred to in the following instructions are divided into two Classes (A) and (B); *and it is to be understood that the openings referred to exceed the area specified in Clause 4, but are not more than 4 ft. in width.*

Class A.—Appliances which, though temporary, completely close the openings and may be accepted as fully efficient except in the case of vessels dealt with under para. 11. In this class are included the following appliances: Shifting boards when fitted into channel bars, which extend the full height of the openings and are riveted to the bulkhead; portable plates secured by nut and screw bolts passing through plate and bulkhead, when the spacing of the bolts exceeds 6in. (centres), but does not exceed 12in. (centres); portable plates when secured by hook bolts, spaced not more than 12in. apart, and passing through the bulkhead plating of the erection in question, so as to afford evidence to the master that the opening is to be closed at sea.

Class B.—Appliances which, though completely closing the openings, cannot be regarded as fully efficient for closing the forward ends of deck erections. In this class are included the following appliances: Shifting boards extending the full height of the openings, when the channel bars for securing them are not riveted to the bulkhead; portable plates when secured by loose strongbacks; portable plates when secured by hook bolts which pass through the plate, but do not pass through the bulkhead; portable plates secured by nut and screw bolts or hook bolts, but which do not comply with the requirements of Class A as to spacing of bolts.

2. In the case of vessels coming under paras. 12 to 17 the following rules are to apply:

(*a*) When there is an opening or openings in the bulkhead at front of a bridge-house or poop closed by efficient temporary appliances of Class A, the bulkhead in question is to be regarded as complete. When, however, there is an opening in the front of a bridge-house closed by appliances of Class B, unless the bridge-house is sub-divided by an efficient iron or steel bulkhead, three-fourths of the length of the bridge-house is to be allowed, and the sheer is to be measured as if there were no bridge-house, as required by para. 18, in the case of bridge-houses not enclosed at both ends. When the opening in the front of a short poop is closed by appliances of Class B, three-fourths the length of the poop should be allowed.

(*b*) When there are doorways in the bulkheads at the forward and after ends of the bridge-house, having shifting boards or other equally efficient appliances which extend at least half the height of the bridge-house, but do not entirely close the doorways, the effective length of the bridge-house is to be computed at three-fourths of its actual length, provided that the machinery openings are either covered by a strong watertight casing or casings, without any doorways or other openings in them, or provided that the

machinery openings are not within the erection in question, but are protected by another erection which is fully enclosed. When, however, the machinery casings have doorways or other openings in them, and are within a bridge-house having doorways in their front bulkheads without either permanent or efficient temporary appliances for completely closing the doorways, the length of such erections should be computed as if there were no means for closing the openings. In either case the sheer is to be measured as if there were no bridge-house, as required by para. 18, in the case of bridge-houses not enclosed at both ends. This does not apply to the case of a bridge erection having its fore end closed, and with openings in the bulkhead at the after end efficiently protected by weather boards to at least half the height of the erection, which should be dealt with as required by para. 13. When there are openings of a similar nature in the front of a poop, the effective length of the poop is to be computed at three-fourths, or one-half of its actual length, according as the above conditions respecting the machinery casings are, or are not, complied with.

(*c*) When there are openings in the bulkhead at the after end of a bridge-house or forecastle, closed by appliances included in either Class A or B, the bulkhead in question may be regarded as complete.

3. (*a*) In the case of well-deck vessels when there are doorways in the front of the bridge-house or long poop, without permanent means of closing them, but having appliances of Class A, the allowance for deck erections is to be computed by the scale of para. 12 instead of by para. 11, except in those cases in which, by the incidence of sub-para. 11 (d) or 11 (e) or both, the freeboard as computed by para. 11 is greater than by para. 12. In such cases the para. 11 freeboard is to be assigned with the prescribed addition under sub-para. 11 (d) or (e), or both.

(*b*) In the case of well-deck steamers having openings in the front of a bridge-house or long poop, with appliances for closing the openings of Class B, the freeboard is to be computed by para. 12, and three-fourths of the length of the bridge-house is to be allowed, as described in the latter part of Clause 2 (*a*) above. When, however, the effective length of the deck erections is less than 5-10ths of the vessel's length the case should be dealt with under para. 14.

(*c*) When there is an opening or openings at the after end of a forecastle, closed by appliances of either Class A or B, the bulkhead in question may be regarded as complete.

4. The foregoing rules regarding portable appliances for closing the openings in bulkheads are not intended to apply to ports for cargo or coal, which are intended to be opened in port only, and are not intended, or adapted, to be opened at sea for the ingress and egress of the crew. Ports may be regarded as fulfilling the above condition when they do not exceed 7 sq. ft. in area, or 3ft. in depth or in width, and when they are provided with strong plate covers.

5. It should be noted that, when the means of closing the openings in the bulkhead at the front of a bridge-house are such that the bulkhead cannot be regarded as complete, the sheer is to be measured as if there were no bridge-house, as required by para. 18, unless the bridge-house is sub-divided by an efficient iron or steel bulkhead. When, however, the bridge-house is sub-divided by an efficient bulk-

head, with no openings in it, except such as are provided with appliances of Class A, and when the openings in the after bulkhead of the bridge-house are fitted with efficient means of closing, extending to at least half the height of the erection, the after portion of the bridge-house is to be regarded as closed, and the sheer will therefore be measured at the ends of the vessel.

6. In all cases of deck erections having openings in their end bulkheads, of such a character that the above rules would require a reduction in the length of deck erections to be allowed, the Surveyor should forward to the Principal Shipwright Surveyor a rough sketch in plan, showing by figured dimensions the position of iron or steel transverse bulkheads (if any) in the deck erection in question, and indicating also what means are fitted for closing any openings in such bulkheads. In the case of wooden vessels the same applies to wooden bulkheads.

Para. 18. *Sheer.*—Sheer of a gradual character is to be defined as follows:

At 1-8th the length of the vessel from the stem or sternpost the sheer is to be 55 per cent. of the sheer at stem or sternpost; at 1-4th the length from stem or sternpost 26 per cent., and at 3-8ths the length 7 per cent. In those cases in which the sheer is required to be taken at the stem and sternpost and the sheer is found to be not of the gradual character, the following method of computing the effective mean sheer is to be used: Let S equal mean of the actual sheers at stem and sternpost; let S_1 equal mean of sheers at 1-8th length from stem and sternpost divided by ·55. If S is greater than S_1, the effective mean sheer to be used in the computation of freeboard is S_1. If S is less than S_1 the effective mean-sheer to be used is $\frac{S + S_1}{2}$. In those cases in which the sheer is required to be taken at 1-8th of the vessel's length from stem or from sternpost the sheer as actually measured at the prescribed point may be used in ordinary cases without any correction on account of a departure of the sheer line from the gradual character. When correcting the depth of hold for excess or deficiency of sheer (para. 3, page 31) the mean of the sheers at 1-8th of vessel's length from stem and from sternpost divided by .55 should in all cases be taken as the vessel's actual sheer for this purpose.

In cases where there is no forecastle the sheer is to be measured at the stem and sternpost, and corrections made for it in all respects as in the case of flush-deck vessels.

When the bridge-house is enclosed, the sheer should be taken at the stem and sternpost, and the freeboard corrected for sheer in estimating the allowance for erections. When the bridge-house is not enclosed at both ends, the sheer should be measured as if there were no bridge-house, and the freeboard should or should not be corrected for sheer in estimating the allowance for erections, according as the sheer is measured at the stern, or at 1-8th length from the stem.

Sub-para. (*a*).—Surveyors should note that clauses 11 and 12 apply either to vessels of the ordinary well-decked type or to vessels having a poop and forecastle with a disconnected bridge-house.

Sub-para. (*d*).—The extent of the depressed part of the sheer covered by deck erections is to be allowed for in applying this rule.

Sub para. (*e*).—In vessels obtaining an allowance for deck erections under para. 11, and having considerably less than the usual sheer, the freeboard should be modified in consideration of the decrease of height of deck in the "well."

Sub-para. (*f*).—In flush-deck vessels the total standard mean sheer means the sheer measured at the stern and sternpost. In vessels having poops and forecastles, it means the sheer measured at points distant 1-8th of the vessel's length from stem and sternpost.

In vessels obtaining an allowance for deck erections under para. 11, where the sheer drops abaft amidships, the height of the raised quarter-deck is to be taken from the level of the top of the midship beam.

Para. 19. *Round of Beam.*—In flush-deck sailing vessels the excess of round of beam for which an allowance is made shall not exceed the standard round of beam; and for sailing vessels having erections on deck the allowance shall be further reduced in proportion to the extent of the main deck uncovered.

TABLE A.

The deductions for summer in vessels having deck erections are to be intermediate between those required by Tables A and C in proportion to the length of the ship covered by those erections.

TABLE B.

All vessels equal in strength to Lloyd's spar-decked rule or which, although in excess of that rule, do not come up to Lloyd's requirement for ships of full scantlings to the upper deck are to be considered as spar-decked ships, the freeboard for which will vary with their strength.

When the height between decks is greater or less than 7ft. the consequent modification in freeboard will vary from 1-3rd to 2-3rds the excess of deficiency of height, the exact proportion to depend upon the strength of the vessel.

In spar-decked vessels where the height between main and spar decks exceeds 7ft., the numbers for scantlings should be found assuming the height between decks to be 7ft.; if both these numbers are in the same grades as the actual scantling numbers of the vessel, the correction for height between decks is to be 1-3rd of the excess of height above 7ft. If both the scantling numbers so found are in higher grades than those of the actual vessel 2-3rds of the excess of height is to be added, and if either one of these scantling numbers is in a higher grade one-half of the excess of height is to be added. The same principle will apply in cases where the height between decks is less than 7ft.

Since the freeboard is measured from the spar deck it will be increased if the 'tween-deck height is more and decreased if it is less than 7ft.

In computing the freeboard of spar-deck vessels having scantlings in excess of Lloyd's requirements a comparison is to be made between their scantlings, the scantlings of vessels of the same dimensions classed 100A built to the three-decked rule, and of vessels built to the 100A spar-decked rule, and the freeboard is to be proportionate between that given in Table A and that given in Table B, after deducting 12 per cent. from the former; but in no case must the freeboard so assigned be less than that provided in Table A for a vessel of the same dimensions, sheer, and camber, or round of beam, and deck erections.

In comparison of scantlings and assignment of freeboard to spar-decked vessels having scantlings in excess of Lloyd's requirements, the following method is to be adopted:

1. The difference between the freeboard by Table A (less 12 per cent.) and that by Table B to be divided by five, 3-5ths of it being considered with reference to the longitudinal strength, and 2-5ths of it with reference to the transverse strength, these allowances to be the maximum deduction on each account.

2. In the comparison of steel ships, notwithstanding the general reduction of 20 per cent. for steel, as compared with iron thicknesses outside plating in the way of the double bottoms is not to be further reduced by 1-20th unless its thickness is 11-20ths or over. No reduction is to be made in any case unless there are floors connected with every frame.

3. In the calculation of strength the following method is to be adopted:

(*a*) Thin iron or steel plating in weather decks and the inner plating of double bottoms are to have their sectional area reduced for the purpose of the strength calculation as follows:

(1) When the deck beams or floors are fitted on every frame of the usual spacing—

Thickness in 20ths . .	5	6	7	8	9
. . . . .	·6	·7	·9	·1	·1

(2) When the deck beams of floors are fitted on alternate frames—

Thickness in 20ths. .	5	6	7	8	9
. . . . .	·4	·5	·6	·7	·8

When the decks are sheathed with wood, with fastenings not more than 24in. apart, the factors given in (1) are to be used, whether the beams are on every frame or on alternate frames, but if the fastenings are 48in. apart, then the factors in (2) are to be used unless the beams are fitted on every frame.

(*b*) A deduction of 1-7th is to be made for rivet holes in steel, and 1-8th in iron, for the parts in tension.

(*c*) Iron or steel decks which cover not less than 2-5ths of the midship length of the vessel are to be considered in the calculation just as they would be if of the full length.

(*d*) Such portions of wood weather decks as are continuous throughout the midship portion of the ship are to be considered as equivalent to steel of 1-25th the sectional area of the wood.

(*e*) For the purpose of comparison of strength, the breadth of the hatchways in the standard vessel shall be deemed to be one-third the breadth of the deck, and the tie-plates should be assumed to be fitted at the side of the hatchways.

Table C.

The standard of strength for awning-decked vessels is that provided by Lloyd's Rules (1885) for 100A awning-deck class, as modified and extended by the following table showing the thicknesses of topside plating, etc.

All vessels equal in strength to the above standard or which, although in excess of that standard, do not come up to Lloyd's requirements

for a spar-decked vessel, are to be considered as awning-decked vessels, the freeboard of which will vary with their strength.

No modification is necessary in respect of the height of 'tween decks of awning-decked vessels.

In computing the freeboard for awning-decked vessels having scantling in excess of the standard requirements, a comparison is to be made between their scantlings, the scantlings of vessels of the same dimensions built to the 100A spar-decked rule, and of vessels built to the standard awning-decked rule, and the freeboard is to be proportionate between that given in Table A and that given in Table C.

In vessels where the superstructure is of less strength than that required for the standard awning-decked class, additions are to be made to the freeboard in the same proportion.

In the comparison of scantling and assignment of freeboard to awning-decked vessels having scantlings in excess of the standard awning-decked vessel, the method of procedure to be similar to that stated above for spar-deck vessels having scantlings in excess of those provided by the spar-decked rule.

The thickness of the side plating above the main deck of standard awning-decked vessels, for half the vessel's length amidships is to be in accordance with the following table:

Ratio—$\frac{L}{D}$.	Under 13.	13–14	14–15
Plating Number.			
10,000 and under 13,100	5	5 and 6	6
13,100 ,, 15,500	6	6	6
15,500 ,, 16,600	6	6 and 7	7
16,600 ,, 18,700	7	7 and 8	8
18,700 ,, 26,400	8	8 and 9*	9*
26,400 ,, 30,900	8	9*	9 and 10*
30,900 ,, 35,200	9*	10*	10†
35,200 ,, 40,000	9*	10†	10†

When section 46 of the above Rules (relating to vessels' proportions) applies to these vessels, the increased thicknesses required for sheerstrakes, stringers, etc., are to be added to those of the main deck.

When one steel deck is required, it is to be fitted at the main deck, and when two steel decks are required they are to be fitted at the awning deck and the main deck, for the purpose of comparison of strength for determination of freeboard.

For vessels having a plating number exceeding 40,000, the scantlings necessary for the standard awning-decked vessel for the Table C freeboard are to be determined so that the stress per square inch upon the material of the hull amidships shall not exceed that of a standard vessel of the same dimensions and form, and having scantlings equal to the requirements of the 100A class in Lloyd's Register for three-deck vessels when loaded to the freeboard given in Tables A, after deducting 12 per cent. from the same.

* The butts of the awning-deck sheerstrake to be treble riveted, and the landing edges of the side plating to be double riveted.

† The butts of the strake of side plating below the awning-deck sheerstrake to be treble riveted in addition.

NOTE.—For iron read sixteenths and for steel read twentieths of an inch. When two thicknesses are given the greater is that of the awning-deck sheerstrake. The depth and length are to be measured as defined in Lloyd's Register Rules for so estimating the scantling numbers.

In part awning-decked vessels with raised quarter-decks and long superstructures with the extra strength given in section 44, Lloyd's Rules for 1889 for iron and steel vessels, where the break of the quarter-deck is 1-10th the vessel's length abaft amidships, and the continuity of strength is suitably maintained at such break, a reduction may be made from the freeboard required by Table C, in accordance with the following scale.

When the break of the quarter-deck is not less than 3-10ths the length of the vessel abaft amidships, twice the above-mentioned allowance may be made, and for intermediate lengths of erection the allowance is to be obtained by interpolation.

Vessels with plating number under 18,000, 2½ inches.
Vessels with plating number 18,000 to 21,000, 3 inches.
Vessels with plating number 21,000 to 24,000, 3½ inches.
Vessels with plating number 24,000 to 27,000, 3½ inches.

In part awning-deck vessels the standard height of the raised quarter-deck is 4ft.; for raised quarter-decks of less height, extending over 4-10ths of the length, the allowance for the erections should be diminished as shown in the following table:

Height of Raised Quarter-Deck.	Moulded Depth of Vessel in Feet.						
	ft. in. 10 0	ft. in. 12 0	ft. in. 14 0	ft. in. 16 0	ft in. 18 0	ft. in. 20 0	ft. in. 22 0
ft. in.	in.	in.	in.	in.	in.	in.	in.
3 6	—	¼	¼	¼	½	¾	¾
3 0	¼	¾	1	1	1¼	1½	1¾
2 6	1	1¼	1½	1¾	2	2½	3
2 0	1½	1¾	2¼	2¾	3¼	3¾	4½
1 6	2	2¼	3	3¾	4¼	5	6

For shorter or longer lengths of raised quarter-decks a proportionate correction should be made.

Table D.

Sailing vessels classed A (black) in Lloyd's Register are to be regarded as first-class ships in applying the tables.

Hard wood ships, *i.e.*, other than fir or pine, classed A (red) in Lloyd's are to have their freeboards by the tables increased by 8 per cent.

Hard wood ships classed Æ in Lloyd's are to have their freeboards by the tables increased 15 per cent.

Hard wood ships without class are to have their freeboards by the tables increased by 20 per cent., unless opened out for survey, when their freeboards will depend upon their condition.

Soft wood ships will require to have their coefficient of fineness modified in respect of the excess of the registered breadth caused by the extra thickness of side. That for hard wood ships is already provided for in the tables.

Soft wood ships classed A (red) in Lloyd's are to have their freeboards by the tables increased 10 per cent.

Soft wood ships classed Æ in Lloyd's are to have their freeboards increased 20 per cent.

Soft wood ships without class are to have their freeboards by the tables increased 25 per cent., unless opened out for survey, when their freeboards will depend upon their condition.

Iron and steel sailing vessels having a greater rate of rise of floor than 1½ in. per foot of half breadth, may have the moulded depth to be used with the tables reduced by half the difference between the total rise of floor at the half breadth and the total rise at the standard rate of 1½in. per foot; 2½in. per foot of half a breadth is to be the maximum rate of rise on which an allowance is to be made. When the reserve buoyancy is calculated, the percentage taken shall be that corresponding to the depth reduced as above, but in no case shall the freeboard be less than that given in the top line of Table D, for such percentage. Whichever method be adopted, the correction for length is to be applied in relation to the reduced moulded depth.

TURRET-DECK STEAMERS.

Rules to Regulate the Depth of Loading of Turret-Deck Vessels and Vessels of Similar Types.

1. A turret is a strongly constructed continuous erection at the middle line of a vessel, forming with the main or harbour deck an integral part of the hull, having a breadth not less than 5-10ths of the greatest breadth of the vessel and a height not less than 25 per cent. of the moulded depth. In assigning freeboard to turret-deck vessels the following rules should be observed:

2. Hatch coamings at least 2ft. high, and casings to engine and boiler openings at least 4ft. 6in. high to be fitted above the " turret " deck.

Any scuttle or other openings in the harbour deck are to be closed water-tight by means of iron or steel plates not less in thickness than the harbour deck, suitably stiffened and strongly bolted in places. The following method of computing the freeboard is based on the consideration that the turret-deck hatchways are provided with permanent means of closing them, as described in clause 8 of the rules for shelter-decked steamers.

3. The volume of the turret to be estimated from a normal beam line drawn through the point where a vertical line at the quarter breadth of the vessel cuts the upper surface of the vessel's deck. Where the turret is nearly one-half the breadth of the vessel, and its transverse section is of rounded form at its base, the base line of the turrets is to be drawn through the point where the vertical line at the quarter breadth cuts the upper surface continued in the same curve as the normal line of beam.

4. The reserve buoyancy required by the tables to be estimated by taking 70 per cent. of the volume of the turret. The height of the turret allowed for is not to exceed 25 per cent. of the moulded depth. (It is to be understood that no correction is to be made for an unsheathed iron harbour deck in applying the buoyancy method.)

5. The moulded depth of the vessel is to be taken to be the depth at side from the beam line, as before defined, to the top of the keel.

6. If a vessel has sheer, to determine the volume of the turret, the turret base line to be drawn at each section as described above. At the extreme fore-end of the vessel the base of the turret to be parallel to the turret deck.

7. Where a poop and forecastle or a forecastle only are fitted on the top of the turret, the allowance for them is to be as follows:

When the effective length of these erections is equal to 1-8th of the vessel's length, deduct 8 per cent. of the difference between the freeboards in Table A (after correction for sheer) and Table C.

For erections of greater or less length the allowance is to be in proportion to the length. The allowance for such erections is not to exceed 10 per cent. of the difference between the freeboards in Table A (after correction for sheer) and Table C.

The effective length of a poop or forecastle is to be obtained by multiplying its actual length by the ratio which its breadth bears to the breadth of the ship at the after end of the forecastle or fore-end of the poop respectively.

The provision of the freeboard tables regarding the height of forecastles, the bulkheads at the after end of forecastles and at the fore end of poops, and the means of closing the openings in poop bulkheads, are to be applied in these cases.

8. The method described above is only applicable when it is possible to obtain a correct drawing of the " lines " of the vessel, and it is only to be employed when facilities are given for verifying the drawings by actual measurements at the ship, in accordance with para. 6 of the freeboard tables. When a verified drawing is obtainable, either the foregoing or the following method may be employed at the option of the owner, but if a verified drawing is not obtainable, the following method only is to be employed.

9. The depth of hold to be used in obtaining the coefficient of fineness in vessels having either an excess or deficiency of sheer is to be modified as described in para. 3 and the coefficient thus obtained is to be modified when the vessel is of rounded form at the gunwale, the necessary addition in ordinary cases being ·01.

10. The length correction under para. 9 of the load-line tables is to be 3-4ths of that specified in Table A, when the breadth of the turret is 5-10ths of the breadth of the vessel, but the table correction is to be halved where the breadth of the turret is 6-10ths or more of the breadth of the vessel. For turrets having breadths between 5-10ths and 6-10ths, the length correction is to be in proportion.

11. In making the sheer correction in accordance with para. 18 of the load-line tables, the sheer is to be measured at the ends of the vessel.

12. The effective length of the turret is to be obtained by multiplying its length by the ratio of the mean breadth of the turret to the breadth of the vessel amidships.

13. The deduction from the freeboard shown in the tables on account of the turret is to be as follows:

Where the effective length of the turret is 5-10ths of the length of the vessel, deduct 45 per cent. of the difference between the freeboards in Table A (after correction for sheer) and Table C. Where the effective length is 6-10ths, deduct 55 per cent., and so on in proportion. For intermediate lengths intermediate percentages are to be taken.

14. In those vessels having unsheathed harbour or main decks, a correction should be made, when employing the linear method of computation, as described in para. 6 (*b*).

15. The transverse and longitudinal strength of the vessel are to be regulated by that required for a "three-deck" vessel of the same length, breadth, moulded depth, and coefficient of fineness, and the scantlings of the turret are to be determined so that the stress per square inch upon the material of the turret amidships shall not exceed that of a standard vessel of the same dimensions and form, and having scantlings equal to the requirements of the 100A class in Lloyd's Register (1885) for three-deck vessels when loaded to the freeboard given in Table A after deducting 12 per cent. from the same.

16. Should a vessel be constructed with a turret less than 5-10ths the breadth of the vessel, or less in height than 1-4th of the moulded depth, or should the radius of curvature at the gunwale exceed 20 per cent. of the moulded depth, or should the centre line of the disc when ascertained reach a point above the junction of the vertical side with a rounded gunwale, full particulars and calculations with the proposed assignment to be submitted to the Board of Trade before freeboards are assigned.

17. The freeboards in the certificates issued are to be set off in feet and inches from the line of the turret deck.

SHELTER-DECKED STEAMERS.

Rules for the Determination of the Freeboard of Shelter-decked Steamers.

By the term "shelter-decked steamer" is meant, for the purpose of the following instructions, a steam vessel having a complete superstructure of a substantial character extending over the whole length of the vessel, the superstructure deck (hereinafter called the shelter-deck) being continuous and unbroken at the sides of the vessel, but having one or more openings at the middle-line, which have no permanent means of closing them, but which may or may not have means for temporarily closing them.

All hatchways in the deck immediately below the shelter-deck should be properly framed with substantial coamings, hatch covers, and shifting beams, etc., as described in para. 24. The hatchways should have efficient means of battening down as described in clause 7 of these rules, and any stairways or similar openings should have efficient means of closing.

In assigning freeboards to shelter-decked vessels, the following rules should be observed:

(1) In making a sheer correction in accordance with para. 18 of the load-line table, the sheer is to be measured at the ends of the vessel, and the freeboard corrected for sheer in estimating the allowance for erections.

(2) (*a*) In the case of shelter-decked vessels having only one opening in the shelter deck, the length correction under para. 9 of the load-line tables is to be one-half that specified in Table A; and the allowance for deck erections is to be determined under para. 11 in the manner specified below, provided that the effective length of the deck erections, when assessed on the

assumption that the opening in the deck is an open well, and in accordance with the different regulations contained in the load-line tables affecting poops, bridges, and forecastles, open or closed, is not less than 6-10ths of the length of the vessel.

(*b*) In the case of shelter-decked vessels having an opening at each end of the vessel, and also in the case of vessels having more than two openings in the shelter-deck, the allowance for deck erections is to be determined under para. 12 of the tables, the length correction under para. 9 of the load line tables to be one half that specified in Table A, provided that the effective length of the deck erections, when assessed on the assumption that each opening in the deck is an open well, and in accordance with the different regulations contained in the load-line tables affecting poops, bridges, and forecastles, open or closed, is not less than 6-10ths of the length of the vessel.

(3) The effective length of the deck erections is to be calculated in the following manner, providing the openings in the shelter-deck do not exceed half the vessel's breadth at the middle of the length of the opening. The length to be taken in the first instance as if each opening were an open well, the value of each part being assessed on that assumption in accordance with the different regulations contained in the load-line tables affecting poops, bridge houses, and forecastles open or closed, and also in accordance with the regulations regarding bridge houses not covering the engine and boiler space. The final allowance for erections will depend upon whether or not temporary but efficient means are provided for closing the openings in the shelter-deck.

(*a*) If efficient means as specified below are provided for temporarily closing the openings in the shelter-deck, the effective length of the deck erections is to be reckoned as the length computed as prescribed above, plus half the difference between that length and the length of the vessel.

(*b*) If efficient means for temporarily closing the openings are not provided, the effective length of the erections is to be computed by adding to the length computed as above one-fourth, instead of one-half, the difference between that length and the length of the vessel.

(*c*) If the openings in the shelter-deck are wider than as specified above, the addition to the assumed length of erections is to be modified in proportion to the relation which the actual opening holds to the specified breadth and to a complete well.

(4) Means for temporarily closing the openings in the shelter-deck may be regarded as efficient if they are at least equivalent to the following in strength and security. The portable planks for closing the openings to be not less in thickness than required by para. 43 of Lloyd's Rules (1885) for the flat of awning-decks. The planks to be supported by portable beams, fitted either longitudinally or athwartships, spaced not wider than 5ft. apart, and efficiently secured at their ends, and the deck in way of the openings to be efficiently supported by pillars from the deck below. The portable planks to be provided with eye bolts and lashings, or some other equally efficient means of securing them in place.

(5) If efficient means are provided for temporarily closing the openings in the shelter-deck in heavy weather, the freeing ports required by para. 11 (*e*) need not be provided. If, however, efficient means for closing the openings are not provided, whether in vessels with one or with more than one opening in the shelter-deck, then freeing ports with shutters properly hung are to be fitted, having a minimum area as follows:

Length of opening in the shelter-deck.	Freeing port area on each side in square feet.
5 feet.	4·5
10 ,,	6·5
15 ,,	7·5
20 ,,	8·5
25 ,,	9·0

If the freeing port area is less than that stated above, an addition is to be made to the freeboard of $\frac{1}{2}$ per cent. of the vessel's moulded depth, provided, however, that in the case of vessels treated under para. 12, the freeboard is not to be increased beyond that due to deck erections of the same length and character, but with open wells, as determined by the different regulations contained in the load-line tables affecting poops, bridge houses, and forecastles.

(6) The deduction for summer to be intermediate between Tables A and C, in proportion to the effective length of erections finally allowed for freeboard purposes, and the freeboards assigned to these vessels must never be less than would be assigned for a complete awning-decked vessel of the same dimensions.

(7) For the purpose of the assignment of freeboards, a hatchway having strong iron or steel coamings, with hatch rest bars of the usual description, and also cleats for battening down bars securely riveted to the coamings, athwartship beams and fore and afters, substantial hatch covers and tarpaulins, shall be considered to have " permanent means of closing." And a deck erection having no openings in it, except so protected, shall be held to be " permanently enclosed."

TABLE A.—CARGO-CARRYING STEAM VESSELS NOT HAVING SPAR OR AWNING DECKS.

For allowances admitted in vessels having erections on deck, see Explanation, page 19 et seq.

A. Correction in inches for a change of 10ft. in the length. **B.** Deduction in inches for summer voyages.

The above reduction in freeboard for summer voyages from European and Mediterranean ports is to be made from April to September inclusive. In other parts of the world the reduced freeboard should be used during the corresponding or recognised summer months. Double the above reduction to be allowed for voyages in the fine season in the Indian Seas, between the limits of Suez and Singapore. An additional freeboard of 2in. shall be required for all vessels up to and including 330ft. in length when entering the North Atlantic, when sailing to, or from, the Mediterranean or any British or European port, and which may sail to, or from, or call at ports in British North America or Eastern ports in the United States, north of Cape Hatteras, from October to March inclusive.

A. Correction in inches for a change of 1oft. in the length. **B.** Deduction in inches for summer voyages.

The above reduction in freeboard for summer voyages from European and Mediterranean ports is to be made from April to September inclusive. In other parts of the world the reduced freeboard should be used during the corresponding or recognised summer months. Double the above reduction to be allowed for voyages in the fine season in the Indian Seas, between the limits of Suez and Singapore. An additional freeboard of 2in. shall be required for all vessels up to and including 330ft. in length when entering the North Atlantic, when sailing to, or from, the Mediterannean, or any British or European port, and which may sail to, or from, or call at ports in British North America or Eastern ports in the United States, north of Cape Hatteras, from October to March inclusive.

TABLE A.—(*Continued.*)—CARGO-CARRYING STEAM VESSELS NOT HAVING SPAR OR AWNING DECKS.

For allowances admitted in vessels having erections on deck, see Explanation, page 19 et seq.

A. Correction in inches for a change of 10ft. in the length. **B.** Deduction in inches for summer voyage.

The above reduction in freeboard for summer voyages from European and Mediterranean ports is to be made from April to September inclusive. In other parts of the world the reduced freeboard should be used during the corresponding or recognised summer months. Double the above reduction to be allowed for voyages in the fine season in the Indian Seas, between the limits of Suez and Singapore. An additional freeboard of 2in. shall be required for all vessels up to and including 330ft. in length when entering the North Atlantic, when sailing to, or from, the Mediterranean, or any British or European port, and which may sail to, or from, or call at, ports in British North America, or Eastern ports in the United States, north of Cape Hatteras, from October to March inclusive.

The following example illustrates the method by which the additional draught of water to which a vessel should be laden in water, partly salt, may be determined:

A flush-deck vessel of 20ft. moulded depth sails from Aberdeen Harbour. To what extent should she be laden beyond the load-line disc?

On referring to page 28 of the Freeboard Tables it will be seen that this vessel should be laden deeper in *fresh* water than in *salt* to the extent of 4in. The water in Aberdeen Harbour weighs 1,015 ounces per cubic foot, or 10 ounces less than salt water, and, as for a difference

of 25 ounces in weight per cubic foot between fresh and salt water the increased immersion is 4in., it will be seen that the increased draught of water with which this vessel should leave Aberdeen Harbour is 10-25ths of 4in., or about 1½in.

LOAD-LINES.

Regulations dated January 12, 1899, Made by the Board of Trade under the Merchant Shipping Act, 1894.

The circular disc prescribed by Section 438 of Merchant Shipping Act, 1894, shall be 12in. in diameter, with horizontal line 18in. in length drawn through centre. Disc to be marked amidships on each side of the ship, the position of its centre being placed at level specified in Board of Trade certificate of approval.

The lines to be used in connection with disc indicating maximum load-line under different circumstances and at different seasons to be horizontal lines, 9in. in length and 1in. in thickness, extending from and at right angles to a vertical line, marked 21in. forward of the centre of disc, maximum load-lines in fresh water to be marked abaft such vertical line, and maximum load-lines in salt water to be marked forward of such vertical line.

Such maximum load-lines shall be as follows, and the upper edge of such lines shall respectively indicate: For Fresh Water—the maximum depth to which the vessel can be loaded in fresh water. For Indian Summer—the maximum depth to which the vessel can be loaded for voyage during the fine season in the Indian Seas, between limits of Suez and Singapore. For Summer—the maximum depth to which the vessel can be loaded for voyages (other than Indian summer voyages) from European and Mediterranean ports between April and September, both inclusive, and as to voyages in other parts of the world (other than Indian Summer voyages), the maximum depth to which the vessel can be loaded during the corresponding or recognised summer months. For Winter—the maximum depth to which the vessel can be loaded for voyages (other than Indian Summer voyages and summer voyages) from European and Mediterranean ports between October and March, both inclusive, and as to voyages in other parts of the world, the maximum depth to which the vessels can be loaded during the corresponding or recognized winter months. For Winter (North Atlantic)—the maximum depth to which the vessel can be loaded for voyages to or from the Mediterranean or any European port from, or to, ports in British North America, or Eastern ports in the United States, north of Cape Hatteras, between October and March, both inclusive. Such maximum load-lines shall be distinguished by initial letters conspicuously marked opposite the horizontal lines, and such letters to be as follows: F.W., Fresh Water; I.S., Indian Summer; S., Summer; W., Winter; W.N.A., Winter (North Atlantic).

The upper edge of horizontal line passing through centre of disc shall always indicate the maximum summer load-line in salt water. The relative positions of the upper edges of the other lines to be used in connection with disc, with the upper edge of the line passing through centre of disc (the maximum summer load-line) will be indicated in the certificate of approval.

Part V. of the Merchant Shipping Act, 1894, shall have effect as if the maximum load-line applicable to a particular voyage were drawn through the centre of the disc.

Steamships shall be marked on both sides with such of the horizontal lines as are applicable to the nature of their employment, and sailing ships shall be marked on both sides with such of the above-mentioned lines, in addition to the horizontal line through centre of disc, as indicate the maximum load-line for fresh water and for North Atlantic winter; but sailing ships engaged solely in coasting trade shall only be marked, in addition to the horizontal line passing through the centre of the disc, with the line indicating maximum load-line in fresh water.

The disc and maximum load-lines shall be painted white or yellow on a dark ground, or black on a light ground, and the position of the disc and of each of the lines shall, in the case of iron and steel vessels, be permanently marked by centre punch marks, and in the case of wooden vessels be sunk for their breadths into the planking a depth of not less than one-quarter of an inch.

Application for a certificate of approval of the position of the disc and lines or any alteration thereof shall be made by one of the registered owners or by the builder of the ship. Every application to be made on the presented form L.L.I.

Respecting certificates of approval and their duration the following rules shall prevail:

(*a*) As regards all ships classed in Lloyd's Register, or by any other corporation or association for the survey or registry of shipping approved by the Board of Trade, the certificate of approval shall cease to have effect when the class of the ship is changed or withdrawn.

(*b*) As regards unclassed iron and steel steamships the certificate of approval will be granted for the period mentioned therein, and upon the expiration of such period the certificate shall cease to have effect.

(*c*) As regards unclassed wooden ships which have been opened out for survey and unclassed iron and steel sailing ships, the certificate will be granted for a fixed time, varying with the age and condition of the ship; and at the expiration of such period it shall cease to have effect.

(*d*) As regards unclassed wooden ships which have not been opened out for survey, no limit of time will be imposed in the certificate.

(*e*) As regards all vessels having deck erections in respect of which deductions have been made for freeboard, if any change tending to invalidate the right to such deductions is made in the structural condition of the deck erections the certificate of approval shall thereby cease to have effect.

Every certificate of approval shall be issued in duplicate; one part shall be delivered to the applicant and the other part sent to the Marine Department, Board of Trade.

On a certificate of approval ceasing to have effect, application shall at once be made by the registered managing owner for the granting of a new certificate, and the old certificate is to be delivered up to the

Board of Trade, who shall cancel it. In default of a certificate which has ceased to have effect being handed in for cancellation, it shall be competent for an officer of the Board of Trade to notify such invalidity to any collector of Customs, and for any collector consequently to refuse clearance to the vessel in question.

The master of every British ship shall, before she leaves any dock, wharf, port, or harbour in the United Kingdom, His Majesty's possessions, or any foreign country, for the purpose of proceeding to sea, enter in the official log all the particulars stated in the certificate, if not previously entered.

The managing owner or master shall forthwith, on the delivery to him or his agent of the certificate, cause it to be framed and put up in some conspicuous part of the ship so as to be visible to all persons on board, and shall keep it so put up as long as the certificate remains in force and the ship is in use.

The expression "amidships" in these regulations shall mean the middle of the length of the load water-line as measured from the fore side of the stem to the aft side of the stern-post.

THE UNCLASSED SHIP.

[Board of Trade *Circular* 1,416, issued July, 1907.]

A vessel, whether constructed of wood, iron, or steel, which is not classed either with Lloyd's Register, Bureau Veritas, the British Corporation, or with any other association which may hereafter be approved by the Board, is regarded as an unclassed ship.

If the vessel is an unclassed wooden sailing ship, the owner may elect to have the vessel opened out for survey, when the freeboard will depend upon her condition; if he does not open the vessel out, the maximum addition of 20 or 25 per cent. must be made to the freeboard, according as the vessel is hard or soft wood.

Wooden steamers must in all cases be opened out for survey before a freeboard is assigned.

BOARD OF TRADE LOAD-LINE SURVEYS: SCALE OF FEES.

	Classed Vessels.			Unclassed Vessels.		
	£	s.	d.	£	s.	d.
For vessels under 300 tons gross	1	1	0	2	2	0
„ of 300 tons and under 1,000 tons gross	2	2	0	3	3	0
„ of 1,000 „ 2,000 „	3	3	0	5	5	0
„ of 2,000 „ 3,000 „	4	4	0	6	6	0
„ of 3,000 „ 4,000 „	5	5	0	8	8	0
„ of 4,000 and above	6	6	0	10	10	0

NOTE.—If the load-line survey is made at the same time as the surveys for a passenger certificate, for alleged unseaworthiness on account of defective hull and machinery, or for a survey prior to re-registry of ships whose registers have been closed, except hulks and lighters, then the fees for the latter surveys cover the former.

The fee for the inspection of minor alterations involving an alteration of freeboard in a vessel having a valid load-line certificate is £1. The fee for an unclassed wooden sailing ship not opened out for survey is to be the same as for a classed vessel. The fee for change of name of a vessel includes the change of name on the load-line certificate. The fee to be charged for a copy of a certificate of approval of load-line is 5s. The travelling expenses incurred by surveyors in inspecting vessels for the assignment of load-line are charged to the owners, in addition to the full fee as prescribed above. When owners or builders submit proposed designs of vessels and require provisional assignment of freeboard, the full fee as prescribed above shall be paid, which will cover the final assignment when required to be made.

INTERNATIONAL LOAD-LINE REGULATIONS.

Under provisions of the Merchant Shipping Act, 1906, which came into force on October 1, 1909, the British load-line regulations now apply to all foreign ships while they are within any port in the United Kingdom.

The load-lines fixed and marked, and the certificates of freeboard issued by the Governments of India, the Straits Settlements, Victoria, and South Australia are to have the same effect as if they had been fixed, marked, and issued by the British Board of Trade.

The British Board of Trade have accepted the load-line tables of France, Germany, Holland, and Sweden as equivalent to their own.

Austria, Denmark, and Spain have adopted the British tables and rules, and vessels flying the flags of these countries are now required to have load-lines assigned and marked in accordance therewith. Norway has adopted freeboard tables and regulations which are now in operation under the Norwegian law, and are, in certain cases, accepted by the British Board of Trade, but which, as regards steamers, are not in agreement with the British tables and are not recognized by the British Government. In most cases, if not in all, acceptance of the British tables and rules by foreign Governments is qualified by reservations in detail.

INTERNATIONAL CLASSIFICATION.

The certificates of classification of Lloyd's Register are recognized by the authorities of the following countries as exempting vessels from undergoing certain inspections at the hands of the officials to the several Governments, viz.:—Australia, Austria-Hungary, Canada, Denmark, France, Greece, Norway, Russia, Spain, Sweden, and the United States of America.

Under the provisions of the French Shipping Law, the classification of Lloyd's Register is accepted by the French authorities as rendering vessels eligible to be granted the requisite *permis de navigation*, so far as regards structure and condition of hull and machinery and equipment of anchors and cables. Similarly, so long as they retain their classification, vessels sailing under the French flag are exempted from certain official periodical surveys, including surveys in dry dock, which

are prescribed by the Law. Lloyd's Register is also empowered to assign and certify the freeboards which are compulsory in the case of French vessels. The Law further provides that, not only French vessels, but vessels of all other nationalities are subject to survey (*visite de partance*) by the Government Surveyors before leaving French, Algerian, and French Colonial ports. In this connection the classification certificates of Lloyd's Register, so far as they apply, are recognized by the French authorities for British vessels, so that such vessels, when provided with the Society's certificates and with valid certificates of freeboard, life-saving appliances, lights and fog-signals, will be exempted from detailed survey in the same way as French-classed vessels are exempted.

INTERNATIONAL LIFE-SAVING REGULATIONS.

The Danish, Dutch, French, German, Norwegian and Swedish regulations for the provision of life-saving appliances have been officially recognized by the British Government as equally effective with those in force in this country.

The Convention of the International Conference on Safety of Life at Sea was signed in London on January 20, 1914, by the plenipotentiaries of the British Empire (including Canada, Australia, and New Zealand, which were separately represented), Germany, France, United States of America, Austria-Hungary, Italy, Spain, Russia, Sweden, Norway, Holland, Belgium, and Denmark. The text of the Convention, containing 74 articles and an annexed *réglement*, was published on February 15, 1914, and a summary of both Convention and Regulations is given on other pages of this YEAR BOOK. The Convention had to be ratified by the different States on or before December 31, 1914, and it comes into force on July 1, 1915. The Merchant Shipping (Convention) Act, passed by the British Parliament, August 10, 1914, provided for its ratification by law in Great Britain.

DIGEST OF MERCHANT SHIPPING ACTS.

MERCHANT SHIPPING ACT, 1894.

PART I.—*Registry.*

British Ships—their Ownership and Registry.—Sections 1 to 3. Application of this part of Act to all Her Majesty's dominions. Ownership of British ships to be vested in British subjects or naturalized citizens, or bodies corporate legally established. British ships to be registered with following exceptions: (1) Those registered before operation of Act. (2) Ships not exceeding 15 tons burthen employed in the coasting trade of United Kingdom, or in British possessions where managing owners reside. (3) Ships not exceeding 30 tons burthen without whole or fixed deck, and employed solely in fishing or trading within waters of British North America as defined. Ships not legally registered not entitled to recognition as British ships and not permitted to proceed to sea.

Procedure for Registration.—Sections 4 to 13. Registrars in United Kingdom and British possessions are the collectors and principal officers of Customs; in Crown Colonies, Governors. Application for registry and prior survey. Declaration of ownership by individuals and body-corporate. Penalty on builder for false certificate. No notice taken of trusts.

Certificate of Registry.—Sections 14 to 23. Certificates of Registry to be granted. Changes of owners and masters to be endorsed. Power to grant new certificate provided. Provision in case of loss. Provisional certificates to be delivered up. Custody of certificate. Delivery may be required under penalty for detention. Legal proceedings. Penalty for using improper certificate. Certificates of ships lost or ceasing to be British to be delivered up, etc. See also Section 52, Merchant Shipping Act, 1906.

Transfers and Transmissions.—Sections 24 to 30. Transfer of ships or shares therein. Declaration by transferee. Registration of transfer. Transmission of shares by death, bankruptcy, and marriage, with necessary proof. Unqualified owners entitled by transmission may apply to Court to sell ship. Power of Court to prohibit transfer.

Mortgages.—Sections 31 to 38. Mortgage of ship or share; mode of procedure. Entry of discharge of mortgage. Priority of mortgage in order of date. Mortgagee not treated as owner. Mortgagee to have power of sale. Mortgagee not affected by bankruptcy of mortgagor. Transfer of mortgages and mode of procedure. Transmission of interest in mortgage by death, bankruptcy, marriage, etc.

Certificates of Mortgage and Sale.—Sections 39 to 46. Powers of mortgage and sale may be transferred by certificate. Requisites for certificates of mortgage and sale. Restrictions on certificates of mortgage and sale. Forms of certificates of mortgage and sale to contain certain particulars. Rules as to certificates of mortgage and sale. Powers of Commissioners of Customs in case of loss or obliteration of certificate of mortgage or sale to issue new certificates. **Revocation of certificate of mortgage or sale by registered owner.**

Name of Ship.—Section 47. Rules as to name of ship, and any change of name.

Registry of Alterations, Registry Anew, and Transfer of Registry.—Sections 48 to 54. Registry of alterations to be made with registrar. Regulations for provisional certificate and endorsement by registrar where ship is to be registered anew provided for in certain cases. Registry anew on change of ownership may be made on application of owners. Transfer of registry provided for on application to registrar. Restrictions on re-registration of abandoned ships. See also Section 53, Merchant Shipping Act, 1906.

Incapacitated Persons.—Section 55. Provision for cases of infancy lunacy, or other incapacity.

Trusts and Equitable Rights.—Sections 56, 57. Notice of trusts not received or to be entered by registrar. Equities not excluded.

Liability of Beneficial Owner.—Section 58. Persons beneficially interested equally liable with managing owner to pecuniary penalties.

Managing Owner.—Section 59. Ship's managing owner or manager to be registered. Penalty for default.

Declarations, Inspection of Register, and Fees.—Sections 60 to 62. Power of registrar to dispense with declarations and other evidence. Mode of making declarations. Application of fees.

Returns, Evidence, and Forms.—Sections 63 to 65. Returns to be made by registrars. Power to inspect register book by public. Evidence of register book and certificate of registry and other documents. Forms of documents and instructions as to registry.

Forgery and False Declarations.—Sections 66, 67.—Forgery of documents deemed a felony. False declaration a misdemeanour.

National Character and Flag.—Sections 68 to 75. National character of ship to be declared before clearance. Penalty for unduly assuming British character. Concealment of British or assumption of foreign character a misdemeanour. Penalty for acquiring ownership by unqualified persons. Liability of ships not recognized as British. National colours for ships and penalty on carrying improper colours. Penalty on ships not showing colours, but registered fishing-boats excluded. Saving clause *re* powers of Admiralty.

Forfeiture of Ship.—Section 76. Proceedings on forfeiture of ship. See also Merchant Shipping Act, 1911.

Measurement of Ship and Tonnage.—Sections 77 to 87. Register tonnage to be ascertained by Rule I., Second Schedule to this Act, and the tonnage of every ship to which Rule I. can be applied, whether about to be registered or not, shall be ascertained by same rule. Ships which, requiring to be measured for purposes other than registry, have cargo on board, and ships which, for purpose of registry, cannot be measured under Rule I. shall be measured under Rule II. of the same Schedule, but such ships may be subsequently remeasured on owner's application, under Rule I. Tonnage regulations provided in Second Schedule to be subject to modification from time to time by Board of Trade. Allowance for engine-room space in steamships. Ships propelled by paddle wheels, where boilers and machinery space is above 20 and under 30 per cent. of gross tonnage, deduction shall be 37 per cent. of gross tonnage. Ships propelled by screws, where such space is above 13

and under 20 per cent. of gross tonnage, deduction shall be 32 per cent. of gross tonnage. Special provision in the case of all other ships. Space above crown of engine-room and above the upper deck framed in for machinery or for admission of light and air, shall not be included in propelling-power space, except owner requests the Board of Trade in writing, and shall not be included in pursuance of such request, unless (*a*) That portion is first included in measurement of gross tonnage; and (*b*) A surveyor certifies that it is duly constructed, safe, and seaworthy, and cannot be used for any other purpose. The following deductions shall be made in ascertaining register tonnage, viz.: In Sailing Vessels —any space set apart and used exclusively for storage of sails. In the case of any Ship—(1) Any space used exclusively for accommodation of master. (2) Any space used exclusively for working of the helm, capstan and anchor gear, or for keeping charts, signals, and other instruments of navigation, and boatswain's stores. (3) The space occupied by donkey-engine and boiler, if connected with the main pumps of the ship. These deductions are subject to provisions that the surveyor certifies as to their suitability and efficiency; that there must be permanently marked over every such space the purpose to which it is to be applied; and that the deduction on account of space for stowage of sails must not exceed 2½ per cent. of tonnage of ship. In screw steamships where an engine-room allowance of 32 per cent. of gross tonnage has been allowed on August 26, 1889, and where any crew space on deck has not been included in gross tonnage, whether its contents have been deducted therefrom or not, the crew space shall be, on the application of the owner or by direction of the Board of Trade, measured and added to register tonnage; and if it appears that with such addition the engine-room does not occupy more than 13 per cent. of the tonnage of the ship, the existing allowance for engine-room of 32 per cent. shall be continued. If the spaces between the inner and outer plating is certified by the surveyor to be not available for cargo stores or fuel, then depth required by Rule I. shall be taken to be the upper side of inner plating of double bottom, which is to be deemed the floor timber referred to in that rule. Tonnage once ascertained to be tonnage of ship. Fees for measurement not to exceed those provided in Third Schedule to Act. Where tonnage of any foreign ship materially differs from that which would be her tonnage under this Act, Her Majesty by Order in Council may direct that such ships may be remeasured in accordance with this Act. Space occupied by deck cargo to be liable to dues. How measurement of tonnage and space to be determined. Surveyors and regulations for measurement of ships to be under Board of Trade. See also Sections 54, 55, Merchant Shipping Act, 1906, and Merchant Shipping (Tonnage) Act, 1907, amending Section 78 of principal Act.

Ports of Registry in Place under Foreign Jurisdiction Act.—Section 88. Her Majesty may declare any port a port of registry by Order in Council, and appoint registrars, and make regulations as to registry.

Registry in Colonies.—Sections 89, 90. Powers of Governors in Colonies same as Commissioners of Customs. Terminable certificates of registry may be granted by Governor in cases of vessels under 60 tons burthen.

Application of Part I. of the Act.—Section 91. Applies to whole of Her Majesty's dominions, and wherever Her Majesty has jurisdiction.

PART II.—*Masters and Seamen.*

Certificated Officers.—Sections 92 to 104. Foreign-going ships and home trade passenger ships, before proceeding to sea from United Kingdom, must each have a master possessing an appropriate certificate of competency or service. In addition, a foreign-going ship must have the first and second mates, or only mate as the case may be, and in a home trade passenger ship the first or only mate, as the case may be, possessed of an appropriate certificate of competency or service. Ships of 100 tons burthen or upwards shall not go to sea unless at least one officer besides the master possesses a certificate as only mate, or one of a higher grade. Penalties for non-compliance and against persons for fraud. Certificates for foreign-going ships are available for home trade passenger ships. Authority of Registrar-General of Seamen as to granting, cancellation, and record of certificates and duplicates. See also Section 56, Merchant Shipping Act, 1906, Paragraph (*b*), Sub-Section (1). Sections 94 and 95 repealed by the Merchant Shipping (Certificates) Act, 1914.

Certificated Engineers.—Sections 92 to 104. Steamships to carry certificated engineers. A foreign-going steamship, if over 100 n.h.p., must have two engineers: the first possessing a first-class certificate, the second a second-class certificate, or one of a higher grade. Every foreign-going steamship of less than 100 n.h.p. shall have an engineer possessing a second-class engineer's certificate, or one of a higher grade. Every sea-going home trade passenger steamship must have as her only or first engineer an engineer possessing a second-class certificate, or one of a higher grade. Examinations for engineers' certificates of competency instituted under Board of Trade. Power of Board of Trade and Local Marine Boards to investigate charges of misconduct against engineers and cancel or suspend certificates. Colonial certificates of competency may be declared by Order in Council to be of equal force. Production of certificate of competency to superintendent on engagement of crew, and in the case of running agreements each voyage. Forgery or fraud in connection with certificates a misdemeanour.

Apprenticeship to the Sea Service.—Sections 105 to 109. Superintendents of Mercantile Marine to bind apprentices and charge fees. Indentures of boys bound by guardians or overseers of the poor to be witnessed by two justices. All indentures exempted from stamp duty. Execution must be in duplicate, and registration necessary at a Mercantile Marine Office within seven days after date. Assignments, desertions, cancellations, deaths, also to be reported. Apprentices to be brought before superintendent before each voyage in a foreign going ship, and indentures produced.

Licences to Supply Seamen.—Sections 110 to 112. Board of Trade may license persons to procure seamen. Penalty against unlicensed persons supplying seamen, £20; against employment of unlicensed persons, or receiving seamen illegally supplied, £20; for receiving remuneration from seamen for shipping them, £5.

Engagement of Seamen.—Sections 113 to 124. Masters of every ship, except of ships of less than 80 reg. tons employed in the coasting trade, must have agreements with their crews in the form sanctioned by the Board of Trade. Colonial ships may have agreements according to the law of their own possessions. All foreign-going British ships must have their agreements signed in the presence of a super-

intendent of Mercantile Marine. Agreements to be in duplicate, one copy being retained for Registrar-General of Seamen. Substitutes in the place of men who have signed, but have not kept their engagements from unforeseen causes, should, where practicable, be engaged at Mercantile Marine Office, but, if otherwise, should have the agreement read, and their signatures therein attested by a witness. Foreign-going ships making voyages averaging less than six months may have running agreements; those must expire on the next following 30th June or 31st December, or on first arrival at port of destination in United Kingdom after such date, or upon discharge of cargo consequent upon arrival. Changes in crew on these agreements must be made at Mercantile Marine Office. Indorsement on agreement by master, necessary that all such changes have been duly made, and penalty for false endorsement, £20. Home trade ships not compelled to sign agreements at Mercantile Marine Office, but the agreement must be duly read, and the signatures of the crew attested by a witness before vessel puts to sea, or as soon after as possible. Shipping a seaman without obtaining due execution of agreement, is an offence entailing penalty of £5 against master; like penalty provided against master or owner in case of a home trade ship. Changes in crews of foreign-going ships shall be reported by master before leaving United Kingdom, to nearest superintendent, under penalty of £5. Seamen engaged in Colonies to be shipped before shipping master or officer of Customs. Seamen engaged abroad must be shipped by the master before Consul, under penalty of £20. Certificates of competency or service of master and necessary officers must be produced at Mercantile Marine office on engagement, before outward clearance granted. Agreements of foreign-going ships to be delivered at Mercantile Marine Office within 48 hours after arrival in United Kingdom, or upon discharge of crew, whichever first happens. Certificate of delivery or inward clearance (BB) then granted; penalty provided for non-delivery. Home trade agreements not to extend beyond next following 30th June, or 31st December, or first arrival in United Kingdom after such dates, or on discharge of cargo consequent upon such arrival; home trade agreements to be delivered to superintendent within 21 days after the dates of each half-year above. Clearance then granted. In home trade passenger ships the production of the necessary certificates of master and officers also necessary. A penalty of £5 incurred for default. In foreign and home trade agreements alterations void unless attested and made with consent of all parties. Falsifying agreement a misdemeanour. Copy of agreement must be made and put where accessible to crew at commencement of voyage, under penalty against master of £5. Seamen discharged before voyage after signing agreement, entitled besides any wages earned, to compensation not exceeding one month's wages. Engagement of seamen in Colonial and foreign ports to be before superintendent or Consul, and endorsement of engagement to be made on agreement by official. Penalty, £5 on master for non-compliance.

Agreements with Lascars.—Section 125. Masters or owners may enter into an agreement with a Lascar or any other native of India, binding him either as a seaman or passenger to go to United Kingdom and back to British India; or to the Australian Colonies, and thence to any part of Her Majesty's dominions. Engagement to be in compliance with special laws and regulations of Indian Government then in force.

Rating of Seamen.—Section 126. No seaman entitled to rating of A.B. unless he has three years' service before the mast. Fishermen in decked fishing vessels registered under this Act may count up to the period of two years of that employment, but not entitled to rating of A.B. until one year's additional sea service is proven in a trading vessel. Service to be proved by certificates of discharge, or a certificate of service from Registrar-General of Seamen. See also Section 58, Merchant Shipping Act, 1906.

Discharge of Seamen.—Sections 127 to 130. Discharge of seamen in foreign-going ships to be before superintendent of Mercantile Marine. Master to deliver account of wages to each seaman. On discharge, master to give seamen certificates of discharge, and return certificates of competency or service to officers. Superintendent may decide questions referred to him by parties in disputes, his decision being final. Settlement of wages and signatures to release. Report on conduct and qualifications of seamen to be made by master. False or forged certificates of discharge a misdemeanour.

Payment of Wages.—Sections 131 to 139. The crews of foreign-going ships must be discharged and their wages paid at the Mercantile Marine Office. The wages must be paid within two days after the seamen leave the ship, exclusive of any Sunday or Bank Holiday. Each seaman is entitled on leaving ship to £2, or one-fourth of balance due to him, whichever is least. Twenty-four hours' notice of the time of discharging crew must be given at Mercantile Marine Office. The official log book and articles of agreement must be delivered to the superintendent within forty-eight hours after ship's arrival, or upon discharge of the crew. On the completion of the discharge the master will receive the inward clearance, or BB certificate. The wages of seamen absent at the time of paying off may be deposited at the Mercantile Marine Office. Seamen may be discharged on board on application at a fee of 1s. for each man, payable by master or owner. Masters of home trade ships may discharge seamen before superintendent. Masters to deliver wages' accounts to seamen twenty-four hours before paying off. Deductions from wages must appear in accounts, except in respect of matters happening after delivery. Deductions to be entered by master in a book during voyage, to be produced at time of discharge. Master of home trade ships to pay seamen their wages within two days after termination of agreement or at time of discharge, whichever first happens. Penalty for non-payment within proper time. Settlement of wages and signature to release to be final. Superintendent may settle questions as to wages on application of either party in foreign-going ship where amount does not exceed £5; if both parties agree in writing, superintendent may settle disputes, whatever amount. Power of superintendent to require production of ship's papers—penalty for non-compliance. Seamen paid wages in foreign money must receive current rate of exchange. See also Section 59, Merchant Shipping Act, 1906, *re* deductions from wages on disration. Also Section 60, Merchant Shipping Act, 1906, giving power to except claims from release on settlement of wages.

Advance and Allotment of Wages.—Sections 140 to 144. A seaman may insist on a stipulation in the agreement for the allotment of any part, not exceeding half, of his wages in favour of certain relatives. The allotment may be made in favour of the seamen's savings bank and paid into his account. The first payment to relatives or other persons shall begin at the end of a month except in the case of a savings

bank, when the first payment is made at the end of three months from signing agreement. Subsequent payments shall be made as agreed upon and stated in allotment note. Allotments issued to non-relatives cannot be recovered summarily at law. Remittances of allotment money may be paid by owners and agents to the relatives of seamen by means of seamen's money orders free of expense. Allotment forms may be had at the Mercantile Marine Office. Advance notes restricted to one month's wages. Right of suing on allotment notes and proof. Time for payment of allotment notes. See also Section 61, Merchant Shipping Act, 1906, making it obligatory to offer allotment notes. Also Section 62, Merchant Shipping Act, 1906, *re* time of payment. Section 144, Merchant Shipping Act, 1894, repealed. Under the Merchant Shipping (Seamen's Allotment) Act, 1911, which see, Section 141, Merchant Shipping Act, 1894, and Section 62, Merchant Shipping Act, 1906, are interpreted to allow an allotment note to be granted to a seaman providing for payment of a greater sum than one half of the wages, and payment at a period earlier than one month from the date of the agreement with the crew and at intervals more frequent than one month.

Seamen's Money Orders and Savings Banks.—Sections 145 to 154. Remittances of seamen's wages by seamen's money orders authorized. Power of Board of Trade to pay when orders lost. Penalty for issuing money orders with fraudulent intent. Power of Board of Trade to establish savings banks at Mercantile Marine Offices. National Debt Commissioners empowered to receive deposits—rate of interest. Application of deposits of deceased depositors. Expenses of banks to be defrayed out of interest. Accounts and copy of regulations *re* savings banks to be laid before Parliament. Public officers to be exempt from legal proceedings, except in cases of wilful default. Forgery of documents, etc., for purpose of obtaining money in savings banks, and punishment.

Rights of Seamen in respect of Wages.—Sections 155 to 163. Right to wages, when to begin. Right to recover wages and salvage not to be forfeited. Wages not to depend on freight. Wages on termination of service by wreck or illness. Wages not to accrue during refusal to work or imprisonment. Forfeiture of wages, etc., of seaman when illness caused by his own default. Costs of procuring imprisonment not exceeding £3 may be deducted from wages. Compensation provided for seamen improperly discharged. Restriction on sale of, and charge upon wages.

Mode of Recovering Wages.—Sections 164 to 167. Summary proceedings for wages authorized. Restrictions on suits for wages in superior courts where less than £50. Wages not recoverable abroad in certain cases, and where engagement to end in United Kingdom. Master has same remedies as seaman for recovery of wages, disbursements, etc.

Power of Courts to Rescind Contracts.—Section 168. In disputes between owners or masters and seamen power given Court to rescind contract.

Property of deceased Seamen.—Sections 169 to 181. Masters are bound within 48 hours of the arrival of any foreign-going or home trade ship in the United Kingdom to deliver to the superintendent of the Mercantile Marine Office the wages and effects of any seaman or apprentice who has died during the voyage, together with a proper account of them on the prescribed form, which may be obtained at that office. Even should no balance be due to seaman, the account must still

be made out, and the fact shown thereon. Deduction for funeral, hospital, or medical expenses cannot be made where seamen have died from injuries received in service of the ship. Claims to the wages and effects of deceased seamen must be made by the relatives or next-of-kin on forms to be had at the Mercantile Marine Offices. Letters of administration or probate will be required where the amount of the wages exceeds £50. Method of dealing with and accounting for wages and effects. Penalty for non-compliance. Effects of deceased seamen left abroad, but not on board ship. Property of deceased seamen may be dealt with by Consuls and officials abroad. Power of Board of Trade to recover wages, etc., of seamen lost with their ship. Wages and effects of seamen dying at home to be accounted for. Mode of payment over of property of deceased seamen by Board of Trade. Dealing with deceased seaman's property when he leaves a will. Claims by creditors. Unclaimed property of deceased seamen after lapse of six years to go to Mercantile Marine Fund. Forgery of documents, etc., for purpose of obtaining property of deceased seamen entails penal servitude or imprisonment. Property of seamen discharged from Royal Navy and dying in merchant ship to be dealt with as Accountant-General of Navy directs.

Reimbursement of Relief to Seamen's Families.—Sections 182, 183. Relief to seamen's families by Union or parish to be chargeable on certain portion of wages, viz. : If one member chargeable, one-half of wages; if two or more members, two-thirds of wages. Parochial authorities to give notice to owner of their claim that same may be retained from wages. Method of enforcing reduction.

Destitute Seamen.—Sections 184, 185. Penalties on masters of ships leaving seamen who are natives of Asia or Africa, or South Sea, or Pacific Islands in distress in the United Kingdom. Secretary of State for India empowered to relieve destitute Lascars and send them home. Parochial authorities to give India Office notice of claims for relief to Lascars and natives of India, which office has power to reimburse claimants.

Leaving Seamen Abroad.—Sections 186 to 189. Repealed by Merchant Shipping Act, 1906. See also Merchant Shipping (Mercantile Marine Fund) Act, 1898.

Distressed Seamen.—Sections 190 to 194. Repealed by Merchant Shipping Act, 1906 See also Merchant Shipping (Mercantile Marine Fund) Act, 1898.

Volunteering into the Navy.—Sections 195 to 197. Seamen allowed to leave their ships in order to enter the Navy. Money and effects of such seamen to be paid over by masters in manner laid down. Wages of such seamen have to be paid; loss sustained by masters engaging substitutes may apply to Admiralty for reimbursement. Forgery or fraud in connection with documents a misdemeanour.

Provisions, Health, and Accommodation.—Sections 198 to 210. Power of three or more of crew to make complaint and procure an official examination of provisions and water. Pecuniary allowance to seamen for short or bad provisions. Board of Trade to make regulations respecting medicines, anti-scorbutics, etc. Owners of ships to provide medicines and medical stores according to scale. Certain ships to be supplied with anti-scorbutics. Penalty for non compliance. Weights and measures to be kept on board ship under penalty. Inspection of medicines, medical stores, and anti-scorbutics provided. Medical inspection of seamen provided on application of owner or master. Appointment of Medical Inspectors by Board of Trade or

Local Marine Board. Appointment of Medical Inspector, and regulations as to supply of anti-scorbutics in Colonies. Inspection of provisions and water for crew provided in case of all ships going through Suez Canal, or round Cape of Good Hope or Cape Horn. Regulations and rules therefor to be made by Board of Trade. Expenses of medical attendance, etc., where master, seaman or apprentice hurt in service of ship to be defrayed by owner. Like expenses payable by owner where illness caused by bad provisions or water, or non-issue of medicines, medical stores, and anti-scorbutics. Recovery of expenses from owner. Ships carrying one hundred persons or upwards on board to carry a medical practitioner. Accommodation for each seaman or apprentice to be in space of not less than 72 cubic ft., and not less than 12 superficial ft. Such space to be free from goods and stores. Penalty for infraction. See also Section 25, Merchant Shipping Act, 1906. Sections 207 and 208 repealed by Merchant Shipping Act, 1906. Section 64, Merchant Shipping Act, 1906, increases space for crew.

Facilities for making Complaints.—Section 211. A seaman or apprentice desirous of making complaint against master or any of the crew, to have facilities for making same. Penalty for refusal.

Protection of Seamen from Imposition.—Sections 212 to 219. Assignment or sale of salvage invalid. Debts exceeding 5s. incurred by a seaman after engagement not recoverable until conclusion of service. Definition of powers of local authorities to license and inspect seamen's lodging-houses, and make bye-laws regulating. Penalty for overcharges by lodging-house keepers. Penalty for detaining seamen's effects. Penalty for solicitations by lodging-house keepers in cases of seamen within twenty-four hours of arrival in port. Penalty on unauthorized persons going on board ship on or after arrival. Application of last provisions to foreign ships to be by Order in Council.

Provisions as to discipline.—Sections 220 to 238. Misconduct of a master, seaman or apprentice endangering life or limb, and punishment. Desertion and absence without leave entails fine and forfeiture of wages, and in places out of the United Kingdom, imprisonment. Deserters may be conveyed on board ship. Provisions as to arrest and imprisonment applying out of the United Kingdom. Power of Court to order offender to be taken on board ship. General offences against discipline and punishment. Summary remedies not to affect other remedies for breach of contract, etc. Penalty entailed by seaman giving false statement as to ship or name. Entry of offences under Act to be made in official log. Entry of desertions abroad and certificates thereof. Register of deserters to be kept by superintendent of Mercantile Marine. Facilities for proving desertion in proceedings for forfeiture of wages. Application of forfeitures. Decision of questions of forfeiture and deductions may be determined in suits for wages. Ascertainment of amount of forfeiture out of wages. Deductions from wages and payment to superintendents, etc., of fines. Penalty for harbouring deserters or enticing to desert. Penalty—fine or imprisonment—on stowaways, who, with seamen carried under compulsion, are subject to discipline of ship. Powers of Her Majesty by Order in Council to recover and apprehend deserters from foreign ships. Harbouring or secreting deserters entails fine of £10. See also Section 28, Merchant Shipping Act, 1906. Section 235 principal Act, 1894, repealed. See also Section 82, Merchant Shipping Act, 1906, amending procedure in Scotland. Also Section 8, Merchant Shipping Act, 1906, *re* boat drill, and Section 12, Merchant Shipping (Convention) Act, 1914.

Official Logs.—Sections 239 to 243. Official log-books to be kept, and to be evidence. By whom entries to be signed. Entries of certain matters required in official log-book. Penalty for non-compliance. Destroying or mutilating or making false or fraudulent entries a misdemeanour. No entry to be made more than twenty four hours after arrival under fine of £30. Delivery of official log-books to superintendents compulsory. Official logs to be sent home in case of transfer of ship, and in case of loss of ship. Non-compliance and penalty, £10.

Local Marine Boards.—Sections 244, 245. Continuance and constitution of Local Marine Boards in manner specified in Seventh Schedule to Act. Control of Board of Trade over Local Marine Boards. See also Section 74, Merchant Shipping Act, 1906.

Mercantile Marine Offices.—Sections 246 to 250. Establishment and control of Mercantile Marine Offices by Board of Trade. Business of Mercantile Marine Offices. Embezzlement by officers of Loca Marine Boards and punishment. Power of Board of Trade to dispense with transactions of certain matters at Mercantile Marinel Offices. Prohibition on taking other than authorized fees at the Mercantile Marine Offices. See also Section 74, Merchant Shipping Act, 1906, repealing parts of Section 246, principal Act, 1894, and placing control of staff of Mercantile Marine Offices solely in Board of Trade.

Registration of and Returns respecting Seamen.—Sections 251 to 258. General Register and Record Office of Seamen to be maintained in London. Board of Trade to appoint Registrar-General of Seamen and all officers and servants thereat. Register of seamen to be kept. Lists of the crew to be made out and signed by master of foreign-going and home trade ships containing certain particulars. Lists of foreign-going ships to be delivered to superintendent within forty-eight hours after arrival at final port of destination; of home trade ships, within twenty-one days after June 30 and December 31 in each year. Penalty for non-compliance, £5. Return of births and deaths to be made and transmitted by master. List of crew to be made out and delivered up by owner or master in case of transfer or loss of ship. Penalty for non-compliance, £10. Transmission of lists and all documents to Registrar-General by superintendents and other officers. Deposit of agreement with crew, indentures and assignments of apprenticeship necessary at foreign and Colonial ports in the case of all British ships (excepting passenger ships) with chief officer of Customs or Consular officer within forty-eight hours after arrival. Penalty for non-compliance by master, £20.

Sites for Sailors' Homes.—Section 259. Corporations or other local public bodies empowered to grant sites for Sailors' Homes at any port in the United Kingdom and vest same in trustees.

Application of Part II. of the Act.—Sections 260 to 266. Part II. applies to ships registered in the United Kingdom, subject as hereinafter provided with respect to (*a*) Ships belonging to any of the three general lighthouse authorities; (*b*) Pleasure yachts; and (*c*) Fishing boats. Definition of what provisions apply to ships registered elsewhere than in the United Kingdom. Only partial application of Part II. to ships of lighthouse authorities and pleasure yachts—exemptions defined. Partial application of Part II. to fishing boats, and exemptions. Colonial Legislatures empowered to apply Part II. to Colonies. Unregistered ship deemed to be registered in United Kingdom for certain purposes. See also Merchant Shipping Act, 1906.

PART III.—*Passenger and Emigrant Ships.*

Definition of Passenger and Passenger Steamer.—Section 267. "Passenger" includes any person other than master and crew, and the owner, his family and servants. "Passenger steamer" every British steamship carrying passengers to, from, or between any place in the United Kingdom, except steam ferry boats working in chains (commonly called "steam bridges") and every foreign steamship carrying passengers between places in the United Kingdom.

Definition of Emigrant Ship.—Sections 268 to 270. Expression "Emigrant ship" defined to which this part of Act applies. Scale for determining length of voyages. Definition of Colonial voyage. See also Merchant Shipping Act, 1906.

Passenger Steamers.—Sections 271 to 284. Annual survey of passenger steamers compulsory. Mode of survey and declaration of survey. Transmission of survey declaration to the Board of Trade necessary. and penalty on owners for non-compliance. Issue of passenger certificate by Board of Trade. Appeal to Court of Survey provided for aggrieved owners. Transmission of passenger certificate by Board of Trade for issue. Fees for certificate payable as defined in Part I. of Ninth Schedule to Act. Duration of certificate. Power of Board of Trade to cancel certificate. Delivery up of certificate on expiration or cancellation, and penalty for failure. Passenger certificate to be posted up in conspicuous position in ship, and penalty for failure. Penalty for forgery or fraud in connection with passenger certificate or declaration. Penalty provided for carrying excess passengers. Colonial passenger certificate valid if approved by Order in Council. See also Sections 19 and 22, Merchant Shipping (Convention) Act, 1914.

General Equipment of Passenger Steamers.—Sections 285, 286. Equipment of passenger steamers with compasses, hose, deck-shelters, and safety appliances. Penalty provided for default. Prohibition of increasing weight on safety valve beyond fixed survey limits; penalty £100.

Keeping Order in Passenger Steamers.—Sections 287, 288. Offences in connection with passenger steamers by passengers and others, and penalties. Power given to exclude drunken passengers on home trade passenger steamers.

Survey of Emigrant Ships.—Section 289. Preliminary survey of emigrant ships necessary. Time of survey; and failure to comply with requirements punishable by law. See also Section 22, Merchant Shipping (Convention) Act, 1914.

Equipments of Emigrant Ships.—Section 290. Emigrant ship, to be equipped with certain compasses, chronometers, fire-engines, anchors, etc. Penalty for non-compliance.

Number of, and Accommodation for, Passengers.—Sections 291 to 294. Regulations as to carrying passengers generally. Limit of number of steerage passengers not to exceed number stated in regulations in Tenth Schedule to Act. Penalty for excess passengers. Regulations as to accommodation of steerage passengers to be in accordance with Eleventh Schedule to Act, and penalty for non-compliance. Stowage of goods debarred in certain places, and penalty for contravention. See also Merchant Shipping Act, 1906, repealing Section 291.

Provisions, Water, and Medical Stores.—Sections 295 to 300. Supply of provisions and water to be of good condition and quality. Extent

of supply and penalty for improper provision. Mode of carrying water defined—penalty for contravention. Provision may be made for touching at intermediate ports to take in water under certain conditions. Issue of water and provisions during voyage, and penalty for failure. Board of Trade may add to dietary scale by notices in *London Gazette*. Power of Board of Trade to exempt certain ships from this part of Act. Medical stores to be carried: penalty for failure. Section 299 repealed by Merchant Shipping Act, 1906.

Dangerous Goods, and Carriage of Cattle.—Sections 301, 302. Regulations as to carriage of dangerous goods, and of horses and cattle. Vessels not to clear outwards where cargo comes within Explosives Act, 1875, or certain other articles endangering health or life of steerage passengers, or with horses, cattle or other animals carried contrary to conditions of Thirteenth Schedule to Act. Penalty for breach. Carriage of military stores by order of Secretary of State, and penalty for refusal.

Medical Officer, Staff, and Crew.—Sections 303 to 305. A duly authorized medical practitioner shall be carried in an emigrant ship (*a*) where number of steerage passengers exceeds 50; and (*b*) where number of persons on board (including cabin passengers, officers, and crew) exceeds 300. Qualification of medical officer, and rating. With steerage passengers, certain stewards, cooks, and interpreters to be carried. Crew of emigrant ship to be efficient and passed by Emigration officer. Penalties for non-compliance. See Section 27, Merchant Shipping Act, 1906.

Medical Inspection.—Sections 306 to 308. Emigrant ship to be subjected to medical inspection of passengers and crew before clearance outwards; penalty for non-compliance. Relanding of persons for medical reasons; penalties for non-compliance. Return of passage money provided for persons relanded for medical reasons.

Master's Bond.—Sections 309, 310. Bond to be given by master of an emigrant ship before clearance. Evidence of bond.

Passengers' Lists.—Sections 311 to 313. List of all passengers in duplicate to be given where ship carries steerage passengers before clearance. Penalty for non-observance. Separate list of passengers embarked after clearance to be rendered under penalty. Attempt to gain passage without payment, and penalty.

Certificate of Clearance.—Sections 314 to 319. Certificate for clearance of emigrant ship to be issued by Emigration officer. Facilities to be given for the inspection of ships, and penalty for failure. Ships putting back to replenish stores, provisions, etc., to be re-examined and obtain clearance certificate in certain cases; penalty for non-compliance. Emigrant ships putting back to be reported to Emigration officer; penalty on master for failure. Appeal to Court of Survey provided for aggrieved owner. Forfeiture of ship proceeding to sea without certificate for clearance.

Passengers' Contracts.—Sections 320 to 323. Contract tickets for passengers to be provided; penalty for failure to comply. Summary remedy for breach of contract. Penalty on passengers failing to produce contract tickets. Penalty for altering or inducing anyone to part with contract ticket.

Regulations as to Steerage Passengers.—Sections 324 to 326. Subject to sanitary and other regulations by Order in Council. Discipline

on board to be maintained and penalties for breach. Sale of spirits to steerage passengers forbidden on board, and penalty for contravention.

Maintenance after Arrival.—Section 327. Steerage passengers to be maintained on board forty-eight hours after arrival in port at end of voyage.

Detention and Wrongful Landing of Passengers.—Sections 328 to 330. Return of passage money and compensation to passengers when passage not provided according to contract. Subsistence money to passengers in case of detention. Penalty for landing steerage passengers at wrong place. See also Merchant Shipping Act, 1906

Provisions in case of Wreck.—Sections 331 to 335. Provisions for passengers in case of an emigrant ship being wrecked or damaged in or near British Islands. Expenses of rescue and conveyance of wrecked passengers. Provision for forwarding of passengers by Governors or Consuls. Receiving of expenses incurred in conveying wrecked passengers from owner, charterer, and master. Validity of insurance of passage money.

Voyages to the United Kingdom.—Sections 336 to 338. Lists of steerage passengers to be brought to British Islands. Number of steerage passengers on ships bringing steerage passengers to British Islands and penalty for excess. Issue of provisions and water in ships carrying steerage passengers to British Islands, and penalty for non-compliance.

Registration of Births and Deaths.—Section 339. Application to foreign ships carrying passengers to and from British Islands of provisions of Part II. *re* Births and Deaths.

Saving of Right of Action.—Section 340. Saving of right of action to steerage passenger or other person on contract for passage.

Passage Brokers.—Sections 341 to 346. Definition of passage broker. Passage brokers to enter into bond and obtain licence. Granting of licences to passage brokers. Forfeiture of licence by Court. Passage broker agents to hold appointments and penalty for non-compliance. Lists of agents and runners to be exhibited by brokers and sent to Emigration officers. Penalty for non-compliance.

Emigrant Runners.—Sections 347 to 352. Emigrant runners defined. Emigrant runner's licence and regulations. Renewal of badges provided. Penalties on persons acting without licence or badge, using badge not lawfully issued, or employing unlicensed persons. Penalties on emigrant runners for certain acts of misconduct. Emigrant runner's commission and fees and penalties for unauthorized charges on steerage passengers.

Frauds in procuring Emigration.—Sections 353, 354. Punishment for frauds in procuring passages. Penalties for fraud in connection with assisting emigration. Section 353 repealed by Merchant Shipping Act, 1906.

Emigration Officers.—Section 355. In British Islands to be appointed by Board of Trade and in British possessions by Governor.

Legal Proceedings.—Sections 356 to 358. Recovery of fines under this Part of Act. Recovery of passage and subsistence money. Compensation and damages may be had in Court of Summary Jurisdiction. Protection of persons executing Act.

Supplemental.—Sections 359 to 363. Owner responsible for default in absence of any agreement. Forms and fees to be as defined in Fourteenth Schedule to Act. Fees for survey of emigrant ships to be as defined in Ninth Schedule to Act. Board of Trade may prepare abstracts of Part III. of Act to be posted in emigrant ships; penalty for failure. Bye-laws *re* emigrant ships by harbour authority. Exemption from survey of foreign passenger steamer or emigrant ship in certain cases where Board of Trade satisfied.

Application of Part III. as regards Emigrant Ships.—Sections 364 to 368. Provisions of this Part of Act respecting emigrant ships to voyages from British Islands to any port out of Europe, and not within Mediterranean Sea. Limited application of Part III. of Act to Colonial voyages exempting certain matters. Modification of Provisions of Part III. in their application to British possessions where proclamation dealing with certain matters made by Governors. Powers of Governors of Colonies as to number of steerage passengers. Power for Legislature of India to apply Part III.

PART IV.—*Fishing Boats.*

Application of Part IV.—Sections 369 to 372. Application of Part IV. partly to—(*a*) All fishing boats and to the whole fishing service; and (*b*) to all fishing boats of twenty-five tons and upwards; and (*c*) to fishing trawlers of twenty-five tons and upwards, and where provided, to fishing trawlers of whatever tonnage. Definition of "fishing boats," second hands, and "voyage." Ascertainment of tonnage of fishing boat. Part IV. not to apply to Scotland, except where expressly provided.

Provisions applying to all Fishing Boats, and to whole Fishing Service, Fishing Boats' Register.—Sections 373 to 375. Registry of British fishing boats. Effect of registry of fishing boats with respect to offences, etc. Rules as to boats and life-buoys to be in accordance with Fifteenth Schedule to Act. Penalty for default.

Discipline.—Sections 376 to 384. Offences by seamen and apprentices in the fishing service and punishment. Civil rights unaffected by criminal provisions. Application of fines and forfeitures to consolidated fund. Deserters and others may be sent back to their boats. Provision for apprehension of seamen or apprentices guilty of certain offences. Arrest of seamen or apprentices who refuse to proceed to sea. Certain notice may be given by seaman that he intends to absent himself. Mode of calculation of wages. Facilities for proving desertion so far as concerns forfeiture of wages.

Provisions as to Deaths, Injuries, Ill-treatment, Punishments, and Casualties in Fishing Boats.—Sections 385, 386. Record to be kept and sent to superintendent. Inquiry as to death, injury, ill-treatment, punishment, etc., by superintendent.

Settlement of Disputes.—Section 387. Decision of disputes by superintendent to be final, and enforceable by Justices' order.

Provisions for ascertaining Profits of Fishing Boats.—Section 388. Accounts to be rendered by owners under penalty.

Agreements for Fishing Vessels in Scotland.—Section 389. Agreements for fishing vessels in Scotland for payment by share only to apply to that country.

Fees and Control by Superintendents.—Sections 390, 391. Fees payable on engagements and discharges of crews of fishing boats. Control of Board of Trade over superintendent.

Provisions applying to all Fishing Boats of Twenty-five tons and upwards.—Sections 392 to 398. Restriction on apprenticeships and agreements in case of boys under thirteen. Boys to be properly apprenticed, or have proper agreements under Act. Penalties. Assistance by superintendents in apprenticeships and agreements. Apprenticeships and agreements with boys to be made before superintendent. Enforcement by superintendent of indentures or agreements. Powers of superintendent to execute provisions of indentures or agreements. Prohibition and penalty on taking money for apprenticeship and boys' agreements.

Provisions applying to Trawlers.—Sections 399 to 408. Engagement of seamen. Agreements with crew provided for in forms sanctioned by the Board of Trade. Statement of change in crew to be rendered in case of running agreements. Alterations, etc., in agreements to be attested. Offences as to agreements with crew and penalties.

Payment of Wages and Discharge of Seamen.—Sections 409 to 412. Account of wages to be rendered to each seaman. Certificate of discharge to be issued. Compensation provided for seamen improperly discharged. Provisions as to discharge and payment of wages to apply in the case of any sort of agreement.

Certificates of Skippers and Second Hands.—Sections 413 to 416. Skippers and second hands to hold certificates of competency. Granting of certificates of competency by Board of Trade. Certificates of service to be issued in certain cases. Register of certificates to be kept as Board of Trade direct. See also Section 81, Merchant Shipping Act, 1906, extending application to Scotland.

Conveyance of Fish from Trawlers.—Section 417. Board of Trade empowered to make regulations as to conveyance of fish from trawlers.

PART V.—*Safety.*

Prevention of Collisions.—Sections 418 to 424. Regulations for prevention of collisions at sea may be made by Order in Council, also to be observed by foreign ships within British jurisdiction. Observance of collision regulations by owners and masters of ships. Inspection as to lights and fog signals by Board of Trade, saving for local rules of navigation in harbours, etc. Duty of vessel to assist the other in collision; failure a misdemeanour. Collisions to be entered in the official log; penalty for non-compliance. Application of collision regulations to foreign ships. See Order in Council of October 13, 1910, consolidating the collision regulations and applying them, with certain reservations, to foreign ships. See also Maritime Conventions Act, 1911, as it affects Sections 419 and 422.

Report of Accidents and Loss of Ship.—Section 425, 426. Report to Board of Trade of accidents to steamships applies to all British ships and to foreign steamships carrying passengers between places in United Kingdom: penalties. Notice of loss of British ship to be given to Board of Trade.

Life-saving Appliances.—Sections 427 to 431. Rules as to life-saving appliances and classification of ships by Board of Trade—fishing boats duly registered exempted. Duties of owners and masters

as to life-saving appliances. Appointment by Board of Trade of consultative committee for framing rules in accordance with Seventeenth Schedule to Act. Penalty for breach of rules. Survey of ship with respect to life-saving appliances. See also Section 4, Merchant Shipping Act, 1906, *re* Application to Foreign Ships, and Sections 11, 12, and 27, Merchant Shipping (Convention) Act, 1914.

General Equipment.—Sections 432, 433. Adjustment of compasses and provision of hose in British sea-going steamships; penalty for default. Placing undue weight on safety valve; penalty.

Signals of Distress.—Sections 434, 435. Signals of distress to be regulated by Order in Council. Provisions for signals of distress, inextinguishable lights, and lifebuoys, in seagoing passenger steamships and emigrant ships: penalties. See Order in Council of October 13, 1910. See also Section 6, Merchant Shipping (Convention) Act, 1914.

Draught of Water and Load-line.—Sections 436 to 445. Ship's draught of water to be recorded on departure under penalty. Deck lines to be marked on all British ships. Ships under 80 tons register in coasting trade, fishing vessels, pleasure yachts, and ships employed solely in rivers and inland waters exempted. Mark of load-line on all British, excepting coasting vessels under 80 tons register, fishing vessels and pleasure yachts. Ships with submerged load-lines deemed unsafe. Time and regulation for marking load-line in case of foreign-going ships. Time, etc., for marking load-line in case of coasting vessels; penalty for default. Rules as to load-line under regulations of Board of Trade. Provision as to Colonial ships with respect to load-lines. Provisions as to foreign ships with respect to load-lines. See also Section 7, Merchant Shipping Act, 1906, enacting that coasting steamers are not exempted from load-line provisions. Also Section 8 *re* extension of provisions as to time of marking load-line. Also Section 8 *re* alteration of load-line marks abroad. Section 451, Merchant Shipping Act, 1894, repealed, *vide* Section 10, Merchant Shipping Act, 1906.

Dangerous Goods.—Sections 446 to 450. Restrictions on carriage of certain dangerous goods in British or foreign vessels. Penalty for misdescription of dangerous goods. Power to deal with goods suspected of being dangerous. Forfeiture of dangerous goods improperly sent or carried. Saving for other enactments relating to dangerous goods.

Loading of Timber.—Section 451. Deck cargoes of wood goods forbidden on British or foreign vessels arriving between last day of October and April 16 in any year. Qualifications and penalties.

Carriage of Grain.—Sections 452 to 456. Obligation to take precautions to prevent grain cargo from shifting. Notice by master to be delivered of kind and quantity of grain cargo. Power of Board of Trade to enforce provisions. Definitions of grain. [The Board of Trade approve of the regulations made by the following bodies, viz.: (1) Rules of the Board of Underwriters of New York; (2) Rules of the National Board of Marine Underwriters of New York (3) Rules of the New Orleans Board of Underwriters; (4) Rules and Regulations of the Wheat Tariff Association at San Francisco for ships carrying wheat in bulk; (5) Regulations for the loading of grain cargoes (wholly in bulk) at San Francisco; (6) Revised rules and bye-laws of the Port Warden of Montreal. The Board of Trade, independently of

these regulations, require:—(*a*) That shifting boards must extend to keelson; (*b*) That there shall not be carried below the decks, or if the ship has more than two decks between the main and upper decks, any grain in bulk, except what may be necessary for feeding cargo in hold, and is carried in properly constructed feeders; (*c*) That grain carried in bulk must be supplied by proper feeders, or else secured by bags of grain or other cargo.] See Section 3, Merchant Shipping Act, 1906, *re* Foreign ships loading after October 1, 1907. See also Section 11, Merchant Shipping Act, 1906, limiting fine under Section 452, principal Act, to £100.

Unseaworthy Ships.—Sections 457 to 463. Sending unseaworthy ship to sea a misdemeanour. Obligations of shipowner to crew with respect to use of reasonable efforts to secure seaworthiness. Power to detain unsafe ships and procedure for detention. Liability of Board of Trade in case of wrongful detention. Liability of owners. Power to require from complainant security for costs. Exemption from finding security in case of seamen complaining if one-fourth of crew and not less than 3. Application to foreign ships of provisions as to detention, and modifications. Survey of ships alleged by seamen to be unseaworthy, if number complaining equal one-fourth of crew, or if their number exceeds 20 by not less than 5; regulation and procedure *re* survey. See also Merchant Shipping (Undermanning) Act, 1897, and Section 8, Merchant Shipping (Convention) Act, 1914.

PART VI.—*Special Shipping Inquiries and Courts.*

Inquiries and Investigations as to Shipping Casualties.—Sections 464 to 468. Shipping casualties defined. Preliminary inquiry; formal investigation. List of assessors. [Shipping Casualties Rules, issued by the Lord Chancellor, came into force April 1, 1895. The interpretation of the terms " investigation," " judge," " list of assessors," and " Court of Appeal " is defined. Board of Trade, on investigation being ordered, may cause notice to be served upon owner, master, and officers of ship, as well as upon any person who in their opinion ought to have notice. Notice should contain a statement of the questions which it is intended to raise on hearing of investigation. Board of Trade and any certificated officer upon whom notice is served to be deemed parties to the proceedings. Any other person upon whom a notice has been served, and any person who shows that he has an interest in the proceedings, shall have the right to appear. Notices to admit or produce documents provided for. Proceedings in court regulated. Examination of witnesses provided for—after which Board of Trade in open court to state questions in reference to casualty, and the conduct of certificated officers or other persons upon which opinion of court desired. Each party to investigation entitled to address the court and produce witnesses. When certificate of an officer is cancelled or suspended the decision must be in open court. In other cases judge may deliver decision either *viva voce* or in writing. Power of judge to order payment of costs by Board of Trade or any other party. Judge bound to report result to Board of Trade. When certificate of master, mate or engineer, cancelled or suspended, the Board of Trade on application to give copy of report to any party to proceedings. Appeals to Probate Division and Admiralty Division of High Court provided for. Regulations as to hearing of appeal and provision for assistance of two assessors. Assessors to be Elder Brethren of Trinity House or elected from persons

approved by Secretary of State as assessors for shipping casualties under Sections 466 and 467 of Act, 1894. Re-hearings by order of Board of Trade provided for under Section 475 or 478 of Act, 1894. Assessors for investigation into shipping casualties to be appointed from list made by Secretary of State. When investigation involves the cancelling or suspension of the certificate of a master, mate or engineer, two assessors shall be appointed from Class I. and Class II. or from either of those classes. Following rules to apply: (1) When investigation involves cancelling or suspension of certificate of a master or mate, but not of an engineer, at least two assessors shall be appointed from Class I. (2) Where investigation involves cancelling or suspension of the certificate of a master or mate of a sailing ship, one at least of the assessors shall be appointed from Sub-section (*a*) of Class I.; and where the investigation involves the cancelling or suspension of the certificate of a master or mate of a steamship, one at least of the assessors shall be appointed from Sub-section (*b*) of Class I. (3) Where investigation involves the suspension or cancellation of the certificate of an engineer, one at least of the assessors shall be appointed from Class II. Board of Trade to inform Secretary of State when assessors are required, and from which class to be appointed. Copy of these rules shall be kept at every Custom House and Mercantile Marine Office in the United Kingdom, and any person desiring to peruse them is entitled to do so.]

Power as to Certificates of Officers.—Sections 469 to 474. Power of Board of Trade to cancel or suspend certificates. Power of court of investigation or inquiry as to certificates. Inquiry as to conduct of certificated officers, and mode of procedure and hearing. Removal of master by Admiralty Court. Delivering up of certificate cancelled or suspended. Penalty. Power of Board of Trade to restore certificate.

Rehearing of Investigations and Inquiries.—Section 475. Re-hearing of investigations and inquiries in certain cases may be ordered.

Supplemental Provisions as to Investigations and Inquiries.—Sections 476 to 479. Investigations and inquiries before stipendiary magistrates at certain places. Power of Lord Chancellor to appoint Wreck Commissioners. Authority for Colonial court to make investigations into shipping casualties and inquiries into conduct of officers. General rules as to investigations and inquiries.

Naval Courts on the High Seas and Abroad.—Sections 480 to 486. Cases in which naval courts may be summoned. Constitution of naval courts. Functions of naval courts. Powers of naval courts defined. Report of proceedings of naval courts to Board of Trade. Penalty for preventing complaint or obstructing investigation. Application of provisions of Act as to naval courts. See also Sections 6 and 7, Merchant Shipping Act, 1906, *re* Power of naval court to send a person sentenced to imprisonment home to undergo sentence. See also Section 68 (2), Merchant Shipping Act, 1906, as to appeal from decision of naval courts.

Courts of Survey.—Sections 487 to 489. Constitution of Court of Survey for ports and districts. Judge with two assessors necessary. Procedure, etc. Power of Court of Survey. Rules for procedure of Court of Survey, etc.

Scientific Referees.—Section 490. Board of Trade have power to appoint scientific referees on Courts of Survey in certain cases.

Payments to Officers of Court.—Section 491. Payments to officers of Courts provided.

PART VII.—*Delivery of Goods and Lien for Freight.*

Sections 492 to 501. Definitions of expressions under Part VII. Power of shipowner to enter and land goods on default of owner of goods. Lien for freight on landing of goods. Discharge of lien. Provisions as to deposits by owners of goods. Sale of goods by warehousemen where lien not discharged. Application of proceeds of sale. Warehousemen's claim to rent and expenses. Warehousemen's protection *re* charge of goods. Saving for powers under local Acts.

PART VIII.—*Liability of Shipowners.*

Sections 502 to 509. Limitation of shipowner's liability in certain cases of loss of or damage to goods. Limitation of owner's liability in certain cases of loss of life, injury or damage. In loss of life or personal injury an aggregate not exceeding £15 for each ton of ship's gross tonnage. In respect of loss of or damage to vessels, goods and merchandise, an aggregate not exceeding £8 per ton of gross tonnage. In sailing vessels, tonnage to be deemed registered tonnage. Power of courts to consolidate claims against owners. Loss or damage may be brought into account among part owners. Insurance of certain risks not invalid. Proof of passengers on board ship from passengers' lists. Liability of master and seaman in such capacity not affected. This part of Act extends to all Her Majesty's dominions. See Section 71, Merchant Shipping Act, 1906, *re* liability of charterers. See also Section 69, Merchant Shipping Act, 1906, *re* ascertainment of registered tonnage. See also Section 72, Merchant Shipping Act, 1906, *re* delivery of wreck to Receiver. See also Merchant Shipping Act, 1911, which affects Section 504.

PART IX.—*Wreck and Salvage.*

Vessels in Distress.—Sections 510 to 517. Definition of wreck and salvage. Duty of Receiver where vessel in distress. Penalty for disobeying Receiver. Powers of the Receiver in case of vessels in distress. Power to pass over adjoining lands. Power of Receiver to repress plunder and disorder by force. Penalties. Liability for damage in case of a vessel plundered. Exercise of powers of Receiver in his absence. Examination in respect of ships in distress.

Dealing with Wreck.—Sections 518 to 522. Provisions as to wreck found in the United Kingdom and penalties. Penalty for taking wreck at time of casualty. Notice of wreck to be given by Receiver. Claims of owners to wreck. Immediate sale of wreck by Receiver in certain cases.

Unclaimed Wreck.—Sections 523 to 529. Right of Crown to unclaimed wreck. Notice of unclaimed wreck to be given to persons entitled. Disposal of unclaimed wreck. Disputed title to unclaimed wreck to be settled same as salvage disputes. Delivery of unclaimed wreck by Receivers not to prejudice title. Power of Board of Trade to purchase rights to wreck. Naval officers not to interfere with wreck.

Removal of Wrecks.—Sections 530 to 534. Removal of wreck by harbour or conservancy authority provided. Power of lighthouse authority to remove wreck. Power of removal to extend to tackle, cargo, etc. Power of Board of Trade to determine certain questions between lighthouse and harbour or conservancy or other authorities. Powers of these authorities to be cumulative. See also Merchant Shipping (Mercantile Marine Fund) Act, 1898.

Offences in respect of Wreck.—Sections 535 to 537. Taking wreck to foreign ports and selling same a misdemeanour. Interfering with wrecked vessel or wreck and penalty. Summary procedure against persons for concealment of wreck.

Marine Store Dealers.—Sections 538 to 542. Marine store dealer to have his name and trade painted on his shop, and to keep proper books. Penalties for non-compliance. Marine store dealer not to purchase from any person under sixteen; not to cut up cable without written permit from Justices. Penalties. Permits to be advertised before dealer acts thereon. Penalty for failure.

Marking of Anchors.—Section 543. Marking of anchors by maker with name or initials and weight. Penalty for failure.

Salvage.—Sections 544 to 546. Salvage payable for saving life. Provisions for payment of salvage of life from foreign vessels. Payment to salvors for salvage of cargo or wreck.

Procedure in Salvage.—Section 547 to 556. Determination of salvage disputes and courts. Determination of disputes as to salvage summarily. Appeals in cases of salvage disputes. Arbitration in Ireland and appointment. Valuation of property by Receiver. Detention of property liable for salvage by Receiver. Sale of detained property by Receiver. Agreement as to salvage. Apportionment of salvage under £200 by Receiver to be final. Apportionment of salvage by Admiralty Courts.

Salvage by Her Majesty's Ships.—Sections 557 to 564. Salvage by Her Majesty's ships. Claim to have consent of Admiralty. Salvage by Her Majesty's ships abroad. Provisions as to bond for payment of salvage services. Execution and enforcement of bond. Saving for other salvage rights. Exemption of documents from stamp duty. Punishment for forgery and false representations.

Jurisdiction of High Court in Salvage.—Section 565. Jurisdiction of High Court, and in Scotland Court of Session in claims as to salvage.

Appointment of Receivers of Wreck.—Section 566. Appointment to be by Board of Trade in the United Kingdom.

Fees of Receivers of Wreck.—Section 567, 568. Receivers' fees to be in accordance with Twentieth Schedule to Act. Remuneration for services by coastguard to be according to Board of Trade scale.

Duties on Wreck.—Section 569. Revenue duties on wrecked goods.

Supplemental.—Sections 570, 571. Powers of Sheriffs in Scotland equivalent to those of Justices of the Peace. Jurisdiction of Lord Warden of Cinque Ports not affected by this part of Act.

Part X.—*Pilotage.*

Sections 572 to 632. Repealed by Pilotage Act, 1913, *q.v.*

Saving for Liability of Owners or Masters.—Section 633. Owners and masters not answerable for loss or damage occasioned by fault or incapacity of pilot in districts where pilotage is compulsory by law. See Section 15, Pilotage Act, 1913.

Part XI.—*Lighthouses.*

General Management.—Sections 634 to 637. Management of lighthouses, buoys, and beacons, etc., to be vested: (*a*) Throughout England and Wales, Channel Islands, and the adjacent seas and islands, and at Gibraltar in the Trinity House; (*b*) throughout Scotland, and the adjacent seas and islands, and the Isle of Man in the Commissioners of Northern Lighthouses; and (*c*) throughout Ireland and the adjacent seas and islands in the Commissioners of Irish Lights. Property vested in lighthouse authorities. Returns and information to be rendered to Board of Trade. Power of Board of Trade to inspect on complaint made. Power of Trinity House to inspect at all times. See also Merchant Shipping (Mercantile Marine Fund) Act, 1898.

Construction of Lighthouses, etc.—Sections 638 to 642. General powers of lighthouse authorities defined. Powers as to the sale, taking and purchasing of land. Restrictions on exercise of lighthouse powers of Commissioners of Northern Lighthouses and Commissioners of Irish Lights. Schemes to be submitted to Trinity House and Board of Trade. Power of Trinity House to direct lighthouse works to be done. Provisions for additions to lighthouses.

Light Dues.—Sections 643 to 646 repealed by Merchant Shipping (Mercantile Marine Fund) Act, 1898, Sections 647 to 651. Publication of light dues and regulations to be made through Commissioners of Customs. Application of light dues to the Mercantile Marine Fund and collection thereof. Recovery of light dues and persons liable. Distress on ship provided where non-payment of light dues. Receipt for light dues to be issued.

Local Lighthouses.—Sections 652 to 657. Local lighthouses to be subject to inspection of general lighthouse authorities, and give returns and information. Control of local lighthouse authorities by general lighthouse authorities. Surrender of local lighthouses, etc, if local authority think fit, to general lighthouse authority by purchase or otherwise subject to the consent of the Board of Trade. Light dues for local lights to be fixed by Order in Council. Application of local light dues, and returns to Board of Trade. Power to reduce local light dues by local authority subject to consent of Her Majesty in Council.

Expenses of General Lighthouse Authorities.—Sections 658 to 665. Payment of lighthouse expenses out of Mercantile Marine Fund. Establishments of general lighthouse authorities to be in accordance with Order in Council, no increase without consent of Board of Trade. Estimates or accounts of expenses to be sent to the Board of Trade. Advances for lighthouse expenses by Treasury on application to Board of Trade. Board of Trade may mortgage Mercantile Marine Fund for lighthouse expenditure. Advances may be made by Public Works Loan Commissioners upon mortgage of Mercantile Marine Fund. Accounts of receipts and expenditure of general lighthouse

authorities to be rendered Board of Trade. Power to grant pensions to staff of general lighthouse authorities on discharge or retirement subject to sanction of Board of Trade.

Offences in Connection with Lighthouses, etc.—Sections 666, 667. Injuries to lighthouses, etc., and penalty. Prevention of false lights, etc., and penalties.

Commissioners of Northern Lighthouses.—Section 668. Incorporation of Commissioners of Northern Lights and constitution of body corporate.

Provision as to Channel Islands.—Section 669. Restriction on exercise of powers of Trinity House in Guernsey or Jersey which are not to be exercised without consent of Her Majesty in Council. Dues for lights, etc., in Guernsey, Jersey, Sark, or Alderney not to be taken without consent of the States of Jersey or Guernsey.

Lighthouses, etc., in Colonies.—Sections 670 to 675. Colonial light dues to be paid on approval of Her Majesty by Order in Council. Collection and recovery of Colonial light dues to be same as in United Kingdom. Payment of Colonial light dues to be made to Paymaster-General. Advances for construction and repair of Colonial lighthouses, etc., may be made by Board of Trade. Accounts of Colonial light dues to be kept as Board of Trade require. See also Merchant Shipping (Mercantile Marine Fund) Act, 1898, repealing Section 673, principal Act.

PART XII.—*Mercantile Marine Fund.*

Sections 676 to 679. Sums payable to the Mercantile Marine Fund set forth. Application of Mercantile Marine Fund. Accounts of fund to be deemed public accounts, and to be annually presented to Parliament by Board of Trade. See also Merchant Shipping (Mercantile Marine Fund) Act, 1898.

PART XIII.—*Legal Proceedings.*

Prosecution of Offences.—Sections 680 to 683. Prosecution of offences and application of Summary Jurisdiction Acts. Appeal from summary conviction in England when fine exceeds £5. Limitation of time for summary proceedings. See also Section 82, Merchant Shipping Act, 1906, applying provisions to Scotland.

Jurisdiction.—Sections 684 to 687. Provision as to jurisdiction. Jurisdiction over ships lying off the coast. Jurisdiction in case of offences on board ship. Offences committed by British seamen at foreign ports to be within Admiralty jurisdiction.

Damage occasioned by Foreign Ship.—Section 688. Power to arrest foreign ship that has occasioned damage when found within three mile limit of coast of United Kingdom.

Provisions in case of Offences abroad.—Sections 689 to 691. Conveyance of offenders and witnesses to United Kingdom or British possessions in offences against property or person. Power of Consular officers. Duties of masters conveying offenders. Penalty on master for refusal to convey offenders or witnesses. Inquiry into cause of death on board ships by superintendents, except—(1) in Scotland, to fishing

boats; (2) Colonial ships within their own jurisdiction; and (3) pleasure yachts or ships belonging to any of three general lighthouse authorities. Deposition to be received in evidence when evidence cannot be produced—with certain restrictions.

Detention of Ship and Distress on Ship.—Sections 692, 693. Enforcing detention of ship, and penalty for proceeding to sea. Penalty for proceeding to sea with detaining officer, etc. Clearance and transire may be refused. Sums ordered to be paid, leviable by distress on ship. See also Merchant Shipping (Stevedores) Act, 1911

Evidence, Service of Documents, and Declarations.—Sections 694 to 698. Proof of attestation from attesting witness of document not required. Admissibility of documents in evidence and regulations. Service of documents, and penalty for obstructing. Proofs, etc., of exemption. Declaration may be before a Commissioner for Oaths.

Application of Penalties and Costs of Prosecutions.—Sections 699 to 701. Application of penalties. Expenses of prosecution of misdemeanour. Payment of costs of prosecution of offences committed in Admiralty jurisdiction.

Procedure in Scotland.—Sections 702 to 710. Offences punishable as misdemeanours and tribunals. Summary proceedings to be before Sheriff or two Justices, and powers of Court. Form of complaint. Warrant on summary proceedings. Backing arrestments. Form of decree for payment of money. Sentence and penalties provided for in default of defender's appearance. Orders not to be quashed for want of form, and to be final. General rules, so far as applicable, to extend to penalties and proceedings in Scotland. See also Section 82, Merchant Shipping Act, 1906.

Prosecution of Offences in Colonies.—Section 711. Prosecution of offences in British possessions punishable by Court or magistrate by whom offences of a like character are ordinarily punishable.

Application of Part XIII.—Section 712. Applies to whole of Her Majesty's dominions, except where otherwise provided.

Part XIV.—*Supplemental.*

General Control of Board of Trade.—Sections 713 to 717. Board of Trade authorized as department to superintend all matters relating to merchant ships and seamen, and to put into execution Shipping Acts. Returns as to merchant shipping to be rendered to Board of Trade by officials. Production of official log-books and other documents by superintendents to Board of Trade on demand. Application of fees, fines, etc. Legal proceedings may be taken by Board of Trade in name of any of its officers.

Expenses of Commissioners of Customs.—Section 718. Expenses of Commissioners to be charged to revenue of Customs. Power of Board of Trade to repay out of Mercantile Marine Fund.

Documents and Forms.—Sections 719 to 722. Proof of documents. Power of Board of Trade to prescribe forms. Certain documents exempted from stamp duty. Offences as to use of forms or fraud or forgery in connection therewith.

Powers for Enforcing Compliance with Act.—Section 723. Powers of officials for seeing that Act is complied with. Production of documents and compelling of master to give evidence. Penalty for non-compliance.

Surveyors of Ships.—Sections 724 to 727. Appointment of surveyors to be by Board of Trade. Power of removal and to make regulations for performance of duties. Penalties on surveyors for receiving unauthorized moneys. Power of surveyor for purposes of survey. Penalty for obstructing surveyor. Returns by surveyors to Board of Trade. Penalties. Appointment of surveyor in Colonies to be by Governor. See also Section 75, Merchant Shipping Act, 1906, substituting ship surveyor for shipwright surveyor. Also Section 19, Merchant Shipping (Convention) Act, 1914.

Board of Trade Inspectors.—Sections 728 to 730. Appointment of inspectors by Board of Trade to report on accidents. Powers of inspectors defined. On liability of witnesses and others. Penalty for obstructing inspectors in the execution of their duty.

Exemption from Rates and Harbour Dues.—Sections 731, 732. Exemption from rates and harbour dues of lighthouses, etc., and property of lighthouse authorities and Board of Trade. Vessels of lighthouse authorities and Board of Trade exempt from tolls, dues, and rates of any kind in the United Kingdom.

Private Signals.—Section 733. Registration of private code of signals by shipowners with Board of Trade. Penalty for displaying unregistered signals. See also Section 6, Merchant Shipping (Convention) Act, 1914.

Application of Act to Foreign Ships by Order in Council.—Section 734. Provision for applying by Order in Council provisions of Merchant Shipping Acts to foreign ships. See also Section 1, Merchant Shipping Act, 1906.

Powers of Colonial Legislatures.—Sections 735, 736. Power of Colonial Legislatures to alter provisions of Act relating to ships of their possessions, excepting Part III. relating to emigrant ships. Regulation of coasting trade by Legislatures of British possessions with certain provisions.

Provision for Foreign Places where Her Majesty has Jurisdiction.—Section 737. Provision may be made by Order in Council.

Orders in Council.—Section 738. Provisions as to Orders in Council and mode of publication.

Transmission and Publication of Documents.—Sections 739, 740. Notices, etc., to be in writing and provision as to sending by post. Publication in *London Gazette*.

Exemption of Her Majesty's Ships.—Section 741. Her Majesty's ships exempted from Act, except where specially provided.

Definitions and Provisions as to Application of Act.—Section 742. "Vessel" includes any ship or boat, or any other description of vessel used in navigation. "Ship" includes every description of vessel used in navigation not propelled by oars. "Foreign-going ship" includes every ship employed in trading or going between some place or places in the United Kingdom and some place or places situate

beyond the following limits, that is to say the coasts of the United Kingdom, the Channel Islands, and Isle of Man, and the Continent of Europe between the River Elbe and Brest inclusive. "Home trade ship" includes every ship employed in trading or going within the following limits: that is to say, the United Kingdom, the Channel Islands, and Isle of Man, and the Continent of Europe between the River Elbe and Brest inclusive. "Home trade passenger ship" means every home trade ship employed in carrying passengers. "Master" includes every person (except a pilot) having command or charge of a ship. "Seaman" includes every person (except masters, pilots, and apprentices duly indentured or registered) employed or engaged in any capacity on board any ship. "Wages" includes emoluments. "Effects" includes clothes and documents. The following expressions are also separately defined, viz., "salvor," "wreck," "pilot," "Court," "Colonial Court of Admiralty," "a Commissioner for Oaths," "Chief Officer of Customs," "superintendent," "Consular officer," "bankruptcy," "representation," "legal personal representative," "name," "port," "harbour," "tidal water," "harbour authority," "conservancy authority," "lighthouse," "buoys and beacon," "the Trinity House," "the Commissioners of Irish Lights," and "lifeboat service."

Application of Act to Ships propelled by Electricity and to certain Fishing Vessels.—Sections 743, 744. Act applies to ships propelled by electricity. Ships engaged in the whale, seal, walrus, or Newfoundland fisheries are deemed foreign-going ships for purposes of Act, with the exception of ships engaged in Newfoundland cod fisheries which belong to ports in Canada or Newfoundland, and to ships engaged in whale fisheries off coast of Scotland, and registered at ports in Scotland. See Section 83, Merchant Shipping Act, 1906.

Repeal and Savings.—Section 745. Acts mentioned in Twenty-second Schedule repealed to extent specified. Provisions and exceptions defined. Ships not measured or re-measured under Merchant Shipping (Tonnage) Act, 1889, to be estimated as if any deduction prohibited by that Act had not been made.

Chinese Passenger Act, 1855, not affected by this Act.—Section 746. Savings for local Acts. Rating of seamen who are rated and served as A.B. before August 2, 1880, not affected by this Act.

Short Title and Commencement.—Sections 747, 748. Act to be cited as the Merchant Shipping Act, 1894. Came into operation, January 1, 1895.

SCHEDULES.

FIRST SCHEDULE.—*Forms.* PART I.—Form A, Bill of Sale. Form B, Mortgage. Form C, Transfer of Mortgage. PART II.—Documents of which the forms are to be prescribed by the Commissioners of Customs and sanctioned by the Board of Trade, *re* certificate of surveyor, declarations *re* ownerships, transfer registry, mortgage and sale.

SECOND SCHEDULE.—*Rules for Measurement of Tonnage.* RULE I.—For ships to be registered and other ships of which the hold is clear. Tables of method and computation. RULE II.—For ships not requiring registry with cargo on board and ships which cannot be measured under Rule I. Method of computation. RULE III.—Measurement of

allowance for engine-room space in steamships. Method of ascertaining. RULE IV.—Open ships, how measured.

THIRD SCHEDULE.—*Table of Maximum Fees to be Paid for the Measurement of Merchant Ships.*

Tons Gross Reg.	Fee.	Tons Gross Reg.	Fee.
Under 50	£1 0 0	1,200 to 2,000	£6 0 0
50 to 100	1 10 0	2,000 to 3,000	7 0 0
100 to 200	2 0 0	3,000 to 4,000	8 0 0
200 to 500	3 0 0	4,000 to 5,000	9 0 0
500 to 800	4 0 0	5,000 and upwards	10 0 0
800 to 1,200	5 0 0		

FOURTH SCHEDULE.—*Table of Maximum Fees to be paid by Applicants for Examination.* Certificate as master, £2; certificate as mate, £1; certificate as 1st class engineer, £2; certificate as 2nd class engineer, £1.

FIFTH SCHEDULE.—*Regulations to be observed with respect to anti-scorbutics.* Furnishing and serving out anti-scorbutics.

SIXTH SCHEDULE.—*Regulations to be observed with respect to accommodation on board ships.* Maximum fees for inspection.

SEVENTH SCHEDULE.—*Constitution of Local Marine Boards.* Establishment of Local Marine Boards. Election of members. Owners of foreign-going or home trade passenger ships have one vote for every 250 tons of shipping. Maximum number of votes to be ten for any one person. Voting powers of joint owners. List of voters to be kept by collector of Customs, and revised every three years. Persons entitled to vote are only entitled to election. Board of Trade may appoint nominees on Board. Registry and votes of electors. Application to corporations for voting purposes.

EIGHTH SCHEDULE.—*Particulars to be Registered by Master of a Ship concerning a Birth at Sea.*

NINTH SCHEDULE.—PART I.—*Maximum Fees to be Paid for Passenger Steamer's Certificate.* For passenger steamers not exceeding 100 tons, £4; exceeding 100, and not exceeding 300 tons, £6; exceeding 300, and not exceeding 600 tons, £8; and for every additional 300 tons above 600, an additional £2. PART II.—*Emigrant Ships.* For an ordinary survey of the ships and of her equipments, accommodation, stores, light, ventilation, sanitary arrangements, and medical stores, £10; for a special survey, £15.

TENTH SCHEDULE.—*Number of Persons carried on Emigrant Ships.*—Repealed by Merchant Shipping Act, 1906.

ELEVENTH SCHEDULE.—*Accommodation for Steerage Passengers.*—Repealed by Merchant Shipping Act, 1906.

TWELFTH SCHEDULE.—*Water and Provisions.* Repealed by Merchant Shipping Act, 1906.

THIRTEENTH SCHEDULE.—*Horses and Cattle in Emigrant Ships.* Repealed by Merchant Shipping Act, 1906.

FOURTEENTH SCHEDULE.—*Forms under Part III.* (*Passenger and Emigrant Ships*). Repealed by Merchant Shipping Act, 1906.

FIFTEENTH SCHEDULE.—*Tabular Form of Number and Dimensions of Boats for Fishing Boats entered in the Fishing Boat Register.*

SIXTEENTH SCHEDULE.—*Maximum Fees for Inspection of Lights and Fog-signals.* For each visit made on application, or where lights or fittings found defective, 10s. Aggregate fees, whatever the number of visits, shall not exceed £1.

SEVENTEENTH SCHEDULE.—*Life-saving Appliances.* Constitution of the Committee.—(1) Three shipowners selected by Council of Chamber of Shipping of the United Kingdom. (2) One shipowner selected by the Shipowners' Associations of Glasgow, and one shipowner selected by the Liverpool Steam Ship Owners' Association and the Liverpool Shipowners' Association conjointly. (3) Two shipbuilders selected by the Council of the Institution of Naval Architects. (4) Three persons practically acquainted with the navigation of vessels, selected by the shipmasters' societies recognized by the Board of Trade for this purpose. (5) Three persons being, or having been able-bodied seamen, selected by seamen's societies recognized by the Board of Trade for this purpose. (6) Two persons selected conjointly by the Committee of Lloyd's, the Committee of Lloyd's Register Society, and the Committee of the Institute of London Underwriters.

EIGHTEENTH SCHEDULE.—*Precautions as to Grain Cargo.* General obligation to prevent cargo shifting. Precautions against shifting of grain. Carriage between decks prevented except for quantity for feeding cargo in the hold. Exemption where feeders are provided. Where grain carried in bulk without feeders one-fourth to be in bags laid upon grain in bulk. Oats or cotton seed not included in this provision, nor sailing ships of less than 400 reg. tons not engaged in Atlantic trade, nor ships laden in Mediterranean or Black Seas provided with compartments in holds and with longitudinal bulkheads or shifting boards, nor ships in which grain does not exceed *one-half* of whole cargo, and the rest cotton, wool, flax, or flour, or other suitable cargo properly stowed. General provisions for proper bulkheads or shifting boards and safe stowage.

NINETEENTH SCHEDULE.—Part I. *Statements in the case of Salvage by Her Majesty's ships.* Certain particulars to be stated by the salvor and by master or other person in charge of vessel, cargo or property salved. Part II. *Salvage bond.*

TWENTIETH SCHEDULE.—*Maximum Fees and Remuneration of Receivers of Wreck.*

TWENTY-FIRST SCHEDULE.—*Maximum Rates of Pilotage to be demanded and Received by Qualified Pilots for Piloting Ships within the limits mentioned therein.* Repealed by Pilotage Act, 1913, *q.v.*

MEDICAL SCALE I.—FOR NORTH ATLANTIC EMIGRANT SHIPS.

The annexed scale of medicines and medical stores and instruments for North Atlantic emigrant ships clearing under Part III. of the Merchant Shipping Act, 1894, was issued, as now revised, in January, 1912.

This scale is intended for North Atlantic emigrant ships only, where the voyage computed according to the Merchant Shipping Acts, 1894 and 1906, does not exceed 26 days.

The medicines to be prepared, plainly labelled in Latin and English names according to the British Pharmacopœia, and the official dose for an adult given in the Pharmacopœia to be stated on the label. All bottles to be stoppered, and all medicines indicated thus (*) to be marked with a red poison label. The proportion of all poisons should be stated on the labels. The weights and measures of the British Pharmacopœia to be used. All articles marked with two asterisks should, in addition to the red poison label, be carried in green fluted bottles and labelled for external use only. All articles marked with one or two asterisks should be stored separately from other articles in the scale.

INSTRUMENTS (All with metal handles).

In metal pocket case.
- 1 Morrant-Baker artery forceps.
- 1 Dressing forceps.
- 1 Dissecting forceps.
- 1 Finger knife.
- 1 Scalpel.
- 1 Curved Bistoury, blunt pointed.
- 1 Probe, with eye.
- 1 Probe-pointed director.
- 1 Broad director.
- 1 Ebony or vulcanite caustic holder
- 1 Blunt-pointed scissors.
- 1 Scissors (one blade sharp-pointed and the other blunt-pointed.)
- 1 Spatula.
- 2 Lancets.
- 1 Dozen suture needles (assorted sizes and shapes).

Silk, 4 sizes, on metal winder.

In metal-lined case with trays.
- 1 Fergusson small saw.
- 1 Amputating saw.
- 1 6-inch amputating knife.
- 1 Syme's ankle-joint knife.
- 1 Dissecting forceps.
- 1 Bone forceps (bent).

In metal-lined case with trays.
- 6 wells' pressure forceps.
- 1 Morrant-Baker artery forceps.
- 1 Solid metal trephine, ¾ in. size.
- 1 Trephine elevator.
- 1 Eye spud.
- 1 Ear speculum (medium size).
- 2 Scalpels.
- 1 Hernia knife.
- 1 Hernia director.
- 2 Trocars and canulas.
- 1 Aneurism needle.

- 1 Gag with handles.
- 1 Pair wound retractors (wire).
- 1 Set of tooth instruments (forceps) in canvas roll.
- 1 Case containing 3 tracheotomy double tubes, assorted (including child's size), 1 trachea dilator, and 1 sharp hook.
- 1 Set midwifery instruments (in canvas roll) comprising—
  - 1 Long forceps.
  - 1 Craniotomy forceps.
  - 1 Perforator, and
  - 1 Blunt hook and crotchet.

* Each tube to hold sufficient lymph for 5 vaccinations.

† **The Surveyors will require all filters to be tested officially.**

1 Sterilizer (large enough to contain midwifery forceps.) [case.
1 Antitoxin syringe with needles, in metal
1 Esmarch's tourniquet (plain with hooks).
1 Œsophageal probang with bristles.
1 Œsophageal forceps.
1 Aspirator, fitted with exploring needle and 2 trocars and canulas, in plated metal case.
1 Length silkworm gut ligature.
3 Silver catheters (Nos. 4 and 8; and No. 12 with prostatic curve).
Full set of olivary-headed catheters.
3 Clinical thermometers, self-registering.
1 Stethoscope.
1 ft. drainage tubing (No 10 gauge).

MEDICAL SCALE II.—FOR EMIGRANT SHIPS OTHER THAN THOSE IN NORTH ATLANTIC TRADE.

The annexed scale of medicines, medical stores, and instruments for ships clearing under Part III. of the Merchant Shipping Act, 1894, other than steamships engaged in the North Atlantic trade, was issued, as now revised, in January, 1912.

For every 100 passengers, where the length of the passage, computed according to th Merchant Shipping Acts, 1894 and 1906, is under 100 days. Where the length of passage is over 100 days the quantities of medicines and medical comforts to be increased by one-half.

The medicines to be prepared, plainly labelled in Latin and English names according to the British Pharmacopœia, and the official dose for an adult given in the Pharmacopœia to be stated on the label. All bottles to be stoppered. The proportion of all poisons should be stated on the labels.

There is a separate scale for North Atlantic emigrant ships, given on page 101.

‡‡Each tube to hold sufficient lymph for 5 vaccinations. Under 500 passengers and crew, 2 doz.; 500 passengers and crew, and over, 4 doz.

INSTRUMENTS. (All with metal handles).

In metal pocket case.

- 1 Morrant-Baker artery forceps.
- 1 Dressing forceps.
- 1 Dissecting do.
- 1 Finger knife.
- 1 Scalpel.
- 1 Curved bistoury, blunt pointed.
- 1 Probe with eye.
- 1 Probe-pointed director.
- 1 Broad director.
- 1 Ebony or vulcanite caustic holder.
- 1 Blunt-pointed scissors.
- 1 Scissors (one blade sharp-pointed and the other blunt-pointed).
- 1 Spatula.
- 2 Lancets.
- 1 Dozen suture needles (assorted sizes and shapes).
- Silk, 4 sizes, on metal winder.

In metal-lined case with trays.

- 1 Fergusson's small saw.
- 1 Amputating saw.
- 1 6-inch amputating knife.
- 1 Symes' angle-joint knife.
- 1 Dissecting forceps.
- 1 Bone forceps (bent).
- 6 Wells' pressure forceps.
- 1 Morrant-Baker artery forceps.
- 1 Solid metal Trephine (¾ in. size).
- 1 Trephine elevator.
- 1 Eye spud.
- 1 Ear speculum (medium size).
- 2 Scalpels.
- 1 Hernia knife
- 1 „ director.
- 2 Trocars and canulas.
- 1 Aneurism needle.

1 Gag with handles.
1 pair wound retractors (wire).
1 Set of tooth instruments (forceps) in canvas roll.
1 Case containing 3 tracheotomy double tubes, assorted (including child's size), 1 trachea dilator and 1 sharp hook.
Set midwifery instruments (in canvas roll) comprising—
1 long forceps,
1 craniotomy forceps,
1 Perforator, and
1 Blunt hook and crotchet.
Sterilizer (large enough to contain midwifery forceps).
1 Antitoxin syringe with needles, in metal case.
1 Esmarch's tourniquet (plain with hooks).
1 Œsophageal probang with bristles.
1 Œsophageal forceps.
1 Aspirator fitted with exploring needles, and 2 trocars and canulas, in plated metal case.
1 Length silkworm gut ligature.
3 Silver catheters (Nos. 4 & 8; and No. 12 with prostatic curve).
1 Full set of olivary-headed catheters.
3 Clinical thermometers, self-registering.
1 Stethoscope.
1 ft. Drainage tubing (No. 10 gauge).

MEDICAL COMFORTS.

	Per 100 Pass. and Crew.
Arrowroot	lbs. 7
Pearl Barley	,, 5
Semolina	,, 10
Condensed milk, of approved quality	1-lb ,, 30
Essence or extract of beef, of approved quality	¼-lb. tins 20
Brandy	gall. 1

MEDICAL SCALE III.—FOR MERCHANT SHIPS.

The annexed scale of medicines and medical stores and instruments was issued, as now revised, in January, 1912.

For voyages of three months and under half the quantity of the following medicines may be carried.

Preparations from British Pharmacopœia, 1898. This column is added for the use of Druggists supplying the Medicines indicated. All bottles to be stoppered, labelled and the official dose for an adult to be stated on the label.	*Names of Medicines, Medicaments, &c.* All Medicines bearing a Red Poison Label must be used with caution, and, if given internally, should be carefully measured.		Proportion for Ships carrying the following number of Men and Boys for 12 months.			
			10 and under.	11 to 20 inclusive	21 to 40 inclusive	41 and upwards
	Alum	oz.	2	2	6	8

MEDICAL SCALE IV.—EMERGENCY.

The annexed scale of medicines and medical stores and instruments for merchant ships is intended for the use of ships sailing from the United Kingdom, and making voyages not exceeding five days from port to port. It was issued, as now revised, in January, 1912.

NOTE.—Ships making voyages of less than 24 hours from port to port have the option of carrying only the small Ambulance Hamper of the St. John Ambulance Association, or its equivalent, in lieu of the following scale.

Preparations from British Pharmacopœia, 1898.	*Names of Medicines, Medicaments, &c.*	Proportion for Ships irrespective of the number of men carried (for voyages of five days and under from port to port).
This column is added for the use of Druggists supplying the Medicines indicated. All bottles to be stoppered, and the official dose for an adult to be stated on the label.	All Medicines bearing a Red Poison Label must be used with caution, and, if given internally, should be carefully measured.

	Authorised Book of Directions . . .	1

All medicines indicated thus (*) to be marked with a red poison label. All article marked with two asterisks should, in addition to the red poison label, be carried in gree fluted bottles and labelled for external use only.

Lime Juice.

The Board of Trade have exempted from those requirements of Section 200 which relate to anti-scorbutics all ships bound from any port in the United Kingdom to European ports, to ports in the Mediterranean Sea—vessels passing through the Suez Canal excepted—to ports on the Eastern Coast of America, situate between the 35th and 60th degrees of North latitude, and also all ships bound to any islands or places in the Atlantic Ocean situate within those limits. It is important, however, to bear in mind that this exemption does not apply to ships which are, or may be by the terms of their agreements, also bound to any place out of the limits specified, nor to ships bound to any part of the coast or islands of Greenland situate within those limits.

THE INSPECTION OF PROVISIONS AND WATER.

Rules made by the Board of Trade under the Merchant Shipping Act, 1894: Section 206.

1. These rules apply to all ships trading or going from any port of the United Kingdom through the Suez Canal, or round the Cape of Good Hope or Cape Horn.

2. The officer to conduct an inspection of ship's stores under the Merchant Shipping Act shall be an officer appointed by the Board of Trade for this purpose.

3. All the different varieties of stores provided or carried in the ship which are referred to in Section 3 of the above-mentioned Act, as well as the supply of water, are subject to inspection.

4. New stores shall be inspected before shipment, whenever practicable, or alongside the ship in which they are to be used; but, if necessary, they may be inspected on board the ship, or they may in certain cases be inspected in some place provided or approved by the Board of Trade for that purpose, as may be decided by the Inspector acting under the instructions of the Board of Trade.

5. All surplus stores left over from a previous voyage are to be inspected, and the contents of all the casks of wet provisions amongst such surplus stores are to be turned out. Such stores are to be inspected on board or alongside the ship, or in such other place as may be provided or approved by the Board of Trade for that purpose, as may be decided by the Inspector acting under the instructions of the Board of Trade.

6. Stores carried in the ship in which they are to be used from one port to another port in the United Kingdom, or sent from one port to a ship at another port, which have passed the Board of Trade Inspector at the first port, as described in a form of advice (P.W. 8) signed by the Inspector who examined them, need not be re-examined; provided always that the official wire and seal remain intact, and that the Inspector is satisfied that the packages have not been tampered with.

7. All notices for inspection of stores to take place at the port where the ship is lying must be made to the Inspector of that port, or in such other manner as may from time to time be determined by the Board of Trade, by the owner or agent of the ship, on the appropriate form (P.W. 1), which must be filled in and delivered to the Inspector at least 48 hours prior to the time at which it is desired that the stores should be inspected.

8. Notice for inspection of stores to be sent coastwise to another port in the United Kingdom from which the vessel is to take her

final departure, or in the case of stores intended to be sent to a ship at some other port in the United Kingdom, may be made by the firm supplying such stores direct to the Inspector at the port where such stores may be. The notice must be given 48 hours previously on the prescribed form.

9. Prior to inspection, a complete list of all stores must be made to the Inspectors.

10. Stores will be inspected at any time during daylight, after 10 a.m. up to 5 p.m.

11. The shipowner, master, and officers of a ship, shall give the Inspector every facility for inspecting the stores and water on board of such ship, and shall, if required, have all the stores contained in casks brought on deck for inspection.

12. Beef shall consist only of briskets, flanks, and plates of fine heavy grade, freshly cured, free from taint, and thoroughly sweet, packed in good sound casks, re-capped, and re-pickled with pickle of full strength, all to the satisfaction of the Inspector.

13. Pork shall be of assorted pieces in fair proportion, of fine grade, freshly cured, free from taint, and thoroughly sweet, packed in good sound casks, re-capped, and re-pickled with pickle of full strength, all to the satisfaction of the Inspector.

14. Preserved meats shall be of fine grade, but may be of any variety, and may be mixed with a fair proportion of vegetables, the whole to be properly preserved and packed in good strong tins, the tins being painted or otherwise protected from rust, all to the satisfaction of the Inspector, who may open one or more of the tins of each kind, should he deem it necessary.

15. Vegetables shall be fresh and sound, properly preserved, and in good strong tins, the tins being painted or otherwise protected from rust, all to the Inspector's satisfaction, who may open one or more of the tins if he deem it necessary.

16. Flour shall be of fine grade, milled from fully matured good sound wheat, containing a proper proportion of nutritious matter. If shipped in barrels, the barrels must be new, properly made from suitably seasoned wood, thoroughly tight, and lined with suitable paper. The ends of the barrels to be coated with hot lime. Where tanks are used for the storage of flour on board, they must be thoroughly cleansed, limed with fresh lime, and dried before being refilled, all to the satisfaction of the Inspector.

17. Biscuits to be thoroughly baked and dried, and made of fully matured wheat flour, containing a proper proportion of nutritious matter. Where tanks are used for the storage of biscuits on board, they must be thoroughly cleansed, limed with fresh lime, and dried before being refilled.

18. An Inspector may at any time proceed on board a ship to ascertain whether the stores or water have been duly inspected, and if he find any have not been so inspected, he shall insist on inspecting the same, and if they are of a quality unfit for the use of the crew, he shall detain the ship under the provisions of the Act until such defects are remedied to his satisfaction.

19. The water left in the ship's tanks from the former voyage must all be completely emptied, and the tanks must be thoroughly cleansed and refilled with good fresh water.

20. All stores found by the Inspector to be deficient in quality shall be landed.

21. The Inspector at the final port of departure in the United Kingdom, if after examination of the stores and water he is satisfied that he has seen all the stores intended for the particular voyage, and that they are of a quality fit for the use of the crew, or in the case of stores previously inspected at some other port in accordance with Rule 6, shall grant a certificate in the prescribed form (P. W. 4), but such certificate shall not be granted except at the final port of departure in the United Kingdom.

ILLEGAL BOARDING OF FOREIGN VESSELS.

Orders in Council under the Merchant Shipping Act, 1894: Section 219.

Foreign States with which, in pursuance of Orders in Council, arrangements have been made under Section 219, for the prevention of persons going on board, or being on board, their ships without permission, and for the punishment of offenders:

Italy	Order in Council dated	March	2, 1881.
Sweden and Norway ..	,, ,,	Oct.	25, 1881.
Germany	,, ,,	Nov.	30, 1882.
United States of America	,, ,,	May	22, 1883.
Austria-Hungary ..	,, ,,	Oct.	17, 1884.
Denmark	,, ,,	Sept.	15, 1887.
Belgium	,, ,,	July	23, 1889.

THE SURRENDER OF DESERTERS.

Orders in Council under the Merchant Shipping Act, 1894: Section 238.

Reciprocal engagements have been entered into between Great Britain and each of the following States for the mutual surrender of seamen who desert from the merchant ships of either country in the ports of the other:—

America (United States)	Germany.	Peru.
Austria-Hungary.	Greece.	Russia.
Belgium.	Honduras.	Salvador.
Brazil.	Italy.	Siam.
Colombia.	Japan.	Spain.
Congo Free State.	Mexico.	Sweden and Norway.
Denmark	Morocco and Fez.	Turkey.
Ecuador.	Netherlands.	Uruguay.
France.	Paraguay.	Zanzibar.

REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

Issued in pursuance of the Merchant Shipping Act, 1894; Section 418.

Preliminary.

These Rules shall be followed, by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following Rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel. The word " steam vessel " shall include any vessel propelled by machinery.

A vessel is " under way " within the meaning of these Rules, when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, etc.

The word " visible " in these Rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

ART. 1. The Rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

ART. 2. A steam vessel when under way shall carry—

(*a*) On or in front of foremast, or if without foremast, then in fore part of vessel, at height above hull of not less than 20 ft., and if breadth of vessel exceeds 20 ft. then at height above hull not less than such breadth, so, however, that light need not be carried at greater height above hull than 40 ft., a bright white light, so constructed as to show unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of vessel, viz., from right ahead to 2 points abaft beam on either side, and of such a character as to be visible at distance of at least 5 miles.

(*b*) On starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of compass, so fixed as to throw light from right ahead to 2 points abaft beam on starboard side, of such character as to be visible at distance of at least 2 miles.

(*c*) On port side a red light so constructed as to show unbroken light over an arc of the horizon of 10 points of compass, so fixed as to throw light from right ahead to 2 points abaft beam on port side, and of such character as to be visible at distance of at least 2 miles.

(*d*) Said green and red side lights shall be fitted with inboard screens projecting at least 3 ft. forward from light, so as to prevent these lights from being seen across bow.

(*e*) A steam vessel when under way may carry an additional white light similar in construction to light mentioned in subdivision (*a*). These two lights shall be so placed in line with keel that one shall be at least 15 ft. higher than the other, and in such position with reference to each other that lower light shall be forward of upper one. The vertical distance between these lights shall be less than horizontal distance.

ART. 3. A steam vessel when towing another vessel shall in addition to her side lights, carry two bright white lights in a vertical line one over the other, not less than 6 ft. apart, and when towing more than one vessel shall carry an additional bright white light 6 ft. above or below such lights, if length of tow, measuring from stern of towing vessel to stern of last vessel towed, exceeds 600 ft. Each of these lights shall be of same construction and character, and shall be carried in same position as white light mentioned in Art. 2 (*a*), except the additional light, which may be carried at height not less than 14 ft. above the hull. Such steam vessel may carry a small white light abaft funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of beam.

ART. 4. (*a*) A vessel which from accident is not under command, shall carry at the same height as white light mentioned in Art. 2 (*a*), where they can best be seen, and, if a steam vessel, in lieu of that light, two red lights, in a vertical line one over the other, not less than 6 ft.

apart, and of such character as to be visible all round the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other, not less than 6 ft. apart, where they can best be seen, 2 black balls or shapes, each 2 ft. in diameter.

(*b*) A vessel employed in laying or in picking up telegraph cable shall carry in same position as white light mentioned in Art. 2 (*a*), and if a steam vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 ft. apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 ft. apart, where they can best be seen, three shapes not less than 2 ft. in diameter, of which the highest and lowest shall be globular in shape and red, and middle one diamond in shape and white.

(*c*) The vessels referred to in this Art., when not making way through water, shall not carry side lights, but when making way shall.

(*d*) The lights and shapes required to be shown by this Art. are to be taken by other vessels as signals that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Art. 31.

ART. 5. A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by Art. 2 for a steam vessel under way, with the exception of the white lights mentioned therein, which they shall never carry.

ART. 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides. To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

ART. 7. Steam vessels of less than 40, and vessels under oars or sails of less than 20 tons gross tonnage, respectively, and rowing boats when under way shall not be obliged to carry the lights mentioned in Art. 2 (*a*) (*b*) (*c*), but if they do not carry them they shall be provided with the following lights:

1. Steam vessels of less than 40 tons shall carry: (*a*) In the fore part of the vessel, or on or in front of the funnel, where it can best be seen, and at a height above the gunwale of not less than 9 ft., a bright white light constructed and fixed as prescribed in Art. 2 (*a*) and of such a character as to be visible at a distance of at least 2 miles. (*b*) Green and red side lights constructed and fixed as prescribed in Art. 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 ft. below the white light.

2. Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 ft. above the gunwale, but

it shall be carried above the combined lantern mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to other vessels, shall be exhibited in sufficent time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Art. shall not be obliged to carry the lights prescribed by Art. 4 (*a*), and Art. 11, last paragraph.

ART. 8. Pilot vessels, when engaged on their station on pilotage duty, shall not show the lights required for other vessels, but shall carry a white lamp at the masthead visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes. On the near approach of or to other vessels they shall have their side lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side. A pilot vessel of such a class as to be obliged to go alongside a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above. Pilot vessels, when not engaged on their station on pilotage duty shall carry lights similar to those of other vessels of their tonnage.

ART. 9.*† Fishing-vessels and fishing-boats, when under way and when not required by this Art. to carry or show the lights hereinafter specified, shall carry or show the lights prescribed for vessels of their tonnage under way.

(*a*) Open boats—boats not protected from the entry of sea water by means of a continuous deck—when engaged in any fishing at night with outlying tackle extending not more than 150 ft. horizontally from the boat into the seaway, shall carry one all-round white light. Open boats, when fishing at night, with outlying tackle extending more than 150 ft. horizontally from the boat into the seaway, shall carry one all-round white light, and in addition, on approaching or being approached by other vessels, shall show a second white light at least 3 ft. below the first light and at a horizontal distance of at least 5 ft. away from it in the direction in which the outlying tackle is attached.

(*b*)‡ Vessels and boats, except open boats as defined in subdivision (*a*), when fishing with drift-nets, shall, so long as the nets are wholly or partly in the water, carry two white lights where they can best be seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 ft. and not more than 15 ft., and so that the horizontal distance between them, measured in a line with the keel, shall be not less than 5 ft. and not more than 10 ft. The lower of these

* This Art. does not apply to Chinese or Siamese vessels. † The expression "Mediterranean Sea" contained in sub-sections (*b*) and (*c*) of this Art. includes the Black Sea and the other adjacent inland seas in communication with it. ‡ Dutch vessels and boats when engaged in the "kol," or handline, fishing will carry the lights prescribed for vessels fishing with drift nets.

two lights shall be in the direction of the nets, and both of them shall be of such a character as to show all round the horizon, and to be visible at a distance of not less than 3 miles. Within the Mediterranean Sea and in the seas bordering Japan and Korea* sailing fishing vessels of less than 20 tons gross tonnage shall not be obliged to carry the lower of these two lights; should they, however, not carry it, they shall show in the same position (in the direction of the net or gear) a white light, visible at a distance of not less than one sea mile on the approach of or to other vessels.

(*c*) Vessels and boats, except open boats as defined in subdivision (*a*), when line-fishing with their lines out and attached to or hauling their lines, and when not at anchor or stationary within the meaning of subdivision (*h*), shall carry the same lights as vessels fishing with drift-nets. When shooting lines, or fishing with towing lines, they shall carry the lights prescribed for a steam or sailing vessel under way respectively. Within the Mediterranean Sea and in the seas bordering Japan and Korea* sailing fishing vessels of less than 20 tons gross tonnage shall not be obliged to carry the lower of these two lights; should they, however, not carry it, they shall show in the same position (in the direction of the lines) a white light, visible at a distance of not less than one sea mile on the approach of or to other vessels.

(*d*) Vessels, when engaged in trawling, by which is meant the dragging of an apparatus along the bottom of the sea—1. If steam vessels, shall carry in the same position as the white light mentioned in Art. 2 (*a*), a tricoloured lantern so constructed and fixed as to show a white light from right ahead to two points on each bow, and a green light and a red light over an arc of the horizon from two points on each bow to two points abaft the beam on the starboard and port sides respectively; and not less than 6 nor more than 12 ft. below the tricoloured lantern a white light in a lantern, so constructed as to show a clear uniform and unbroken light all round the horizon. 2. If sailing vessels, shall carry a white light in a lantern, so constructed as to show a clear uniform and unbroken light all round the horizon, and shall also, on the approach of or to other vessels, show where it can best be seen a white flare-up light or torch in sufficient time to prevent collision. All lights mentioned in subdivision (*d*) 1 and 2 shall be visible at a distance of at least 2 miles.

(*e*) Oyster dredgers and other vessels fishing with dredge-nets shall carry and show the same lights as trawlers.

(*f*) Fishing vessels and fishing boats may at any time use a flare-up light in addition to the lights which they are by this Art. required to carry and show, and they may also use working lights.

(*g*) Every fishing vessel and every fishing-boat under 150 ft. in length, when at anchor, shall exhibit a white light visible all round the horizon at a distance of at least 1 mile. Every fishing vessel of 150 ft. in length or upwards, when at anchor, shall exhibit a white light visible all round the horizon at a distance of at least 1 mile, and shall exhibit a second light as provided for vessels of such length by Art. 11. Should any such vessel, whether under 150 ft. in length, or of 150 ft. in length or upwards, be attached to a net or other fishing gear, she shall on the approach of other vessels show an additional white light at least 3 ft. below the anchor light, and at a horizontal distance of at least 5 ft. away from it in the direction of the net or gear.

*Also, as regards Russian vessels, in the seas (excluding the Baltic) bordering the coasts of Russia.

(*h*) If a vessel or boat when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall in daytime haul down the day-signal required by subdivision (*h*); at night show the light or lights prescribed for a vessel at anchor; and during fog, mist, falling snow, or heavy rain-storms make the signal prescribed for a vessel at anchor. (See subdivision (*d*), and the last paragraph, of Art. 15.)

(*i*) In fog, mist, falling snow, or heavy rain-storms, drift-net vessels attached to their nets, and vessels when trawling, dredging, or fishing with any kind of drag net, and vessels line fishing with their lines out, shall, if of 20 tons gross tonnage or upwards, respectively, at intervals of not more than 1 minute make a blast; if steam vessels, with the whistle or siren, and if sailing vessels, with the fog-horn; each blast to be followed by ringing the bell. Fishing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals; but if they do not, they shall make some other efficient sound signal at intervals of not more than 1 minute.

(*k*) All vessels or boats fishing with nets or lines or trawls, when under way, shall in daytime indicate their occupation to an approaching vessel by displaying a basket or other efficient signal where it can best be seen. If vessels or boats at anchor have their gear out, they shall, on the approach of other vessels, show the same signal on the side on which those vessels can pass.

The vessels required by this Art. to carry or show the lights hereinbefore specified shall not be obliged to carry the lights prescribed by Art. 4 (*a*), and the last paragraph of Art. 11.

ART. 10. A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light. The white light required to be shown by this Art. may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass—viz., for 6 points from right aft on each side of the vessel, so as to be visible at a distance of at least 1 mile. Such light shall be carried as nearly as practicable on the same level as the side lights.

ART. 11. A vessel under 150 ft. in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 ft. above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least 1 mile. A vessel of 150 ft. or upwards in length, when at anchor, shall carry in the forward part of the vessel at a height of not less than 20, and not exceeding 40, ft. above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall be not less than 15 ft. lower than the forward light, another such light. The length of a vessel shall be deemed to be the length appearing in her certificate of registry. A vessel aground in or near a fairway shall carry the above light or lights, and the two red lights prescribed by Art. 4 (*a*).

ART. 12. Every vessel may, if necessary, in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light, or use any detonating signal that cannot be mistaken for a distress signal.

ART. 13. Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or

for vessels sailing under convoy, or with the exhibition of recognition signals adopted by shipowners, which have been authorised by their respective Governments and duly registered and published.

ART. 14. A steam vessel proceeding under sail only, but having her funnel up, shall carry in daytime, forward, where it can best be seen, one black ball or shape 2 ft. in diameter.

Sound-Signals for Fog, etc.

ART. 15. All signals prescribed by this Art. for vessels under way shall be given: 1. By " steam vessels " on the whistle or siren; 2. By " sailing vessels and vessels towed " on the fog-horn. The words " prolonged blast " used in this Art. shall mean a blast of from 4 to 6 seconds' duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell.* A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.

In fog, mist, falling snow, or heavy rain storms, whether by day or night, the signals described in this Art. shall be used as follows:—

(*a*) A steam vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam vessel under way, but stopped and having no way upon her, shall sound, at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.

(*c*) A sailing vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*d*) A vessel, when at anchor, shall, at intervals of not more than 1 minute, ring the bell rapidly for about five seconds.

(*e*) A vessel, when towing, a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules shall, instead of the signals prescribed in subdivisions (*a*) and (*c*) of this Art., at intervals of not more than 2 minutes, sound three blasts in succession, viz.: one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

Speed of Ships to be Moderate in Fog, etc.

ART. 16. Every vessel shall, in a fog, mist, falling snow, or heavy rain storms, go at a moderate speed, having careful regard to the existing circumstances and conditions. A steam vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

* In all cases where the Rules require a bell to be used a drum may be substituted on board Turkish vessels or a gong where such articles are used on board small sea-going vessels.

Steering and Sailing Rules.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

Art. 17. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other, as follows:

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close-hauled.

(*b*) A vessel which is close-hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

Art. 18. When two steam vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Art. only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other. The only cases to which it does apply are, when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each vessel is in such a position as to see both the side lights of the other. It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Art. 19. When two steam vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Art. 20. When a steam vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam vessel shall keep out of the way of the sailing vessel.

Art. 21. Where by any of these rules one of two vessels is to keep out of the way, the other shall keep her course and speed. When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See Art. 27 and 29.)

Art. 22. Every vessel which is directed by these Rules to keep out of the way of another vessel, shall, if the circumstances of the case admit, avoid crossing ahead of the other.

ART. 23. Every steam vessel which is directed by these Rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

ART. 24. Notwithstanding anything contained in these Rules, every vessel overtaking any other, shall keep out of the way of the overtaken vessel. Every vessel coming up with another vessel from any direction more than two points abaft her beam, *i.e.*, in such a position, with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's side lights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear. As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

ART. 25. In narrow channels every steam vessel shall, when it is safe and practicable, keep to that side of the fairway or mid channel which lies on the starboard side of such vessel.

ART. 26. Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets, or lines, or trawls. This Rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels for boats.

ART. 27. In obeying and construing these Rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above Rules necessary in order to avoid immediate danger.

Sound-Signals for Vessels in Sight of one Another.

ART. 28. The words " short blast " used in this Art. shall mean a blast of about 1 second's duration. When vessels are in sight of one another, a steam vessel under way, in taking any course authorised or required by these Rules, shall indicate that course by the following signals on her whistle or siren, viz.:

One short blast to mean, " I am directing my course to starboard."

Two short blasts to mean, " I am directing my course to port."

Three short blasts to mean, " My engines are going full speed astern."

No Vessel under any Circumstances to neglect proper Precautions.

ART. 29. Nothing in these Rules shall exonerate any vessel, or the owner or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

ART. 30. Nothing in these Rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

Distress Signals.

ART. 31. When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:

In the daytime—1. Gun or other explosive signal fired at intervals of about a minute; 2. The International Code signal of distress indicated by N C; 3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball; 4. A continuous sounding with any fog-signal apparatus.

At night—1. Gun or other explosive signal fired at intervals of about a minute; 2. Flames on the vessel (as from burning tar-barrel, oil-barrel, etc.); 3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals; 4. A continuous sounding with any fog-signal apparatus.

International Application of Collision Regulations.

By an Order in Council, dated October 13, 1910, the foregoing Collision Regulations and the Rules as to Signals of Distress are consolidated and made to apply to all British ships. Further, these Regulations and Rules, subject to qualifications mentioned in them and to the proviso in the case of Chinese ships that the Regulations and Rules will be applicable only to ships of foreign type, are made to apply to the ships of the under-mentioned countries, whether they are within British jurisdiction or not, and such ships, for the purpose of these Regulations and Rules, shall be treated as if they were British ships:—

Argentina.	Egypt.	Peru.
Austria-Hungary.	France.	Portugal.
Belgium.	Germany.	Roumania.
Brazil.	Greece.	Russia.
Bulgaria.	Guatemala.	Siam.
Chile.	Italy.	Spain.
China.	Japan.	Sweden.
Costa Rica.	Mexico.	Turkey.
Denmark.	Netherlands.	United States.
Ecuador.	Norway.	Venezuela.

LIFE-SAVING APPLIANCES.

Rules made by the Board of Trade under the Merchant Shipping Act, 1894 : Section 427.

[*Issued May* 8, 1914; *came into operation, July* 1, 1914.]

For the purposes of these Rules, ships shall be arranged in the following classes, under the headings " Foreign-going " and " Home Trade."

Foreign-Going.

Class I.—*Foreign-going Passenger Steamers, including Emigrant Ships.*

Rule A.—(1) A ship of this class shall carry lifeboats in such number and of such aggregate capacity as shall be sufficient to accommodate the total number of persons carried, or which the ship is certified to carry, whichever number is greater. Provided that if the aggregate capacity of the lifeboats carried exceeds the capacity required by General Rule 2, the Board of Trade may allow one or more life-rafts conforming to the conditions laid down in that Rule to be carried in lieu of any of the remaining lifeboats which would otherwise be required by the present Rule. (2) The master or owner of a ship of this class

claiming to carry on any voyage fewer lifeboats and life-rafts than will provide sufficient accommodation for all the persons for which the ship is certified, must declare before the Collector or other Officer of Customs, before the time of clearance, that the lifeboats and life-rafts actually carried will be sufficient to accommodate all persons carried at any time during the voyage to foreign ports and the voyage back to the United Kingdom.

Rule B.—A ship of this class shall, subject to the provisions of General Rule 20 (1), be provided, in accordance with its length, with the number of sets of davits specified in Column A of the Table in Appendix I. Provided that no ship shall be required to have a number of sets of davits greater than the number of boats required to accommodate the total number of persons which is carried, or which the ship is certified to carry, whichever number is the greater, and provided further that the Board of Trade may, where it appears to them necessary, having regard to the height at which the boats are carried above the centre of the load line disc, and to the other circumstances of the case, require a ship of this class to carry in lieu of, or in addition to, davits, some other approved form of launching appliances, or such arrangements for launching boats as may be, in their opinion effective.

Rule C.—(1) Each set of davits shall have a lifeboat of Class 1 attached to it, and of these lifeboats at least the minimum number specified in Column B of the Table in Appendix I shall be open boats. (2) Any additional lifeboats which may be required to make up the total lifeboat accommodation, may be boats of Class 1 or Class 2.

Rule D.—If the ship is under 400 ft. in length, at least twelve approved lifebuoys shall be carried; if of 400 ft. or over, but under 600 ft., at least eighteen approved lifebuoys shall be carried; if of 600 ft. or over, but under 800 ft., at least twenty-four approved lifebuoys shall be carried; and if of 800 ft. or over, at least thirty approved lifebuoys shall be carried.

Rule E.—One approved life-jacket shall be carried for each person on board, and in addition a sufficient number of approved life-jackets of a size suitable for children.

Rule F.—The Board of Trade may schedule certain voyages between specified ports or places outside the United Kingdom as being, for the purpose of these Rules, voyages of a nature similar to one or other of the classes of voyages within Home Trade limits provided for in the Rules. If a foreign-going passenger steamer is permitted by the terms of the passenger certificate to carry, between specified ports or places abroad, a number of passengers in addition to the number allowed when the ship is proceeding to sea from the United Kingdom, and such a voyage has been scheduled in accordance with the provisions of this Rule, that ship shall, so far as concerns the additional passengers carried between those ports or places, comply with the Rules applicable to the class of Home Trade voyage to which the voyage has been scheduled as similar.

CLASS II.—*Foreign-going Steamships not certified to carry Passengers.*

Rule A.—A ship of this class shall carry on each side of the ship lifeboats of Class 1 in such number and of such aggregate capacity as will accommodate all persons on board; provided that if the total number of lifeboats required under this Rule exceeds two, a boat of Class 3 may be carried in lieu of one of them; and if the number exceeds

three, one or two boats of Class 3 may be carried in lieu of the same number of lifeboats.

Rule B.—The lifeboats, and boats of Class 3 carried in lieu of lifeboats, shall be attached to davits.

Rule C.—At least six approved lifebuoys shall be carried, together with one approved life-jacket for each person on board.

CLASS III.—*Foreign-going Sailing Ships carrying more than twelve Passengers.*

Rule A.—A ship of this class shall carry lifeboats in such number and of such aggregate capacity as shall be sufficient to accommodate all persons on board.

Rule B.—All the lifeboats shall be attached to davits so far as practicable in the opinion of a Board of Trade Surveyor.

Rule C.—At least six approved lifebuoys shall be carried, together with one approved life-jacket for each person on board, and, in addition, a sufficient number of approved life-jackets of a size suitable for children.

CLASS IV.—*Foreign-going Sailing Ships not carrying more than twelve Passengers.*

Rule A.—A ship of this class shall carry a lifeboat or lifeboats of Class 1, of such capacity as shall be sufficient to accommodate all persons on board; if only one lifeboat is required under this Rule, a boat of Class 3 shall be carried in addition, and if the number of lifeboats required under this Rule exceeds two a boat of Class 3 may be carried in lieu of one of them.

Rule B.—Two boats at least shall be attached to davits, one on each side of the ship.

Rule C.—At least four approved lifebuoys shall be carried, together with one approved life-jacket for each person on board.

HOME TRADE.

CLASS I.—*Steamships certified to carry Passengers anywhere within Home Trade Limits*, i.e., *between places in the British Islands (that is to say, the United Kingdom, the Channel Islands, and the Isle of Man), or between the British Islands and the Continent of Europe between the River Elbe and Brest inclusive.*

Rule A.—A ship of this class shall, subject to the provisions of General Rule 20 (1), be provided in accordance with its length with the number of sets of davits specified in Column A of the Table in Appendix I; each set of davits shall have a lifeboat attached to it. Provided that no ship shall be required to have a number of sets of davits greater than the number of boats required to accommodate the total number of persons carried, or which the ship is certified to carry whichever number is greater. The lifeboats attached to davits may be either open or pontoon lifeboats, but no ship shall carry attached to davits a number of open lifeboats less than that specified in accordance with its length in Column B of the Table in Appendix I.

Rule B.—In a ship of this class launched on or after the 1st March, 1913, if the lifeboats attached to davits do not provide the aggregate capacity specified in the Table in Appendix II, additional lifeboats

shall be carried to make up that capacity. Provided that no ship at whatever date launched shall be required to carry lifeboats of an aggregate capacity greater than is required to accommodate the total number of persons carried.

Rule C.—Subject to the provisions of General Rule 20 (3), if the lifeboats carried do not provide sufficient accommodation for the total number of persons which the ship is allowed by her ordinary passenger certificate to carry, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus shall be carried so that they, together with the lifeboats, shall provide sufficient accommodation for the total number of persons for which the ship is so certified.

Rule D.—Where a ship of this class has a special passenger steamer's certificate allowing her, when engaged upon daylight voyages between the 20th March and the 30th September, inclusive, to carry a number of persons in excess of the total number of persons allowed by her ordinary passenger certificate, the lifeboats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus carried shall provide sufficient accommodation for 80 per cent. of the number allowed by such special passenger steamer's certificate, or for the total number of persons allowed by the ordinary passenger steamer's certificate, whichever number is the greater.

Rule E.—At least ten approved lifebuoys shall be carried, together with one approved life-jacket for each person on board, and, in addition, a sufficient number of approved like-jackets of a size suitable for children.

CLASS II.—*Steamships trading within Home Trade Limits, but not certified to carry Passengers.*

Rule A.—A ship of this class having a length of 100 ft. or over shall carry a boat or boats on each side of the ship of such capacity as shall be sufficient to accommodate all persons on board. Such boats shall be attached to davits.

Rule B.—One of such boats may be a boat of Class 3. The remaining boats shall be lifeboats of Class 1.

Rule C.—A ship of this class having a length under 100 ft. shall carry at least one open boat of Class 1, so stowed that it can be readily placed in the water on either side of the ship, and of sufficient capacity to accommodate all the persons on board.

Rule D.—A ship of this class if 100 ft. in length or over shall carry at least four approved lifebuoys, and if under 100 ft. at least two approved lifebuoys. One approved life-jacket shall be carried for each person on board.

CLASS III.—*Sailing Ships carrying Passengers anywhere within Home Trade Limits.*

Rule A.—A ship of this class shall carry a lifeboat or lifeboats of sufficient aggregate capacity sufficient to accommodate all persons on board.

Rule B.—Such boats shall, as far as practicable, be attached to davits.

Rule C.—At least four approved lifebuoys shall be carried, together with one approved life-jacket for each person on board, and, in addition, a sufficient number of approved life-jackets of a size suitable for children.

CLASS IV.—*Sailing Ships, trading within Home Trade limits but not carrying Passengers.*

Rule A.—Subject to the provisions of Rule B, a ship of this class shall carry a boat or boats of such capacity as shall be sufficient to accommodate all persons on board. The boats shall be stowed in such a manner that they can readily be placed in the water on either side of the ship. At least one of the boats shall be an open boat of Class 1.

Rule B.—A ship of this class having a length of under 100 ft. and engaged solely in the Coasting Trade shall comply with the requirements of Rule A, except that the boat or boats carried may be of Class 3.

Rule C.—A ship of this class if 100 ft. in length or over shall carry at least four approved lifebuoys, and if under 100 ft. at least two approved lifebuoys. One approved life-jacket shall be carried for each person on board.

CLASS V.—*Steamships certified to carry Passengers on short specified passages along the coasts of the United Kingdom, or between Great Britain and Ireland, or between Great Britain or Ireland and the Isle of Man.*

Rule A.—A ship of this class shall, subject to the following proviso, comply with the provisions of Class I, Home Trade; Provided that a ship of this class, when engaged:—(*a*) on certain voyages near the coasts of the United Kingdom, specially scheduled by the Board of Trade for this purpose, or (*b*) on daylight excursions, specially scheduled by the Board of Trade for this purpose, between the 1st June and the 31st August, inclusive, shall not be required to carry more sets of davits or lifeboats of a greater aggregate cubic capacity than are respectively specified in the second columns of Tables A and B in Appendix III.

CLASS VI.—*Steamships certified to carry Passengers on short excursions to sea,* i.e., *beyond partially smooth water limits, between 1st April and 31st October, inclusive, during daylight, and in fine weather.*

Rule A.—Subject to the provisions of General Rule 20 (1), a ship of this class shall be provided in accordance with its length with such number of sets of davits as is specified in the Table in Appendix IV; each set of davits shall have a lifeboat of Class 1 attached to it. Provided that no ship shall be required to have a larger number of sets of davits than the number of boats required to accommodate the total number of persons carried, or which the ship is certified to carry, whichever number is the greater.

Rule B.—Subject to the provisions of General Rule 20 (2) and (3), such further number of lifeboats, or such number of approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus shall be provided, as shall be sufficient (together with the lifeboats required by Rule A) for 70 per cent. of the total number of persons for which the ship is certified.

Rule C.—The boats carried shall be of such reasonable capacity, having regard to the size of the ship, as the Board of Trade may require. Provided that no ship shall be required to carry lifeboats of an aggregate capacity greater than is required to accommodate the total number of persons which the ship is certified to carry.

Rule D.—If the ship is under 200 ft. in length, at least four approved lifebuoys shall be carried, and if of 200 ft. in length or over, at least

eight approved lifebuoys shall be carried. One approved life-jacket shall be carried for each person on board, and, in addition, a sufficient number of approved life-jackets of a size suitable for children.

CLASS VII.—*Steamships certified to carry Passengers in partially smooth water.*

Rule A.—Subject to the provisions of General Rule 20 (1), a ship of this class shall be provided in accordance with its length with the number of sets of davits specified in the Table in Appendix IV; each set of davits shall have a lifeboat of Class 1 attached to it. Provided that no ship shall be required to have a larger number of sets of davits than the number of boats required to accommodate the total number of persons carried, or which the ship is certified to carry, whichever number is the greater.

Rule B.—Subject to the provisions of General Rule 20 (2) and (3) such additional lifeboats, or such number of approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus shall be provided as shall be sufficient (together with the lifeboats required under Rule A) for 60 per cent. of the total number of persons for which the vessel is certified.

Rule C.—The boats carried shall be of such reasonable capacity, having regard to the size of the ship, as the Board of Trade may require. Provided that no ship shall be required to carry lifeboats of an aggregate capacity greater than is required to accommodate the total number of persons which the ship is certified to carry.

Rule D.—If the ship is under 200 ft. in length, at least four approved lifebuoys shall be carried, and if of 200 ft. in length or over, at least eight approved lifebuoys shall be carried. One approved life-jacket shall be carried for each person on board, and, in addition, a sufficient number of approved life-jackets of a size suitable for children.

CLASS VIII.—*Steamships certified to carry Passengers in smooth water in estuaries and lakes.*

Rule A.—Subject to the provisions of General Rule 20 (2) and (3), a ship of this class shall carry such boats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus, as shall be sufficient (together with the boat or boats required by Rule B, where that rule applies) for 40 per cent. of the total number of persons for which the ship is certified.

Rule B.—A ship of this class having a length of not less than 70 ft. and less than 150 ft. shall carry at least one boat, and if of 150 ft. or over, at least two boats. The boats shall be attached to davits.

Rule C.—If the ship is under 150 ft. in length, at least four approved lifebuoys shall be carried, and if of 150 ft. in length or over, at least six approved lifebuoys shall be carried. One approved life-jacket shall be carried for each person on board.

Rule D.—The Board of Trade may in their discretion relieve a ship of this class wholly or partially from the operation of these Rules.

CLASS IX.—*Steamships certified to carry Passengers in smooth water on rivers and canals.*

Rule A.—Subject to the provisions of General Rule 20 (2) and (3),

a ship of this class shall carry such boats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus, as shall be sufficient (together with the boat carried under Rule B, where that rule applies) for 40 per cent. of the total number of persons for which the ship is certified.

Rule B.—A ship of this class having a length of not less than 70 ft. shall carry a boat in such a position that it can readily be got into the water.

Rule C.—At least four approved lifebuoys shall be carried. One approved life-jacket shall be carried for each person on board.

Rule D.—The Board of Trade may in their discretion relieve a ship of this class wholly or partially from the operation of these Rules.

CLASS X.—*Steam Launches and Motor Boats certified to carry Passengers for short distances to sea.*

Rule A.—A ship of this class having a length not exceeding 60 ft. shall carry two approved lifebuoys.

Rule B.—A ship of this class shall carry one approved life-jacket for each person on board; and, in addition, a sufficient number of life-jackets of a size suitable for children.

Rule C.—A ship of this class exceeding 60 ft. in length shall comply with the Rules in Class VIII, Home Trade, applying to a ship of the same length.

CLASS XI.—*Steam fish carriers, tugs, steam lighters, dredgers, steam hoppers, and hulks, which proceed to sea.*

Rule A.—A ship of this class shall comply with the Rules in Class II, Home Trade.

CLASS XII.—*Steam fish carriers, tugs, steam lighters, dredgers, steam hoppers, and hulks, which do not proceed to sea.*

Rule A.—A ship of this class shall carry a boat sufficient to accommodate all persons on board, two approved lifebuoys, and one approved life-jacket for each person on board.

GENERAL RULES.

1. *Interpretation.*

(1) In these Rules, unless the context otherwise requires:—*Person* means a person over the age of one year. *Passenger* has the same meaning as in Section 267, Merchant Shipping Act, 1894. *Passenger steamer* means every steamer which carries more than twelve passengers. *Emigrant ship* has the same meaning as in Section 268, Merchant Shipping Act, 1894, as amended by Section 14, Merchant Shipping Act, 1906. *Daylight* shall be reckoned as extending from one hour before sunrise to one hour after sunset. *Approved* means approved by the Board of Trade. *Length*, when a ship is referred to, means registered length.

(2) The Interpretation Act, 1889, shall apply to these Rules in the same way as it applies to an Act of Parliament.

2. *Power of the Board of Trade to accept alternatives.*

The Board of Trade shall have power, in general or in any particular case, to accept any boat, raft, buoyant apparatus, or other life-saving

appliance, in lieu of a life-saving appliance required by these Rules, subject to such conditions as they may impose, if they are satisfied that under those conditions it will be as effective as the appliance required by these Rules. Provided that in the case of a foreign-going passenger steamer no life-saving appliance shall be accepted in lieu of a lifeboat required by these Rules, except either some other approved type of lifeboat or a life-raft approved as being in every respect as efficient as the pontoon life-raft described in General Rule 10. Provided also that no life-raft shall be accepted on a foreign-going passenger steamer in lieu of a lifeboat required by these Rules unless the total cubic capacity of the lifeboats provided is at least equal to the greater of the two following amounts:—(1) 75 per cent. of the total capacity required to accommodate all the persons carried; or (2) the minimum capacity required by Column C of the Table in Appendix I.

3. *Boats.*

For the purposes of these Rules boats are arranged in the following classes:—

Class I.—A. *Open lifeboats with internal buoyancy only.*

The buoyancy of a wooden boat of this type shall be provided by water-tight air-cases, the total volume of which shall be at least equal to one-tenth of the cubic capacity of the boat. In the case of a metal boat an addition shall be made to the cubic capacity of the airtight compartments, so as to give it buoyancy equal to that of the wooden boat.

B. *Open lifeboats with internal and external buoyancy.*

The internal buoyancy of a wooden boat of this type shall be provided by water-tight air-cases, the total volume of which shall be at least equal to 7½ per cent. of the cubic capacity of the boat. If the external buoyancy is of cork, its volume, for a wooden boat, shall not be less than thirty-three thousandths of the cubic capacity of the boat; if of any material other than cork, its volume and distribution shall be such that the buoyancy and stability of the boat are not less than that of a similar boat provided with external buoyancy of cork. In the case of a metal boat an addition shall be made to the cubic capacity of the airtight compartments, so as to give it buoyancy equal to that of the wooden boat.

C. *Pontoon lifeboats having a well deck and fixed watertight bulwarks.*

The area of the well deck of a boat of this type shall be at least 30 per cent. of the total deck area. The height of the well deck above the water line at all points shall be at least equal to one-half per cent. of the length of the boat, this height rising to 1½ per cent. of the length of the boat at the ends of the well. The freeboard of a boat of this type shall be such as to provide for a reserve buoyancy of at least 35 per cent.

Class II.—A. *Open lifeboats having the upper part of the side collapsible.*

A boat of this type shall be fitted both with watertight air-cases and with external buoyancy, the volume of which, for each person

which the boat is able to accommodate, shall be at least equal to the following amounts:—

	Cubic feet.
Air cases	1·5
External buoyancy (if of cork)	0·2

The minimum freeboard of boats of this type is fixed in relation to their length; it shall be measured vertically to the top of the solid hull at the side amidships, from the water-level when the boat is loaded. The freeboard in fresh water shall not be less than the following amounts:—

Length of the Boat in feet.	Minimum Freeboard in inches.
26	8
28	9
30	10

The freeboard of boats of intermediate lengths shall be found by interpolation.

B. *Pontoon lifeboats having a well deck and collapsible bulwarks.*

All the conditions laid down for boats of Class 1C shall be applied to boats of this type, which differ from those of Class 1C only in regard to the bulwarks.

C. *Pontoon lifeboats having a flush deck and collapsible bulwarks.*

The minimum freeboard of boats of this type is independent of their length and depends only upon their depth. The depth of the boat shall be measured vertically from the underside of the garboard strake to the top of the deck at the side amidships and the freeboard shall be measured from the top of the deck at the side amidships to the water level when the boat is loaded. The freeboard in fresh water shall not be less than the following amounts, which are applicable without correction to boats having a mean sheer equal to 3 per cent. of their length:—

Depth of Boat in inches.	Minimum Freeboard in inches.
12	$2\frac{3}{4}$
18	$3\frac{3}{4}$
24	$5\frac{1}{8}$
30	$6\frac{1}{2}$

For intermediate depths the freeboard shall be obtained by interpolation. If the sheer is less than the standard sheer defined above, the minimum freeboard shall be obtained by adding to the figures in the table one-seventh of the difference between the standard sheer and the actual mean sheer measured at the stem and stern post; no deduction shall be made from the freeboard on account of the sheer being greater than the standard sheer or on account of the camber of the deck.

CLASS III.

Open boats which have not the buoyancy required for lifeboats of Class I.

4. *Motor Boats.*

(1) An approved motor boat may be carried as a lifeboat subject

to the following conditions:—(*a*) It shall comply with the requirements for a lifeboat of Class 1, and proper appliances shall be provided for putting it into the water speedily. (*b*) It shall be adequately provided with fuel, and kept so as to be at all times fit and ready for use.

(2) Where the number of lifeboats is less than ten, one of them may be a motor boat. Where the number of lifeboats is not less than ten, two of them may be motor boats. The Board of Trade may, on the application of an owner, allow a greater number of motor boats to be carried, if they are satisfied that the efficiency of the life-saving equipment will not thereby be diminished.

(3) In fixing the volume of the internal buoyancy and, where fitted, the external buoyancy, regard shall be had to the difference between the weight of the motor and its accessories and the weight of the additional persons which the boat could accommodate if the motor and its accessories were removed.

5. *Construction of Boats.*

(1) All boats shall be properly constructed, and shall be of such form and proportions that they shall have ample stability in a seaway, and sufficient freeboard when loaded with their full complement of persons and equipment. They shall be fitted and arranged to the satisfaction of the Board of Trade.

(2) The structural strength of the boats shall be to the satisfaction of the Board of Trade, and in the case of foreign-going passenger steamers launched on or after the 1st March, 1913, sufficient to permit of the boats being safely lowered into the water with the full complement of persons and equipment on board.

(3) In all open boats, all thwart and side seats shall be fitted as low in the boat as practicable, and shall provide seating accommodation for all persons the boat is deemed fit to carry, and bottom boards shall be fitted so that the thwarts shall not be more than 2 ft. 9 in. above them.

(4) Internal buoyancy apparatus shall be constructed of copper or yellow metal of not less than 18 ozs. to the superficial foot, or of other durable material, and in open boats of Class 1 may be placed along the sides or at the ends of the boat, but not in the bottom of the boat. External buoyancy apparatus may be of cork or of any other equally efficient approved material; the use of rushes, cork shavings, loose granulated cork, or any other loose granulated substance, and the use of apparatus dependent upon inflation by air, is prohibited.

(5) Open lifeboats of Class 1 shall have a mean sheer at least equal to 4 per cent. of their length.

(6) Pontoon lifeboats may be built of wood or metal. If constructed of wood, they shall have the bottom and deck made of two thicknesses with textile material between; if of metal, they shall be divided into watertight compartments with means of access to each compartment and shall be provided with at least two bilge pumps.

(7) All pontoon lifeboats shall be fitted with efficient means for quickly clearing the deck of water. The orifices for this purpose shall be such that the water cannot enter the boat through them when they are intermittently submerged. The number and size of the orifices shall be determined by the Board of Trade for each type of boat by a special test. For the purpose of this test:—(*a*) The pontoon boat shall be loaded with a weight of iron equal to that of its complement of persons and equipment; (*b*) In the case of a boat 28 ft. in length, two tons of

water shall be cleared from the boat in a time not exceeding the following:—

Class 1C	... ...	60 seconds.
„ 2B	... ...	60 „
„ 2C	... ...	20 „

In the case of a boat having a length greater or less than 28 ft. the weight of water to be cleared in the same time shall be for each type directly proportional to the length of the boat.

(8) No boat shall be accepted as a lifeboat the buoyance of which depends upon the previous adjustment of one of the principal parts of the hull.

(9) All boats shall be fitted for the use of a steering oar.

(10) All boats shall be permanently marked to the satisfaction of the Board of Trade in such a way as to indicate plainly their dimensions and the number of persons for which they are approved. Boats that have been properly marked need not be re-measured, unless there is reason to believe that the marks have been tampered with or are otherwise defective or improper.

6. *Number of Persons.*

(1) The number of persons which a lifeboat shall be deemed fit to carry shall be equal to the greatest whole number obtained by dividing the capacity of the boat in cubic feet, or the surface of the boat in square feet, as the case may be (calculated as provided by General Rules 7 and 8), by the standard unit of capacity, or unit of surface, defined below.

(2) The cubic capacity in feet of a boat in which the number of persons is determined by the surface shall be assumed to be ten times the number of persons which the boat is authorised to carry.

(3) The standard units of capacity and surface are as follows:—

Unit of Capacity.	Cubic Feet.
Class 1A.	... 10
Class 1B.	... 9
Class 3	... 10
Unit of Surface.	Square Feet.
Class 2A.	$3\frac{1}{2}$
Class 2C	
Class 1C.	$3\frac{1}{4}$
Class 2B.	

(4) The Board of Trade may accept a smaller divisor for pontoon boats of Class 1C and Class 2B, if they are satisfied after trial that the number of persons for whom there is seating accommodation in the boat in question is greater than the number obtained by applying the above divisor, provided always that the divisor adopted in place of $3\frac{1}{4}$ shall never be less than 3.

(5) The number of persons obtained by the above rules shall be reduced:—(1) If it is greater than the number of persons for which there is proper seating accommodation, the latter number being determined in such a way that the persons when seated do not interfere in any way with the use of the oars, or (2) If, in the case of boats other than open boats of Class 1, the freeboard when the boat is fully loaded is less than the freeboard required by these Rules.

(6) If a Surveyor is doubtful as to the number of persons any boat is fit to carry he may require the boat to be tested afloat with the intended number of persons on board.

(7) The Board of Trade may limit the number of persons to be allowed in boats with very fine ends and in boats very full in form.

(8) Two children under the age of twelve years may be carried in place of one adult person.

7. Cubic capacity of Open Boats of Class 1.

(1) In the case of an open boat of Class 1 the cubic capacity shall be determined by the following formula:—Capacity $= \frac{l}{12}(4A + 2B + 4C)$. l denotes the *length* of the boat in feet from the inside of the planking or plating at the stem to the corresponding point at the stern post; in the case of a boat with a square stern the length is measured to the inside of the transom. A, B, C denote respectively the *areas of the cross-sections* at the quarter length forward, amidships, and the quarter length aft, which correspond to the three points obtained by dividing l into four equal parts (the areas corresponding to the two ends of the boat are considered negligible). The areas A, B, C shall be deemed to be given in square feet by the successive application of the following formula to each of the three cross-sections:—Area $= \frac{h}{12}(a + 4b + 2c + 4d + e)$. h denotes the *depth* measured in feet inside the planking or plating from the keel to the level of the gunwale, or, in certain cases, to a lower level, as determined hereafter. a, b, c, d, e denote the horizontal *breadths* of the boat measured in feet to the inside of the planking at the upper and lower points of the depth and at the three points obtained by dividing h into four equal parts (a and e being the breadths at the extreme points, and c at the middle point, of h).

(2) If the sheer of the gunwale, measured at the two points situated at a quarter of the length of the boat from the ends, exceeds 1 per cent. of the length of the boat, the depth employed in calculating the area of the cross-sections A or C shall be deemed to be the depth amidships plus 1 per cent. of the length of the boat.

(3) If the depth of the boat amidships exceeds 45 per cent. of the breadth, the depth employed in calculating the area of the midship cross-section B shall be deemed to be equal to 45 per cent. of the breadth, and the depth employed in calculating the areas of the quarter length sections A and C shall be obtained by increasing this last figure by an amount equal to 1 per cent. of the length of the boat, provided that in no case shall the depths employed in the calculation exceed the actual depths at these points.

(4) If the depth of the boat is greater than 4 ft. the number of persons given by the application of these General Rules shall be reduced in proportion to the ratio of 4 ft. to the actual depth, until the boat has been tested afloat with that number of persons on board all wearing life jackets, and the test has proved satisfactory.

(5) The cubic capacity of a boat may be assumed to be the product of the length, the breadth and the depth multiplied by 0·6 in cases where it is clear that this formula does not give a greater capacity than that obtained by the above method. The dimensions shall then be measured in the following manner:—*Length:* From the intersection of the outside of the planking with the stem to the corresponding point

at the stern post or, in the case of a square sterned boat, to the after side of the transom. *Breadth:* From the outside of the planking at the point where the breadth of the boat is greatest. *Depth:* Amidships inside the planking from the keel to the level of the gunwale, but the depth used in calculating the cubic capacity may not in any case exceed 45 per cent. of the breadth. In all cases the shipowner shall have the right to require that the cubic capacity of the boat shall be determined by exact measurement.

(6) If the oars are pulled in rowlocks, the bottom of the rowlocks shall be considered as the gunwhale in measuring the depth of the boat.

(7) The cubic capacity of a motor-boat shall be obtained from the gross capacity by deducting a volume equal to that occupied by the motor and its accessories.

8. *Deck area and capacity of Pontoon Boats and of Open Boats of Class 2.*

In the case of boats of the above types the surface in square feet shall be determined by the following formula:—Area $= \frac{l}{12}(2a + 1{\cdot}5b + 4c + 1{\cdot}5d + 2e)$. l denotes the *length* in feet from the intersection of the outside of the planking with the stem to the corresponding point at the stern post. a, b, c, d, e denote the *horizontal breadths* in feet outside the planking at the points obtained by dividing l into four equal parts and sub-dividing the foremost and aftermost parts into two equal parts (a and e being the breadths at the extreme sub-divisions, c at the middle point of the length, and b and d at the intermediate points).

9. *Size of boats.*

No boat carried in compliance with these Rules shall have a capacity of less than 125 cubic feet.

10. *Life-Rafts.*

(1) An approved pontoon life-raft shall satisfy the following conditions:—(i) It shall be reversible and fitted with bulwarks of wood, canvas or other suitable material on both sides. These bulwarks may be collapsible. (ii) It shall be of such size, strength and weight that it can be handled without mechanical appliances, and, if necessary, be thrown from the vessel's deck. (iii) It shall have not less than three cubic feet of air-cases or equivalent buoyancy for each person whom it can accommodate. (iv) It shall have a deck area of not less than four square feet for each person whom it can accommodate and the platform shall not be less than 6 ins. above the water level when the raft is loaded. (v) The air cases or equivalent buoyancy should be placed as near as possible to the sides of the raft.

(2) Every raft shall be marked to the satisfaction of the Board of Trade in such a way as plainly to indicate the number of persons for which it is approved.

(3) Two children under the age of twelve years may be carried in place of one adult person.

(4) In ships which carry rafts there shall be a sufficient number of rope ladders, or other approved appliances, always available for use in embarking the persons in the rafts.

11. *Weight of Persons.*

In the tests prescribed by these Rules for determining the number

of persons which a boat or pontoon raft can accommodate each person shall be assumed to be an adult person wearing a life-jacket.

In verifications of freeboard the pontoon boats shall be loaded with a weight of at least 165 lbs. for each adult person that the pontoon boat is authorised to carry.

12. *Stowage of Boats, Rafts, etc.*

(1) All boats and rafts shall be stowed in such a way that:—(*a*) They can be launched in the shortest possible time; (*b*) Even under conditions of list and trim unfavourable from the point of view of the handling of the boats and rafts as large a number of persons as possible can be embarked in them; (*c*) As large a number of the boats and rafts as possible shall be capable of being launched on either side of the ship, either by means of approved appliances for transferring them from one side of the deck to the other, or by stowing some of the additional boats or rafts in rows across the deck, or by some other equally satisfactory means.

(2) With regard to the stowage of additional lifeboats and rafts, the following provisions shall also apply:—(*a*) Additional lifeboats may be stowed under lifeboats of Class I attached to davits; (*b*) Additional lifeboats may be stowed in tiers of two or three one above another, or they may, subject to such conditions as the Board of Trade may impose, be fitted one within another; (*c*) Additional lifeboats, and rafts, may be stowed in rows across a deck bridge or poop; (*d*) Means shall be provided to the satisfaction of the Board of Trade for attaching additional lifeboats to the davits, and lowering them into the water, in the shortest possible time, and in the case of boats not stowed under davits for securing their transfer to the ship's side in the shortest possible time.

(3) Where a boat is stowed underneath another boat there shall be provided approved removable supports or other approved appliances, so as to secure that the weight of a boat is not unduly supported by the boat underneath it.

(4) Boats may only be stowed on more than one deck on condition that proper measures are taken to prevent the boats from a lower deck being fouled by those from a deck above.

(5) All other buoyant apparatus, lifebuoys and life-jackets shall be so stowed as to be readily available in case of emergency.

13. *Appliances for lowering boats.*

(1) The davits shall be of approved form and shall be suitably placed to the satisfaction of the Board of Trade. They shall be fitted on one or more of the decks in such positions that the boats can be efficiently lowered from them, and shall be so spaced and placed that the boats can be swung out with facility. Davits shall not be fitted in the bows of a ship, but they may be fitted in any other position in the ship, provided that the boats are not brought into dangerous proximity to a propeller at the time of launching.

(2) The davits, falls, blocks, and all other gear required for lowering the boats, shall be of sufficient strength to the satisfaction of the Board of Trade; and in the case of foreign-going passenger steamers launched on or after the 1st March, 1913, they shall be of such strength that the boats can be lowered safely with the full complement of persons and equipment, the ship being assumed to have a list of 15 degrees.

(3) In the case of foreign-going passenger steamers launched on or after the 1st July, 1914, the davits shall be fitted with a gear of sufficient power to ensure that the boat can be turned out against the maximum list under which the lowering of the boats is possible on the vessel on which they are fitted.

(4) The boat's falls shall be long enough to lower the boat into the water with safety when the vessel is light. Life-lines shall be fitted to the davit spans, and shall be long enough to reach the water when the vessel is light. Hooks shall not be attached to the lower tackle blocks.

(5) Means shall be provided for speedily, but not necessarily simultaneously or automatically, detaching the boats from the falls; the boats placed under davits shall be attached to the falls and kept ready for service; the points of attachment of the boats to the falls shall be sufficiently away from the ends of the boats to ensure their being easily swung clear of the davits; the boats' chocks shall be of such construction and arrangement as shall be satisfactory to the Board of Trade.

(6) Where more boats than one are served by the same set of davits, arrangements shall be made to prevent the falls fouling when they are recovered, and, where more than three boats are served by the same set of davits, there shall be provided an approved appliance for lowering the boats in turn and rapidly.

(7) The Board of Trade may accept in lieu of davits or sets of davits any other appliance, appliances, or arrangements, which appear to them at least as effective as davits for placing the boats in the water.

14. *Equipment for boats and life-rafts.*

(1) Every boat which is carried by any ship shall be equipped as follows:—(*a*) With the full single banked complement of oars and two spare oars, and a steering oar. (*b*) With two plugs for each plug hole, attached with lanyards or chains, and one set and a half of thole pins or crutches, attached to the boat by sound lanyards. Plugs shall not be required where proper automatic valves are fitted. (*c*) With a sea anchor, a bailer, a galvanised iron bucket, a rudder and a tiller, or yoke and yoke lines, a painter of sufficient length, and a boat-hook. The rudder, the bailer, and the bucket shall be attached to the boat by sufficiently long lanyards, and kept ready for use. (*d*) With a vessel capable of holding one quart for each person that the boat is deemed fit to carry. This vessel shall be kept filled with fresh water, and provided with a dipper with lanyard. (*e*) With two hatchets, one to be kept in each end of the boat, and to be attached to the boat by a lanyard. (*f*) With a line securely becketted round the outside of the boat. (*g*) With an efficient lantern trimmed, with oil in its receiver sufficient to burn eight hours; or with some other lantern or light at least as effective approved by the Board of Trade.

(2) In addition to the equipment prescribed above, the boats in all Classes of foreign-going ships shall be equipped as provided in paragraphs (*a*) to (*e*), inclusive, of this sub-section of this Rule. The Board of Trade may, however, exempt from the requirement to carry masts, sails, and compasses a proportion of the boats of ships which carry passengers in the North Atlantic, and which are equipped with wireless telegraphy. The boats of ships in Classes I to V, inclusive, of the Home Trade shall be provided with the additional equipment

specified in paragraphs (*b*), (*d*), and (*e*) of this sub-section of this Rule. (*a*) With a mast or masts, and with at least one good sail and proper gear for each; but this does not apply to an approved motor boat. (*b*) With an efficient compass. (*c*) With an air-tight case containing 2 lbs. of biscuits for each person for whom the boat is approved. (*d*) With one gallon of vegetable or animal oil, and a vessel of approved pattern for distributing it in the water in rough weather. This vessel shall be capable of being attached to the sea anchor. (*e*) With one dozen self-igniting red lights in a water-tight tin, and a box of suitable matches in a water-tight tin.

(3) Every life-raft, which is carried by a foreign-going ship, shall be equipped as follows:—(*a*) With four oars and five thole pins or crutches attached to the raft by sound lanyards, and a steering oar. (*b*) With a sea anchor and a painter of sufficient length. (*c*) With a vessel capable of holding one quart for each person that the raft is deemed fit to carry. This vessel shall be kept filled with fresh water, and provided with a dipper with lanyard. (*d*) With a line securely becketted round the outside of the raft. (*e*) With a self-igniting lifebuoy light. (*f*) With one gallon of vegetable or animal oil, and a vessel of approved pattern for distributing it on the water in rough weather. This vessel shall be capable of being attached to the sea anchor. (*g*) With an air-tight case containing two pounds of biscuits for each person for whom the raft is approved. (*h*) With one dozen self-igniting red lights in a water-tight tin, and a box of suitable matches in a water-tight tin.

(4) Every life-raft which is carried by a Home Trade ship shall be provided with a suitable approved equipment.

(5) All boats and rafts shall be fully equipped before the ship leaves harbour, and the equipment shall remain in the boat or raft throughout the voyage, while the ship is at sea. Such of the articles as are liable to be stolen or mislaid shall be properly secured to the boat or raft. If it is not practicable to place the whole of the equipment in the boat or raft the part not so placed shall be stowed in a suitable locker near by, and each article shall be marked with the number of the boat or raft to which it belongs.

15. *Buoyant Apparatus.*

Approved buoyant apparatus, whether buoyant deck seats, buoyant deck chairs or other buoyant apparatus, shall be deemed sufficient, so far as buoyancy is concerned, for a person or a number of persons to be ascertained by dividing the number of pounds of iron which it is capable of supporting in fresh water by 32. Such buoyant apparatus shall be of approved material and construction, and if it depends for its buoyancy on air shall not required to be inflated before use, and shall be marked in such a way as plainly to indicate that it is buoyant and the number of persons for whih it is approved.

16. *Life-Jackets.*

An approved life-jacket shall mean a jacket of approved material and construction, which is capable of floating in fresh water for 24 hours with 15 lbs. of iron suspended from it, or any other approved appliance of equal buoyancy and capable of being fitted on the body. Life-jackets the buoyancy of which depends on air compartments are prohibited. Life-jackets for children shall be of suitable size and buoyancy to the satisfaction of the Board of Trade.

17. *Lifebuoys.*

(1) (*a*) An approved lifebuoy shall be of solid cork or other equivalent material. It shall be capable of floating in fresh water for at least 24 hours with 32 lbs. of iron suspended from it. (*b*) Lifebuoys filled with rushes, cork shavings, granulated cork or any other loose granulated material, or whose buoyancy depends upon air compartments requiring inflation, are prohibited.

(2) All lifebuoys shall be fitted with beckets securely seized, and at least one on each side of the ship shall be fitted with a life-line at least 15 fathoms in length.

(3) (*a*) Self-igniting lifebuoy lights shall be placed near the following number of lifebuoys:—In a ship in Class VI, Home Trade, not less than two; In every other ship, except ships in Class VII, VIII, IX, or X, Home Trade, at least half the lifebuoys required by these Rules and not less than six in any passenger steamer. (*b*) Such lifebuoy lights shall be efficient and inextinguishable in water to the satisfaction of the Board of Trade, and provided with means for attachment to the lifebuoys.

18. *Position of Lifebuoys and Life-Jackets.*

All lifebuoys and life-jackets shall be suitably placed to the satisfaction of a Board of Trade Surveyor and so as to be readily accessible to all persons on board; and their position shall be plainly indicated so that it may be known to those for whom they are intended. Lifebuoys shall always be capable of being rapidly cast loose and shall not be rigidly secured in any way.

19. *Saving for certain ships and boats.*

(1) Notwithstanding anything contained in these Rules, a passenger steamer in Class VI, Class VII, Class VIII, or Class IX, Home Trade, launched before 1st March, 1913, shall not be required to be provided, until 1st January, 1916, with boats, approved life-rafts, approved buoyant deck seats or other approved buoyant apparatus more than sufficient to accommodate the following percentage of the total number of persons which the ship is certified to carry:—In Class VI, 50 per cent.; in Class VII, 40 per cent.; in Class VIII, 25 per cent.; in Class IX, 25 per cent. In every case, subject to the discretionary power given to the Board of Trade by Class VIII, Rule D, and by Class IX, Rule D, approved life-jackets shall be carried in accordance with the Rules in the respective Classes.

(2) Any boat which forms part of the equipment of a ship that was launched before 1st March, 1913, and which has been inspected and approved by the Board of Trade before that date, may be accepted as equivalent to a lifeboat until 1st July, 1915, so long as it remains in good condition.

(3) Boats and rafts which were ordered before 1st October, 1912, in order to complete the equipment of a ship, but which were not delivered in sufficient time to be inspected by the Board of Trade before 1st March, 1913, may be accepted as equivalent to lifeboats and pontoon life-rafts, respectively, until 1st July, 1915, so long as they remain in good condition, and subject, as regards rafts, to such conditions as the Board of Trade may in any particular case require. Provided that the boats and rafts shall not be so accepted unless (*a*) they have been inspected, where this has not already been done; (*b*) they would have

complied with the requirements of the Rules enforced prior to 1st March, 1913.

20. *Exemptions.*

(1) If it shall appear to the Board of Trade, on the application of the owner of any ship, that it is not practicable or reasonable to fit in that ship the number of sets of davits required by these Rules, the Board of Trade may direct that one or more sets of davits may be dispensed with in that ship, subject to such conditions, if any, as the Board may impose. Provided that, in the case of a foreign-going passenger steamer, the number of davits fitted shall not be less than the minimum number of open boats of Class I required by these Rules, except in the following cases:—(i) If a large proportion of the persons on board are accommodated in boats whose length is greater than 50 ft., a further reduction in the number of sets of davits may be allowed if the Board of Trade are satisfied that the arrangements are in all respects satisfactory. (ii) In the case of ships the keel of which is laid on or before 31st December, 1914, the minimum number of sets of davits may, if the ship is between 245 ft. and 460 ft. in length, be one less, and if the ship is 460 ft. or more in length, two less (one on each side of the ship) than the minimum number of open boats specified in column B of the Table in Appendix I. Provided further that, in the case of a foreign-going passenger steamer, the owner of the ship in question shall be required to prove, by a test made in the presence of a Board of Trade Surveyor, that all the boats can be launched in a time, to be fixed by the Board of Trade. The conditions of this test shall be as follows:—(i) The ship is to be upright and in smooth water (ii) The time is the time required from the beginning of the removal of the boat covers, or any other operation necessary to prepare the boats for lowering, until the last boat, or pontoon raft, is afloat. (iii) The number of men employed in the whole operation must not exceed the total number of boat hands that will be carried on the vessel under normal service conditions. (iv) Each boat when being lowered must have on board at least two men, and its full equipment as required by these Rules. The Board of Trade may in their discretion impose as a condition of such exemption as aforesaid, in respect of a ship in Class I, Home Trade, launched before 1st March, 1913, that the boats carried shall be of a required capacity greater than the minimum capacity prescribed in General Rule 9.

(2) If it appears to the Board of Trade, on the application of the owner of any ship, that it is not practicable or reasonable in a particular case to require that pontoon lifeboats, made before 31st December, 1914, and carried on ships of which the keel was laid on or before that date, shall have the minimum freeboard specified in these Rules, or the bottom and deck made in two thicknesses with textile material between, the Board may in their discretion dispense with full compliance with the Rules in these respects until 1st January, 1920, subject to such conditions, if any, as the Board may impose.

(3) If it shall appear to the Board of Trade on the application of the owner of any passenger steamer in the Home Trade, launched before 1st March, 1913, that it is not practicable, or reasonable, to provide in that ship the boats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus required, the Board of Trade may direct that the requirements of these Rules may be modified

as regards that ship, subject to such conditions as they may impose, provided always that—(*a*) In the case of a ship in Class I or Class V the total number of persons which can be accommodated in the boats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus, shall not be less than 70 per cent. of the total number allowed to be carried by the ordinary passenger certificate; (*b*) In the case of a ship in Class VI, Class VII, Class VIII, or Class IX the total number of persons which can be accommodated in the boats, approved life-rafts, approved buoyant deck seats, or other approved buoyant apparatus, shall not be a lower percentage of the total number of persons which the ship is certified to carry than is required in sub-section (1) of Rule 19 for these classes of ships respectively.

(4) If a small ship is unable to carry more than one boat, the Board of Trade may in their discretion exempt that ship from carrying more than one, but whenever one boat only in carried there must be proper provision to enable it to be placed readily in the water on either side of the ship. If it is impracticable in any case for a ship to carry a boat of the minimum capacity prescribed by General Rule 9, the Board of Trade may in their discretion allow a boat of smaller capacity to be carried by that ship.

21. *Ships certified to carry not more than twelve passengers.*

A ship which is certified to carry a number of passengers not exceeding twelve, and which, if it were not certified to carry passengers, would be subject to the Rules in Class II, Foreign-going, or in Class II, Home Trade, as the case may be, shall be subject to those Rules respectively, and not to those in any other Class.

22. *References to General Rules.*

Where in a Rule in any Class reference is made to a General Rule, that reference shall not be deemed in any way to limit or to derogate from the general force and application of the Rule to which reference is made,

23. *Short Title.*

These Rules may be cited as the Merchant Shipping (Life-Saving Appliances) Rules, 1914.

Appendix I.

Table showing the Minimum Number of Sets of Davits and the Minimum Number of Open Boats required to be provided in a Steamship in Class I, Foreign-going, or in Class I, Home Trade, or in Class V, Home Trade (except in certain cases), and the Minimum Life-boat Capacity for the purposes of General Rule 2.

Registered Length of the Ship.	(A) Minimum number of sets of davits.	(B) Minimum number of open boats, Class I.	(C) Minimum aggregate cubic capacity of lifeboats in feet.

285 „ 300	1,900
300 „ 330	2,150
330 „ 360	2,400

In the case of a steamship of under 100, or over 360 ft., the cubic capacity of the lifeboats to be carried shall be prescribed by the Board of Trade.

Appendix IV.

Table showing the Minimum Number of Sets of Davits required to be provided in a Steamship in Class VI or Class VII, Home Trade.

Length of steamship in feet.	Minimum number of sets of davits.
Under 200	2
200 and under 240	3
240 „ 280	4
280 „ 320	5

In the case of a steamship of over 320 ft., the number of sets of davits to be provided shall be prescribed by the Board of Trade.

REMOVAL OF WRECKS.

Extension of Powers conferred by Sections 530-534 of the Merchant Shipping Act, 1894.

Sections 530 to 534 give powers to the local harbour authority at every port to clear away any wreck forming an obstruction, in default of the owner's proceeding to do so, and to re-imburse itself from the sale of any materials recovered, either of the ship or of her cargo. Where there is no local authority, the lighting and buoying authority is to have jurisdiction, and the same powers of removal, re-imbursing itself in the same manner. As, however, the expenses of recovery of the materials of an iron ship greatly exceed the value of the materials when recovered, certain of the principal harbour authorities have applied for, and have obtained further powers; and the Port of London Authority, the Humber Conservancy, the Mersey Docks and Harbour Board, the Clyde Lighthouse Trust, and the Commissioners of Cork and of Waterford Harbours, have, with some others, power to enforce payment by the owners of a wrecked ship of all expenses incurred in the removal of the obstruction.

In France, the measure of liability is limited to the value of the ship and cargo. By abandonment of these the owner of a vessel wrecked in French waters escapes all further liability to the Government.

MERCHANT SHIPPING (UNDERMANNING) ACT, 1897.

AN ACT TO AMEND THE MERCHANT SHIPPING ACT, 1894, WITH RESPECT TO THE POWER OF DETENTION FOR UNDERMANNING.

I.—(1) Section 459 of the Merchant Shipping Act, 1894 (which gives power to detain unsafe ships), shall apply in the case of undermanning, and accordingly that section shall be construed as if the words "or by reason of undermanning" were inserted therein after the word "machinery," and as if the words "or for ascertaining the sufficiency of her crew" were inserted after the word "surveyed," and as if the words "or the manning of the ship" were inserted therein after the words "re-loading of cargo," and the powers exercisable under or for the purposes of that section shall include power to muster the crew.

(2) Section 462 of the Merchant Shipping Act, 1894, (which relates to foreign ships), shall also apply in the case of undermanning, and accordingly that section shall be construed as if the words "or by reason of undermanning" were inserted therein after the words "improper loading."

II.—This Act may be cited as the Merchant Shipping Act, 1897.

BOARD OF TRADE INSTRUCTIONS AS TO PROCEDURE UNDER THE MERCHANT SHIPPING ACT, 1897.

[*Circular* 1463; *came into operation, March*, 1909.]

1. Foreign-going steamships of over 200ft. in length, or not less than 700 tons gross, when proceeding to sea, should have, independently of the master and two mates, a sufficient number of deck hands available for division into two watches, so as to provide a minimum effective

watch, viz., a competent hand at the wheel, a look-out man, and an additional hand on deck available for any purpose.

2. Foreign-going steamships of over 2,500 tons gross, or of more than 320ft. in length, should have, independently of the master and two mates, not less than eight efficient deck hands.

3. Foreign-going steamships of over 5,500 tons gross, or of more than 420ft. in length, should have, independently of the master and two mates, not less than ten efficient deck hands.

4. In case of any such vessel opening or lodging Articles of Agreement and failing to have the requisite number of efficient deck hands, in addition to the master and two mates, the Superintendent or Deputy Superintendent should draw the master's attention to the fact, and immediately report the case in writing to the Resident Detaining Officer or Surveyor of the Board of Trade.

5. The Resident Detaining Officer or Surveyor should at once, on receiving such notice from the Superintendent, visit the vessel, and point out to the master the necessity of providing the requisite number of deck hands. Should the master refuse to comply with this, the Detaining Officer should, if satisfied that the undermanning is such as to cause serious danger to life, have the ship provisionally detained.

6. In any case in which the Detaining Officer or Surveyor does not feel justified in detaining a ship so reported to him, he should immediately report the case to the Board of Trade for instructions, and, should the vessel sail before action is taken, he should give the reasons which have induced him to allow the vessel to proceed to sea.

7. When a steam vessel of less than 200ft. in length, or less than 700 tons gross, or any steam vessel proceeding on a home trade or on a coasting voyage, appears to be unsafe through undermanning, the Detaining Officer should at once inspect the vessel, obtain all necessary particulars, and report fully to the Board of Trade.

8. When Articles of Agreement are being signed or deposited in the case of sailing vessels, the Superintendent should, if it appears to him that the number or efficiency of the crew is such as to fall materially below the general practice in similar vessels, as evidenced by the office records, bring the matter to the master's notice in careful and guarded terms, reporting it at the same time to the Detaining Officer of the Board of Trade. The Detaining Officer should at once have the vessel inspected and reported upon fully in the matter of rig, equipment, labour-saving appliances, intended voyage, together with details, if procurable, of sail area and number of cloths in head of main course, or any other particular likely to affect the question. These particulars should be sent at once to the Board of Trade, with a report from the Surveyor or Principal Officer as to whether he considers the vessel so undermanned as to be likely to lead to serious danger to life. In carrying out the above instructions, due regard must be had to the nature of the service for which the vessel is intended.

9. In the case of foreign vessels, as they do not require to go through Shipping Office formalities when in our ports, trustworthy information as to their manning will chiefly come to hand through formal complaint of the crew, or particulars supplied by Customs or Consular Officers. If such information be received, the vessel should be visited, and the same course adopted as in the case of a British vessel, the officer being careful to use tact in pointing out to the master his requirements, and the result

of non-compliance with the same, communicating at the same time with the Consul of the nation to which the vessel belongs. Where there is reason to believe that the law in force in any foreign country is such as to secure an efficient manning as is required in British ships, no attempt should be made to interfere with a vessel unless there be trustworthy evidence that such law has not been complied with. A foreign vessel should not be detained for undermanning without the sanction of the Department.

MERCHANT SHIPPING (LIABILITY OF SHIPOWNERS) ACT, 1898.

I.—Sections 502 to 509 inclusive of the Merchant Shipping Act, 1894, shall extend and apply to the owners, builders, or other parties interested in any ship built at any port or place in Her Majesty's dominions, from and including the launching of such ship until the registration thereof, under Section 2 of the Merchant Shipping Act, 1894. Provided always that such owners, builders, or other parties interested as aforesaid shall not benefit under this section for a period beyond three months after the launching of such ship.

II.—So much of Section 508 of the Merchant Shipping Act, 1894, as is inconsistent with the foregoing, is hereby repealed.

III.—For the purposes of this Act, the tonnage of a ship shall be ascertained as provided by Section 503, Sub-Section 2 (*b*) and (*c*) of the Merchant Shipping Act, 1894, with regard to foreign ships.

IV.—For purposes of this Act " ship " shall include every description of vessel used or intended to be used in navigation not propelled by oars, and whether completed or in course of completion or construction.

V.—This Act may be cited as the Merchant Shipping (Liability of Shipowners) Act, 1898.

MERCHANT SHIPPING (MERCANTILE MARINE FUND) ACT, 1898.

AN ACT TO AMEND THE LAW WITH REGARD TO THE PROVISION FOR THE PAYMENT OF CERTAIN EXPENSES UNDER THE MERCHANT SHIPPING ACT, 1894, AND WITH REGARD TO THE LEVYING OF LIGHT DUES.

I.—(1) As from the commencement of this Act—

(*a*) All sums accounted for and paid to the Mercantile Marine Fund, except the light dues or other sums mentioned in paragraph (*i*) of Section 676 of the Merchant Shipping Act, 1894, shall be paid into the Exchequer.

(*b*) All expenses charged on and payable out of the Mercantile Marine Fund, except the expenses relating to lighthouses, buoys, and beacons mentioned in paragraph (1) of Section 677 of the same Act, and except also any expenses incurred by a general lighthouse authority under Section 531 of the same Act, shall, so far as they are not paid by any private person, be paid out of moneys provided by Parliament.

(c) The said excepted sums shall be accounted for and paid to, and the said excepted expenses shall be charged on and payable out of a fund which shall be called the General Lighthouse Fund, and references in Part XI. and in Sections 531 and 679 of the Merchant Shipping Act, 1894, to the Mercantile Marine Fund shall be construed as references to the General Lighthouse Fund.

(2) The General Lighthouse Fund shall be applied to the payment of the expenses by this Act charged therein, and to no other purpose whatever.

(3) The amount standing at the commencement of this Act to the credit of the Mercantile Marine Fund shall be carried to the credit of the General Lighthouse Fund, and the liabilities of the Mercantile Marine Fund existing at the commencement of this Act shall be discharged out of the General Lighthouse Fund.

II.—(1) All Colonial light dues shall, after the commencement of this Act be carried to the General Lighthouse Fund, subject to the prior payment thereout of any sums payable on account of money secured on those dues at the commencement of this Act in accordance with the conditions on which the money is secured.

(2) All sums which, at the commencement of this Act, are standing to the credit of the accounts kept by the Board of Trade with respect to Colonial light dues (including any sum standing to the credit of the Basses Lights Fund), shall be transferred and paid to the General Lighthouse Fund, but shall remain subject to any existing charges thereon.

(3) All expenses incurred in constructing or maintaining any Colonial lights, and the contributions made by Her Majesty's Government in respect of the lighthouse on Cape Spartel, Morocco, shall, after the commencement of this Act, be paid out of the General Lighthouse Fund.

(4) Sections 661, 662, and 663 of the Merchant Shipping Act, 1894 (which relate to the advance and borrowing of money for the purpose of the construction and repair of lighthouses), shall apply in the case of Colonial lights as they apply in the case of other lighthouses, buoys, or beacons.

(5) All expenses incurred after the commencement of this Act by the Board of Trade or any of the general lighthouse authorities in making and maintaining communication between lighthouses and the shore shall be paid out of the General Lighthouse Fund. Provided that such communications shall be available for private messages at reasonable charges, so far as may be compatible with the efficiency and safety of the lighthouse service, and all sums received in respect thereof shall be paid to the General Lighthouse Fund.

III.—Such fees shall be paid in respect of the registration, transfer (including transmission), and mortgage of British ships as the Board of Trade, with the consent of the Treasury, determine, not exceeding those specified in the First Schedule to this Act, and all such fees shall be paid into the Exchequer. Provided that fees shall not be payable under this section in respect of vessels solely employed in fishing, or sailing ships of under one hundred tons.

IV.—Section 193 of the Merchant Shipping Act, 1894 (which relates to the recovery of expenses incurred on account of distressed seamen),

shall extend to expenses incurred under that Act on account of any distressed seamen within the meaning of that Act, except where it is certified in pursuance of Section 188 of the Act, that the cause of a seaman being left behind is desertion or disappearance, and paragraphs (*a*) and (*b*) in sub-section 1 of the said Section 193 shall be repealed.

V.—(1) On and after the commencement of this Act the general lighthouse authorities shall levy light dues with respect to the voyages made by ships or by way of periodical payment, and not with respect to the lights which a ship passes or from which it derives benefit, and the dues so levied shall take the place of the dues now levied by those authorities.

(2) The scale and rules set out in the Second Schedule to this Act shall have effect for the purpose of the levying of light dues in pursuance of this Act, but Her Majesty may, by Order in Council, alter, either generally or with respect to particular classes of cases, the scale or rules and the exemptions therefrom.

(3) Before any Order in Council is made under this section, the draft thereof shall be laid before each House of Parliament for not less than thirty days on which that House is sitting, and if either House, before the expiration of the thirty days during which the draft has been laid before it, presents an address to Her Majesty against the draft, or any part thereof, no further proceedings shall be taken thereon, but this shall be without prejudice to the making of any new draft Order.

VI.—On proof to the satisfaction of the Board of Trade that a British ship has during any financial year carried, in accordance with the scale and regulations to be made by the Board of Trade, with the concurrence of the Treasury, boys between the ages of fifteen and nineteen, there shall be paid to the owner of the ship, out of moneys provided by Parliament, an allowance not exceeding one-fifth of the light dues paid during that year in respect of that ship. Provided that no such payment shall be made in respect of any boy unless he has enrolled himself in the Royal Naval Reserve, and entered into an obligation to present himself for service when called upon, in accordance with rules to be issued by the Admiralty. The scale and regulations aforesaid may be modified from time to time by the Board of Trade with the concurrence of the Treasury. This section shall continue in force until the 31st day of March, 1905, and no longer, unless Parliament otherwise enact. [This section is no longer in force.]

VII.—In this Act, unless the context otherwise requires—The expression " Colonial lights " means any lighthouses, buoys, or beacons on or near the coast of a British possession and maintained by the Board of Trade out of moneys provided by Parliament or out of Colonial light dues, and includes the lighthouses mentioned in the Third Schedule to this Act. The expression " Basses Lights Fund " means the fund referred to in Section 5 of the Public Works Loans Act, 1887, formed by the dues levied in respect of the Basses lights. Other expressions have the same meaning as in the Merchant Shipping Act, 1894.

VIII.—The enactments mentioned in the Fourth Schedule to this Act are hereby repealed to the extent specified in the third column of that Schedule.

IX.—(1) This Act may be cited as the Merchant Shipping (Mercantile Marine Fund) Act, 1898.

(2) This Act shall be construed as one with the Merchant Shipping Act, 1894, and that Act and the Merchant Shipping Act, 1897, the Merchant Shipping (Exemption from Pilotage) Act, 1897, and this Act may be cited together as the Merchant Shipping Acts, 1894 to 1898.

SCHEDULE I.—TABLE OF MAXIMUM FEES TO BE PAID ON THE REGISTRATION, TRANSFER, AND MORTGAGE OF SHIPS.

1.—*Registration.*

(1) On Initial Registry	£	s.	d.
Vessels under 50 tons gross	1	0	0
,, 50 to 100 ,,	1	10	0
,, 100 to 200 ,,	2	0	0

with 10s. for every additional 100 tons, or fraction of a 100.

2.—*Transfer and Mortgage.*

(2) On Transfer, Transmission, Registry Anew, Transfer of Registry, Mortgage, and Transfer of Mortgage.

According to the gross tonnage represented by the ships or shares of ships transferred, etc. (*e.g.*, the transfer of a $\frac{1}{64}$ share in a ship of 6,400 tons to be reckoned as a transfer of 100 tons).

	£	s.	d.
Under 10 tons	0	2	6
10 tons and under 20 tons	0	5	0
20 ,, ,, 30 ,,	0	7	6
30 ,, ,, 40 ,,	0	10	0
40 ,, ,, 50 ,,	0	12	6
50 ,, ,, 75 ,,	0	15	0
75 ,, ,, 100 ,,	0	17	6
100 ,, ,, 125 ,,	1	0	0

and a further fee of 2s. 6d. for every additional 50 tons, or part of 50 tons, up to 500 tons, after which 2s. 6d. for every 100 tons, or part of 100 tons.

SCHEDULE II.—LIGHT DUES.

Scale of Payments.

(1) 1d. per ton per voyage for home-trade sailing ships.
(2) 2½d. per ton per voyage for foreign-going sailing ships.
(3) 1½d. per ton per voyage for home-trade steamers.
(4) 2⅝d. per ton per voyage for foreign-going steamers.
(5) An annual payment in the place of payments per voyage of 1s. per ton for tugs and pleasure yachts.

Rules.

(1) A ship shall not in any year be required to make payments on account of light dues—(*a*) if the ship is a home-trade ship, for more than ten voyages; and (*b*) if the ship is a foreign-going ship, for more than six voyages; and (*c*) if the ship makes voyages during the year both as a home-trade and as a foreign-going ship, for more than ten voyages, counting each voyage made as a foreign-going ship as a voyage and a half. Provided that no steamer shall be required to pay more than 1s. 4½d. per ton, and that no sailing vessel shall be required to pay more than 1s. 1½d. per ton in any year.

(2) A ship shall not pay dues both as a home-trade ship and as a foreign-going ship for the same voyage, but a ship trading from a port outside home-trade limits, and discharging cargo or landing passengers or mails at any port within home-trade limits, shall be deemed to be on one voyage as a foreign-going ship, until she has arrived at the last port of discharge of cargo or passengers brought from beyond home-trade limits; and a ship trading to a port outside home-trade limits, and loading cargo or receiving passengers or mails at any port within home-trade limits, shall be deemed to be on one voyage as a foreign-going ship from the time she starts from the first port of loading of cargo or passengers destined for a port beyond home-trade limits.

(3) The voyage of a home-trade ship shall be reckoned from port to port, but a home-trade ship shall not be required to pay dues for more than three voyages in one month.

(4) The voyage of a foreign-going ship trading outwards shall be reckoned from the first port of lading in the United Kingdom or the Isle of Man of cargo destined for a port outside home-trade limits.

(5) The voyage of a foreign-going ship trading inwards shall be reckoned from her last port of lading outside home-trade limits to the last port in the United Kingdom or the Isle of Man at which any cargo laden outside those limits is discharged.

(6) Dues payable per voyage under this Act shall be payable and collected only at ports where a ship loads or discharges cargo or passengers or mails.

(7) The annual payments shall be payable at the commencement of the year in respect of which they are made, provided that a new vessel shall only pay 1d. per ton for each month after the commencement of her voyage till the first of April following.

(8) For the purposes of these rules—(*a*) A ship's tonnage shall be reckoned as under the Merchant Shipping Act, 1894, for dues payable on a ship's tonnage, with the addition required in Section 85 of that Act with respect to deck cargo, or in the case of an unregistered vessel in accordance with the Thames measurement adopted by Lloyd's Register. (*b*) A year shall be reckoned from the day of the month on which this Act commences.

Exemptions.

There shall be exempted from dues under this Schedule:—Her Majesty's ships; ships belonging to foreign Governments; sailing ships (not being pleasure yachts) of less than 100 tons, and all ships (not being pleasure yachts) of less than 20 tons; vessels (other than tugs or pleasure yachts) when navigated wholly and bona fide in ballast, on which no freight is earned and without any passenger; ships putting in for bunker coal, stores or provisions for their own use on board; vessels for the time being employed in sea fishing or in sea fishing service, exclusive of vessels used for catching fish otherwise than for profit; ships putting in from stress of weather, or for the purpose of repairing, or because of damage, provided they do not discharge or load cargo other than cargo discharged with a view to such repairs, and afterwards re-shipped; yachts and pleasure boats of under 5 ton registered shipping tonnage.

SCHEDULE III.

I.—LIGHTHOUSES MAINTAINED BY THE BOARD OF TRADE OUT OF MONEY VOTED BY PARLIAMENT.

Bahamas. 11 Lighthouses as follow:

Gun Cay.	Great Stirrup Cay.
Abaco.	Castle Island.
Cay Sal.	Invagua.
Great Isaacs.	Bird Rock.
Cay Lobos.	Watling Island.
Elbow Cay.	

On *Sombrero*, one of the Leeward Islands.
Cape Pembroke, Falkland Islands.

II.—LIGHTHOUSES MAINTAINED BY THE BOARD OF TRADE OUT OF COLONIAL LIGHT DUES LEVIED UNDER THE MERCHANT SHIPPING ACT, 1894.

Great Basses, Little Basses, } off the coast of Ceylon.
Barberyn, Dondra Head } on the coast of Ceylon.
Minicoy Island, between the Laccadive and Maldive Islands.

SCHEDULE IV.—ENACTMENTS REPEALED.

The Basses Lights Act, 1872—the whole Act. The Public Works Loans Act, 1881—Section 10. The Public Works Loans Act, 1887—Section 5. The Merchant Shipping Act, 1894—Section 193, the word "such" where it first occurs, and from "as follows; namely" to "citizen of a foreign country" inclusive; Section 194; Section 643 to the words "and those," inclusive; Sections 644, 645, 646, 673, and 678.

SUCCESSIVE REDUCTIONS OF LIGHT DUES BY ORDERS IN COUNCIL.

[*In accordance with Section V., Sub-Section 2, of this Act.*]

From April 1, 1903, a reduction of 12½ per cent. of amounts specified.

From April 1, 1907, an additional reduction of 7½ per cent of amounts specified (for 3 years).

From April 1, 1909, an additional reduction of 17½ per cent. of amounts specified (for 3 years).

By the latest Order, the 7½ per cent. reduction of 1907 is repealed, making the total reduction to date 30 per cent.

From April 1, 1913, a reduction of 25 per cent. on dues at present leviable from vessels using the Great and Little Basses and Minicoy lights. Heretofore the charge levied at the Basses has been $\frac{8}{16}$ of 1*d.* per ton, and that at Minicoy $\frac{1}{16}$ of 1*d.* per ton.

MERCHANT SHIPPING (LIABILITY OF SHIPOWNERS AND OTHERS) ACT, 1900.

I.—The limitation of the liability of the owners of any ship set by Section 503 of the Merchant Shipping Act, 1894, in respect of loss of or damage to vessels, goods, merchandise, or other things, shall extend and apply to all cases where (without their actual fault or privity) any loss or damage is caused to property or rights of any kind, whether on land or on water, or whether fixed or movable, by reason of the improper navigation or management of the ship.

II.—(1) The owners of any dock or canal, or a harbour authority or a conservancy authority, as defined by the Merchant Shipping Act, 1894, shall not, where without their actual fault or privity any loss or damage is caused to any vessel or vessels, or to any goods, merchandise, or other things whatsoever on board any vessel or vessels, be liable to damages beyond an aggregate amount not exceeding £8 for each ton of the tonnage of the largest registered British ship which, at the time of such loss or damage occurring, is, or within the period of five years previous thereto has been, within the area over which such dock or canal owner, harbour authority, or conservancy authority performs any duty, or exercises any power. A ship shall not be deemed to have been within the area over which a harbour authority or a conservancy authority performs any duty, or exercises any powers, by reason only that it has been built or fitted out within such area, or that it has taken shelter within or passed through such area on a voyage between two places both situate outside that area, or that it has loaded or unloaded mails or passengers within that area.

(2) For the purpose of this section the tonnage of ships shall be ascertained as provided by Section 503, Sub-section 2, of the Merchant Shipping Act, 1894, and the register of any ship shall be sufficient evidence that the gross tonnage and the deductions therefrom and the registered tonnage are as therein stated.

(3) Section 504 of the Merchant Shipping Act, 1894, shall apply to this section as if the words " owner of a British or foreign ship " included a harbour authority and a conservancy authority, and the owner of a canal or of a dock.

(4) For the purpose of this section the term " dock " shall include wet docks and basins, tidal docks and basins, locks, cuts, entrances, dry docks, graving docks, gridirons, slips, quays, wharves, piers, stages, landing-places, and jetties.

(5) For the purposes of this section the term " owners of a dock or canal " shall include any person or authority having the control and management of any dock or canal, as the case may be.

(6) Nothing in this section shall impose any liability in respect of any such loss or damage on any such owners or authority in any case where no such liability would have existed if this Act had not passed.

III.—The limitation of liability under this Act shall relate to the whole or any losses and damages which may arise upon any one distinct occasion, although such losses and damages may be sustained by more than one person, and shall apply whether the liability arises at common law or under any general or private Act of Parliament, and notwithstanding anything contained in such Act.

IV.—This Act may be cited as the Merchant Shipping (Liability of Shipowners and others) Act, 1900.

V.—This Act shall be construed as one with the Merchant Shipping Act, 1894, and that Act and the Merchant Shipping Act, 1897, the Merchant Shipping (Exemption from Pilotage) Act, 1897, the Merchant Shipping (Liability of Shipowners) Act, 1898, the Merchant Shipping (Mercantile Marine Fund) Act, 1898, and this Act, may be cited together as the Merchant Shipping Acts, 1894 to 1900.

MERCHANT SHIPPING ACTS AMENDMENT ACT, 1906.

PART I.—*Safety.*

1. British load-line made applicable to all foreign ships while within any port of the United Kingdom, without prejudice (*a*) to their being applied by agreement with any foreign country; and (*b*) to His Majesty in Council directing in respect of any foreign country that "the regulations in force relating to overloading and improper loading" are as effective as those of the United Kingdom.

2. Foreign ships may be detained when unsafe by reason of defective condition of hull, equipments, machinery, etc., when at any port of the United Kingdom, whether taking cargo on board at such port or not.

3. After October 1, 1907, Sections 452, 453, 454 and 456 of the 1894 Act, which relates to precautions to be taken in loading grain cargoes, shall apply to a foreign ship which shall load a grain cargo or discharge all or part of her cargo at any port of the United Kingdom, in the same manner as if it were a British ship.

4. Sections 427 to 431 of the 1894 Act relating to life-saving appliances shall, after October 1, 1909, apply to foreign ships in ports of the United Kingdom, save when the life-saving provisions of any foreign country are as effective as those prescribed by Part V. of that Act.

5. In respect of Part I. of this Act, the "appointed day" on which provisions of the principal Act relating to load-line and to life-saving appliances will be applied to foreign ships in ports of the United Kingdom, shall be October 1, 1909.

6. Nothing in the foregoing provisions shall affect any foreign ship not bound to a port of the United Kingdom to embark or land passengers, or take in or discharge cargo, or take in bunker coal.

7. Steamers in the coasting trade are not exempt from the load-line rules; but steamers which do not carry cargo may be excepted by the Board of Trade.

8. (1) Section 440 of the principal Act shall apply to all British ships; and, as applied by this (1906) Act, to all foreign ships. (2) In case of a ship which the owner is not required to enter outwards, (*a*) the load-line disc shall be marked before clearance is demanded; (*b*) the master of a British ship shall enter a copy of a statement (similar to that required in form of entry, Sub-section (2), Section 440 of principal Act) in agreement with crew, and official log book; and (*c*) must deliver a copy of the same to the Customs' officer from whom clearance is demanded. (3) When the certificates referred to in Sub-section (4) of Section 443 of principal Act (regulations of load-line) must be delivered, the master's statement referred to shall not be prepared, etc. (4) Sub-section (5) of Section 440 and Sub-section (2) of Section 443 of the principal Act are modified to provide "for an alteration by the Board of Trade of marks during a voyage," or "on ships abroad."

9. (1) The master of British ships shall cause entry to be made in official log book, or a record to be made (where no log is kept) of every boat drill practice on board, and every inspection of life-saving appliances. (2) The master shall produce such records when so required by an official of the Board of Trade. (3) Any person who wil-

fully makes a false or fraudulent entry in an official log book is liable on summary conviction to a penalty not exceeding £100.

10. (1) If a British or foreign ship arrives between the last day of October and the 16th of April at a port in the United Kingdom from any port out of the United Kingdom, carrying heavy or light wood goods as deck cargo (except under the conditions allowed by this section), the master (and the owner, if privy to the offence) shall be liable to a fine not exceeding £5 for every 150 cubic ft. of space in which wood goods are carried contrary to this section. (2) Heavy wood goods may be carried as deck cargo as follows:—(*a*) Only in covered spaces; (*b*) only in ships approved by the Board of Trade; and (*c*) they must be loaded in accordance with regulations of the Board of Trade. (3) Light wood goods may be carried as deck cargo as follows:—(*a*) Each unit of goods must be of a cubic capacity not greater than 15 cubic ft.; and (*b*) the height above deck to which goods are carried must not exceed—(i) in uncovered space on a deck forming top of a break, poop, or other permanent closed-in space on upper deck, 3 ft. above top of closed-in space; and (ii) in uncovered space, not forming top of any permanent closed-in space on the upper deck, or forming top of covered space, the height of main rail, bulwark, or plating, or $\frac{1}{4}$th of inside breadth of ship, or 7 ft., whichever height is least. Regulations made by Board of Trade for the protection of seamen from risk arising from the carriage of goods to such a height must be complied with; and (iii) in a covered space, the full height of space. (4) Provided that a master or owner shall not be liable to fine under this section—(*a*) in respect of wood goods which master considered it necessary to place or keep on deck during voyage on account of leak, or damage to ship received or apprehended; or (*b*) if he proves that the ship sailed from port of loading at such time as allowed sufficient interval to arrive at the said port in the United Kingdom before the last day of October, but was prevented by stress of weather or circumstances beyond his control; or (*c*) if he proves that the ship sailed from port of loading at such time before 16th of April as allowed a reasonable interval for the ship to arrive after that day at the said port in the United Kingdom, and by reason of an exceptionally favourable voyage arriving before that day. (5) For the purposes of this section—(*a*) "heavy wood goods" means—(i) any square, round, waney, or other timber, or pitch pine, mahogany, oak, teak, or other heavy wood goods; or (ii) any more than 5 square or store spars, dressed and prepared for use or not; and (*b*) "light wood goods" means deals, battens, or light other wood goods of any description; and (*c*) "deck" cargo means cargo carried either in uncovered space upon deck or in covered space not included in the cubical contents forming the ships' registered tonnage; and (*d*) the space in which wood goods are carried shall be deemed to be the space limited by the superficial area occupied by the goods, and by straight lines enclosing a rectangular space sufficient to include the goods. (6) Nothing in this section shall affect any ship which comes into any port of the United Kingdom for any purpose other than the delivery of her cargo. (7) This section shall come into operation on the passing of this Act. [See also Board of Trade Rules given as one of the appendices to the Digest of this Act.]

11. A person liable to a fine under Sub-section (2), Section 452 of the principal Act (which relates to precautions to prevent grain cargo from

shifting) may be prosecuted summarily; but the fine, if the offence is so prosecuted, shall not exceed £100.

12. After Dec. 31, 1907, the officer, before whom a seaman is engaged at any port in the British Isles or on the Continent of Europe between the River Elbe and Brest inclusive, shall not allow a seaman to sign the agreement if he does not possess a sufficient knowledge of English to understand necessary orders given him in the performance of his duties; but this section shall not apply to any British subject, inhabitant of British Protectorate, or lascar. Provided that where a seaman has been allowed to sign an agreement, and is discharged, and the fact is noted by a superintendent or officer, on his certificate of discharge a superintendent or other officer shall not refuse to allow such seaman who holds a certificate so noted to sign an agreement in the absence of special reasons, at the discretion of the Board of Trade.

PART II.—*Passenger and Emigrant Ships.*

13. The definition " passenger steamer," in Section 267 of the 1894 Act is amended to include every foreign steamship (whether originally proceeding from a port in the United Kingdom or from a port out of the United Kingdom) which carries passengers to or from any place, or between places, in the United Kingdom.

14. The following sub-section is substituted for par. (3) of Section 268 of principal Act—" (3) ' Steerage passenger ' means all except cabin passengers, and persons shall not be deemed cabin passengers unless —(*a*) the space allotted to their exclusive use is equal to 36 clear superficial ft. to each statute adult; and (*b*) the fare amounts to at least the sum of £25 for the voyage or is in the proportion of at least £3 5s. for every 1,000 miles of length of voyage; and (*c*) they have been furnished with tickets in form prescribed by the Board of Trade."

15. Where a steamer takes or lands passengers by means of a tender she shall be deemed to be taking the passengers from or to that port which the tender comes or goes to.

16. (1) A ship shall not carry passengers, cabin or steerage, on more than one deck below the water line. (2) If this section is not complied with the master of the ship shall for each offence be liable to a fine not exceeding £500.

17. The Board of Trade may prescribe regulations, scales, conditions, and forms in substitution for Schedules 10, 11, 12, 13, and 14 of the principal Act, which relate to number and accommodation of emigrants, provisions and water for steerage passengers, carriage of horses and cattle on emigrant ships, and the forms to be used.

18. (1) The master of every emigrant ship shall, in addition to obligations under Section 361 of principal Act, on request produce to any steerage passenger the scale of provisions to which that person is entitled and shall post copies of scale in two conspicuous places. (2) The master shall be liable on summary conviction to a fine not exceeding £2 for every day on which by his default copies of the extracts are not posted up, and £2 if he fails to produce the scale as required to a steerage passenger. (3) Any person who displaces or defaces a copy of the posted scale shall be liable on summary conviction to a fine not exceeding £2.

19. The following shall be substituted for par. (i) of Section 328 of the 1894 Act:—" (i) The steerage passenger must be at place of embarkation before the appointed hour, or any hour fixed, of which he has received twenty-four hours' notice; and."

20. (1) The Board of Trade may allow the master's bond required under Section 309 of the principal Act to be given in the form of a continuing bond as respects that emigrant ship. (2) The Board of Trade may make regulations to adapt Sections 309 and 310 of principal Act to the conditions under which continuing bonds may be allowed for any ship. (3) Sub-section (3) of Section 310 of principal Act shall have effect in every voyage of the ship during continuance of bond.

21. If the master or owner of a steamer shall fail to comply with Merchant Shipping Acts as to surveys certificate, he shall be liable to a fine not exceeding £10 for every passenger carried from or to any place in the United Kingdom, and the master or owner of any tender shall be liable to a like penalty for every passenger taken on board or landed.

22. If the number of passengers on board at any place is greater than the number allowed by law and the passenger steamers' certificate, the owner or master shall, for the purpose of Section 283 of principal Act, be deemed to have received the passengers at that place.

23. The provisions of Part III. of the 1894 Act, shall apply to any person who sells or lets, or is anywise concerned in the sale or letting of, steerage passages from any place in Europe, not within the Mediterranean.

24. The following shall be substituted for Section 353 of the 1894 Act:—" If any person, by fraud, or false pretence, induces or attempts to induce any person to emigrate or to engage a steerage passage in any ship, he shall for each offence be liable to a fine not exceeding £50, or imprisonment for a period not exceeding 3 months."

Part III.—*Seamen's Food.*

25. (1) The master of every ship for which an agreement with the crew is required shall furnish provisions to every member of the crew who does not furnish his own in accordance with the scale [since printed], and for the purpose of compensation in the case of short or bad provisions, every such member of the crew shall be deemed to have stipulated for provisions in accordance with scale. (2) The power of the court to modify or refuse compensation under Section 199 of the principal Act shall be extended to cases where a member of crew claiming compensation has been supplied with provisions containing the same or a greater amount of wholesome nutriment in place of scale. (3) If the master of a ship through default fails to furnish provisions in accordance with scale, the master shall be liable on summary conviction, in addition to paying compensation, to a fine not exceeding £100. (4) His Majesty may by Order in Council vary or add to the scale set out in First Schedule to this Act. (5) This section shall not apply to lascars, natives of India, or others not accustomed to European food, with whom a separate agreement is entered into providing an adequate scale suited to their needs.

26. (1) An inspecting officer may inspect (either on board or before shipment) provisions or water intended for the crew of any British

ship going from any port in the United Kingdom and for which an agreement with the crew is required (other than provisions provided by the crew themselves), and if the provisions or water are deficient in quality the ship shall be detained until the defects are remedied; provided that inspection of provisions or water shall be made before shipment whenever practicable, and if the master, owner, or agent gives 48 hours' notice to the inspecting officer. But the inspecting officer shall have power to inspect provisions or water if they are at a convenient place, without prejudice to the inspection of provisions or water not specified in the notice. (2) Where provisions or water are found deficient in quality the master shall be liable on summary conviction to a fine not exceeding £100, unless the court thinks that the finding of the inspector was not justified; but if the responsibility for the defects rests with owner, agent, or the person who has supplied the provisions or water, that agent, owner, or person shall be liable to conviction. (3) The master shall give the inspecting officer every reasonable facility for the purpose of inspection, and, if he fails, shall be liable for each offence to a fine not exceeding £10.

27. (1) After the 30th of June, 1908, every British foreign-going ship of 1,000 tons gross and upwards, going from any place in the British Islands, or the continent of Europe between the River Elbe and Brest inclusive, shall be provided with a duly certificated cook who is able to prove one month's service at sea. (2) A cook must be the holder of a certificate in cooking granted by the Board of Trade or some school of cookery or institution approved by the Board, or is the holder of certificates of discharge showing at least two years' service as cook before 30th June, 1908. (3) The cook shall be rated as ship's cook, or in the case of ships of not more than 2,000 tons gross, or ships in which crew, or majority of them, provide their own provisions, as ship's cook or cook and steward. (4) In emigrant ship, the cook shall be in addition to cook required by Section 304 of principal Act. (5) If these requirements are not complied with and are in force, the master or owner shall (if there is no sufficient reason for failure to comply) for each offence be liable on summary conviction to a fine not exceeding £25.

PART IV.—*Relief and Repatriation and Wages of Seamen.*

28. (1) If a seaman belonging to British ship is left behind out of British Isles, the master shall (*a*) enter in the official log a statement of effects left on board by and wages due to seaman when left behind, and (*b*) on termination of voyage, furnish to proper officer within 48 hours after arrival at terminal port "wages and effects" and "reimbursements" accounts in form approved by Board of Trade. (2) The master shall deliver effects (subject to deductions allowed) and wages due, and the proper officer shall give receipt for effects or amount on Board of Trade forms. (3) The master shall be reimbursed out of wages or effects sums properly chargeable, and the officer shall allow those sums to be deducted from wages account; and, or, effects. The proper officer may require evidence as to sums chargeable to be given by the master. Masters may appeal to a Court of Summary Jurisdiction where amount in dispute exceeds £10. (4) At option of master, as between him and proper officer, several seamen's accounts may be dealt with collectively, and master shall be entitled to be reimbursed out of total amount, and shall be required to deliver to proper officer only the sum by which the total exceeds the total of the amounts

allowed as chargeable on reimbursements accounts. (5) The proper officer shall (subject to repayment under this section) remit effects, and wages at such time and manner as the Board of Trade require. (6) "Effects" includes proceeds of sale of effects if sold under this section, and shall be sold by proper officer unless the Board of Trade direct contrary. (7) The master shall be under no liability for loss or damage of effects accrued without his neglect or privity after seaman left ship. (8) The Board of Trade shall be under no liability except to comply with order of court as respects wages, or effects remitted to them and not required for reimbursing expenses incurred on behalf of the Crown, or by the Government of a foreign country. The Board shall be entitled to appear in any such proceedings by any of their officers, and notice to superintendent shall be deemed a notice to the Board. The Board may meet any claim made by a seaman against master or owner in respect of wages or effects. Provided they have given notice, and the master or owner has not given written notice of objection within ten days. For purposes of this sub-section, any proceedings taken or claim made by a person in whose favour an allotment note has been made, or who claims reimbursement of expenses on behalf of any union or parish under Section 182 of principal Act, shall be treated as proceedings taken or claim made by the seaman. (9) Sums remitted under this section shall be paid into the Exchequer, and sums payable by the Board shall be paid out of the moneys provided by Parliament. (10) If the master fails to comply with this section, he shall for each offence be liable on summary conviction to a fine not exceeding £20, and if he delivers a false account or makes a false statement he shall be guilty of a misdemeanour. (11) The proper officer for the purpose of this section shall be—(i) at a port in the United Kingdom or British possession, a superintendent; (ii) in the absence of superintendent, the chief officer of customs at or near port; (iii) elsewhere, the consular officer. (12) This section shall not apply in the case of an absent seaman (*a*) Where the master satisfies the proper officer that no effects have been left on board, and that he has paid all wages due to seaman; or (*b*) where wages earned by seaman (after proper deductions of allotments or advances according to agreement) appears to be less than £5, and master does not exercise option to deal with the delivery and reimbursement accounts collectively; or (*c*) where the master satisfies proper officer that net amount due to seaman on account of wages (after deductions, allotments, advances or otherwise) is less than £3, and master does not exercise option to deal with accounts collectively; or (*d*) where forfeiture of wages and effects has been dealt with in legal proceedings before termination of voyage, or within 48 hours of arrival of ship at port where voyage terminates.

29. Provisions of Part II. of principal Act, relating to property of deceased seamen and apprentices, shall apply to seamen or apprentices of a British ship registered in United Kingdom, the voyage of which is to terminate out of the United Kingdom, and the British consular officer at port where voyage terminates, or if in a British possession, the officer of customs, shall exercise the powers under provisions when a ship, the voyage of which is to terminate in the United Kingdom, touches and remains for 48 hours at a port elsewhere, and those provisions shall apply accordingly.

30. (1) The master shall not discharge a seaman out of United Kingdom (except in country in which he was shipped) unless he pre-

viously obtains, endorsed on agreement with crew, sanction of proper authority, but sanction shall not be refused where the seaman is discharged on termination of service. (2) Authority to whom application is made for sanction may (and, if not a merchant, shall) examine grounds on which a seaman is to be discharged out of United Kingdom, and may administer oaths, and grant or refuse sanction. But sanction shall not be unreasonably withheld. (3) If master fails to comply with this section, he shall, for each offence, be guilty of a misdemeanour, and it shall lie on master to prove that sanction was or could not be obtained, or was unreasonably withheld.

31. Where master discharges seaman out of United Kingdom, he shall give him certificate of discharge in Board of Trade form, and the certificate he has retained shall be returned to certificated officer.

32. (1) Where service of seaman belonging to a British ship terminates at a port out of H.M. dominions (otherwise than by consent), the master shall, besides giving certificate of discharge and paying wages, make provision for his maintenance and return to a proper return port, and proper authority shall endorse upon agreement with crew the particulars of provision so made. (2) If master fails to comply with this section, the expenses of maintenance and of journey to return port—(*a*) if defrayed by seaman shall be recoverable as wages; and (*b*) if defrayed by proper authority or other person shall (unless seaman has been guilty of barratry) be a charge upon ship, and may also be recovered against person who is owner at time being, or, where ship has been lost, against person who was owner of ship at time of loss or, where ship has been transferred to some person not a British subject, either against the owner for time being or against person who was owner of ship at time of the transfer, at the suit of proper authority or other person defraying expenses, or, in case they have been allowed to the authority out of public money, as a debt to the Crown, either by ordinary process of law or in the court and in manner in which wages may be recovered by seamen. (3) This section shall not apply to foreign seamen shipped and discharged at a port out of the United Kingdom.

33. (1) Where a British ship is transferred or disposed of at port out of H.M. dominions, any seaman shall be discharged unless he consents in presence of the proper authority to complete voyage of ship if continued. (2) Where a seaman is so discharged these provisions as to certificate and return to proper return port shall apply as if service had terminated otherwise than by consent of seaman to be discharged during currency of agreement, and shall apply to foreign seamen whether shipped in United Kingdom or not.

34. (1) If master or seaman receives injury in service of ship, or suffers illness (other than venereal disease, and not due to his own act or misbehaviour), the expense of surgical and medical advice, medicine, and maintenance until cured, or dies, or is returned to proper return port, and conveyance to port, and in case of death expense of burial, shall be defrayed by owner, without deduction from his salary or wages. (2) If master or seaman is removed from ship to prevent infection, or for convenience of ship, and subsequently returns to duty, expense of removal, advice, attendance, medicine, and maintenance shall be defrayed by owner. (3) Expense of medicines, surgical and medical advice, and attendance, given master or seaman on board

shall be defrayed in like manner. (4) In all other cases reasonable expenses incurred by owner for seaman in illness, and in burial of seaman who dies on service, shall, if duly proved, be deducted from seaman's wages.

35. (1) If expenses in illness, or injury of seaman, payable under Shipping Acts by master or owner, are paid by any authority on behalf of Crown, or if any other expenses in respect of illness, etc., are so paid, they shall be repaid to authority by master or owner. (2) If the expenses are not repaid, the amount shall with costs be a charge upon ship, and recoverable from master or owner for time being, or where ship is lost, from person who was owner at time of loss, or where transferred to person not a British subject, from owner for time being or person who was owner at time of transfer, as a debt to the Crown. (3) A certificate of the facts, signed by the authority, with vouchers as case requires, shall be sufficient proof that expenses were paid.

36. (1) The master shall not leave seaman behind out of United Kingdom, ashore or at sea (unless where legally discharged), unless he obtains, endorsed on agreement with crew, certificate of the proper authority, stating cause of seaman being left. (2) Authority to whom application is made for certificate may (and, if not a merchant, shall) examine grounds why seaman is to be left behind, and may administer oaths, and grant or refuse certificate. (3) If the master fails to comply with this section he shall be guilty for each offence of misdemeanour, and it shall lie on him to prove that certificate was, or could not be, obtained without unreasonable delay, or was unreasonably withheld.

37. (1) Where a master leaves seaman behind on shore out of United Kingdom on ground of unfitness or inability, he shall deliver to person signing required certificate an account of wages due to seaman, and if to consular officer account must be in duplicate. (2) If the master fails to deliver account, he shall be liable to a fine not exceeding £10, and if he knowingly delivers false account, he shall be liable to a fine not exceeding £20, in addition to payment of the wages.

38. (1) The master shall pay wages due seaman left behind for unfitness or inability to proceed. If left in British possession to seaman himself. If elsewhere, to British consular officer. (2) Where payment is made to consular officer, he shall retain duplicate of account, and, if satisfied, endorse on other duplicate receipt for payment, and return it to the master, who shall deliver duplicate within 48 hours of return to port of destination, if in United Kingdom, to superintendent at port, and if not in United Kingdom to proper authority. (3) Payment shall be made in money, and when not practicable, by bills on owner. If by bill—(*a*) person signing certificate of proper authority shall certify on bill that bill is drawn for seaman's wages, and shall endorse on agreement with crew the amount of bill drawn, and particulars required by Board of Trade; (*b*) if bill is drawn by master, owner shall be liable to pay amount to holder or endorsee; and it shall not be necessary to prove that master had authority to draw; (*c*) a bill purporting to be drawn and endorsed under this section shall, if produced out of the custody of the Board of Trade or Registrar-General of Shipping, or superintendent, be admissible in evidence; and endorsement shall also be admissible of facts stated. (4) If the master fails, without reasonable cause, to pay, he shall for each offence be liable, in addition to the payment of wages, to a fine not exceeding £10.

39. Where amount due to seaman left behind on ground of unfitness or inability to proceed is so paid to consular officer, he shall deal with the sum in following manner, viz.;—(1) If seaman subsequently obtains employment at or quits port at which payment has been made, he shall deduct out of the sum expenses by him in maintenance of seaman under Shipping Acts, except such as owner or master is required to defray, and pay remainder to seaman, and deliver to him account of sums so received and expended on his behalf; (2) if seaman dies before ship quits port, he shall deal with sum as part of property of deceased seaman; and (3) if seaman is sent to proper return port at public expense, he shall account for sum to the Board of Trade; and the sum, after deducting expenses incurred (except such as master or owner is required to pay) shall be dealt with as wages of seaman.

40. The Board of Trade may make regulations for relief, maintenance, and return to a proper return port of shipwrecked seamen and seamen found otherwise in distress out of United Kingdom, and make conditions regarding same, and seamen shall not have the right to be relieved, maintained, or sent to proper return port, except on those conditions.

41. (1) Where either (*a*) any seamen, whether subjects of His Majesty or not, are found out of United Kingdom, and have been shipwrecked from British ship or any of H.M. ships, or having been discharged or left behind are in distress in that place, or (*b*) any British seamen who have been engaged to serve in a ship belonging to government or citizen of a foreign country, are in distress out of United Kingdom, the proper authority shall provide for return of those seamen to a proper return port, and their necessary clothing and maintenance until their departure for such a port, and, in case of shipwrecked seamen, for repayment of expenses in conveyance, and maintenance while being conveyed. (2) The authority shall be paid such sums as Board of Trade may allow, and those sums shall be paid.

42. (1) Where expenses (other than as here defined) are incurred on behalf of Crown, or by foreign government and repaid on behalf of Crown, on account of a distressed seaman for maintenance, clothing, conveyance to a proper return port, or for burial, or otherwise, they shall be a charge upon the ship, British or foreign, to which distressed seaman belonged, or, where ship has been lost, from person who was owner at time of loss, or if a foreign ship, from person, principal, or agent who engaged seaman for the ship. (2) The debt (in addition to fines) may be recovered by Board of Trade, as wages may be recovered. (3) In proceeding for recovery account (if any) of expenses and proof of payment by or on behalf of Board of Trade shall be *prima facie* evidence that expenses were incurred or repaid on behalf of Crown. (4) For the purpose of this section excepted expenses are in cases where certificate of proper authority obtained on leaving a seaman behind states (or Board of Trade are satisfied) that cause of seaman being left behind is desertion, disappearance, imprisonment, for misconduct, or discharge from ship by naval court for misconduct and expenses for return to proper return port of a distressed seaman discharged at port at which he was shipped, or neighbouring port.

43. A person belonging to a British ship shall not force seaman on shore and leave him behind, or cause him to be left on shore or sea, in or out of H.M. dominions; and if he does he shall for each offence be guilty of misdemeanour.

44. (1) Every fine imposed on a seaman for misconduct for which his agreement imposes fine shall be deducted as follows:—(*a*) If offender is discharged in United Kingdom, and offence is proved in case of foreign-going ship to satisfaction of superintendent before whom offender is discharged, and in case of home-trader of superintendent at or nearest port at which crew are discharged, the master shall deduct fine from the wages of offender; (*b*) if offender enters H.M. naval service or is discharged abroad, and offence and entry as aforesaid are proved, fine shall be deducted and entry made in official log and signed by officer or authority to whose satisfaction offence is proved. (2) Fines deducted shall be paid—(*a*) if offender is discharged in United Kingdom, to superintendent; (*b*) if offender enters H.M. naval service, on return of ship to port of destination, if in United Kingdom, to the superintendent before whom crew is discharged, or in case of home trader, to superintendent at or nearest port at which crew is discharged, and, if port of destination is not in United Kingdom, to the proper authority; (*c*) if offender is discharged out of United Kingdom, to proper authority. (3) A proper authority shall remit amounts received, and render accounts as Board of Trade require. (4) If a master or owner fails without reasonable cause to pay fine as required, he shall for each offence be liable to a fine not exceeding six times the amount of the fine not so paid. (5) An act of misconduct for which fine has been inflicted and paid, or deducted from wages of seaman shall not be otherwise punished.

45. For purpose of this part of Act, either port at which seaman was shipped or port in country to which he belongs, or some port agreed to in case of discharged seaman, shall be deemed proper return port. Provided that in case of a seaman belonging to a British possession shipped and discharged out of United Kingdom the proper officer may treat a port in United Kingdom as a proper return port.

46. (1) A seaman may be sent to a proper return port by reasonable route, by sea or land, or both. (2) Provision shall be made for return of seaman as to whole or part of route by sea, by placing him on board British ship in want of men, or by providing him with passage in British or foreign ship, or money for passage, and by paying expenses and maintenance during journey, or providing means to pay expenses. (3) Where master of ship is required to provide for return of discharged seaman to a proper return port, he may deposit with proper authority such sum as authority consider sufficient for return of seaman to proper return port. (4) The Board of Trade may make provision for enabling proper authority, and in case of expenses incurred in United Kingdom any officer named by Board, to defray expenses on account of that seaman which the authority originally acting in respect of him could defray, and any expenses so incurred shall be deemed incurred on behalf of distressed seaman.

47. If question arises as to what port a seaman is to be sent to, or as to route by which he should be sent, that question shall be decided by the proper authority, and the authority shall have regard to convenience and expense, and to the fact that a British ship in want of men is about to proceed to proper return port.

48. (1) Where distressed seaman is, for purpose of return, placed on board a British ship, the authority shall endorse on agreement with crew the name of seaman placed on board, together with particulars

directed to be endorsed by distressed seamen regulations. (2) The master of British ship shall receive and afford passage and maintenance to all distressed seamen he is required under this Act to take on board, not exceeding one for every 50 tons burden, and shall during passage provide every seaman with sleeping place, protected against sea and weather. (3) On production of certificate, signed by the authority, specifying number and names of distressed seamen and time when each was received, and on declaration made by master before a J.P. or officer authorised to administer oath, stating number of days during maintenance in each case, full complement of crew, and of actual number of seamen employed on board, and every variation in that number, whilst distressed seamen received maintenance, master shall be entitled for maintenance and passage of every seaman exceeding number (if any) wanted to make up complement of crew, such sum per diem as Board of Trade allow. (4) If any master fails without reasonable cause to comply with this section in case of distressed seaman he shall for each offence be liable to a fine not exceeding £100.

49. For purposes of this part of Act, unless context otherwise requires—(1) The expression "proper authority" means—(*a*) as respects a place out of H.M. dominions, British consular officer, or if there is no such officer, any two British merchants resident at or near place, or one British merchant; and (*b*) in a British possession—(i) in discharge or leaving behind seamen, a superintendent, or, failing one, chief officer of customs at or near place; and (ii) in relation to distressed seamen the governor of the possession, or person acting under his authority; and (2) the expression "seamen" includes seamen and also apprentices to sea service. (3) The provisions of this Part of Act shall, for the purpose of Sections 260 to 266 of principal Act, be construed as if contained in Part II. of that Act.

PART V.—*Miscellaneous.*

50. (1) The Board of Trade and Commissioners of Customs may refuse registry of ship by name proposed to register if it is already the name of a registered British ship or a name similar, and may require notice to be given before name is marked on ship or entered in register. (2) If registry by name proposed is refused by Board of Trade, or regulations are not complied with, that ship shall not be registered.

51. (1) Where it appears to Commissioners of Customs that there is doubt as to title of any ship registered to be so registered, they may direct the register of port of registry of ship to require evidence that the ship is entitled to be registered as British ship. (2) If within such time, not less than 30 days, as the Commissioners fix, satisfactory evidence of title of ship to be registered is not so given, the ship shall be subject to forfeiture under Part I. of principal Act. (3) In application of this section to British possession, the Governor, and in the application of this section to foreign ports of registry, the Board of Trade, shall be substituted for Commissioners of Customs.

52. (1) Sub-section 1, Section 21 of principal Act shall be read as if words were inserted at the end of that sub-section, "and the registry of the ship shall be considered as closed except so far as relates to any unsatisfied mortgages or existing certificates of mortgage entered

therein." (2) Any unsatisfied registered mortgage may, if ship comes within H.M. dominions, be enforced, without prejudice in case of sale by judgment of a court.

53. The following shall be substituted for Sub-section (2), Section 48 of principal Act:—" (2) If default is made in registering a new or an alteration of a ship altered as aforesaid, the owner shall be liable on summary conviction to a fine not exceeding £100, and to a fine not exceeding £5 for every day during which offence continues after conviction."

54. (1) For purpose of enabling spaces used for water ballast to be deducted in ascertaining register tonnage, Section 79 of principal Act shall be read as if the words—" (iv) Any space (other than double bottom) adapted only for water ballast; and " were added at the end of paragraph (*a*) of Sub-section 1 of that section. (2) For obtaining benefit of deduction under this section the owner who claims to be entitled to deduction may apply to Board of Trade to have necessary remeasurements of ship made, and the Board, on payment of fee, shall direct measurements to be made, and number denoting the register tonnage shall be altered accordingly.

55. Sub-section 1, Section 84 of principal Act shall be read as if following words were added, viz., " and any space shown by certificate of registry or other national papers of any such ship as deducted from tonnage on account of being occupied by seamen or apprentices, and appropriated to their use, shall be deemed to have been certified under this Act, and to comply with provisions of this Act which apply to such a space in the case of British ships, unless a surveyor of ships certifies to the Board of Trade that construction and equipment of ship as respects that space do not come up to standard required under this Act in the case of a British ship, and if any question arises whether construction and equipment of ship so come up to required standard a surveyor may inspect ship for purpose of determining whether such certificate should be given or not."

56. The following paragraph shall be substituted for paragraph (*b*) of Sub-section 1, Section 92 of principal Act (which relates to certificates of competency of officers):—" (*b*) If ship is of 100 tons or upwards with at least one officer besides master holding certificate not lower than that of—(i) mate in case of home trade passenger ship; (ii) second mate in case of foreign-going sailing ship of not more than 200 tons, and (iii) only mate in case of any other foreign-going ship."

57. In any legal proceedings by master for recovery of wages due him, the Court may order payment with addition of damages for unreasonable delay.

58. (1) For the purpose of reducing period of service required as qualification for A.B., three years before the mast shall be substituted for four years and two years shall be substituted for three years, and two or more years' sea service shall be substituted for three or more in Section 126 of principal Act. (2) Any superintendent or other officer shall refuse to enter seaman as A.B. on agreement with crew unless seaman gives satisfactory proof as is required by Section 126 of principal Act of his title to be so rated; and if seaman, for the purpose of obtaining A.B., makes false statement, he shall be liable on summary conviction to a fine not exceeding £5.

59. (1) Where the master disrates a seaman he shall forthwith cause to be entered in official log statement of disrating, and furnish seaman with copy of entry; and any reduction of wages consequent shall not take effect until entry has been made and copy so furnished. (2) Any reduction of wages consequent on disrating shall be deemed a deduction from wages within meaning of Sections 132 and 133 of principal Act (which relate to the delivery of account of wages and allowance of deductions).

60. Notwithstanding Section 136 of principal Act, seamen may except from release any specified claim against master or owner; and a note of claim so excepted shall be entered on release, which shall not constitute a discharge.

61. In order to give effect to Section 141 of principal Act enabling seamen to require stipulation for allotment of his wages by allotment note every superintendent or other officer shall, after seaman has signed agreement, inquire of seaman whether he requires such stipulation for allotment by allotment note, and if seaman requires such stipulation shall insert it in agreement with the crew, and shall be deemed to have been agreed to by master.

62. Payment under allotment note shall begin at expiration of month from date of agreement with crew, and shall be paid at expiration of every subsequent month after first month in respect of wages earned before payment.

63. (1) Where balance of wages due to seaman is more than £10, and seaman expresses to master desire to have facilities for remitting, at any time after ship has left port, all or part of balance to a savings bank, or near relative in whose favour allotment note may be made, the master shall give facilities as regards balance in excess of £10, but shall be under no obligation to give facilities while ship is in port if sum will become payable before ship leaves, or otherwise than conditionally on seaman going to sea in ship. (2) If master fails to comply with this section, he shall be liable on summary conviction for each offence to a fine not exceeding £5.

64. (1) Sub-section 1 of Section 210 of principal Act (which provides space for seaman or apprentice in British ship) shall be construed as if not less than 120 cubic ft. and 15 super ft. measured on deck or floor of space were substituted for not less than 72 cubic ft. and not less than 12 super ft. measured on the deck or floor of that space. (2) In estimating space for accommodation of seamen and apprentices, there may be taken into account space occupied by mess rooms, bath rooms, or washing places appropriated exclusively to use of those seamen and apprentices, so, however, that space in any place in which they sleep is not less than 72 cubic ft. and 12 super ft. for each seaman or apprentice. (3) Nothing in this section shall affect (*a*) Ship registered before the passing of this Act or in course of construction on January 1, 1907; (*b*) ship of not more than 300 tons; or (*c*) fishing boat within meaning of Part IV. of principal Act; or require additional space in case of places occupied solely by lascars and appropriated to their use.

65. (1) Where a seaman is lawfully engaged and has received an advance, after negotiating his note, wilfully or through misconduct fails to join or deserts his ship, he shall, on summary conviction, be liable to a fine not exceeding £5, or, to imprisonment for not

exceeding 21 days, but nothing in this section shall take away or limit remedy by action or summary procedure before justices. (2) Where it is shown to the satisfaction of superintendent that a seaman engaged has wilfully or through misconduct failed to join his ship, the superintendent shall report matter to the Board of Trade, and the Board may direct that any of the seaman's certificates of discharge shall be withheld for such period as they may think fit, and while a seaman's certificate of discharge is so withheld, the Registrar-General of Shipping and any person having custody or necessary documents may refuse to furnish copies of any certificates of discharge or certified extracts of any particulars of service of character.

66. Where on any investigation under Part VI. of principal Act, the Court find that a casualty has been caused or contributed to by the wrongful act or default of any person, and an application for re-hearing has not been made under Section 475 or Section 478 of principal Act, or has been refused, the owner or any other person interested may appeal from decision in the same manner as a master may appeal with respect to cancelling or suspension of his certificate.

67. (1) Powers of Naval Court under Section 483 of principal Act shall include power to send offender sentenced to imprisonment to United Kingdom or any British possession to which His Majesty by Order in Council has applied this section as to them most convenient, and the Court shall have same powers as respects orders which may be given to masters as consular officer has for sending offender for trial under Section 689 of principal Act, and Sub-section 2, 4, and 5 of that section shall apply with modification. (2) Any master to whose charge offender is committed shall, on his ship's arrival in United Kingdom or British possession, give him into custody of police officer or constable, and offender shall be dealt with as if convicted and sentenced to imprisonment by a court of competent jurisdiction in United Kingdom or British possession, as the case may be. (3) This section may be applied to any British possession the Legislature of which consents.

68. (1) Any person aggrieved by Naval Court ordering forfeiture of wages, or decision as to wages, fines, or forfeitures, may appeal to High Court. (2) Sub-section 2 of Section 483 of principal Act shall not have effect on order of Naval Court quashed on appeal under this section, and where order of a Naval Court is varied on appeal, shall apply as if varied order were order of Naval Court.

69. For the limitation of liability of owners of ships, docks, or canals, and harbour and conservancy authorities, tonnage of steamship shall be her registered tonnage, with addition of engine-room space deducted, and the words " registered tonnage with the addition of any engine-room space deducted " shall be substituted in paragraph (*a*) Sub-section (2) Section 503 of principal Act for " gross tonnage without deduction on account of engine-room."

70. Proviso to Section 1 of Liability of Shipowners Act, 1898, shall cease, but that section shall not extend Section 502 of principal Acts to owners or shareholders after ship has become foreign.

71. Sections 502 to 509 of principal Act shall be read so that "owner " shall include charterer to whom ship is demised.

72. Section 518 of principal Act shall apply to wreck found or taken possession of outside and brought within limits of United Kingdom, as it applies to wreck found or taken possession of within those limits.

73. Pilotage certificate shall not be granted to master or mate unless a British subject, but renewal of such certificate may be granted. Repealed by Pilotage Act, 1913.

74. (1) In the United Kingdom, superintendents, deputies, clerks, and servants in mercantile marine offices shall be appointed and removable by the Board of Trade, and superintendents shall be subject to control and directions of the Board. (2) Sub-section 1 of Section 244 of principal Act is amended.

75. (1) A surveyor of ships under Section 724 of principal Act may be appointed ship surveyor or engineer surveyor, or both, and reference to shipwright-surveyor shall be reference to ship surveyor. (2) Surveyor of ships appointed as shipwright-surveyor, or as shipwright-surveyor and an engineer-surveyor, shall be deemed appointed ship surveyor, or both ship and engineer-surveyor. (3) Surveys under Section 272 of principal Act by a ship surveyor and engineer-surveyor may be made by same person if appointed as ship surveyor and engineer-surveyor, and section shall be so construed. (4) The Board of Trade may, in addition to appointing a surveyor-general, appoint other principal officers of survey of ships and incidental matters.

76. (1) The master, whether of British or foreign ship, which carries any passenger to or from a place out of United Kingdom, or from place to place out of United Kingdom, shall furnish to such person the total number of passengers carried, particulars and forms required by the Board. (2) Any passenger shall furnish master any information required for the return. (3) If master fails to make return or makes false return, and if passenger refuses information required for the return or gives false information, the master or passenger shall be liable to a fine not exceeding £20.

77. (1) The master of every ship carrying cattleman to or from any port out of the United Kingdom shall furnish such person a return giving particulars of cattlemen carried as may be required for the time being, and every cattleman shall furnish master with information required. (2) If the master fails to make return or makes false return, he shall be liable to a fine not exceeding £100, and if cattleman refuses information or gives false information, he shall be liable to imprisonment with hard labour for a term not exceeding three months. (3) The expression "cattleman" means person engaged to attend during voyage on cattle or horses carried as cargo.

78. (1) The Board of Trade may exempt any ship from specified requirement or dispense with its observance if satisfied that the action taken or provision made as respects the subject-matter is effective, or more effective than actual compliance with the requirement. (2) The Board of Trade shall annually lay before Houses of Parliament report of cases in which they have exercised powers under this section.

79. (1) The Board of Trade may appoint Advisory Committees when considering rules, regulations, or scales for Merchant Shipping Acts of persons representing interests affected, or having special knowledge of subject. (2) Members of Advisory Committee shall be paid travelling and other allowances as Board of Trade fix. (3) Committees

may be appointed to advise the Board of Trade as regards rules, regulations, or scales or any class thereof.

80. (1) His Majesty may by Order in Council determine how Government ship may be registered as British ship for the purpose of the Merchant Shipping Acts. (2) This Act shall not affect powers of Legislature of any British possession to regulate Government ships under control of that possession. (3) The expression " Government ships " here means ships not forming part of H.M. Navy held by or for the Crown, and cannot be registered under Merchant Shipping Act, 1894.

81. (1) Sections 413 to 416 of principal Act shall apply to fishing boats, trawlers of 25 tons and upwards, going to sea from ports of Scotland, as they apply to fishing boats from ports of England and Ireland, except that in Section 415 date of commencement of this Act shall be substituted for dates mentioned in that section and Part IV. of the principal Act shall be so construed. (2) The section aforesaid as hereby applied to Scotland shall be deemed portions or provisions of Part IV. referred to in Section 369 of principal Act, and that section and Part IV. shall be so construed. Provided that any Order to be published in *Edinburgh Gazette* under that section shall be subject to consent of the Secretary for Scotland.

82. The principal Act, in its application to Scotland, is amended as follows:—(1) Sub-section 1, Section 237 of principal Act is hereby amended by addition thereto of " And such person found on board without consent as aforesaid may be taken before any sheriff or justice of the peace without warrant, and such sheriff or justice may summarily hear the case, and on proof of the offence, convict such offender as aforesaid." (2) Provisions of Section 680 of principal Act shall apply to Scotland. (3) Section 702 of principal Act shall be amended by deletion of " by criminal libel at the instance of the procurator fiscal of the county before the sheriff," and every offence referred to in Section 702 of principal Act may be prosecuted by indictment. (4) The words " or misdemeanours " in Section 703 of principal Act are repealed.

83. Section 744 of principal Act shall not apply to ships in whale fisheries off coast of and registered at ports in Scotland, and there shall be added at end of that section " and of ship engaged in the whale fisheries off the coast of Scotland and registered at ports in Scotland."

PART VI.—*Supplemental.*

84. (1) In this Act " principal Act " means Merchant Shipping Act, 1894, and " Merchant Shipping Acts " means Merchant Shipping Acts, 1894 to 1900, and this Act. (2) Reference in this Act to provision of Merchant Shipping Acts, 1894 to 1900, amended by subsequent Act or this Act, shall be construed as reference to the amended provision.

85. Enactments mentioned in Second Schedule to this Act are repealed to the extent specified in third column of that schedule.

86. (1) This Act may be cited as the Merchant Shipping Act, 1906, and may be cited together as the Merchant Shipping Acts, 1894 to 1906. (2) This Act shall, save as otherwise provided, come into operation on the 1st June, 1907.

Scale of Provisions for Merchant Vessels at Sea—Authorised by the Merchant Shipping Act, 1906.

CONDITIONS AND EXCEPTIONS IN APPLYING SCALE.

1. The issue of provisions for which a weekly total, and no daily, amount is given in the scale shall be reasonably distributed throughout the week.

2. The issue of soft bread shall not be required—(*a*) In a ship of less than 1,000 tons gross registered tonnage; or (*b*) if rough weather renders the making of the bread impracticable; or (*c*) in any ship until the date of the first agreement with the crew entered into after Jan. 1, 1908; but where soft bread is not issued an equivalent amount of biscuit shall be issued.

3. An equal quantity of fish, up to an amount not exceeding ¾ lb., in any one week, may be substituted for preserved meat. The fish issued, whether under scale or as a substitute, must be fresh or dried fish, or canned salmon or canned herrings.

4. Within the tropics, 1½ lb of preserved meat or 3 lbs. of fresh meat may be substituted for 2 lbs. of salt pork.

5. Fresh potatoes must be issued for at least the first eight weeks of the voyage in the case of every ship leaving a port within the home trade limits at any time between the last day of September and the first of May, and at any other time when they can be procured at a reasonable cost. When fresh potatoes are not issued, an equal amount of yams or vegetables preserved in tins or an equivalent amount of dried or compressed potatoes or dried or compressed vegetables in the proportion of 1 lb. to 6 lbs. of fresh potatoes, must be issued.

6. Fresh vegetables or vegetables preserved in tins may at any time be substituted for dried or compressed vegetables in the proportion of a ½ lb. of fresh vegetables or vegetables preserved in tins to 1 oz. of dried or compressed vegetables.

7. A mixture of coffee and chicory containing not less than 75 per cent. of coffee may be substituted for coffee in the proportion of 5 oz. of the mixture to 4 oz. of coffee.

8. The dried fruit issued must be raisins, sultanas, currants, figs, or prunes.

9. The onions must be fresh onions when in season; and when not in season, an equal amount of onions or vegetables preserved in tins or an equivalent amount of dried or compressed onions or vegetables in the proportion of 1 oz. to a ½ lb. of fresh onions must be issued.

10. In port—(*a*) soft bread shall be issued in lieu of biscuit; and (*b*) when procurable at a reasonable cost, 1½ lbs. of fresh meat and a ½ lb. of fresh vegetables shall be issued daily, and when they are issued, salt and preserved meat and dried or compressed vegetables need not be issued.

11. The stokehold hands are to receive sufficient oatmeal and one quart of water extra daily while under steam.

Substitutes and Equivalents—not to be used without Reasonable Cause.

Fresh meat 1½ lbs., salt meat 1 lb., preserved meat ¾lb., to be considered equal. Coffee ½ oz., cocoa ½oz., tea ¼ oz., to be considered equal. Flour 1 lb., biscuit 1 lb., rice 1 lb., to be considered equal. Split peas ½ pt., flour ¾ lb., calavances or haricot beans ½ pt., rice ¾ lb., to be considered equal when issued with meat rations. Marmalade 1 lb., jam 1 lb., butter ½ lb., to be considered equal. Mustard and curry powder, to be considered equal.

BOARD OF TRADE INSTRUCTIONS TO INSPECTORS OF SHIPS' PROVISIONS

Under the Merchant Shipping Act, 1906: Section 26.

[*Issued August, 1907; Revised November, 1908, and October, 1909.*]

(1) These instructions relate primarily to the inspection of provisions and water under Section 26 of the Act of 1906, and do not affect the inspection required by Section 206 of the Act of 1894, which must be carried on as heretofore.

(2) The first duty of inspectors is the compulsory inspection under the Act of 1894, and inspection under the new Act must not be allowed to interfere with that duty. The Board of Trade are not yet in a position to decide what increase of staff may ultimately be necessary to enable due effect to be given to the new Act, and inspections under it can only be undertaken when time permits. When stores for long-voyage ships coming under Section 206 of the Act of 1894 have been inspected in bulk (*see* par. 5 of these instructions), inspectors will then only require to satisfy themselves that the official seals are intact, and that the time for which they hold good has not elapsed.

(3) Inspectors will observe that the inspection must be made before the shipment of the provisions or water when practicable. If notice is given that the stores for a ship are ready for inspection and in a convenient place, inspection can only be made within 48 hours from the receipt of the notice. The notice must be given by the master, owner, agent of the ship, or ship's store dealer.

(4) Any premises at or near a seaport which are, in fact, convenient, having regard to accommodation, lighting, etc., will be regarded as a "convenient place" within the meaning of Section 26, but in deciding what particular inspections should be made, inspectors must remember that, while it is desirable that the inspection should be as general as possible, and that no port or store should remain altogether unvisited by an inspector, consideration must also be had to the expenditure of time which may be involved in travelling to and from distant places, and which might be more usefully spent in inspections nearer the inspector's offices.

(5) The Board of Trade have decided to allow the inspection of stores in bulk (*see also* par. 2) on payment of the fees specified below. The periods for which the seals will hold good are also shown:—

Article.	Quantity.	Fees.	Seals to hold good for
Biscuits	In bags up to 1 cwt. each	1d. each	1 month.
"	" barrels	2d. "	1 "
"	" tins of any weight	1d. on 28 lbs.	3 months.

Pepper	„ 6 lbs.	1d.	2 „
Curry Powder	„ 6 lbs.	1d.	2 „
Onions (tinned)	„ 48 lbs.	1d.	3 „
„ (fresh)	In bags or cases, on every 112 lbs.	1d.	1 month

The stores inspected in bulk should be wired and sealed in the ordinary course. Applications for inspection in bulk must be made upon Forms P.W. 25 and 26, and inspections must not be made until the fees payable have been received.

(6) Pars. 1 to 16 of the Instruction to Inspectors of Ships' Provisions (*Circular* 474, June, 1893) will apply generally to the conduct of inspections under the Act of 1906.

(7) The following instructions should guide the inspectors in dealing with the water and provisions inspected by them. The descriptions of the articles given below are not intended to fix a rigid standard so as to rule out articles which do not exactly comply with the descriptions, but are meant to indicate the quality below which provisions should not be passed:

(1) *Water.*—The water should be good fresh water, and ships' tanks should be completely emptied of all water left over after the conclusion of a voyage, and thoroughly cleansed before being refilled.

(2) *Biscuits.*—Biscuits should be thoroughly baked and dried and should be made of fully matured wheat flour containing a proper proportion of nutritious matter. Where tanks are used for the storage of biscuits on board ship they must be thoroughly cleansed, limed with fresh lime, and dried before being refilled. This requirement does not apply in the case of galvanised tanks when they are new, or when no fault has been found with their contents.

(3) *Salt Beef.*—Beef shall consist only of brisket, flanks, and plates of fine heavy grade, freshly cured, free from taint, and thoroughly sweet, packed in good sound casks, re-capped and re-pickled with pickle of full strength, all to the satisfaction of the inspector.

(4) *Salt Pork.*—Pork shall be of assorted pieces in fair proportion, of fine grade, freshly cured, free from taint, and thoroughly sweet, packed in good sound casks, re-capped, and re-pickled with pickle of full strength, all to the satisfaction of the inspector.

(5) *Preserved Meat.*—Preserved meats shall be of fine grade, but may be of any variety and may be mixed with a fair proportion of vegetables, the whole to be properly preserved, and packed in good strong tins, the tins being painted or otherwise protected from rust, all to the satisfaction of the inspector, who may open one or more of the tins of each kind should he deem it necessary.

(6) *Fish.—Dried Fish* to be cod or ling, large or medium, sea split, thoroughly well cured, hard and dry; or any other approved kind of fish. *Tinned Salmon:* Best Alaska reds. *Fresh Herrings:* Fine quality properly preserved in good strong tins and protected from rust.

(7) *Fresh Potatoes.*—Good hard sound potatoes of a variety suitable to the time of year.

(8) *Dried or Compressed Vegetables.*—Vegetables shall be fresh and sound, properly preserved, and in good strong tins, the tins being painted and otherwise protected from rust, all to the satisfaction of the inspector, who may open one or more of the tins of each kind should he deem it necessary. No dried or compressed mixed vegetables containing more than 10 per cent. of potatoes, or 5 per cent. of green peas, or 5 per cent. of calavances, will be passed.

(9) *Peas, Split.*—Good, clean, kiln-dried.

(10) *Peas, Green.*—Good sound blue peas; to break when boiled.

(11) *Calavances.*—Good, clean.

(12) *Flour.*—Flour shall be of fine grade, milled from fully matured good sound wheat, containing a proper proportion of nutritious matter, to the satisfaction of the inspector. If shipped in barrels, the barrels must be new, properly made from suitable seasoned wood, thoroughly tight, and lined with suitable paper. The ends of the barrels to be coated with hot lime. Where tanks are used for the storage of flour on board, they must be thoroughly cleansed, limed with fresh lime, and dried before being refilled, all to the satisfaction of the inspector.

(13) *Rice.*—Good, clean (not broken rice).

(14) *Oatmeal.*—Good genuine.

(15) *Coffee, and Coffee and Chicory.*—Good, clean liquoring coffee or coffee and chicory (limited to 25 per cent. of chicory), free from brickiness. Chicory of the best quality only.

(16) *Tea.*—Good, strong liquoring tea composed of Indian, Ceylon, or China.

(17) *Sugar.*—Good, white, granulated or crystals, or cane sugar of equal quality.

(18) *Milk (Condensed).*—Full-cream, sweetened or unsweetened milk, of proved keeping quality, free from preservatives. On analysis (if analysed), the milk must show at least 10 per cent. of fat. Skim milk will not be accepted.

(19) *Butter.*—Butter shall be thoroughly sweet, packed in good tins, free from rust; may contain salt, and must be equal in quality to the

best salted Cork butter. No butter containing more than 16 per cent. of water may be shipped.

(20) *Marmalade or Jam.*—*Marmalade* prepared from sound fruit and sugar only. *Jams:* Fruit and sugar only, added fruit juice or jelly not to exceed 10 per cent., and actual amount of fruit juice or jelly so added to be stated on the label. Mixed fruit jams will not be passed, unless it is clearly indicated on the label that they consist only of two fruits, which must be named, with the percentage of each fruit stated.

(21) *Syrup or Molasses.*—Good pure cane.

(22) *Suet.*—Best beef suet.

(23) *Pickles.*—Good mixed or assorted, in pure malt vinegar only.

(24) *Dried Fruits.—Raisins:* Good, clean, selected Valencias or Sultanas. *Currants:* Good, clean. *Prunes:* Good dried prunes, or plums seventy or eighty to the 1 pound. *Figs:* Finest natural bags.

(25) *Fine Salt.*—Fine block salt.

(26) *Mustard.*—Good condiment.

(27) *Pepper.*—Pure ground, black, of good quality, the produce of the entire berry only, finely ground, dry, in good condition, free from dirt and all impurities and adulteration.

(28) *Curry Powder.*—Good quality.

(29) *Onions.*—Onions must be fresh and sound, and if shipped in tins must be properly preserved, the tins being painted or otherwise protected from rust, all to the satisfaction of the inspector, who may open such tins as he deem it necessary.

NOTE.—Type samples, showing approximately the quality of provisions required, should be kept on view at the inspectors' offices.

Special forms for use in connection with inspection under Section 26 of the Act of 1906, and of inspection of stores in bulk will be issued.

SCHOOLS OF COOKERY.

Recognised under Section 27, Merchant Shipping Act, 1906.

London School of Nautical Cookery, Sailors' Home, Well Street and Dock Street, London, E.

City of Liverpool Seamen's Cookery School, Liverpool.

Shipping Federation School of Nautical Cookery, Glasgow.

" " Rangoon.
" " Chittagong.

LOAD LINE EXEMPTION.

Under the Merchant Shipping Act, 1906: Section 7, and by Orders in Council, April 24 and May 30, 1907.

The Board of Trade except the following classes of coasting steamships under 80 tons register from the obligation to be marked with a load line so long as they do not carry cargo:—(1) Tugs and salvage steamers.

(2) Steamers surveying harbours and approaches thereto. (3) Steam hopper barges and dredgers. (4) Steam pilot vessels. (5) Passenger steamers holding Board of Trade Passenger Certificates plying in smooth waters or partially smooth water limits; and passenger steamers holding Board of Trade Passenger Certificates plying in excursion limits.

LOADING OF TIMBER RULES.

Rules made by the Board of Trade under Section 10 of the Merchant Shipping Act, 1906, by Minute of February 7, 1907, and amended by Order in Council, August 20, 1907.

I.—Classes of Ships approved for the purpose of carrying Heavy Wood Goods as Deck Cargo.—The classes of ships approved for the purpose of carrying heavy wood goods as deck cargo are iron or steel steamships having covered spaces, that is to say, poops, bridges, forecastles or shelter decks, which form part of the permanent structure of the ship, and which comply with the following conditions:—(*a*) The space must be within an erection which extends from side to side of the ship. (*b*) The outside plating must be continuous from deck to deck, and throughout the full length of the space. (*c*) The length must be bounded by iron or steel partitions and the total area of the openings in any such partition must not exceed one-fourth of the area of the partition itself.

II.—Regulations with respect to the Loading of Heavy Wood Goods as Deck Cargo.—(1) Heavy wood goods may only be loaded in covered spaces which form part of the permanent structure of the ship, and which comply with the conditions specified in Rule I. (2) Heavy wood goods must not be loaded in any covered space in such a manner as to make the ship unfit, by reason of instability, to proceed to sea and to perform the voyage safely, having regard to the nature of the service for which she is intended. (3) Heavy wood goods must be properly stowed and secured so as to prevent shifting.

III.—Regulations for the Protection of Seamen from risk arising from the Carriage of Wood Goods as Deck Cargo in Uncovered Spaces on board Ship.—(1) When wood goods are carried in an uncovered space, there shall be fitted on each side of the ship temporary rails or bulwarks of a substantial character for the full length within which the deck cargo is stowed, extending to a height of not less than 4 ft. above the line of the top of the deck cargo. (2) The uprights of such temporary rail or bulwark shall be of substantial scantling and be placed not more than 4 ft. apart; the heels of the uprights shall extend down to, and rest on, the deck of the vessel. (3) There shall be attached longitudinally to these uprights for the full length of the deck cargo, spars, deals, battens, guard-ropes or chains, at intervals of not more than 12 in. apart in a vertical direction. If ropes or chains are used, they shall be set up taut and securely attached to each upright. (4) The temporary rails or bulwarks may consist of closely spaced vertical deals, provided they are properly secured and that there are protected openings at intervals for water clearance. (5) Where light wood is carried in an uncovered space (not being a space forming the top of any permanent closed-in space on the upper deck or a space forming the top of a covered space) and the uncovered space is bounded by an open rail formed of wood, iron, or steel stanchions and longitudinal rods, battens or chains, no measures for the protection of the seamen shall be deemed sufficient if the height of such rail exceeds 3 ft. 6 in.

LANGUAGE TEST: INSTRUCTIONS TO SUPERINTENDENTS AND CONSULS AT HOME TRADE PORTS.

Board of Trade *Circular 1427*, issued November, 1907, under Section 12 of the Merchant Shipping Act, 1906.

(1) Under Section 12 of the Act of 1906 it is the duty of the superintendent or consul at a home trade port, before permitting a foreign seaman to sign the agreement of a British vessel, to satisfy himself that the seaman possesses a sufficient knowledge of the English language to understand the necessary orders given to him in the course of his duties.

(2) In most cases a conversation with the seaman will probably be sufficient to enable the officer to form a trustworthy opinion as to the extent of the man's knowledge of English.

(3) If the seaman is able to follow the officer in his explanation of the articles of agreement and of the stipulations they contain, and if he is able to state in intelligible English his age, nationality, address, last ship, etc., to be entered in the agreement preparatory to signing on, a few additional questions put either by the officer, or by the master of the ship, will be sufficient to test his ability to understand the terms in common use in giving orders on board ship.

(4) In doubtful cases the officer should supplement this test by asking a few essential questions relating to his duties that require more than "yes" or "no" for an answer, before deciding whether the seaman may be regarded as complying with the requirements of the section.

(5) When a foreign seaman has been allowed by a superintendent or other proper officer to sign an agreement at a port in the United Kingdom, or within the Home Trade limits after the date on which Section 12 comes into force, the officer before whom the man is discharged should make and sign an endorsement on page 3 of the seaman's continuous discharge book to the following effect:—"This seaman signed an agreement after December 31, 1907." The endorsement should be stamped with the office stamp.

(6) The endorsement should not be made in the case of substitutes who have not been engaged before a superintendent or other officer.

(7) The proper officer shall not under this section refuse to allow a seaman holding a discharge certificate so endorsed to sign an agreement unless he considers that there are special reasons for the refusal. Special reasons are only likely to arise in exceptional circumstances, *e.g.*, where there is strong evidence that the seaman is in possession of an endorsed discharge certificate which does not belong to him. The proper officer should, accordingly, exercise great caution before refusing to allow the engagement of a seaman holding a discharge certificate properly endorsed, and in every case where such refusal is found to be necessary, a full report should be forwarded to the Board of Trade.

(8) The proper officer will observe that the provisions of Section 12 do not apply to British subjects, inhabitants of British Protectorates or Lascars. When a seaman claims to come under one of these categories, the proper officer should as far as possible satisfy himself that this is the case.

REGULATIONS RELATING TO SHIPS' NAMES.

Drawn up by the Board of Trade under Section 50 of the Merchant Shipping Act, 1906.

Under the provisions of Section 50 of the Act of 1906, the Board of

Trade, in conjunction with the Commissioners of Customs, make the following regulations relating in ships' names:—

(1) Any person who proposes to make application for the registry of a British ship shall give notice in writing of the proposed name to the registrar of shipping at the intended port of registry at least 14 days before the date on which it is contemplated to effect the registry.

(2) It shall not be necessary to give notice of the name by which it is proposed to register for (*a*) a fishing boat which is only to be entered in the fishing boat register under Part IV. of the Merchant Shipping Act, 1894; (*b*) a yacht belonging to a recognised club and used for pleasure only.

(3) When it is proposed to register the ship at a port in the British Isles, the registrar at that port shall transmit the notice to the Registrar-General of Shipping and Seamen.

(4) If the proposed name does not appear already as the name of a registered British ship, or if it is not a name so similar to that of a registered British ship as to be calculated to deceive, the Registrar-General of Shipping and Seamen shall issue a certificate to that effect to the registrar at the port at which the ship is to be registered, and the ship shall be registered under that name provided all requirements for registry have been duly complied with.

(5) If the proposed name is found to be already the name of a registered British ship, or a name so similar as to be calculated to deceive, the Registrar-General of Shipping and Seamen shall issue a certificate to that effect and shall transmit the certificate to the Board of Trade, who may refuse the registry of the ship by that name. The Board of Trade will intimate their decision to the registrar at the intended port of registry and to the applicant for registry.

(6) Notwithstanding anything contained in the foregoing regulations the Board of Trade may allow the registry of a ship by name or designation which is already the name or designation of a registered British ship:—

(*a*) if they are satisfied that the ship is intended to replace a ship of the same name owned by the same owners, where the British registry of the original ship has been closed, or she has been sold on the condition that her name be changed; or

(*b*) if the designation proposed is a number only and the vessel so designated plies only in or about a port or harbour in which no other vessel is designated by the same number; or

(*c*) if they are satisfied that the case is one of urgency and that the ship will be delayed if registration is refused by the name proposed by the owners. In such a case the Board may allow the ship to be registered by the name proposed by the owners upon the owners depositing £100 with the registrar of shipping and guaranteeing to change the name of the ship within twelve months to a name allowed by the Board of Trade. The deposit will be returned as soon as the name of the ship has been changed as allowed by the Board of Trade.

Applications for special consideration under the terms of this regulation must be accompanied by a full statement of the circumstances of the case, and in the case of applications under sub-section (*c*) by a remittance of the deposit and by the written guarantee required by that sub-section.

(7) When it is proposed to register the ship at a port not situated

in the British Islands, the registrar to whom the name is intimated may proceed with the registry of the ship if he satisfies himself that the name does not appear in the current Mercantile Navy List; but if the name does so appear, the registrar shall transmit the application to the Registrar-General of Shipping and Seamen, and the case shall be treated in the manner laid down for registry in the British Islands.

MERCHANT SHIPPING (TONNAGE DEDUCTION FOR PROPELLING POWER) ACT, 1907.

An Act to amend Section 78 of the Merchant Shipping Act, 1894, with respect to the deduction of the space occupied by propelling power in ascertaining the tonnage of a ship.

I.—The deduction under Section 78 of the Merchant Shipping Act, 1894 (referred to as the " principal Act ") for space occupied by the propelling power of a ship shall not in any case exceed 55 per cent. of that portion of the tonnage of the ship which remains after deducting from the gross tonnage any deductions allowed under Section 79 of the principal Act. Provided that:—

(*a*) This shall not apply to steamships constructed for the purpose of towing vessels, so long as exclusively employed as tugs; but if, and when, employed for carriage of passengers, cargoes, or stores, or using graving docks or dry docks, or places provided for the repairing of vessels, the register tonnage, on which dues based on register tonnage may be levied by any harbour or dock authority, shall be ascertained in manner provided by the Merchant Shipping Acts, 1904 to 1906, as amended by this Act, and

(*b*) This section shall not come into operation until January 1, 1914, in the case of the following ships (in this Act referred to as existing ships), namely, ships constructed, or the construction of which has been commenced before May 1, 1907, and ships, a contract for the construction of which has been made before May 1, 1907, though the construction has not actually commenced before that date.

II.—Nothing in this Act to affect any power which any dock or harbour authority have under any Act or Order confirmed by Parliament to charge tonnage rates, dues or charges otherwise than on register tonnage.

III.—(1) Where, in ascertaining tonnage of an existing ship a deduction has been made for the space occupied by propelling power greater than the maximum allowed under this Act, the tonnage shall before the date on which the Act comes into operation, be recalculated on the basis of allowing the maximum deduction under this Act, instead of that previously allowed, and the necessary alteration of the particulars and certificate of registry of ship shall be made and take effect on that date.

(2) Registrar of ship's port of registry to record alteration in particulars of registry, and send notice of alteration to the managing owner.

(3) Managing owner on receipt of notice of any alteration shall forthwith transmit same to the master of the ship, who is to produce it to the registrar of the port at which the ship is when notice is received, or to the registrar of the first port at which the ship next arrives, that registrar may make necessary alterations in the certificate of registry.

(4) Failure of managing owner or master to comply with the foregoing requirement, makes either liable on summary conviction to a fine not exceeding £50.

(5) Expression "Managing Owner" includes any person registered under Section 59 of the principal Act in cases where there is no managing owner.

IV.—Act may be cited as the Merchant Shipping Act, 1907, and be construed as one with the principal Act, and the Merchant Shipping Acts, 1894 to 1906, and this Act may be cited together as the Merchant Shipping Acts, 1894 to 1907.

Board of Trade Instructions to Surveyors under Merchant Shipping Act, 1907.

The Act does not come into operation uutil January 1, 1914, in the case of existing ships, that is, (*a*) ships constructed, (*b*) ships under construction but not completed, or (*c*) ships for which building contracts were made before May 1, 1907. In the cases of (*b*) and (*c*) the surveyor's formula of tonnage measurement should be accompanied by a report and a letter from the builders of the vessel, showing the date when the building was commenced, or the date when the contract was signed, as the case may be.

Whenever a tonnage formula is forwarded for a new steamship intended to be employed as a tug, the surveyor should also furnish a report stating whether or not the vessel is to have a passenger certificate, or is to be used for the carriage of cargoes, as it is only in tugs constructed and used *exclusively for towing* that the 55 per cent. limit or propelling space deduction is not to be applied.

Surveyors should note that the foregoing instruction does not supersede any of the provisions of the Second Schedule, Rule III., Merchant Shipping Act, 1894, or of par. 8 of the Instructions relating to the Measurement of Ships.

MARINE INSURANCE (GAMBLING POLICIES) ACT, 1909.

I.—(1) If (*a*) any person effects a contract of marine insurance without having any *bona-fide* interest, direct or indirect, either in the safe arrival of the ship in relation to which the contract is made or in the safety or preservation of the subject-matter, insured, or a *bona-fide* expectation of acquiring such an interest; or (*b*) any person in the employment of the owner of a ship, not being a part owner of the ship, effects a contract of marine insurance in relation to the ship, and the contract is made "interest or no interest," or "without further proof of interest than the policy itself," or "without benefit of salvage to the insurer," or subject to any other like term, the contract shall be deemed to be a contract by way of gambling on loss by maritime perils, and the person effecting it shall be liable, on summary conviction, to imprisonment, with or without hard labour, for a term not exceeding six months or to a fine not exceeding £100, and in either case to forfeit to the Crown any money he may receive under the contract.

(2) Any broker or other person through whom, and any insurer with whom, any such contract is effected shall be liable on summary conviction to the like penalties if he acted knowing that the contract was

by way of gambling on loss by maritime perils within the meaning of this Act.

(3) Proceedings under this Act shall not be instituted without the consent in England of the Attorney-General, in Scotland of the Lord Advocate, and in Ireland of the Attorney-General for Ireland.

(4) Proceedings shall not be instituted under this Act against a person (other than a person in the employment of the owner of the ship in relation to which the contract was made) alleged to have effected a contract by way of gambling on loss by maritime perils until an opportunity has been afforded him of showing that the contract was not such a contract as aforesaid, and any information given by that person for that purpose shall not be admissible in evidence against him in any prosecution under this Act.

(5) If proceedings under this Act are taken against any person (other than a person in the employment of the owner of the ship in relation to which the contract was made) for effecting such a contract, and the contract was made " interest or no interest," or " without further proof of interest than the policy itself," or " without benefit of salvage to the insurer," or subject to any other like term, the contract shall be deemed to be a contract by way of gambling on loss by maritime perils unless the contrary is proved.

(6) For the purpose of giving jurisdiction under this Act, every offence shall be deemed to have been committed either in the place in which the same actually was committed or in any place in which the offender may be.

(7) Any person aggrieved by an order or decision of a court of summary jurisdiction under this Act, may appeal to quarter sessions. This sub-section shall not apply to Scotland.

(8) For the purposes of this Act the expression " owner " includes charterer.

II.—This Act may be cited as the Marine Insurance (Gambling Policies) Act, 1909, and the Marine Insurance Act, 1906, and this Act may be cited together as the Marine Insurance Acts, 1906 and 1909.

MERCHANT SHIPPING (SEAMEN'S ALLOTMENT) ACT, 1911.

This Act removes doubts that have arisen as to the true interpretation of Section 141 of the Merchant Shipping Act, 1894, and Section 62 of the Merchant Shipping Act, 1906, in respect of the payment of Seamen's Allotment Notes. It enacts:

I. By agreement with the master an allotment note may be granted to a seaman providing for—(*a*) payment of a greater sum than one half of the wages; (*b*) payment at a period earlier than one month from the date of the agreement with the crew and at intervals more frequent than one month.

II. This Act may be cited as the Merchant Shipping (Seamen's Allotment) Act, 1911.

MERCHANT SHIPPING ACT, 1911.

An Act to give jurisdiction under Section 76 and Part VIII. of the Merchant Shipping Act, 1894, to certain British Courts in foreign countries.

I.—(1) Among the courts before which a ship may be brought for adjudication under Section 76 of the Merchant Shipping Act, 1894 (which relates to proceedings on forfeiture of a ship), there shall be included any British Court in a foreign country, being a court having Admiralty jurisdiction, as if such a court were included among the courts specified in that section, and that section shall be construed and have effect accordingly.

(2) Any such British Court shall also have jurisdiction to entertain any proceedings under Part VIII. of the Merchant Shipping Act, 1894, and accordingly Section 504 of that Act (which relates to the power of courts to consolidate claims against owners) shall be construed and have effect as if such a court were included among the courts to which an application under that section may be made.

(3) In this Act the expression "British Court in a foreign country" means any British Court having jurisdiction out of His Majesty's Dominions in pursuance of an Order in Council whether made under any Act or otherwise.

II.—This Act may be cited as the Merchant Shipping Act, 1911, and shall be construed as one with the Merchant Shipping Act, 1894, and the Merchant Shipping Acts, 1894 to 1907, and this Act may be cited together as the Merchant Shipping Acts, 1894 to 1911.

MERCHANT SHIPPING (STEVEDORES AND TRIMMERS) ACT, 1911.

An Act to enlarge the remedies of persons having claims for work done in connection with the stowing or discharging of ships' cargoes or the trimming of coal on board ships.

I.—(1) If it is claimed that any sum is due to any person from the owners of a ship for work done at any place in the United Kingdom by that person in connection with the stowing or discharging of cargoes on board or from that ship, or the trimming of coal on board that ship, and that ship is at any time found in any place in England or Ireland or within three miles of the coast thereof, a judge of any court of record in England or Ireland may, upon its being shown to him by any person applying in accordance with rules of court that prima facie the claim against the owners is a good claim and that none of the owners reside in the United Kingdom, issue an order for the arrest of the ship.

(2) An order under this Act shall be directed to some officer of customs and excise, or some other officer named in the order, and shall require him to detain the ship until such time as satisfaction has been made by the owners, agent, master, or consignee thereof in respect of the claim, or until security, to be approved by the judge, has been given by them or him, to abide the event of any action, suit, or other legal proceeding that may be instituted in respect of the claim, and to pay all costs and damages that may be awarded thereon, and where any such order is made, the officer to whom the order is directed shall detain the ship accordingly.

(3) In any legal proceedings in relation to any such claim as aforesaid, the person giving security shall be made defendant, and shall be stated to be the owner of the ship in respect of which the work giving rise to

the claim was done, and the production of the order of the judge, made in relation to the security, shall be conclusive evidence of the liability of the defendant to the proceedings.

(4) Where a complaint is made to the Board of Trade that, before an application can be made under this section, the ship in respect of which the application is to be made will have departed from the limits of England or Ireland or three miles from the coast thereof, the ship shall, if the Board so direct, be detained for such time as will allow the application to be made and the result thereof to be communicated to the officer detaining the ship, and that officer shall not be liable for any costs or damages in respect of the detention if made in accordance with the directions of the Board.

(5) Section 692 of the Merchant Shipping Act, 1894, shall apply to the detention of a ship under this Act as it applies to the detention of a ship under that Act.

(6) If the owner of a ship is a corporation, the owner shall, for the purposes of this Act, be deemed to reside in the United Kingdom if the corporation has an office in the United Kingdom at which service of writs can be effected.

II.—Where a ship has been demised to charterers, the provisions of this Act shall apply to claims against the charterers of the ship as they apply to claims against the owners of a ship, with the substitution of charterers for owners: Provided that no ship shall be detained on a claim against the charterers of the ship after the expiration of the term for which the ship was demised to them.

III.—Any person having a claim to which this Act applies may, if he so desires, instead of proceeding under the foregoing provisions of this Act institute proceedings in Admiralty for enforcing the claim, and all courts having jurisdiction in Admiralty shall, if proceedings are so instituted, have the same jurisdiction for the purpose of enforcing the claim as if the claim were a claim for necessaries supplied to the ship.

IV.—Nothing in this Act shall affect the power of any person to enforce any claim to which this Act applies otherwise than in accordance with the provisions of this Act.

V.—This Act may be cited as the Merchant Shipping (Stevedores and Trimmers) Act, 1911.

MARITIME CONVENTIONS ACT, 1911.

An Act to amend the Law relating to Merchant Shipping with a view to enabling effect to be given to two Conventions, dealing respectively with collisions between vessels and with salvage, which were signed on behalf of His Majesty at the Conference held at Brussels in 1910.

Provisions as to Collisions, &c.

I.—(1) Where, by the fault of two or more vessels, damage or loss is caused to one or more of those vessels, to their cargoes or freight, or to any property on board, the liability to make good the damage or loss shall be in proportion to the degree in which each vessel was in fault: Provided that—(*a*) if, having regard to all the circumstances of the case, it is not possible to establish different degrees of fault, the liability shall be apportioned equally; (*b*) nothing in this section shall operate so as to render any vessel liable for any loss or damage to which her fault has not contributed; and (*c*) nothing in this section shall affect the liability of any person under a contract of carriage or any contract or shall be construed as imposing any liability upon any person from

which he is exempted by any contract or by any provision of law, or as affecting the right of any person to limit his liability in the manner provided by law.

(2) For the purposes of this Act, the expression "freight" includes passage money and hire, and references to damage or loss caused by the fault of a vessel shall be construed as including references to any salvage or other expenses, consequent upon that fault, recoverable at law by way of damages.

II.—Where loss of life or personal injuries are suffered by any person on board a vessel owing to the fault of that vessel and of any other vessel or vessels, the liability of the owners of the vessels shall be joint and several: Provided that nothing in this section shall be construed as depriving any person of any right of defence on which, independently of this section, he might have relied in an action brought against him by the person injured, or any person or persons entitled to sue in respect of such loss of life, or shall affect the right of any person to limit his liability in cases to which this section relates in the manner provided by law.

III.—(1) Where loss of life or personal injuries are suffered by any person on board a vessel owing to the fault of that vessel and any other vessel or vessels, and a proportion of the damages is recovered against the owners of one of the vessels which exceeds the proportion in which she was in fault, they may recover by way of contribution the amount of the excess from the owners of the other vessel or vessels to the extent to which those vessels were respectively in fault: Provided that no amount shall be so recovered which could not, by reason of any statutory or contractual limitation of, or exemption from, liability, or which could not for any other reason, have been recovered in the first instance as damages by the persons entitled to sue therefor.

(2) In addition to any other remedy provided by law, the persons entitled to any such contribution as aforesaid shall, for the purpose of recovering the same, have, subject to the provisions of this Act, the same rights and powers as the persons entitled to sue for damages in the first instance.

IV.—(1) Sub-section (4) of Section 419 of the Merchant Shipping Act, 1894 (which provides that a ship shall be deemed in fault in a case of collision where any of the collision regulations have been infringed by that ship), is hereby repealed.

(2) The failure of the master or person in charge of a vessel to comply with the provisions of Section 422 of the Merchant Shipping Act, 1894 (which imposes a duty upon masters and persons in charge of vessels after a collision to stand by and assist the other vessel) shall not raise any presumption of law that the collision was caused by his wrongful act, neglect, or default, and accordingly Sub-section (2) of that section shall be repealed.

V.—Any enactment which confers on any court Admiralty jurisdiction in respect of damage shall have effect as though references to such damage included references to damages for loss of life or personal injury, and accordingly proceedings in respect of such damages may be brought *in rem* or *in personam*.

Provisions as to Salvage.

VI.—(1) The master or person in charge of a vessel shall, so far as he can do so without serious danger to his own vessel, her crew and passengers (if any), render assistance to every person, even if such person be a subject of a foreign State at war with His Majesty, who

is found at sea in danger of being lost, and, if he fails to do so, he shall be guilty of a misdemeanour.

(2) Compliance by the master or person in charge of a vessel with the provisions of this section shall not affect his right or the right of any other person to salvage.

VII.—Where any dispute arises as to the apportionment of any amount of salvage among the owners, master, pilot, crew, and other persons in the service of any foreign vessel, the amount shall be apportioned by the court or person making the apportionment in accordance with the law of the country to which the vessel belongs.

General Provisions.

VIII.—No action shall be maintainable to enforce any claim or lien against a vessel or her owners in respect of any damage or loss to another vessel, her cargo or freight, or any property on board her, or damages for loss of life or personal injuries suffered by any person on board her, caused by the fault of the former vessel, whether such vessel be wholly or partly in fault, or in respect of any salvage services, unless proceedings therein are commenced within two years from the date when the damage or loss or injury was caused or the salvage services were rendered, and an action shall not be maintainable under this Act to enforce any contribution in respect of an overpaid proportion of any damages for loss of life or personal injuries unless proceedings therein are commenced within one year from the date of payment: Provided that any court having jurisdiction to deal with an action to which this section relates may, in accordance with the rules of the court, extend any such period, to such extent and on such conditions as it thinks fit, and shall, if satisfied that there has not during such period been any reasonable opportunity of arresting the defendant vessel within the jurisdiction of the court, or within the territorial waters of the country to which the plaintiff's ship belongs or in which the plaintiff resides or has his principal place of business, extend any such period to an extent sufficient to give such reasonable opportunity.

IX.—(1) This Act shall extend throughout His Majesty's dominions and to any territories under his protection, and to Cyprus: Provided that it shall not extend to the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa, and Newfoundland.

(2) This Act shall not apply in any case in which proceedings have been taken before the passing thereof and all such cases shall be determined as though this Act had not been passed.

(3) The provisions of this Act shall be applied in all cases heard and determined in any court having jurisdiction to deal with the case and in whatever waters the damage or loss in question was caused or the salvage services in question were rendered, and Sub-section (9) of Section 25 of the Supreme Court of Judicature Act, 1873, shall cease to have effect.

(4) This Act shall apply to any persons other than the owners responsible for the fault of the vessel as though the expression " owners " included such persons, and in any case where, by virtue of any charter or demise, or for any other reason, the owners are not responsible for the navigation and management of the vessel, this Act shall be read as though for references to the owners there were substituted references to the charterers or other persons for the time being so responsible.

X.—This Act may be cited as the Maritime Conventions Act, 1911, and shall be construed as one with the Merchant Shipping Acts, 1894 to 1907.

PILOTAGE ACT, 1913.

PART I.—*Revision of Pilotage Organization.*

1. The Board of Trade shall take steps to obtain information with respect to pilotage organization at the various ports in the United Kingdom, and, by exercise of their powers under this Act to make Pilotage Orders, shall carry into effect any re-organization or improvement of organization which the Board may consider necessary or expedient, and shall also at any port deal by Pilotage Order with any Act, order, charter, custom, by-law, regulation, or provision in force at the port with a view to rendering the law relating to pilotage at the various ports in the United Kingdom accessible and, so far as possible, uniform.

2. (1) The Board of Trade shall take steps to obtain information with respect to by-laws as to pilotage in force at the various ports in the United Kingdom, and, after consulting with the pilotage authority at the port and considering any by-laws proposed by that authority, shall when necessary or expedient and with a view to securing, so far as practicable, uniformity of administration and to carrying out any changes consequent on the passing of this Act, make recommendations for the substitution of new by-laws for those in force at the port, or in case there are no such by-laws in force for the making of such by-laws as required. (2) If a pilotage authority fail to submit by-laws in accordance with the recommendations for confirmation by the Board of Trade under this Act, the Board may treat the by-laws recommended by the Board as if they were by-laws submitted to them by the pilotage authority for confirmation, and those by-laws, when confirmed by the Board of Trade in accordance with this Act, shall have the same effect as if they had been so submitted.

3. (1) The Board of Trade shall appoint such persons as they think fit as Commissioners for the purposes of this Act, but the appointment of any person appointed to be a Commissioner under this section shall not have effect beyond January 1, 1917, or such date, not being more than five years later, as the Board of Trade, with approval of the Treasury, may determine. (2) The Board of Trade may appoint and employ such officers or other persons as they think fit to assist any persons acting as Commissioners in the execution of their duties under this Act. (3) The salaries and remuneration of any persons acting as Commissioners and of any persons so appointed or employed shall be determined by the Board of Trade with approval of the Treasury, and any such salaries and remuneration, and all expenses incurred by the Board of Trade in the execution of this Act, shall be paid out of moneys provided by Parliament.

4. (1) With a view to preparation of schemes for re-organization or improvement of organization of pilotage, the Board of Trade shall cause local inquiries to be held by any persons acting as Commissioners under this Act at the various ports of the United Kingdom, except in cases where the pilotage authority of the port have submitted, in accordance with this Act, a scheme for the purpose to the Board of Trade, and the Board of Trade are satisfied that the scheme so submitted, with such modifications (if any) as may be made by the Board, is adequate for the purpose, or the pilotage authority have satisfied the Board of Trade that no scheme for the re-organization or improvement of organization of pilotage at the port is necessary or expedient. Any such local inquiry may, if the Board think necessary or desirable, include an inquiry into

by-laws in force at the port where the inquiry is held, and into their operation. (2) Where any such inquiry is held, the persons holding it shall make a report to the Board of Trade recommending to the Board a scheme for the re-organization or improvement of organization of pilotage at the port, or if a scheme has been submitted by the pilotage authority, recommending any amendments which it appears expedient to make in the scheme so submitted. (3) The Board of Trade may group ports for the purpose of any such local inquiry, and in that case the ports so grouped shall be dealt with at the same inquiry. (4) Any pilotage authority may, within three months after the passing of this Act, give notice to the Board of Trade of their intention to submit a scheme to the Board for the re-organization or improvement of organization of pilotage at their port, and shall in such a case also give such public notice of their intention as the Board may require, and if such a scheme is so submitted to the Board within nine months after the passing of this Act, the scheme shall be treated as a scheme submitted to the Board in accordance with this Act.

5. (1) Notice of any local inquiry to be held under this Part of this Act shall be given and published in such manner as the Board of Trade think best fitted for giving information of the time and place of the inquiry to those concerned, and all persons interested shall be permitted to attend and make representations. (2) Any person holding a local inquiry shall have power, by summons signed by him, to require the attendance of all such persons as he thinks fit to call and examine, and shall have power to require the production of all books, papers, and documents which he considers important. (3) Any persons attending as witnesses at any such local inquiry shall be allowed such expenses as would be allowed to witnesses attending before a court of record, or in Scotland before the Court of Session, and in case of dispute as to amount to be allowed, the dispute shall be referred by any person holding the local inquiry to a master or district registrar of the supreme court, or in Scotland to the auditor of accounts in the Court of Session, who on request signed by him shall ascertain and certify the proper amount of expenses. (4) If any person without reasonable excuse fails to comply with any summons or requisition of a person holding a local inquiry under this section, or impedes a person holding a local inquiry in the execution of his duty, he shall be liable on summary conviction in respect of each offence to a fine not exceeding £5, and in addition to a fine not exceeding £1 for every day during which the offence continues.

6. The Board of Trade, before making recommendations to a pilotage authority under this Act for the substitution of new by-laws for those in force in any port, and a pilotage authority, before submitting any scheme to the Board for the re-organization or improvement of organization of pilotage at their port shall, unless pilots are directly represented on the authority or on a pilotage committee of the authority, take steps to ascertain the opinion of the pilots at the port with respect to the matter in question.

PART II.—*General Pilotage Law. Pilotage Orders.*

7. (1) The Board of Trade may, by Order made under this Act (in this Act referred to as a Pilotage Order): (*a*) make such re-arrangement of pilotage districts and pilotage authorities as they think necessary or expedient; (*b*) establish new pilotage districts and new pilotage authorities and abolish existing pilotage districts and existing

pilotage authorities in cases where it appears to the Board necessary or expedient; (*c*) define the limits of pilotage districts, distinguishing as respects any pilotage district in part of which pilotage is compulsory and in part of which pilotage is not compulsory, the part of the district in which pilotage is compulsory; (*d*) provide for the incorporation of any pilotage authority, and make such alteration in the constitution of any pilotage authority with reference to their powers and duties as pilotage authority, and such provisions as to the appointment of committees (including, if it is thought fit, persons not members of the authority), and as to the relations between the authority and the committee, as the Board think necessary or expedient; (*e*) empower a pilotage authority to delegate to a committee thereof any of their powers and duties, and provide, if it seems necessary or desirable, that the decisions of the committee on questions so delegated shall not require confirmation by the pilotage authority; (*f*) make such provision for the direct representation of pilots and shipowners on any pilotage authority or committee of a pilotage authority as the Board think necessary or expedient; (*g*) in cases where a pilotage authority have powers and duties as to other matters as well as pilotage, provide for their accounts as pilotage authority being kept separate from their accounts in relation to other matters; (*h*) provide that pilotage shall be compulsory in any area where it has previously not been compulsory, or provide, in connection with any rearrangement of a pilotage district, that pilotage shall be non-compulsory in any area where it has been compulsory, subject to provision being also made for the payment of compensation to the pilots concerned for any loss or damage which may be incurred by them in consequence of such rearrangement; (*i*) authorize, where it appears expedient, any pilotage authority to make by-laws providing for the grant of certificates (in this Act referred to as deep sea certificates) certifying that persons are qualified to act as pilots of ships for any part of the sea or channels outside the district of any pilotage authority, so, however, that a pilot holding such a certificate shall not be entitled to supersede any other person as pilot of a ship; (*j*) provide that any Act (other than this Act), order, charter, custom, by-law, regulation, or provision shall, so far as it relates to pilotage, cease to have effect within any pilotage district or as respects any pilotage authority, but may re-enact the whole or any part thereof so far as is not inconsistent with the provisions of this Act; (*k*) provide for compensation being paid to any pilots for any loss or damage which may be incurred by them in consequence of any Order abolishing or re-arranging any pilotage districts; and (*l*) make any provisions which appear necessary or expedient for the purpose of giving full effect to the Order. (2) Provision shall be made by Pilotage Order for the direct representation of pilots either on the pilotage authority or on the committee of the pilotage authority of any district where there are not less than six licensed pilots if a majority of the pilots licensed for the district signify in writing to the Board of Trade that they desire such representation, and, where such provision is made, provision shall also be made for the representation of shipowners on the authority or committee, as the case may be. (3) A Pilotage Order establishing a pilotage authority for any pilotage district shall provide for representation on the pilotage authority of any dock or harbour authority having jurisdiction within the district which was represented on the pilotage authority for the district at the time of the passing of this Act, and which desires to be so represented. (4) A Pilotage Order shall not be made by the Board

of Trade except: (*a*) for any of the purposes of Part I of this Act; or (*b*) on the application in writing of any person interested in the pilotage of any pilotage district or in the operation of the laws relating to pilotage in that district or the administration of those laws. (5) A Pilotage Order shall require confirmation by Parliament: (*a*) if it is an Order made for any of the purposes of Part I of this Act; and (*b*) if, whatever the purpose for which it is made, a petition is presented to the Board of Trade against the Order by any person appearing to the Board of Trade to be interested in the administration of pilotage in the district within six weeks after the Order is published and the petition is not withdrawn. (6) A Pilotage Order which does not require confirmation by Parliament shall have effect as if enacted in this Act. (7) The provisions contained in the First Schedule to this Act shall have effect with respect to Pilotage Orders.

Pilotage Districts and Authorities.

8. (1) The districts established as pilotage districts under Pilotage Orders made under this Act shall be pilotage districts, and the pilotage authorities shall be the pilotage authorities as constituted by Pilotage Orders made under this Act. (2) Until otherwise provided by Pilotage Order made under this Act, every pilotage district which is, at the time of the passing of this Act, a pilotage district shall continue to be a pilotage district, and every pilotage authority which is a pilotage authority at the time of the passing of this Act shall continue to be a pilotage authority.

Advisory Committee.

9. (1) The Board of Trade may appoint an advisory committee for advising them with reference to the exercise of their powers or the performance of their duties under this Act, consisting of pilots, shipowners, representatives of pilotage authorities, representatives of dock and harbour authorities, or other persons representing the interests principally affected, or having special knowledge of the subject-matter. (2) There shall be paid to the members of any such committee out of moneys provided by Parliament such allowances and expenses as the Board of Trade may fix with the consent of the Treasury.

Compulsory Pilotage.

10. (1) Subject to the provisions of any Pilotage Order, pilotage shall continue to be compulsory in every pilotage district in which it was compulsory at the time of the passing of this Act, and shall continue not to be compulsory in every pilotage district in which it was not compulsory at the time of the passing of this Act, and subject to the provisions of this Act all exemptions from compulsory pilotage in force at the date of the passing of this Act shall cease to have effect. (2) Any reference in this Act to a pilotage district in which pilotage is compulsory shall, in the case of a district in which pilotage is compulsory only in part of the district, be construed, if the context so requires, as a reference to that part of the district only.

11. (1) Every ship (other than an excepted ship within the meaning of this section) while navigating in a pilotage district in which pilotage is compulsory for the purpose of entering, leaving, or making use of any port in the district, and every ship carrying passengers (other than an excepted ship within the meaning of this section), while navigating for any such purpose as aforesaid in any pilotage district

(whether pilotage is compulsory or not compulsory in that district) shall be either: (*a*) under the pilotage of a licensed pilot of the district; or (*b*) under the pilotage of a master or mate possessing a pilotage certificate for the district who is *bona fide* acting as master or mate of the ship. (2) If any ship (other than an excepted ship) in circumstances in which pilotage is compulsory under this section, is not under pilotage as required by this section, after a licensed pilot of the district has offered to take charge of the ship, the master of that ship shall be liable in respect of each offence to a fine not exceeding double the amount of the pilotage dues that could be demanded for the conduct of the ship. (3) For the purposes of this Act the following ships are excepted ships: ships belonging to His Majesty; pleasure yachts; fishing vessels; ferry boats plying as such exclusively within the limits of a harbour authority; ships of less than 50 tons gross; ships exempted from compulsory pilotage by by-law as hereinafter provided in this section. (4) A pilotage authority may by by-law made under this Act exempt from compulsory pilotage in their district any of the following classes of ships, if not carrying passengers, up to such limit of gross tonnage in each case as may be fixed by the by-law: ships trading coastwise; home trade ships trading otherwise than coastwise; ships whose ordinary course of navigation does not extend beyond the seaward limits of a harbour authority, whilst navigating within those limits or within such parts thereof as may be specified in the by-law: Provided that, if any such by-law appears to the Board of Trade to exempt from compulsory pilotage ships of any class or description which were not at the date of the passing of this Act in practice exempted in the district to which the by-law relates, the Board shall not confirm the by-law, but may, if they think fit, submit to Parliament a Bill confirming the by-law with or without modifications, and such Bill shall be treated as if it were a Bill confirming a Pilotage Order, and the provisions of this Act with respect to such Bills shall apply accordingly. (5) For purposes of this section, a ship which habitually trades to or from any port or ports outside the British Islands shall not be deemed to be trading coastwise, and a ship which habitually trades to or from any port outside the home trade limits shall not be deemed to be a home trade ship, by reason only that she is for the time being engaged on a voyage between ports in the British Islands, or within the home trade limits, as the case may be.

12. The provisions of this Act with respect to compulsory pilotage shall not apply to tugs, dredgers, sludge-vessels, barges, and other similar craft: (*a*) belonging to or hired by a dock, harbour or river authority whilst employed in the exercise of the statutory powers or duties of the authority and navigating within any pilotage district which includes within its limits the whole or any part of the area of the authority; or (*b*) belonging to a local authority whilst employed in the exercise of the statutory powers or duties of the authority and navigating within the pilotage district within which the port to which they belong is situate: Provided that where in any pilotage district any of the classes of vessels aforesaid were at the time of the passing of this Act in practice subject to compulsory pilotage, the pilotage authority may by by-law provide that any of such vessels shall continue to be so subject.

13. A ship calling at a port in a pilotage district for the purpose only of taking on board or landing a pilot belonging to some other pilotage district shall not, for the purpose of the provisions of this Act

relating to compulsory pilotage, be deemed to be navigating in the first-mentioned district for the purpose of entering, leaving, or making use of that port.

14. Notwithstanding anything in any Pilotage Order made under this Act, any area in which pilotage was not compulsory at the date of the passing of this Act shall be deemed to be an area in which pilotage is not compulsory for the purpose of determining the liability of the owner or master of a ship being navigated in the area for any loss or damage occasioned by or arising out of the navigation of such ship.

15. (1) Notwithstanding anything in any public or local Act, the owner or master of a vessel navigating under circumstances in which pilotage is compulsory shall be answerable for any loss or damage caused by the vessel or by any fault of the navigation of the vessel in the same manner as he would if pilotage were not compulsory. (2) This section shall not take effect until January 1, 1918, or such earlier date as His Majesty may fix by Order in Council, certifying that it is necessary to bring the section into operation in order to enable His Majesty to comply with an international convention. (3) As from the date of the coming into operation of this section, Section 633, Merchant Shipping Act, 1894, shall cease to have effect.

Power of Pilotage Authorities to license Pilots and make By-laws.

16. Subject to provisions of this Act, a pilotage authority may license pilots for their district, and do all such things as may be necessary or expedient for carrying into effect their powers and duties.

17. (1) A pilotage authority may by by-laws made under this Act: (*a*) determine the qualification in respect of age, physical fitness, time of service, local knowledge, skill, character, and otherwise to be required from persons applying to be licensed by them as pilots, provide for the examination of such persons, and fix the term for which a licence is to be in force, and the conditions under which a licence may be renewed; (*b*) fix the limit (if any) on the number of pilots to be licensed, and provide for the method in which and the conditions under which the list of pilots is to be filled up; (*c*) provide generally for the good government of pilots licensed by the authority, and of apprentices, and in particular for ensuring their good conduct and constant attendance to and effectual performance of their duties, whether at sea or on shore; (*d*) determine the system to be adopted with respect to the supply and employment of pilots, and provide, so far as necessary, for the approval, licensing, and working of pilot boats in the district, and for the establishment and regulation of pilot boat companies; (*e*) provide for the punishment of any breach of any by-laws made by them for the good government of pilots or apprentices by the infliction of fines not exceeding £20 (to be recoverable as fines are recoverable under the Merchant Shipping Acts, 1894 to 1907), without prejudice to their powers under this Act to revoke or suspend the licence in the case of any such breach of by-law; (*f*) fix for the district the rates of payments to be made in respect of the services of a licensed pilot (in this Act referred to as pilotage dues), and define the circumstances and conditions under which pilotage dues may be payable on different scales and provide for the collection and distribution of pilotage dues; (*g*) if and so far as it appears to the authority to be generally desired by the pilots concerned, provide for the pooling of pilotage dues earned by the licensed pilots or by any class of pilots in the district; (*h*) provide for a deduction being made from any sums received by pilots of any

sums required for meeting the administrative expenses of the authority, or any contributions required for any fund established for the payment of pensions or other benefits to pilots, their widows or children (in this Act referred to as a pilots' benefit fund); (*i*) provide, if and so far as it appears to the authority to be generally desired by the pilots, for bonds (the penalty of which shall not in any case exceed £100) being given by pilots for the purpose of the provisions of this Act limiting pilots' liability; (*j*) establish, either alone or in conjunction with any other pilotage authority, pilots' benefit funds, and provide for the direct payment to that fund of any contributions by pilots towards the fund, or of any part of the ordinary receipts of the pilotage authority, and also for the administration of any such fund and for the conditions of participation in any such fund; (*k*) provide for the method of conducting the examination of masters and mates applying for pilotage certificates so as to maintain a proper standard of efficiency; (*l*) prohibit the grant of pilotage certificates to masters or mates who do not hold at least a mate's certificate of competency recognized under Part II, Merchant Shipping Act, 1894; (*m*) provide that a pilotage certificate shall not be renewed without re-examination unless the master or mate has made not less than a specified number of visits to the port as master or mate of any ship in respect of which the certificate is granted; (*n*) if the pilotage authority are an authority authorized to grant deep sea certificates by virtue of a Pilotage Order made with reference to that authority, provide for the grant of deep sea certificates; (*o*) apply any by-laws made under this section for the good government of pilots and the punishment of any breach of any such by-law, with any necessary modifications, to masters and mates holding pilotage certificates; (*p*) require the owners of ships, whose masters or mates hold pilotage certificates, to contribute towards the pilot fund or account of the pilotage district, and require the holders of such certificates to make a periodical return to them of the pilotage services rendered by them; provided that the contribution so required from an owner shall not exceed such proportion of the pilotage dues which would have been payable in respect of the ship if the master or mate had not held a pilotage certificate, as may be fixed by the Board of Trade; (*q*) provide for any matter for which provision is to be made or may be made under this Act by by-law. (2) A by-law shall not take effect unless it has been submitted to the Board of Trade and confirmed by them with or without modifications. (3) Notice of any by-law proposed to be submitted for confirmation under this section shall, before it is so submitted, be published in such manner as the Board of Trade direct.

18. (1) If at any port either: (*a*) a majority of the licensed pilots belonging to the port; or (*b*) any number of persons, not less than six, being masters, owners, or insurers of vessels using the port; or (*c*) a dock or harbour authority not being the pilotage authority, object to any by-law in force at the port, or desire that any by-law should be in force at the port which is not in force, they may make representation to the Board of Trade to that effect, and the Board of Trade if the representation appears to them reasonable after giving the pilotage authority, and, if they think fit, any other persons, an opportunity of making representations on the subject, may, by order, revoke, vary, or add to any by-law to which objection is made, or require the pilotage authority to submit to them for confirmation a by-law for the purpose of giving effect to the representation. (2) Any by-law revoked by any such order shall cease to have effect, and any by-law to which

additions are made or which is varied or added to, shall have effect with the variations or additions made by the order. (3) If a pilotage authority fail to submit to the Board of Trade for confirmation a by-law in accordance with an order made under this section, the Board of Trade may treat the by-law which they have required the pilotage authority to submit to them as a by-law submitted to them by the authority, and confirm it accordingly, and the by-law so confirmed shall have effect as if it had been made and confirmed in accordance with this Act.

19. The grant or renewal of a licence to a pilot by a pilotage authority under the powers given to them by this Act does not impose any liability on the authority for any loss occasioned by any act or default of the pilot.

20. (1) A pilot's licence shall be in a form approved for the time being by the Board of Trade. (2) A licensed pilot shall, when required by the pilotage authority by whom the license has been granted, produce his licence to the authority, and, in case his licence is revoked or suspended, shall deliver up his licence to the authority. (3) On the death of a licensed pilot, the person into whose hands his licence comes shall without delay transmit it to the pilotage authority by whom it was granted. (4) If any licensed pilot or other person fails to comply with the requirements of this section, he shall be liable in respect of each offence to a fine not exceeding £10.

21. (1) All receipts of a pilotage authority in their capacity as such (other than any money received by them on behalf of and paid over to any pilot, or if the authority administer a pilots' benefit fund, any sums received by them as direct payments for that fund), shall be paid into a separate fund or account, to be called the pilot fund or account of the pilotage district. (2) All expenses incurred by a pilotage authority in the exercise of their powers or performance of their duties shall be paid out of their pilot fund or account, and, except so far as may be provided to the contrary by by-law, subject to the payment of those expenses, the balance shall in each year be applied for the purposes of any pilots' benefit fund established in the district, and so far as not required for that purpose shall be applied for the benefit of pilots in such manner as may be determined by the pilotage authority with the approval of the Board of Trade. (3) A separate account shall be kept by any pilotage authority who administer a pilots' benefit fund of all moneys received by them as payments to that fund, or for the benefit of that fund, and money standing to the credit of that account shall not be applicable to any purpose other than the purposes of the fund. (4) Nothing in this section shall prevent a pilotage authority who own or hire the pilot boats for the district from keeping a separate account in respect of such boats.

22. (1) Every pilotage authority shall deliver triennially, or, if the Board of Trade so direct, at shorter intervals, to the Board, in the form and at the time required by the Board, returns giving such particulars as the Board may by order prescribe with respect to pilotage in their district, and any returns so delivered shall, as soon as may be, be laid before both Houses of Parliament. (2) Every pilotage authority shall in addition furnish annually to the Board of Trade, at such time as the Board direct, a statement of their accounts in the form prescribed by the Board, duly audited, including a statement of the average gross and net earnings of pilots during the past year, and, where the authority administer a pilots' benefit fund, the separate accounts of

that fund, including particulars of the investments if any. (3) Every pilotage authority shall allow the Board of Trade, or any person appointed by the Board for the purpose, to inspect any books or documents in the possession of that authority relating to any matter in respect of which a return is required to be delivered or a statement is required to be funished under this section. (4) If a pilotage authority refuse or fail without reasonable cause to deliver any return or furnish any statement to the Board of Trade in accordance with this section, His Majesty may by Order in Council suspend the pilotage authority for such time as His Majesty may direct, and thereupon the Board of Trade shall by order direct that, in the meantime, the powers of the authority shall be exercised, and the duties of the authority shall be performed, by such person as they may appoint for the purpose, and any such order shall take effect as if it were enacted in this Act.

Masters' and Mates' Certificates.

23. (1) A pilotage authority may grant a pilotage certificate to any person who is *bona fide* the master or mate of any ship if that person applies for such certificate, and if, after examination, they are satisfied that, having regard to his skill, experience, and local knowledge, he is capable of piloting the ship of which he is master or mate within their district: Provided that: (*a*) a pilotage certificate shall not be granted to the master or mate of a ship unless he is a British subject, except in the cases for which special provision is made by this Act; and (*b*) in any district where a by-law is in force prohibiting the grant of pilotage certificates to masters or mates who do not hold at least a mate's certificate of competency recognized under Part II, Merchant Shipping Act, 1894, the pilotage authority shall not grant a certificate except to a master or mate holding such a certificate of competency. (2) A pilotage certificate shall be in a form approved for the time being by the Board of Trade, and shall contain (in addition to any other particulars which may be prescribed) the name of the person to whom the certificate is granted, the name and draught of water of the ship or ships in respect of which it is granted, the limits of the district in respect of which the certificate is granted, and the date on which it was granted. (3) A pilotage certificate shall not be in force for more than a year from the date on which it is granted, but may be renewed annually by the pilotage authority, subject to the provisions of any by-law made by that authority as to re-examination. (4) A pilotage certificate may be granted so as to extend to more than one ship belonging to the same owner, while the master or mate is *bona fide* acting as master or mate of any such ship, provided that they are ships of substantially the same class. (5) A pilotage authority may, on the application of the master or mate of a ship, alter his pilotage certificate so as to relate to any other ship or ships of a not substantially greater draught of water or tonnage than that to which the certificate formerly related, to which the master or mate may be transferred, or so as to cover any ships of substantially the same class and belonging to the same owner as the ships to which the certificate already relates. (6) A pilotage authority may, for the purposes of this section, treat ships which are shown to their satisfaction to be *bona fide* under the management of the same person as manager, managing owner, demisee, or time charterer, as being ships owned by that person.

24. (1) Notwithstanding anything in this Act, the provisions of this Act as to the renewal of a pilotage certificate shall apply, with respect to the renewal of a pilotage certificate granted before June 1,

1906, to a master or mate who is not a British subject in the same manner as they apply to a pilotage certificate granted to a master or mate who is a British subject. (2) If any master or mate who is not a British subject shows to the satisfaction of the Board of Trade that he is the master or mate of a ship which is of substantially the same class, and is trading regularly between the same ports as a foreign ship which, on June 1, 1906, was exempt from the obligation to carry a licensed pilot, or had habitually been piloted by a master or mate of the ship who held a pilotage certificate, the Board of Trade may authorize the master or mate to apply to the pilotage authority for a pilotage certificate under this Act, and the provisions of this Act as to the granting of a pilotage certificate shall, notwithstanding anything in this Act, extend to a master or mate so applying for a certificate, although he is not a British subject, as they extend to a master or mate who is a British subject: Provided that if the Admiralty at any time consider that, on the grounds of public safety, the provisions of this sub-section should not be applicable with respect to any pilotage district or part of a pilotage district, they may make an order excluding that district or part of a district from the operation of those provisions; and while any such order is in force with respect to any such district or part of a district, a certificate granted under those provisions shall not be of any effect within that district or part of a district.

25. For the purposes of this Act, references to certificates of competency recognized under Part II, Merchant Shipping Act, 1894, shall be deemed to include references to any certificate of competency granted by the government of a foreign country, being a certificate of a class approved by the Board of Trade for the purpose.

Supplementary Provisions as to Licences and Certificates.

26. A pilotage authority may suspend or revoke any pilot's licence or any pilotage certificate granted by them if it appears to them, after giving the holder thereof an opportunity of being heard, that he has been guilty of any offence under this Act or of any breach of any by-law made by the authority, or of any other misconduct affecting his capability as a pilot, or that he has failed in or neglected his duty as a pilot, or that he has become incompetent to act as pilot; and a licence or certificate, if so revoked, shall cease to have effect, and, if so suspended, shall cease to have effect for the period for which it is suspended: Provided that in any case where pilots are directly represented on a committee of a pilotage authority, that committee may, until a Pilotage Order is made regulating the relations between the authority and the committee, exercise the powers conferred on a pilotage authority by this section with respect to pilots' licences as though they were the pilotage authority.

27. (1) If a complaint is made to the Board of Trade that a pilotage authority have: (*a*) without reasonable cause refused or failed to examine any candidate for a pilot's licence, or a master or mate for a pilotage certificate, or to grant such a licence or certificate after examination; or (*b*) conducted any examination for a pilot's licence or a pilotage certificate improperly or unfairly; or (*c*) imposed conditions on the granting of a pilot's licence or a pilotage certificate which they have no power to impose or which are unreasonable; or (*d*) without reasonable cause refused or failed to renew a pilotage certificate, or, having obtained possession of any such certificate, refused or failed to return it; or (*e*) without reasonable cause suspended or revoked a pilotage

certificate; or (*f*) in any other manner failed properly to perform their duties under this Act with respect to the matters above-mentioned in this section, or improperly exercised any of their powers under this Act with respect to those matters; the Board of Trade shall consider the complaint, and, if they are of opinion that the complaint is in any respect well founded, shall make such order as they think fit for the purpose of redressing the matter complained of, and the pilotage authority shall give effect to any order so made by the Board of Trade. (2) If a pilotage authority refuse or fail to give effect to any such order of the Board of Trade, the Board of Trade may, for the purpose of giving effect to the order, exercise any powers of the pilotage authority, and anything done by the Board of Trade in the exercise of those powers shall have the same effect as if done by the pilotage authority.

28. (1) If a pilot is aggrieved by the suspension or revocation by the pilotage authority of his licence, or by the refusal or failure of the pilotage authority to renew his licence, or by the refusal or failure of the pilotage authority who have obtained possession of his licence to return it to him, or by the imposition upon him by the pilotage authority of a fine exceeding £2, he may either appeal to a judge of county courts having jurisdiction within the port for which the pilot is licensed, or to a metropolitan police magistrate or stipendiary magistrate having jurisdiction within that port. (2) For the purpose of hearing the appeal, the judge or magistrate shall sit with an assessor of nautical and pilotage experience selected and summoned by the judge or magistrate. (3) Objection may be taken to any person proposed to be summoned as an assessor, either personally or in respect of his qualification, and by either party to the appeal. (4) The judge or magistrate may confirm or reverse the suspension or revocation of the licence, or make such order in the case as may seem just, and his decision shall be final, unless special leave to appeal from it to the High Court on a question of law or a question of mixed law and fact is given by the judge or magistrate, or by the High Court, and in such case the decision of the High Court shall be final. (5) The costs incurred by a pilotage authority under this section shall be payable out of any fund applicable to the general expenses of the pilotage authority. (6) Rules with respect to the procedure under this section (including costs and the remuneration of assessors) may be made, as respects county court judges, by the authority having power to make rules of practice under the County Courts Act, 1888, and as respects metropolitan police and stipendiary magistrates by a Secretary of State, but in either case with the concurrence of the Treasury as to fees. (7) In Scotland the appeal under this section shall be to the sheriff having jurisdiction at the port where the decision is given, and may be heard by the sheriff sitting with an assessor as provided in this section, and rules may be made by the Court of Session by Acts of sederunt with respect to the procedure in case of those appeals in Scotland (including costs and the remuneration of assessors), subject to the concurrence of the Treasury as to fees. (8) In the application of this section to Ireland: (*a*) The expression "judge of county courts" and "judge" shall respectively mean a county court judge and chairman of quarter sessions, and include recorder; (*b*) the expressions "stipendiary magistrate" and "magistrate" shall respectively mean a magistrate appointed under the Constabulary (Ireland) Act, 1836; (*c*) rules with respect to the procedure in case of appeals under this section (including costs and the remuneration of assessors) may from time to time be made, as respects

county court judges and chairmen of quarter sessions, by the authority having power to make rules and orders for regulating the practice under the County Officers and Courts (Ireland) Act, 1877, and as respects stipendiary magistrates, by the Lord Lieutenant of Ireland in Council, but in either case with the concurrence of the Treasury as to fees.

29. Such fees shall be payable on the examination for a pilot's licence, or for a pilotage certificate, and on the grant, renewal, or alteration of any such licence or certificate, as may be fixed by by-law made under this Act.

Rights and Obligations of Licensed Pilots.

30. (1) A pilot licensed for a district may supersede any pilot not so licensed who is employed to pilot a ship in the district. (2) Where a licensed pilot supersedes an unlicensed pilot the master of the ship shall pay to the latter a proportionate sum for his services, and shall be entitled to deduct the sum so paid from the sum payable in respect of the services of the licensed pilot. Any question as to the proportion payable to the licensed pilot and to the person whom the licensed pilot has superseded shall be referred to the pilotage authority by whom the licensed pilot has been licensed, and their decision on the question shall be final. (3) If in any pilotage district a pilot not licensed for the district pilots or attempts to pilot a ship after a pilot licensed for that district has offered to pilot the ship, he shall be liable in respect of each offence to a fine not exceeding £50. (4) If the master of a ship knowingly employs or continues to employ a pilot not licensed for the district to pilot the ship within any pilotage district after a pilot licensed for that district has offered to pilot the ship, or in the case of an outward bound ship, without having taken reasonable steps (proof whereof shall lie on the master) to obtain a licensed pilot, he shall be liable in respect of each offence to a fine not exceeding £50. (5) If any person other than the master or a seaman being *bona fide* one of the crew of the ship is on the bridge of a ship, or in any other position (whether on board the ship or elsewhere) from which the ship is navigated, that person shall, for the purposes of this section, be deemed to be piloting the ship unless the contrary is proved.

31. (1) A licensed pilot may require the master of any ship which he is piloting to declare her draught of water, length and beam, and the master shall comply with any such request. (2) If the master refuses to comply with any such request of a pilot, or makes or is privy to any other person making any false statement to the pilot in answer to the request, he shall be liable in respect of each offence to a fine not exceeding £50.

32. (1) A ship while being moved within a harbour which forms part of a pilotage district shall be deemed to be a ship navigating in a pilotage district, except so far as may be provided by by-law in the case of ships being so moved for the purpose of changing from one mooring to another mooring or of being taken into or out of any dock, provided that a by-law shall in every case be made for the purpose aforesaid in any pilotage district where any class of persons other than licensed pilots were in practice employed at the date of the passing of this Act for the purpose of changing the moorings of ships or for taking ships into or out of dock. (2) A ship whilst being navigated within any closed dock, lock, or other closed work in a pilotage district shall

notwithstanding anything in this Act be deemed to be navigating in a district in which pilotage is not compulsory.

33. (1) The pilotage authority shall cause every pilot licensed by them to be furnished with a copy of this Act as amended for the time being, and with a copy of any Pilotage Order for the time being in force in the district, and of any by-laws so in force. (2) A licensed pilot shall produce any copy so furnished to him to the master of any ship or other person employing him when required to do so, and if he fails without reasonable cause to do so, he shall be liable in respect of each offence to a fine not exceeding £5.

34. (1) A master of a ship shall not, except under circumstances of unavoidable necessity, take a licensed pilot without his consent beyond the district for which he is licensed, or beyond the point up to which he has been engaged to pilot the ship, and if a master of a ship acts in contravention of this section, he shall be liable in respect of each offence to a fine not exceeding £20. (2) Where a pilot is taken beyond the district for which he is licensed, or beyond the point up to which he has been engaged to pilot the ship, either without his consent or under circumstances of unavoidable necessity, he shall be entitled, over and above his pilotage dues, to maintenance and to the sum of 10s. 6d. a day, recoverable in the same manner as pilotage dues. (3) The sum so to be paid shall be computed from and inclusive of the day on which the ship passes beyond the district for which the pilot is licensed or the point up to which the pilot was engaged to pilot her, and up to and inclusive of either the day of his being returned in the said ship to the place where he was taken on board, or, if he is discharged from the ship at a distance from that place, such day as will allow him sufficient time to return thereto; and in the last-mentioned case he shall be entitled to his reasonable travelling expenses.

35. (1) A licensed pilot who has given a bond in conformity with by-laws made for the purpose under this Act shall not be liable for neglect or want of skill beyond the penalty of the bond and the amount payable to him on account of pilotage in respect of the voyage in which he was engaged when he became so liable. (2) Any bond given by a pilot in conformity with by-laws made for the purpose under this Act shall not be liable to stamp duty, and a pilot shall not be called upon to pay any expense in relation to the bond other than the actual expense of preparing it. (3) Where any proceedings are taken against a pilot for any neglect or want of skill in respect of which his liability is limited as provided by this section, and other claims are made or apprehended in respect of the same neglect or want of skill, the court in which the proceedings are taken may determine the amount of the pilot's liability, and upon payment by the pilot of that amount into court, may distribute that amount rateably among the several claimants and may stay any proceedings pending in any other court in relation to the same matter, and may proceed in such manner and subject to such regulations as to making persons interested parties to the proceedings, and as to the exclusion of any claimants who do not come within a certain time, and as to requiring security from the pilot, and as to payment of any costs as the court thinks just.

36. (1) Every licensed pilot when acting as such shall be provided with his licence, and shall, if requested, produce it to any person by whom he is employed, or to whom he offers his services as pilot. (2) If a licensed pilot refuses to produce his licence in accordance with this

section, he shall be liable, in respect of each offence, to a fine not exceeding £10.

37 If any person not being a licensed pilot for a district falsely represents himself to be a licensed pilot for that district, either by means of using a licence which he is not entitled to use or by any other means, he shall be liable in respect of each offence to a fine not exceeding £20.

Pilot Boats and Pilot Signals.

38. All pilot boats regularly employed in the pilotage service of any pilotage district shall be approved and licensed by the pilotage authority of the district, and that authority may, at their discretion, appoint and remove the masters of those pilot boats.

39. (1) Every pilot boat shall be distinguished by the following characteristics: (*a*) On her stern the name of her owner and the port to which she belongs, painted in white letters at least one in. broad and three in. long, and on each bow the number of her licence; (*b*) in all other parts a black colour, painted or tarred outside, or such other colour or colours as the pilotage authority of the district, with the consent of the Board of Trade, direct; (*c*) when afloat a flag (in this Act called a pilot flag) of large dimensions compared with the size of the pilot boat, and of two colours, the upper horizontal half white, and the lower horizontal half red, to be placed at the mast head, or on a sprit or staff, or in some equally conspicuous situation. (2) It shall be the duty of the master of the pilot boat to see that the pilot boat possesses all the above characteristics, and that the pilot flag is kept clean and distinct, so as to be easily discerned at a reasonable distance; and also that the names and numbers aforesaid are not at any time concealed; and if a master fails, without reasonable cause, to comply with the requirements of this section, he shall be liable in respect of each offence to a fine not exceeding £20.

40. A Pilotage Order in dealing with any Act, order, charter, custom, by-law, regulation, or provision shall not provide for abolishing or diminishing any power of a pilotage authority to acquire, own, hire, build, renew, maintain, or work pilot boats.

41. (1) When a ship is navigating in a pilotage district, and has on board a pilot licensed for that district, or a master or mate holding a pilotage certificate for that district, the master of the ship shall cause a pilot flag to be exhibited; and if he fails, without reasonable cause, to do so, he shall be liable in respect of each offence to a fine not exceeding £50.

42. A pilot flag, or a flag so nearly resembling a pilot flag as to be likely to deceive, shall not be displayed on any ship or boat not having a licensed pilot or a master or mate holding a pilotage certificate on board, and if any such flag is displayed on any such ship or boat, the master of that vessel shall, unless in the case of the display of a flag likely to deceive he proves that he had no intention to deceive, be liable for each offence to a fine not exceeding £50.

43. (1) The master of a ship (other than an excepted ship) shall when navigating in circumstances in which pilotage is compulsory under this Act, display a pilot signal, and keep the signal displayed until a licensed pilot comes on board. (2) The master of a ship, whether navigating in circumstances in which pilotage is compulsory or not, which is being piloted in a pilotage district by a pilot not licensed for the district, shall display a pilot signal and keep the signal displayed until a licensed pilot comes on board. (3) If the master

of any ship fails to comply with this section he shall be liable in respect of each offence to a fine not exceeding £20.

44. (1) The master of a ship (other than an excepted ship) which, in circumstances in which pilotage is compulsory under this Act, is not under pilotage as required in these circumstances, shall, if a licensed pilot of the district makes a signal for the purpose of offering his services as pilot, by any practical means consistent with the safety of his ship, facilitate the pilot getting on board the ship, and shall give the charge of piloting the ship to that pilot, or if there are two or more licensed pilots offering at the same time, to such one of them as may, according to any by-laws for the time being in force in the district, be entitled or required to take charge of the ship. (2) Where the master of a ship, whether in circumstances in which pilotage is compulsory or not, accepts the services of a licensed pilot, he shall, by any practical means consistent with the safety of his ship, facilitate the pilot getting on board the ship. (3) If the master of any ship fails to comply with the provisions of this section, he shall be liable in respect of each offence to a fine not exceeding double the amount of pilotage dues that could be demanded for the conduct of the ship.

45. (1) His Majesty may by Order in Council make rules as to the signals to be used or displayed where the services of a pilot are required on any vessel, and those signals are in this Act referred to as pilot signals. (2) If a vessel requires the services of a pilot, the master of that vessel shall use or display the pilot signals. (3) If a master of a vessel uses or displays, or causes or permits any persons under his authority to use or display, any of the pilot signals for any other purpose than that of summoning a pilot, or uses or causes or permits any person under his authority to use any other signal for a pilot, he shall be liable in respect of each offence to a fine not exceeding £20.

Offence by Pilots.

46. If any pilot, when piloting a ship, by wilful breach of duty or by neglect of duty, or by reason of drunkenness: (*a*) does any act tending to the immediate loss, destruction, or serious damage of the ship, or tending immediately to endanger the life or limb of any person on board the ship; or (*b*) refuses or omits to do any lawful act proper and requisite to be done by him for preserving the ship from loss, destruction, or serious damage, or for preserving any person belonging to or on board the ship from danger to life or limb, that pilot shall in respect of each offence be guilty of a misdemeanour.

47. If any person, by wilful misrepresentation of circumstances upon which the safety of a ship may depend, obtains, or endeavours to obtain, the charge of that ship, that person and every person procuring, abetting or conniving at the commission of the offence shall, in addition to any liability for damages, be liable in respect of each offence to a fine not exceeding £100.

48. (1) If a licensed pilot, either within or without the district for which he is licensed: (*a*) himself keeps, or is interested in keeping by any agent, servant, or other person, any premises licensed for the sale of intoxicating liquors, or sells or is interested in selling any intoxicating liquors, tobacco, or tea; (*b*) is in any way directly or indirectly concerned in any corrupt practices relating to ships, their tackle, furniture, cargoes, crews, or passengers, or to persons in distress at sea or by ship-

wreck, or to their moneys, goods, or chattels; (*c*) lends his licence; (*d*) acts as pilot whilst suspended; (*e*) acts as pilot when in a state of intoxication; (*f*) employs, or causes to be employed, on board any ship which he is piloting any boat, anchor, cable, or other store, matter, or thing beyond what is necessary for the service of that ship, with intent to enhance the expenses of pilotage for his own gain or for the gain of any other person; (*g*) refuses or wilfully delays, when not prevented by illness or other reasonable cause, to pilot any ship within the district for which he is licensed, upon the signal for a pilot being made by that ship, or upon being required to do so by the master, owner, agent, or consignee thereof, or by any officer of the pilotage authority by whom the pilot is licensed, or by any chief officer of Customs and Excise; (*h*) unnecessarily cuts or slips, or causes to be cut or slipped, any cable belonging to any ship; (*i*) refuses, otherwise than on reasonable ground of danger to the ship, when requested by the master, to conduct the ship which he is piloting into any port or place within the district for which he is licensed; or (*k*) quits the ship, which he is piloting, before the service for which he was engaged has been performed and without the consent of the master of the ship; that pilot shall, in addition to any liability for damages, be liable in respect of each offence to a fine not exceeding £100. (2) If any person procures, aids, abets, or connives at the commission of any offence under this section, he shall, in addition to any liability for damages, be liable to a fine not exceeding £100. (3) The provisions of the law relating to Customs with respect to the recovery of penalties under that law, and the application of such penalties, shall apply in the case of any prosecution by any officer of Customs and Excise for the recovery of a fine in respect of any offence against this section.

Recovery, &c., of Pilotage Dues.

49. (1) The following persons shall be liable to pay pilotage dues for any ship for which the services of a licensed pilot are obtained, namely: (*a*) the owner or master; (*b*) as to pilotage inwards, such consignees or agents as have paid or made themselves liable to pay any other charge on account of the ship in the port of her arrival or discharge; (*c*) as to pilotage outwards, such consignees or agents as have paid or made themselves liable to pay any other charge on account of the ship in the port of her departure; and those dues may be recovered in the same manner as fines of like amount under the Merchant Shipping Act, 1894, but that recovery shall not take place until a previous demand has been made in writing. (2) Any consignee or agent (not being the owner or master of the ship) who is hereby made liable for the payment of pilotage dues in respect of any ship may, out of any moneys received by him on account of that ship or belonging to the owner thereof, retain the amount of all dues paid by him, together with any reasonable expenses he may have incurred by reason of the payment of the dues or his liability to pay the dues.

50. A licensed pilot shall not demand or receive, and a master shall not offer or pay to any licensed pilot, dues in respect of pilotage services at any other rates, whether greater or less, than the rates which may be demanded by law, and, if a pilot or master acts in contravention of this enactment, he shall be liable in respect of each offence to a fine not exceeding £10.

51. If any boat or ship, having on board a licensed pilot, leads any ship which has not a licensed pilot on board when the last-mentioned ship cannot, from particular circumstances, be boarded, the pilot so leading the last-mentioned ship shall be entitled to the full pilotage rate for the distance run as if he had actually been on board and had charge of that ship.

Special Provisions as to the Trinity House.

52. (1) Any district which at the time of the passing of this Act is under the authority of sub-commissioners appointed by Trinity House and any pilotage district which may be declared after the passing of this Act to be a Trinity House outport district, shall be deemed to be a Trinity House outport district. (2) The powers and duties of Trinity House under this Act as the pilotage authority of an outport district shall be exercised and performed through a committee appointed for the district in such manner and subject to such conditions as may be determined by a Pilotage Order, under the name of Sub-Commissioners or such other name as may be fixed by the Order, and any such Order may be made so as to apply to all or any one or more of the outport districts.

53. Nothing in this Act shall oblige Trinity House to maintain separate pilot funds for each of the pilotage districts of which they are the authority, and if they maintain a single pilot fund for all those districts, the provisions of this Act as to pilot funds shall apply as if all the districts of which they are the pilotage authority were a single pilotage district.

54. Notwithstanding anything in this Act Trinity House may permit any person who, at the date of the passing of this Act, was licensed to pilot an exempted vessel in the Thames or Medway to continue to pilot any vessel in those rivers belonging to a class which, at the date of the passing of this Act, were exempted vessels, and were, in the opinion of Trinity House, in practice piloted by such persons, and any such person while so acting shall be deemed, for the purposes of this Act, to be a licensed pilot.

55. (1) The following pilotage dues in respect of foreign ships, not being excepted ships, trading to and from the port of London: (*a*) as to ships inwards, the full amount of pilotage dues for the distance piloted; and (*b*) as to ships outwards, the full amount of dues for the distance required by law; shall be paid to the chief officer of Customs and Excise in the port of London by the master, or by any consignees or agents of the ship who have paid or made themselves liable to pay any other charge for the ship in the port of London. (2) The chief officer of Customs and Excise, on receiving pilotage dues in respect of foreign ships, shall give to the person paying the dues a receipt in writing, and in the port of London the ship may be detained until the receipt is produced to the proper officer of Customs and Excise of the port. (3) The chief officer of Customs and Excise shall pay over to Trinity House the pilotage dues received by him under this section, and Trinity House shall apply the dues so received: (*a*) in paying to any licensed pilot who produces to them sufficient proof of his having piloted the ship such dues as would have been payable to him for pilotage services if the ship had been a British ship after making any deductions which they are authorized to make by by-law under this

Act; and (*b*) in paying to any person not being a licensed pilot who produces to them sufficient proof of his having in the absence of a licensed pilot piloted the ship, such amount as Trinity House think proper, not exceeding the amount which would, under similar circumstances, have been payable to a licensed pilot after making the said deductions; and (*c*) in paying over to the Trinity House Pilot Fund the residue, together with the amount of any deductions made as aforesaid. (4) Nothing in this section shall affect the application of the provisions of this Act as to the recovery of pilotage dues.

Miscellaneous and General Provisions.

56. The expenditure under this Act out of money provided by Parliament shall not exceed £6,000 in any one year.

57. The Board of Trade Arbitrations, &c., Act, 1874, shall apply as if this Act were a special Act within the meaning of the first-mentioned Act.

58. Notwithstanding anything in this Act, where a pilotage authority is entitled by statute at the time of the passing of this Act to receive moneys in the name of pilotage and to apply part of such moneys to purposes other than those authorized under this Act, a Pilotage Order made under Part I of this Act in respect of that authority may provide for the apportionment of the moneys so received as between the pilot fund or account and such other purposes.

59. This Act shall (except as expressly provided) come into operation on April 1, 1913: Provided that any enactment, order, charter, custom, by-law, regulation, or provision with reference to pilotage affecting any pilotage district in particular, and in force at the time of the passing of this Act, including any exemptions from compulsory pilotage taking effect thereunder, shall remain in force notwithstanding anything in this Act or any repeal effected by this Act, until provision is made by Pilotage Order, or in the case of a by-law by by-law, made under this Act superseding any such enactment, order, charter, custom, by-law, regulation, or provision.

60. (1) The enactments mentioned in the Second Schedule to this Act are hereby repealed to the extent specified. Provided that: (*a*) any Order in Council, licence, certificate, by-law, rule, or regulation made or granted under any enactment hereby repealed or in pursuance of any power which ceases in consequence of this Act, shall, subject to the provisions of this Act, continue in force as if it had been made or granted under this Act; and (*b*) any officer appointed, any body elected or constituted, and any office established under any enactment hereby repealed shall continue and be deemed to have been appointed, elected, constituted, or established, as the case may be, under this Act; (*c*) any document referring to any Act or enactment hereby repealed shall be construed to refer to this Act or to the corresponding enactment of this Act. (2) The mention of particular matters in this section shall not be held to prejudice or affect the general application of Section 38, Interpretation Act, 1889, as regards the effect of repeals.

61. This Act extends to the United Kingdom and the Isle of Man, and applies to all ships, British and foreign.

62. This Act may be cited as the Pilotage Act, 1913, and shall be construed as one with the Merchant Shipping Act, 1894, and amending Acts, and the Merchant Shipping Acts, 1894 to 1907, and may be cited together as the Merchant Shipping Acts, 1894 to 1913.

FIRST SCHEDULE.—PROVISIONS AS TO PILOTAGE ORDERS.

1. Subject to the provisions of this schedule the Board of Trade may make rules in relation to applications for Pilotage Orders, to the payments to be made in respect thereof, to the publication of notices and advertisements, the manner in which and the time within which representations or objections with reference to any application are to be made, and as to the publication of Pilotage Orders.

2. Notice of an application for an Order should be published once at least in each of two successive weeks in the month immediately succeeding the date of the application in such manner as may be prescribed by the Board of Trade.

3. The notice shall state the object which it is proposed to effect by the Order.

4. The Board of Trade on receiving any application for an Order shall refer the application to the pilotage authority of the district, if the authority are not themselves the applicants, and shall consider any objections made to the proposed Order whether by the pilotage authority or by other persons appearing to the Board of Trade to be interested, and for that purpose shall allow at least six weeks to elapse between the date on which the application is referred to the authority and that on which the Order is made.

5. The Board of Trade may submit to Parliament for confirmation any Order which requires confirmation by Parliament.

6. If and when a Bill confirming any such Order is pending in either House of Parliament, a petition is presented against any Order comprised therein, the Bill, so far as it relates to that Order, may be referred to a Select Committee, or if the two Houses of Parliament think fit so to order, to a Joint Committee of those Houses, and the petitioner shall be allowed to appear and oppose as in the case of private Bills.

7. Any Act confirming an Order under this Act may be repealed, altered, or amended by any subsequent Order made under this Act.

8. The Board of Trade may revoke, either wholly or partially, any Order made by them before the Order is confirmed by Parliament, but such revocation shall not be made whilst the Bill confirming the Order is pending in either House of Parliament.

9. The making of an Order shall be *prima facie* evidence that all requirements of this Act in respect of proceedings required to be taken previously to the making of the Order have been complied with.

SECOND SCHEDULE.—ENACTMENTS REPEALED.

The Merchant Shipping Act, 1894.—Sections 572 to 632 inclusive, and the Twenty-first Schedule.

The Merchant Shipping (Exemption from Pilotage) Act, 1897.—The whole Act.

The Merchant Shipping Act, 1906.—Section 73.

MERCHANT SHIPPING (CONVENTION) ACT, 1914.

An Act to make such amendments of the Law relating to Merchant Shipping as are necessary or expedient to give effect to an International Convention for the Safety of Life at Sea, signed in London on January 20, 1914, and for purposes incidental thereto.

PART I.—*Ice and Derelicts; Navigation of North Atlantic.*

1. Any sums required for the contribution from the United Kingdom towards establishing and maintaining, in accordance with the Convention, a service in the North Atlantic for the destruction of derelicts, for the study and observation of ice conditions, and for ice patrol, shall be paid by the Board of Trade out of moneys provided by Parliament.

2. (1) The master of a British ship registered in the United Kingdom, if he meets with or is informed of any dangerous ice or dangerous derelict or any other imminent and serious danger to navigation on or near his course, shall (*a*) if the ship is fitted with wireless telegraphy send out the wireless danger call described in Schedule II of this Act, followed, as provided in that schedule, by a message conveying the required information, and if the ship is not so fitted, communicate the information, by any other means of communication at his disposal, to ships in the vicinity; and (*b*) make a report to shore as soon as possible in accordance with rules to be made for the purpose by the Board of Trade. (2) If the master of a ship fails to comply with the provisions of this section, he shall be liable in respect of each offence to a fine not exceeding £50. (3) Every person in charge of a wireless telegraph station under the control of the Postmaster-General, or which is established or installed under licence of the Postmaster-General, shall, on receiving the wireless danger call, refrain from sending messages for a time sufficient to allow other stations to receive the message conveying information, and, if so required by the Board of Trade, shall transmit the information in such manner as may be required by the Board. (4) The transmission of messages respecting ice and derelicts shall be free of cost to the ships concerned, and any expenses of the transmission of those messages which would, but for this provision, fall on the ship shall, so far as they are not otherwise defrayed, be defrayed out of moneys provided by Parliament. (5) The Derelict Vessels (Report) Act, 1896, is repealed.

3. (1) The master of a British ship registered in the United Kingdom, when ice is reported on or near his course, shall at night either proceed at a moderate speed, or change his course so as to keep amply clear of the ice reported and the area of danger. (2) If the master of a ship fails to comply with this section, he shall be liable, in respect of each offence, to a fine not exceeding £100.

4. (1) The owner of any line of passenger steamers registered in the United Kingdom crossing the North Atlantic from or to any port in the United Kingdom by regular routes shall give public notice, in such manner as may be directed by the Board of Trade, of the routes which it is proposed ships belonging to the line should follow, and of any changes made in those routes. (2) If the owner of a line of passenger steamers fails to comply with this section he shall be liable, in respect of each offence, to a fine not exceeding £20.

5. (1) The master of a British ship registered in the United Kingdom shall, when a wireless distress call is received on his ship from any other ship, proceed with all speed to the assistance of the persons in distress unless he is informed by or on behalf of the ship from which the call is received that his assistance is not wanted, or unless for any other reason it is impracticable, unreasonable, or unnecessary in the special circumstances of the case so to proceed, and, if he fails to comply with this provision, he shall be guilty of a misdemeanour. Compliance by the master of a ship with this provision shall not affect his right or the right of any other person to salvage. (2) In any case where the

master of a British ship registered in the United Kingdom on receiving the wireless distress call from a ship does not proceed to the assistance of the persons in distress, he shall enter the fact and the reasons justifying his action in the official logbook and, if necessary, immediately inform the master of the ship from which the call is received.

6. (1) The master of a British ship registered in the United Kingdom shall not use or display or cause or permit any person under his authority to use or display, nor shall any person on a British ship registered in the United Kingdom use or display—(*a*) any signal or call recognized as a signal or call of distress or danger under Section 434 of the principal Act or otherwise, except in circumstances which justify the use of the signal or call; or (*b*) any private signals, whether registered or not, which cannot easily be distinguished from any such signals or calls. (2) If the master of any ship or any other person acts in contravention of this section, he shall be liable in respect of each offence to a fine not exceeding £50. (3) The Board of Trade may revoke the registration of any private signals registered under Section 733 of the principal Act, if in their opinion the signals cannot be easily distinguished from signals which are for the time being recognised as signals or calls of distress or danger.

7. (1) A passenger steamer which is subject to the provisions of Part II of this Act shall be provided with a Morse signalling lamp of sufficient range. (2) A printed copy of the code of urgent and important signals specified in Schedule II to this Act shall be placed in a conspicuous place in the chart room of every ship registered in the United Kingdom. (3) If the provisions of this section are not complied with in the case of any passenger steamer or any ship, the owner (if in fault) shall be liable in respect of each offence to a fine not exceeding £20, and the master (if in fault) shall be liable in respect of each offence to a fine not exceeding £10. (4) Paragraph (*b*) of subsection (3) of Section 272 of the principal Act, shall be read as if "signalling apparatus" were included in that paragraph.

PART II.—*Manning, Construction, and Equipment of Passenger Steamers.*

8. (1) Every passenger steamer registered in the United Kingdom shall be manned with a crew sufficient and efficient from the point of view of safety of life at sea for the purpose of her intended voyage, and shall during her voyage be kept so manned. (2) If any of the provisions of this section are not complied with in the case of any steamer, Sections 459 and 460 of the principal Act shall apply to the steamer as it applies to ships which are, by reason of undermanning, unfit to proceed to sea without serious danger to human life, having regard to the nature of the service for which they were intended, and the owner (if in fault) shall be liable in respect of each offence to a fine not exceeding £100, and the master (if in fault) shall be liable in respect of each offence to a fine not exceeding £50. (3) The Board of Trade shall make rules with respect to the manning of passenger steamers for the purposes of this section from the point of view of safety of life at sea, and where those rules apply to a ship the ship shall for the purposes of this section be deemed to be manned with a sufficient and efficient crew if manned in accordance with those rules, and not to be manned with a sufficient and efficient crew if not manned in accordance with those rules.

9. (1) With a view to securing the safety of passenger steamers registered in the United Kingdom, the Board of Trade may make such

rules as appear necessary or expedient to carry into effect the provisions of the Convention which relate to the construction of steamers, and also to carry into effect any international agreement which may be arrived at as the result of the procedure under Art. 30 of the Convention. (2) Rules made under this section shall not apply to steamers already constructed or in course of construction at the time of the passing of this Act, or the construction of which is commenced after that time and before July 1, 1915, except so far as it may appear to the Board of Trade practicable and reasonable to apply those rules to any such steamer or any class of such steamers, with any exceptions or modifications which appear expedient to the Board in the circumstances.

10. (1) The Board of Trade may make such rules with respect to the closing and periodical trial and operation of watertight doors, side scuttles, valves, and other like contrivances in passenger steamers registered in the United Kingdom, as appear necessary or expedient to carry into effect the provisions of the Convention. (2) If the master of a passenger steamer acts in contravention of or fails to comply with any rule made under this section, he shall be liable in respect of each offence to a fine not exceeding £100.

11. (1) The accommodation provided on a passenger steamer registered in the United Kingdom, by lifeboats and (to the extent to which they are allowed in substitution for lifeboats in pursuance of rules made under this section) by pontoon life rafts, shall be at least sufficient for every person on board the ship; and if such steamer has on board at any time a total number of persons greater than that for which accommodation is so provided, the owner (if in fault) shall be liable in respect of every person in excess to a fine not exceeding £10, and the master (if in fault) shall be liable in respect of every person in excess to a fine not exceeding £5, and subsections (2) and (3) of Section 430 of the principal Act shall apply with respect to penalties under this section as they apply with respect to penalties under that section. (2) Rules with respect to life-saving appliances made under Section 427 of the principal Act shall make such provision as is necessary to carry into effect, as respects passenger steamers registered in the United Kingdom, the provisions of the Convention, and such alteration of, and addition to, the rules for the time being in force shall be made as are necessary or expedient for that purpose. The power to make rules under Section 427 of the principal Act is hereby extended so as to include such further power, if any, as may be required to give full effect to this provision.

12. (1) The Board of Trade may make such rules as appear necessary or expedient for carrying out, in the case of passenger steamers registered in the United Kingdom, the provisions of the Convention with respect to the internal arrangement and the lighting of ships, manning of boats, certificates for lifeboatmen, prevention, detection, and extinction of fire on board ship, mustering and duties of the crew in case of accident, and for practice and drills with a view to action in emergencies. (2) If any rule made under this section is not complied with in the case of any ship, the owner (if in fault) shall be liable in respect of each offence to a fine not exceeding £100, and the master (if in fault) shall be liable in respect of each offence to a fine not exceeding £50 and subsections (2) and (3) of Section 430 of the principal Act shall apply with respect to the penalties under this section as they apply with respect to the penalties under that section. (3) A seaman or apprentice shall, during the period for which he is entitled to receive wages, take part,

in accordance with any requirements of the master, in any muster or drill required by rules under this section, and wilful failure or refusal on the part of any such seaman or apprentice so to take part in a muster or drill shall be regarded as wilful disobedience of a lawful command within the meaning of paragraph (*b*) of subsection (1) of Section 225 of the principal Act; but a seaman or apprentice to the sea service shall not be compelled to take part in a muster or drill at the end of a voyage.

13. Any passenger steamer proceeding on a voyage within the home trade limits shall be exempt from the provisions of this Part of this Act, and the Board of Trade may by order exempt any passenger steamers proceeding on any other voyage specified in the order from all or any of the provisions of this Part of this Act according to the voyage on which they are proceeding, if the Board are of opinion that, having regard to the nature of the voyage, it is unnecessary or unreasonable that the provisions from which the steamers are exempted should be applied to the steamers during the voyage; but no exemption shall be given to any voyage in the course of which the steamer goes more than 200 sea miles from the nearest coast.

14. For the pupose of this Part of this Act, a passenger steamer means a steamer which carries more than twelve passengers; and persons who are on board a steamer by reason of *force majeure* or as the result of any obligation on the part of a master to carry shipwrecked persons or persons in like circumstances, shall not be deemed to be passengers and shall not be counted when reckoning the number of persons on board.

Part III.—*Wireless Telegraphy.*

15. (1) Subject to the provisions of this Act, every British ship registered in the United Kingdom which carries 50 or more persons shall be provided with wireless telegraphy and shall maintain a wireless telegraphy service which shall be at least sufficient to comply with the rules made under this Act, and shall be provided with certified operators and watchers at least in accordance with those rules. Provided that the obligations imposed by this section shall not come into operation until such date, not being less than six months after the making of those rules, as may be specified in the rules. (2) In reckoning the number of persons carried on a ship for the purpose of this section, persons shall not be counted who are exceptionally and temporarily carried on a ship—(*a*) as the result of *force majeure;* or (*b*) as the result of the necessity of increasing the number of the crew to fill the places of members of the crew who are ill or disabled; or (*c*) as the result of the obligation on the part of the master to carry shipwrecked persons, or persons in like circumstances; or (*d*) if so provided by rules of the Board of Trade, as cargo hands for a part of the voyage not being between one continent and another, and not being, during the time the hands are carried, outside the limits of latitude 30° N. and 30° S. (3) If this section is not complied with in the case of any ship, the master or owner shall be liable in respect of each offence to a fine not exceeding £500, and any such offence may be prosecuted summarily, but if the offence is prosecuted summarily the fine shall not exceed £100.

16. (1) The Board of Trade, in consultation with the Postmaster-General, shall make such rules with respect to wireless telegraphy installations and service on British ships registered in the United Kingdom and with respect to the carrying on those ships of operators and

watchers for the purposes of wireless telegraphy, as appear necessary or expedient to carry into effect the provisions of the Convention. (2) The Board of Trade may by rules made under this section exempt from the obligations of this Act as to wireless telegraphy—(*a*) ships while on voyages the course of which does not take the ship more than 150 sea miles from the nearest coast, if the Board are satisfied that the route and conditions of the voyage are such as to render compliance with those obligations unreasonable or unnecessary; and (*b*) sailing ships on which, owing to the peculiar or primitive nature of their build it is impossible to provide a proper wireless installation. (3) The Board of Trade may by rules made under this section provide that any automatic calling apparatus certified by them to be efficient and to have been accepted by the parties to the Convention may be substituted, for the purposes of the provisions of this Act and any rules made thereunder relating to wireless telegraphy, for a certified operator or watcher.

17. The Board of Trade may postpone the operation of the provisions of this Act relating to wireless telegraphy as respects any particular ship for such period as the Board determine in each case, if it is shown by the owners that they have taken all reasonable steps to comply with the provisions of this Act, but that they have been unable to do so owing to difficulties in obtaining delivery of any wireless telegraphy apparatus or of obtaining the service of certificated operators or watchers. The period of postponement under this section shall not exceed one year in the case of ships required in pursuance of the Convention to provide a first-class wireless service, and two years in the case of ships required to provide a third-class wireless service, and in the case of ships required to provide a second-class wireless service, shall not exceed one year as respects the provision of a wireless installation and two years as respects the provision of a continuous watch.

PART IV.—*Safety Certificate.*

18. (1) Where any provisions of Parts II and III of this Act are applicable to a British ship registered in the United Kingdom, that ship shall not proceed to sea from a port in the United Kingdom unless a safety certificate has been granted in respect of the ship, and is for the time being in force, and shall be provided with a safety certificate when coming into such a port. (2) If the provisions of this section are not complied with, the master shall be liable to a fine not exceeding £100. (3) The master of any ship to which this section applies shall produce the safety certificate on being required by any officer authorized by the Board of Trade to require the production of the certificate; and if the certificate is not produced the ship may be detained. (4) The safety certificate shall certify that the provisions of the Convention have been complied with, and shall be a certificate granted by or under the authority of the Board of Trade under this Part of this Act.

19. (1) The Board of Trade shall not grant a safety certificate or allow a safety certificate to be granted unless they are satisfied, on the report of a wireless telegraphy inspector, as respects provisions relating to wireless telegraphy, and on the report of a surveyor of ships appointed under Section 724 of the principal Act as respects other matters, that the certificate can be properly granted. (2) A copy of any report of a wireless telegraphy inspector or surveyor of ships for the purposes of this section shall be sent to the owner, and if the owner

feels aggrieved by the report he may appeal to the court of survey for the port or the district where the ship for the time being is, in manner provided by the rules of that court. On any such appeal the judge of the court of survey shall report to the Board of Trade on the question raised by the appeal, and for the purposes of deciding the question whether the certificate of safety is to be granted or not, the report from the judge of the court of survey shall be substituted by the Board of Trade for the report which has been the subject of appeal. (3) A safety certificate shall not be in force for more than one year from the date of its issue, nor after notice is given by the Board of Trade to the owner, agent, or master of the ship in respect of which it has been granted, that the Board of Trade have cancelled the certificate. (4) If a ship in respect of which a safety certificate has been granted is absent from the United Kingdom at the time when the certificate expires, the Board of Trade, or any person authorised by them for the purpose, may, if it appears proper and reasonable, grant such an extension of the certificate as will allow the ship to complete the return voyage to the United Kingdom, but no such extension shall have effect for a period exceeding five months from the date of the expiration of the certificate. (5) Sections 276, 277, 279 to 282 of the principal Act (which in connection with passenger steamer certificates relate to the transmission of a certificate, fees for certificate, the cancellation, delivery up, posting up, and penalties for the forgery of, a certificate) shall apply with respect to a safety certificate as they apply with respect to a passenger steamer's certificate, with the substitution of the report of the surveyor or inspector under this section for the declaration of survey.

20. (1) The Postmaster-General (and the Board of Trade, if they desire to do so for any special purposes in connexion with wireless telegraphy on board a ship), may appoint wireless telegraphy inspectors for the purpose of inspecting ships with a view of ascertaining whether the requirements relating to wireless telegraphy are complied with on board any ship. (2) A wireless telegraphy inspector, for the purpose of reporting with respect to the granting of a safety certificate under this Act, or for the purpose of ascertaining whether the provisions as to wireless telegraphy and wireless operators are complied with on board any ship, may go on board any ship at all reasonable times, and do all things necessary for the proper inspection of the installation on the ship, and may also require the master of the ship to supply him with any information which it is in the power of the master to supply with respect to the provision on the ship of operators or watchers, and require the production of any certificate granted under this Act in respect of the installation, and of the certificates of the operators and watchers on the ship. (3) If the master refuses or fails to supply information in accordance with this section, he shall be liable to a fine not exceeding £20; and if any person impedes any inspector in the performance of his duties under this Act, or having the custody of a certificate the production of which may be required under this section fails to produce it when the production is so required, that person shall be liable to a fine not exceeding £20.

21. Where a safety certificate has been granted in respect of a ship and is in force, any of the provisions of this Act or the rules made thereunder relating to the manning, construction or equipment of the ship, or the provision of wireless telegraphy and wireless operators and watchers on the ship, which are applicable to the ship, shall be deemed

to have been complied with unless it appears that the ship cannot proceed to sea without danger to the passengers or crew, owing to the fact that the actual condition of the ship does not correspond in substantial particulars with the certificate.

22. (1) The report of a surveyor for the purposes of a safety certificate under this Act shall, as to the matters contained therein, have the same effect for the purpose of the passenger steamer's certificate as the declaration of a surveyor under Section 272 of the principal Act, and shall contain not only the particulars required for a safety certificate, but also in the case of a passenger steamer requiring a passenger steamer's certificate, any particulars required for the purpose of a passenger steamer's certificate. (2) Where a ship has a safety certificate, the passenger steamer's certificate need only state matters which are required to be stated in the passenger steamer's certificate. (3) An emigrant ship in respect of which a safety certificate is in force shall be exempted from Section 289 of the principal Act in the same manner as an emigrant ship in respect of which a passenger steamer's certificate is in force.

PART V.—*Application to Foreign Ships and to British Ships not registered in the United Kingdom.*

23. (1) Compliance with the provisions of Parts II and III relating to the manning, construction, or equipment of passenger steamers or relating to the provision of wireless telegraphy and wireless telegraph operators and watchers on a ship, and representing provisions of the Convention, shall be required in the case of a foreign ship or a British ship not registered in the United Kingdom which comes into or proceeds to sea from a port in the United Kingdom, in the same manner as compliance with those provisions would be required if the ship were registered in the United Kingdom, and the provisions of this Act shall apply to such a ship accordingly. (2) A safety certificate granted by or under the authority of the Government of the country to which a foreign ship or a British ship not registered in the United Kingdom belongs and recognized by the Board of Trade as granted in accordance with and for the purposes of the Convention, shall have the same effect as regards that ship as a safety certificate granted under this Act has as respects a ship registered in the United Kingdom. (3) A foreign ship, and a British ship not registered in the United Kingdom, coming into or proceeding to sea from a port in the United Kingdom—(*a*) shall, if entitled to a total or partial exemption from the provisions of the Convention under a certificate of exemption recognized by the Board of Trade as granted in accordance with and for the purposes of the Convention, be exempted to the same extent from the corresponding provisions of this Act; and (*b*) shall, if on a voyage on which a British ship registered in the United Kingdom would be entitled to a total or partial exemption from the provisions of Parts II, III, or IV of this Act, be exempted to the same extent as a British ship registered in the United Kingdom would be exempted.

24. Any provisions of this Act, and of any rules made thereunder, which apply to the United Kingdom or to ships registered in the United Kingdom or to ports in the United Kingdom, shall apply to all British possessions other than British India, the Dominion of Canada, the Commonwealth of Australia (including Papua and Norfolk Island), the Dominion of New Zealand, the Union of South Africa, and Newfoundland; and to ships registered and to ports in those possessions as

they apply to the United Kingdom, to ships registered in the United Kingdom, and to ports of the United Kingdom: Provided that—(*a*) His Majesty may, by Order in Council, except any British possession from the operation of this provision, if he thinks fit, having regard to the special circumstances of the possession, and may revoke any such order; and (*b*) His Majesty may, by Order in Council, if satisfied that the legislature of any British possession to which this section applies have by Act or Ordinance made proper provision for carrying out the Convention as respects that possession, direct that the provision shall cease to apply to that possession; and (*c*) such adaptations of the provisions of this Act and any rules thereunder may be made by Order in Council as may appear necessary to make those provisions or rules applicable in the British possession to which they apply by virtue of the foregoing provision; and (*d*) the Secretary of State may postpone the operation of the provision as respects any possession until any date not later than July 1, 1915, if satisfied that it is expedient to do so, having regard to the special circumstances of the possession.

25. (1) His Majesty may by Order in Council direct that this Act shall apply to any British protectorate and to Cyprus in the same manner as it applies to British possessions other than those mentioned in Section 24 of this Act. (2) His Majesty may by Order in Council direct that any provisions of this Act and of any rules made thereunder shall apply to ships registered in any port of registry outside His Majesty's dominions as they apply to ships registered in the United Kingdom, subject to any adaptations made by Order in Council for the purpose of making these provisions applicable to ships registered in that port.

PART VI.—*General.*

26. Nothing in this Act shall subject any ship which, not being bound to a port in the United Kingdom, has been compelled to take refuge in such a port by stress of weather or *force majeure* to any provisions of this Act from which the ship would have been exempt in the ordinary course of the ship's voyage.

27. (1) Any rules made for the purposes of this Act, and all rules made under Section 427 of the principal Act, after the commencement of this Act, for any purpose, shall be laid before each House of Parliament as soon as may be; and if an address is presented to His Majesty by either House within the next subsequent 40 days on which that House has sat next after any such rules were laid before it, praying that the rules be annulled, the rules shall forthwith be void, but without prejudice to the validity of anything previously done thereunder or to the making of any new rule. (2) Before making any such rules the Board of Trade shall give public notice of the draft of the proposed rules for giving information to those concerned, and giving those concerned an opportunity of making representations to the Board with respect to the rules. (3) Subsection (2) of Section 427 of the principal Act is repealed.

28. For the purposes of this Act, unless the context otherwise requires, the time of the commencement of the construction of a ship shall be deemed to be the time at which the keel is laid, and similar expressions shall be construed accordingly; and the country to which ships registered in a British possession belong shall be deemed to be the British possession in which they are registered.

29. (1) Any provision of this Act shall, unless the context otherwise

requires, be in addition to, and not in derogation of, any provision of the Merchant Shipping Acts or any other enactment relating to the same or similar matters. (2) Any reference in this Act to any provision of the Merchant Shipping Acts, 1894 to 1913, amended by any subsequent Act or amended by this Act, shall be construed as a reference to the provision as so amended. (3) In this Act the expression "the principal Act" means the Merchant Shipping Act, 1894. (4) This Act may be cited as the Merchant Shipping (Convention) Act, 1914, and shall be construed as one with the principal Act, and the Merchant Shipping Acts, 1894 to 1913. (5) This Act shall come into operation on July 1, 1915, provided that His Majesty may by Order in Council from time to time postpone the coming into operation for such period not exceeding on any occasion of postponement one year as may be specified in the Order.

INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA.

Introductory Note.

The Convention of the International Conference on Safety of Life at Sea was signed in London on January 20, 1914, by the plenipotentiaries of the British Empire (including Canada, Australia, and New Zealand, which were separately represented), Germany, France, United States of America, Austria-Hungary, Italy, Spain, Russia, Sweden, Norway, Holland, Belgium, and Denmark. The Convention was to be ratified by the different States on or before December 31, 1914, and it will come into force on July 1, 1915. In Great Britain and Ireland the Merchant Shipping (Convention) Act, which gives legal sanction and authority to the terms of the Convention, was passed by Parliament, August 10, 1914.

The text of the Convention, containing 74 Articles and an annexed *réglement*, was published on February 15, 1914. We give on this and succeeding pages the principal provisions of the Convention with the Regulations to which they refer. The English translation of the Convention has been prepared by the British Board of Trade for convenience of reference, but it must be clearly understood that the French text alone possesses any official authority. The Merchant Shipping (Life-Saving Appliances) Rules, which came into operation on July 1, 1914, in substitution for Rules hitherto in force, are based on the recommendations of the Convention, and are reproduced *in extenso* on other pages of this YEAR BOOK.

SUMMARY OF TEXT OF THE CONVENTION.

Ships to which the Convention Applies.

Art. 1.—The Contracting Parties undertake to give effect to the provisions of this Convention. The provisions are completed by Regulations which have the same force and take effect at the same time as the Convention.

Art. 2.—Except where otherwise provided by this Convention, the merchant ships of any of the States of the Contracting Parties, which are mechanically propelled, which carry more than 12 passengers,

which proceed from a port of one of the said States to a port outside that State, or conversely, are subject to the provisions of this Convention. Ports situated in the Colonies, Possessions or Protectorates of the Contracting Parties are considered to be ports outside the States of the Contracting Parties. Persons on board by reason of *force majeure* or in consequence of the obligation laid upon the master to carry shipwrecked or other persons are not deemed to be passengers.

Art. 3.—There are excepted from this Convention, save where the Convention otherwise provides, ships making voyages specified in a schedule to be communicated by each Contracting Party to the British Government at the time of ratifying the Convention. No schedule may include voyages in the course of which ships go more than 200 sea miles from the nearest coast. Each Contracting Party has the right subsequently to modify its schedule of voyages in conformity with this Article on condition that it notifies the British Government. Each Contracting Party has the right to claim from another Contracting Party the benefit of the privileges of the Convention for all its ships engaged in any one of the voyages mentioned in its own schedule.

Art. 4.—No ship, not subject to the provisions of the Convention at the time of its departure, can be subjected to the Convention in the course of its voyage, if stress of weather, or any other cause of *force majeure* compels it to take refuge in a port of one of the States of the Contracting Parties.

Safety of Navigation.

Art. 5.—When the expression "every ship" is used in this chapter and in the corresponding Regulations, it includes all merchant ships, whether ships defined in Art. 2 or not, which belong to any of the Contracting States.

Art. 6.—The Contracting Parties undertake to take all steps to ensure the destruction of derelicts in the northern part of the Atlantic Ocean east of a line drawn from Cape Sable to a point situated in latitude 34° north and longitude 70° west. Further, they will establish in the North Atlantic with the least possible delay a service for the study and observation of ice conditions and a service of ice patrol. For this purpose two vessels shall be charged with these three services. During the whole of the ice season they shall be employed in ice patrol. During the rest of the year they shall be employed in the study and observation of ice conditions and in the destruction of derelicts; nevertheless, the study and observation of ice conditions shall be effectively maintained, in particular from the beginning of February to the opening of the ice season. While the two vessels are employed in ice patrol the Contracting Parties, to the extent of their ability and so far as the exigencies of Naval Service permit, will send warships or other vessels to destroy any dangerous derelicts, if considered necessary.

Art. 7.—The Government of the United States is invited to undertake the management of the three services of derelict destruction, study and observation of ice conditions, and ice patrol. The Contracting Parties specially interested in these services, whose names are given below, undertake to contribute to the expense of establishing and working the services in the following percentage:—Austria-Hungary, 2; Belgium, 4; Canada, 2; Denmark, 2; France, 15; Germany, 15; Great Britain, 30; Italy, 4; Netherlands, 4; Norway, 3; Russia, 2; Sweden, 2; United States of America, 15. Each of the Contracting Parties has the right to discontinue its contribution to the expense of working these services

after September 1, 1916. The Contracting Party which avails itself of this right will continue responsible for the expenses of working up to September 1, following the date of denunciation of the Convention on this particular point. To take advantage of this right it must give notice to the other Contracting Parties at least six months before September 1. The Government of the Contracting Party which undertakes the service of derelict destruction is invited to devise means of granting, at the expense of this service, to merchant ships, which have contributed in an effective manner to the destruction of ocean derelicts, rewards to be fixed by the Government in accordance with the services rendered.

Art. 8.—The master of every ship which meets with dangerous ice or a dangerous derelict is bound to communicate the information by all the means of communication at his disposal to the ships in the vicinity, and to the competent authorities at the first point of the coast with which he can communicate. Every Administration which receives intelligence of dangerous ice or a dangerous derelict shall take all steps necessary for bringing the information to the knowledge of those concerned. The transmission of messages respecting ice and derelicts is free of cost to the ships concerned. It is desirable that the information should be sent in a uniform manner. For this purpose, a code, the use of which is optional, appears in the Regulations.

Art. 9.—The master of every ship fitted with a radio-telegraph installation, on becoming aware of the existence of an imminent and serious danger to navigation, shall report it immediately in the manner prescribed by the Regulations.

Art. 10.—When ice is reported on, or near, his course the master of every ship is bound to proceed at night at a moderate speed, or to alter his course so as to go well clear of the danger zone.

Art. 11.—The ships defined by Art. 2 shall have on board a Morse signalling lamp of sufficient range. The use of Morse signals is regulated by a code given in the Regulations.

Art. 12.—The use of international distress signals for any other purpose than that of signals of distress is prohibited on every ship. The use of private signals liable to be confused with the international distress signals is prohibited on every ship.

Art. 13.—The selection of routes across the North Atlantic in both directions is left to the responsibility of the steamship companies. Nevertheless the Contracting Parties undertake to impose on these companies the obligation to give public notice of the regular routes which they propose their vessels should follow, and of any changes which they make in them. The Contracting Parties undertake to use their influence to induce the owners of all vessels crossing the Atlantic to follow as far as possible the routes adopted by the principal companies.

Art. 14.—The Contracting Parties undertake to use all diligence to obtain from the Governments which are not parties to this Convention their agreement to the revision of the International Regulations for Preventing Collisions at Sea as indicated below:—The second white mast-head light to be compulsory. A permanent fixed stern light to be compulsory. A special day signal to be compulsory for motor vessels. A special sound signal to be established for use by a vessel in tow, or if the tow is composed of several vessels by the last vessel of the tow. Art. 31 of the Collisions' Regulations to be modified in the following

manner: Add to the lists of both day and night signals the international radio-telegraph distress signal.

Art. 15.—The Governments of the Contracting Parties undertake to maintain, or, if necessary, to adopt, measures for ensuring that, from the point of view of safety of life at sea, the ships defined in Art. 2 shall be sufficiently and efficiently manned.

Construction.

Art. 16.—For the application of the Articles contained in this chapter and in the corresponding Regulations, the ships defined in Art. 2 are divided into "new ships" and "existing ships." New ships are those the keel of which is laid after July 1, 1915. The following Articles of this chapter, Art. 17 to 30, are applicable to them in full. Other ships are considered as existing ships. Existing arrangements on each of these ships shall be considered by the Administration of the State to which it belongs, with a view to improvements providing increased safety where practicable and reasonable.

Art. 17.—Ships shall be as efficiently subdivided as possible having regard to the service for which they are intended. The minimum requirements respecting subdivision and arrangements affecting subdivision are given in the following Articles and in the Regulations. The degree of safety provided for by these minimum requirements varies in a regular and continuous manner with the length of the vessel and with a certain "criterion of service." The requirements of the annexed Regulations are such that the highest degree of safety corresponds with the ships of greatest length primarily engaged in the carriage of passengers. Articles V to IX of the Regulations indicate the method to be followed in order to determine the permissible length of compartments on the basis of the floodable length; prescribe a limit to the length of compartments; and fix the conditions governing certain special cases. When the watertight subdivision of a ship is such as to provide for a degree of safety greater than that provided by the rules prescribed by this Convention, the Administration of the State to which the ship belongs shall, if so requested by the owner, record this fact on the Safety Certificate of the ship.

Art. 18.—Ships shall be fitted with forward and after peak bulkheads and bulkheads at the extremities of the machinery space in accordance with the provisions of Article XI of the Regulations.

Art. 19.—With a view to retarding the spread of fire, ships shall be fitted with fireproof bulkheads in accordance with the provisions of Article XII of the Regulations.

Art. 20.—The conditions under which means of escape from the various watertight compartments shall be provided are indicated in Article XIII of the Regulations.

Art. 21.—In order to ensure their strength and watertightness, watertight bulkheads shall be constructed and tested in accordance with the provisions of Article XIV of the Regulations.

Art. 22.—The number of openings in watertight bulkheads shall be reduced to the minimum compatible with the design and proper working of the ship; satisfactory means shall be provided for closing these openings. Articles XV and XVII of the Regulations indicate the conditions governing the number of openings, the character and use of the means of closing with which these openings shall be provided, and the tests to which watertight doors shall be subjected.

Art. 23.—Side-scuttles and other openings in the side of the ship and the inboard openings of discharges through the shell shall be provided with means of closing them, and arranged in such manner as to prevent so far as possible the accidental admission of water. Articles XVI and XVII of the Regulations indicate the conditions under which openings may be made in the ship's side, the appliances which shall be provided for closing these openings, and the requirements as to operating the closing appliances.

Art. 24.—In order to ensure their strength and watertightness, watertight decks, trunks, and ventilators shall be constructed and tested in accordance with the provisions of Article XVIII of the Regulations.

Art. 25.—The conditions under which inspections of watertight doors, &c., and drills for their operation, shall be made periodically during a voyage are indicated in Article XIX of the Regulations.

Art. 26.—A record of the closing and opening of watertight doors, &c., and of all inspections and drills, shall be entered in the official log book as required by Article XX of the Regulations.

Art. 27.—The conditions under which a double bottom shall be fitted in ships of different lengths, and in particular the minimum extent of the double bottom longitudinally and transversely, are indicated in Article XXI of the Regulations.

Art. 28.—Ships shall have sufficient power for going astern to secure proper control in all circumstances; the auxiliary steering apparatus may be of less power than the main apparatus and need not be worked by steam or other mechanical power.

Art. 29.—The general principles governing the survey of ships defined in Art. 2, whether new or existing ships, as regards hull, main and auxiliary boilers and machinery, and equipments, are stated in Articles XXIV to XXVI of the Regulations. The Government of each of the Contracting Parties undertakes:—(1) To draw up detailed regulations in accordance with these general principles, or to bring its existing regulations into agreement with these principles; (2) to communicate these regulations to each of the other contracting States; and (3) to secure that these regulations shall be enforced.

Art. 30.—The Contracting Parties undertake to cause the study of the criterion of service referred to in Art. 17 to be pressed forward, and to communicate to each other the results. The British Government is invited to undertake the duty of circulating this information, and, as soon as a definite result is attainable, of endeavouring to secure the acceptance by the Contracting States of the criterion. Upon its acceptance by each of the contracting States, as from a date and subject to conditions to be agreed upon, such criterion shall have effect as if it were prescribed in the Convention. The procedure shall also be applied to the following items:—(1) The fitting of longitudinal watertight bulkheads, double skins and watertight decks and flats, and the question whether there may be allowed any increase in the length of transverse watertight compartments in way of which such longitudinal subdivision is fitted, and, if so, to what extent; (2) the method of subdivision for obtaining the highest practicable degree of safety to be applied to ships of shorter lengths than those covered by Article VIII of the Regulations; and (3) the results of experiments in regard to the proper margin of resistance above the pressure which watertight bulkheads are required to be capable of supporting, as referred to in Article XIV of the Regulations. The Contracting States undertake

to exchange information as freely as possible in regard to the application of the rules of this Convention in matters relating to safety of construction.

Radiotelegraphy.

Art. 31.—All merchant ships belonging to any of the Contracting States, whether propelled by machinery or sails, and whether they carry passengers or not, shall, when engaged on the voyages specified in Art. 2, be fitted with a radiotelegraph installation, if they have on board 50 or more persons in all. Advantage may not be taken of the provisions of Art. 2 and 3 to exempt a ship from the requirements of this chapter.

Art. 32.—Ships on which the number of persons on board is exceptionally and temporarily increased up to or beyond 50 as the result of *force majeure*, or because the master is under the necessity of increasing the number of his crew to fill the places of those who are ill, or is obliged to carry shipwrecked or other persons, are exempted. Moreover, the Governments of each of the Contracting States, if they consider the route and conditions of the voyage are such as to render a radiotelegraph installation unreasonable or unnecessary, may exempt from the requirement of Art. 31 the following ships:—(1) Ships which in the course of their voyage do not go more than 150 sea miles from the nearest coast. (2) Ships on which the number of persons on board is exceptionally or temporarily increased up to or beyond 50 by the carriage of cargo hands for a part of the voyage, provided that the said ships are not going from one continent to another, and that, during that part of their voyage, they remain within the limits of latitude 30° N. and 30° S. (3) Sailing vessels of primitive build.

Art. 33.—Ships which are required to be fitted with a radiotelegraph installation are divided, for the purpose of radiotelegraph service, into three classes, in accordance with the classification established for ship stations in Article XIII. (*b*) of the Regulations annexed to the Radiotelegraph Convention, signed in London, July 5, 1912, viz.:

First Class.—Ships having a continuous service. There shall be placed in the First Class ships intended to carry 25 or more passengers:—(1) If they have an average speed in service of 15 knots or more; (2) if they have average speed in service of more than 13 knots, but only subject to the two-fold condition that they have on board 200 persons or more (passengers and crew), and that, in the course of their voyage, they go a distance of more than 500 sea miles between any two consecutive ports. Nevertheless these ships may be placed in the Second Class on condition that they have a continuous watch.

Second Class.—Ships having a service of limited duration. There shall be placed in the Second Class all ships intended to carry 25 or more passengers, if they are not, for other reasons, placed in the First Class. Ships placed in the Second Class must, during navigation, maintain a continuous watch for at least seven hours a day, and a watch of ten minutes at the beginning of every other hour.

Third Class.—Ships which have no fixed periods of service. All ships neither in the First nor in the Second Class shall be placed in the Third Class. The owner of a ship placed in the Second or Third Class has the right to require that, if the ship complies with all the requirements for a superior class, a statement to the effect that it belongs to that superior class shall be inserted in the Safety Certificate.

Art. 34.—Ships required to be fitted with a radiotelegraph installation shall be required, by the Governments of the countries to which they

belong, to maintain a continuous watch during navigation as soon as the Governments consider that it will be of service for the purpose of safety of life at sea. Meanwhile, the Contracting Parties undertake to require, from the date of ratification of the present Convention subject to the delays specified below, a continuous watch on the following ships:—(1) Ships whose average speed in service exceeds 13 knots, which have on board 200 persons or more, and which, in the course of their voyage, go a distance of more than 500 sea miles between two consecutive ports, when these ships are placed in the Second Class. (2) Ships in the Second Class, for the whole of the time during which they are more than 500 sea miles from the nearest coast. (3) Other ships specified in Art. 31, when they are engaged in the Trans-Atlantic trade, or when engaged in other trades if their route takes them more than 1,000 sea miles from the nearest coast. Ships connected with all kinds of fishing business including whaling, which are required to be fitted with a radiotelegraph installation, shall not be required to maintain a continuous watch. The continuous watch may be kept by one or more operators, holding certificates in accordance with Article X of the Regulations annexed to the International Radiotelegraph Convention, 1912, together, if necessary, with one or more certificated watchers. Nevertheless, if an efficient automatic calling apparatus is invented, the continuous watch may be maintained by this means by agreement between the Governments of the Contracting Parties. By "certificated watcher" is meant any person holding a certificate issued under the authority of the Administration concerned. To obtain this certificate, the applicant must prove that he is capable of receiving and understanding the radiotelegraph distress signal and the safety signal described in the Regulations. The Contracting Parties undertake to take steps to ensure that the certificated watchers observe the secrecy of correspondence.

Art. 35.—The radiotelegraph installations required by Art. 31 shall be capable of transmitting clearly perceptible signals from ship to ship over a range of at least 100 sea miles by day under normal conditions and circumstances. Every ship which is required to be fitted with a radiotelegraph installation shall, whatever be the class in which it is placed, be provided in accordance with Article XI of the Regulations annexed to the International Radiotelegraph Convention, 1912, with an emergency installation, every part of which is placed in a position of the greatest possible safety to be determined by the Government of the country to which the ship belongs. In all cases the emergency installation must be placed, in its entirety, in the upper part of the ship, as high as practically possible. The emergency installation includes an independent source of energy capable of being put into operation rapidly and of working for at least six hours with a minimum range of 80 sea miles for ships in the First Class and 50 sea miles for ships in the two other Classes. If the normal installation, which has a range of at least 100 sea miles, satisfies all the conditions prescribed, an emergency installation is not required. The licence provided for in Article IX of the Regulations annexed to the International Radiotelegraph Convention, 1912, may not be issued unless the installation complies with the provisions of both Conventions.

Art. 36.—The matters governed by the International Radiotelegraph Convention, 1912, and the Regulations annexed thereto, and in particular the radiotelegraph installations on ships, the transmission of messages, and the certificates of the operators, remain and will continue

subject to the provisions—(1) of that Convention and the Regulations, and (2) of this Convention, in regard to all the points in which it supplements the 1912 documents.

Art. 37.—Every master of a ship who receives a call for assistance from a vessel in distress is bound to proceed to the assistance of the persons in distress. Every master of a vessel in distress has the right to requisition from among the ships which answer his call for assistance the ship or ships which he considers best able to render him assistance, but he must exercise this right only after consultation, so far as may be possible, with the masters of those ships. Such ships are then bound to comply immediately with the requisition by proceeding with all speed to the assistance of the persons in distress. The masters of the ships required to render assistance are released from this obligation as soon as the master or masters requisitioned have made known that they will comply with the requisition, or as soon as the master of one of the ships which has reached the scene of the casualty has made known to them that their assistance is no longer necessary. If the master of a ship is unable, or considers it unreasonable or unnecessary, in the special circumstances of the case, to go to the assistance of the vessel in distress, he must immediately inform the master of the vessel in distress accordingly. He must enter in his log-book the reasons justifying his action. These provisions do not prejudice the International Convention for the unification of certain rules with respect to Assistance and Salvage at Sea, signed at Brussels, September 23, 1910, and, in particular, the obligation to render assistance laid down in Art. 11 of that Convention.

Art. 38.—The Contracting Parties undertake to take all steps necessary for giving effect to the provisions of this chapter with the least possible delay. Nevertheless, they may allow a delay not exceeding one year, from the date of the ratification of this Convention, for the provision and training of operators and for the installation of the apparatus on ships in the First and Second Classes; and a delay not exceeding two years, from the date of the ratification of this Convention, for the provision and training of operators and watchers on the ships in the Third Class, for the installation of the apparatus on ships in the Third Class, and for the establishment of a continuous watch on ships in the Second and Third Classes.

Life-saving Appliances and Fire Protection.

Art. 39.—For the application of the Articles contained in this chapter and of the corresponding part of the Regulations the ships defined in Art. 2 are divided into "new ships" and "existing ships." New ships are those of which the keel is laid after December 31, 1914. Other ships are "existing ships."

Art. 40.—At no moment of its voyage may a ship have on board a total number of persons greater than that for whom accommodation is provided in the lifeboats and the pontoon life-rafts on board. The number and arrangement of the boats, and (where they are allowed) of the pontoon rafts, on a ship depends upon the total number of persons which the ship is intended to carry; provided that there shall not be required on any voyage a total capacity in boats, and (where they are allowed) pontoon rafts, greater than that necessary to accommodate all the persons on board.

Art. 41.—All the life-boats allowed for a ship shall comply with the conditions fixed by this Convention and Articles XXVII to XXXII

of the Regulations annexed. The conditions required for the pontoon rafts are given in Article XXXIII of the Regulations. [See also the Merchant Shipping (Life-Saving Appliances) Rules, 1914].

Art. 42.—Each boat must be of sufficient strength to enable it to be safely lowered into the water when loaded with its full complement of persons and equipment.

Art. 43.—Any type of boat may be accepted as equivalent to a boat of one of the prescribed classes and any type of raft as equivalent to an approved pontoon raft, if the Administrations concerned are satisfied by trials that it is as effective as the standard types of the class in question, or as the approved type of pontoon raft, as the case may be. The Government of the Contracting Party which accepts a new type of boat or raft will communicate to the Governments of the other Contracting Parties particulars of the trials made. It will also inform them of the class in which a new type of boat has been placed.

Art. 44.—Suitable arrangements shall be made for embarking the passengers in the boats. In ships which carry rafts there shall be a number of rope ladders always available for use in embarking the persons on to the rafts.

Art. 45.—The number of persons that a boat of one of the standard types or an approved pontoon raft can accommodate is determined by the methods indicated in Articles XXXIV to XXXIX of the Regulations. [See Life-Saving Appliances Rules, 1914].

Art. 46.—Article XL of the Regulations prescribes the equipment for boats and pontoon rafts. All loose equipment must be securely attached to the boat or pontoon raft to which it belongs.

Art. 47.—The arrangements to be made for the stowage of the boats and the extent to which pontoon rafts may be accepted are specified in Articles XLI, XLII, and XLIII of the Regulations. The minimum number of sets of davits is fixed in relation to the length of the ship; provided that a number of sets of davits greater than the number of boats necessary for the accommodation of all the persons on board may not be required.

Art. 48.—All boats and rafts must be stowed in such a way that they can be launched in the shortest possible time, and that, even under unfavourable conditions of list and trim from the point of view of the handling of the boats and rafts, it may be possible to embark in them as large a number of persons as possible. The arrangements must be such that it may be possible to launch on either side of the ship as large a number of boats and rafts as possible. Supplementary instructions are given in Article XLIV of the Regulations.

Art. 49.—The davits shall be of such strength that the boats can be lowered with their full complement of persons and equipment, the ship being assumed to have a list of 15 degrees. The davits must be fitted with a gear of sufficient power to ensure that the boat can be turned out against the maximum list under which the lowering of the boats is possible on the vessel in question.

Art. 50.—Any appliance may be accepted in lieu of davits or sets of davits if the Administration concerned is satisfied, after proper trials, that the appliance in question is as effective as davits for placing the boats in the water. The Government of the Contracting Party which accepts a new type of appliance shall communicate to the other Contracting Parties particulars of the appliance with details of the trials made.

Art. 51.—(1) A life-jacket of an approved type, or other appliance

of equal buoyancy and capable of being fitted on the body, shall be carried for every person on board, and, in addition, a sufficient number of life-jackets, or other equivalent appliances, suitable for children. (2) Article XLV of the Regulations fixes in accordance with the length of the ship the number of lifebuoys of an approved type to be carried, and also the conditions with which life-jackets and life-buoys must comply, and in accordance with which they must be stowed.

Art. 52.—The Government of each of the Contracting Parties undertakes to apply to existing ships, as soon as possible, and not later than July 1, 1915, all the provisions of the preceding Art. 40 to 51 inclusive, requiring, in the first place, accommodation for all the persons on board in boats and rafts; provided that, in cases where the strict application of these principles would not be practicable or reasonable, the Government of each of the Contracting Parties has the right to allow the exemptions specified in Article XLVI of the Regulations.

Art. 53.—(1) Proper arrangements shall be made for ingress to and egress from the different compartments, decks, &c. (2) Provision shall be made for an electric or other system of lighting, sufficient for all requirements of safety, in the different parts of both new and existing ships, and particularly upon the decks on which the lifeboats are stowed. On new ships there must be a self-contained source capable of supplying, when necessary, this safety lighting system, and placed in the upper parts of the ship, as high as practically possible. (3) The exit from every compartment must always be lighted by an emergency lamp, which shall be kept locked, and which shall be independent of the ordinary lighting of the ship. These emergency lamps may be supplied from the independent installation referred to in the preceding paragraph, if an independent circuit is employed for this purpose, and if this installation works concurrently with the ordinary lighting of the ship.

Art. 54.—There must be, for each boat or raft required a minimum number of certificated lifeboatmen. The minimum total number of certificated lifeboatmen is determined by the provisions of Article XLVII of the Regulations. The allocation of the certificated lifeboatmen to each boat and raft remains within the discretion of the master, according to the circumstances. By "certificated lifeboatman" is meant any member of the crew who holds a certificate of efficiency issued under the authority of the Administration concerned, in accordance with conditions laid down in the afore-mentioned Article of the Regulations. Article XLVIII of the Regulations deals with the manning of the boats.

Art. 55.—(1) The carriage, either as cargo or ballast, of goods which by reason of their nature, quantity, or mode of stowage are, either singly or collectively, likely to endanger the lives of the passengers or the safety of the ship, is forbidden. This provision does not apply to the ship's distress signals, nor to the carriage of naval or military stores for the public service of the State under authorized conditions. (2) The Government of each Contracting Party shall, from time to time by official notice, determine what goods are to be considered dangerous goods, and shall indicate the precautions which must be taken in their packing and stowage. (3) Article XLIX of the Regulations indicates the arrangements to be made for the detection and extinction of fire.

Art. 56.—Special duties for the event of an emergency shall be allotted to each member of the crew. The muster list shall show all

these special duties, and shall indicate, in particular, the station to which each man must go, and the duties he has to perform. Before the vessel sails, the muster list shall be drawn up and exhibited, and the proper authority shall be satisfied that it has been prepared for the ship. It shall be posted in several parts of the ship, and in particular in the crew's quarters. Articles L and LI of the Regulations indicate the conditions under which musters of the crew and drills shall take place.

Safety Certificates.

Art. 57.—A certificate, called a " Safety Certificate," shall be issued, after inspection and survey, to every ship which complies in an efficient manner with the requirements of the Convention.

Art. 58.—The Safety Certificate shall be drawn up in the official language or languages of the State by which it is issued.

Art. 59.—The Safety Certificate shall not be issued for a period of more than twelve months. If the ship is not in a port of the State to which it belongs at the time when the period of the validity of the Safety Certificate expires a duly authorised officer of this State may extend this period; but such an extension shall be granted only for the purpose of allowing the ship to complete its return voyage to its own country, and then only in cases in which it appears proper and reasonable so to do. The extension cannot have effect for more than five months, and the ship shall not thereby be entitled to leave its own country again without having obtained a new certificate.

Art. 60.—The Safety Certificate issued under the authority of a Contracting State shall be accepted by the Governments of the other Contracting States for all purposes covered by this Convention.

Art. 61.—Every ship holding a Safety Certificate issued by the officers of the Contracting State to which it belongs, or by persons duly authorized by that State, is subject in the ports of the other Contracting States to control by officers duly authorized by their Governments in so far as this control is directed towards verifying that there is on board a valid Safety Certificate, and, if necessary, that the conditions of the vessel's seaworthiness correspond substantially with the particulars of that certificate.

Art. 62.—The privileges of the Convention may not be claimed in favour of any ship unless it holds a proper valid Safety Certificate.

Art. 63.—If, in the course of a particular voyage, the ship has on board a number of passengers less than the maximum number indicated in the Safety Certificate, and is, in consequence, in accordance with the provisions of this Convention free to carry a smaller number of lifeboats and other life-saving appliances than that stated in the Certificate, a memorandum may be issued by the officers or other authorized persons referred to in Articles 57 and 59. This memorandum shall state that in the circumstances there is no infringement of the provisions of the Convention. It shall be annexed to the Safety Certificate and shall be substituted for it in so far as life-saving appliances are concerned. It shall be valid only for the particular voyage in regard to which it is issued.

General.

Art. 64.—The Governments of the Contracting Parties undertake to communicate mutually, in addition to the documents which, in this Convention, are the subject of special provisions to that effect, all

information which they possess affecting safety of life on those of their ships subject to the rules of this Convention, provided always that such information is not of a confidential nature. The British Government is invited to serve as intermediary for collecting and distributing this information.

Art. 65.—The Contracting Parties undertake to take, or to propose to their respective legislatures, the measures necessary for the repression of infractions of the requirements imposed by this Convention.

Art. 66.—The Contracting Parties which intend the Convention to apply to the whole of their Colonies, Possessions and Protectorates, or to one or to some of these countries, shall declare this intention either at the time of signing these presents or subsequently. The Contracting Parties may also in the same way denounce this Con vention as regards their Colonies, Possessions, or Protectorates, or one or some of those countries.

Art. 67.—The States which are not Parties to this Convention shall be allowed to accede thereto at their request.

Art. 68.—The treaties, conventions and arrangements concluded prior to this Convention shall continue to have full and complete effect, as regards:—(1) Ships excepted from the Convention; (2) ships to which it applies, in respect of subjects for which the Convention has not expressly provided. It is understood that, the subject of this Convention being safety of life at sea, questions relating to the well-being and health of passengers, and in particular of emigrants, as well as other matters relative to their transport, continue subject to the legislation of the different States.

Art. 69.—This Convention shall come into force on July 1, 1915, and shall remain in force without any prescribed limit of time. Nevertheless, each Contracting Party may denounce the Convention at any time after an interval of five years from the date on which the Convention comes into force in that State. This denunciation shall be notified through the diplomatic channel to the Government of Great Britain and shall take effect twelve months after the day on which the notification is received. A denunciation only affects the State which makes it.

Art. 70.—This Convention with the Regulations drawn up in a single copy shall be deposited in the archives of the Government of Great Britain.

Art. 71.—This Convention shall be ratified and the instruments of ratification, accompanied by the schedules specified in Art. 3, shall be deposited at London not later than December 31, 1914. The British Government shall give notice of the ratifications and shall furnish a copy of each schedule to the Governments of the other Contracting Parties. Notwithstanding failure to ratify on the part of a Contracting Party, the Convention shall continue to have full and complete effect as regards the Contracting Parties which ratify it.

Art. 72.—To render ratification easier for a Contracting State which, prior to the date of signature of this Convention, has laid down requirements in regard to any matter within the scope of this Convention, it is agreed that no ship which has complied with those requirements before July 1, 1915, may avail itself of the periods of grace allowed by the Convention in order to cease to comply with those requirements.

Art. 73.—Where this Convention provides that a measure may be taken after agreement between all or some of the Contracting States, the Government of His Britannic Majesty is invited to approach the

said States with a view to ascertaining whether they accept the proposals made by one of these States for effecting such a measure.

Art. 74.—This Convention may be modified at subsequent Conferences, of which the first shall be held, if necessary, in 1920. The place and time of these Conferences shall be fixed by common consent by the Governments of the Contracting Parties. The Governments may, through the diplomatic channel, introduce into this Convention, by common consent and at any time, improvements judged useful or necessary.

Summary of the Principal Articles of the Regulations.

Floodable Length.

Art. VI.—The floodable length at any point of the length of a ship shall be determined, taking into consideration form, draught, and other limiting characteristics of the ship in question. This floodable length for a given point in a ship with a continuous bulkhead deck is the maximum percentage of the length of the ship (having its centre at the point in question) which can be flooded under the definite assumptions set forth in Art. VII without the ship being submerged beyond the margin line. In the case of ships not having a continuous bulkhead deck, the floodable length must be such as to secure to the ship, for each portion of its length, and for all conditions of trim after damage, a measure of safety at least equal in effectiveness to that laid down for the ship with continuous bulkhead deck.

Permeability.

Art. VII.—The definite assumptions referred to in Art. VI relate to the permeabilities of the spaces in question below the margin line. In determining the floodable length a uniform average permeability shall be used throughout the whole length of each of the three following portions of the ship:—(1) The machinery space; (2) the portion forward of the machinery space; and (3) the portion abaft the machinery space. For steam ships the permeability of the machinery space, including the double bottom in wake thereof, shall be taken as 80 per cent. For ships fitted with internal combustion engines the corresponding permeability shall be taken as 85 per cent., unless it is proved by actual calculation that a lower figure may be adopted, provided that in no case shall that figure be less than 80 per cent. The permeabilities for spaces forward and aft of the machinery space shall be as follows:—(*a*) Sixty per cent. in cargo spaces, bunkers (permanent or reserve), store-rooms, baggage and mail rooms, chain-lockers, watertight shaft or pipe tunnels, and fresh-water tanks above the double bottom. It must be proved that the spaces just enumerated are practicable for the purpose intended and are, in fact, to be so used. The same permeability shall not be assigned to any other space without the approval of the Administration. (*b*) Ninety-five per cent. in passenger and crew spaces, peaks, trimming-tanks exclusively so used, double bottoms, and all other spaces not specifically appropriated to one of the purposes indicated in Section (*a*). If in a 'tween deck space enclosed by complete transverse permanent steel bulkheads any portion thereof is appropriated to passengers, the whole of that space shall be regarded

as passenger space; and, similarly, 'tween deck spaces appropriated for the carriage of *either* passengers *or* cargo shall be regarded as passenger spaces. Where the spaces before or abaft the machinery space below the margin line consist partly of spaces mentioned in section (*a*) and partly of spaces mentioned in section (*b*), the average percentage of permeability shall be determined separately for each end by the formula $95-35\,r$, where r is the ratio between the volume of the spaces mentioned in section (*a*) and the total volume of the space in the portion of the ship under consideration.

Permissible Length of Compartments.

Art. VIII.—(1) The maximum permissible length of one compartment having its centre at any point in the ship's length is obtained from the floodable length (Art. VI) by multiplying that length by an appropriate factor, called the *factor of subdivision*. (2) This factor of subdivision depends on the length of the ship, and, for a given length, varies according to the nature of the service for which the ship is intended. This factor decreases in a regular and continuous manner. (*a*) As the length of ship increases; and (*b*) as, for a given length, the ship departs from the type of ship engaged in a mixed cargo and passenger service, and approaches to the type of ship primarily engaged in the carriage of passengers. (3) For each of the two types of ships referred to in the previous paragraph (2) (*b*) the variation of the factor of subdivision may be expressed by a curve, of which the co-ordinates represent the length of the ship and the value of the factor. The following table gives certain points on two curves, the higher of which corresponds to the minimum requirements for the "mixed" type, and the lower to the minimum requirements for the "passenger" type:

A.	B.		C.	
	Metres.	Feet.	Metres.	Feet.
1·00	90	295	79	259
0·90	114	374	87	285
0·84	123	404	93	305
0·65	149	489	116	380
0·50	174	571	149	489
0·39	213	699	209	685
0·34	274	899	274	899

Column A gives the maximum permissible values of the factor of subdivision for the length of ships given in Columns B and C. Column B is applicable to ships engaged in a mixed cargo and passenger service. Column C is applicable to ships primarily engaged in the carriage of passengers. (4) For a given length, the value of the factor of subdivision appropriate to a ship between the two extreme limits will be between the values of the factors determined by the two curves mentioned, and will be automatically fixed by a *criterion of service* which is to form the subject of further study.

Art. IX.—(1) When the factor of subdivision is equal to or less than ·5, it may be doubled in order to give at any point of the ship's length the total length of two adjacent compartments; but, in that case, the length of the shorter compartment of any pair shall not be less than one-quarter of the total length so obtained. If one of the two adjacent compartments is situated inside the machinery space and the second

outside the machinery space, and the average permeability of the portion of the ship in which the second is situated differs from 80 per cent., the length of the pair of compartments shall be adjusted to the proper value by applying a suitable correction. (2) In no case whatever shall the length of any watertight compartment exceed 28 metres (equivalent to 92 ft.). (3) When the factor of subdivision applicable to any ship is less than ·84, but more than ·5, the combined length of the two foremost compartments shall not exceed the floodable length at the extreme forward end, provided also that the length of the second compartment is not greater than that permissible by Art. VIII above and not less than 3 metres (equivalent to 10 ft.). (4) When the length of the ship is more than 213 metres (equivalent to 699 ft.), but less than 251 metres (equivalent to 823 ft.) the floodable length at the forward end of the ship shall be at least 20 per cent. of the ship's length; and the ship, forward of a bulkhead placed either at the distance of the actual floodable length abaft the stem or not nearer to the stem than 20 per cent. of the ship's length, shall be divided into at least three compartments. (5) When the length of the ship is equal to or greater than 251 metres (equivalent to 823 ft.) the same method shall be adopted, but the floodable length shall be at least 28 per cent. and the number of compartments at least four. (6) A bulkhead may be recessed transversely, provided the sides of the recess are at a sufficient distance from the sides of the ship. Vertical steps are inadmissible in the main transverse watertight bulkheads of ships to which the subdivision rules of Art. VIII apply where the factor of subdivision is greater than ·5, unless such arrangements are made by additional subdivision as shall maintain the same measure of safety as that secured by bulkheads without steps. The total length of the steps in any bulkhead shall not exceed 2 per cent. of the ship's length, plus 3 metres (equivalent to 10 ft.). (7) The existence of recesses or steps in a bulkhead shall in no case affect the permissible volumes of the compartments adjacent to such bulkhead, as determined by this and the preceding Article.

Art. X.—If the degree of safety of a ship is greater than that prescribed by Art. VIII and IX, and if the owner requests that this fact be recorded on the Safety Certificate, this request shall be accompanied with all the data necessary to justify the claim. In such case, the record shall state the fact that the subdivision is equal or superior to that provided for a ship of equal length in Column C of Table in Art. VIII, with an additional statement giving the length of the ship in Column C whose factor of subdivision according to the rules would be exactly equal to that employed in determining the subdivision of the ship in question. Values of length and factors for lengths not specifically stated in Columns C and A respectively of the Table in Art. VIII shall be obtained by interpolation.

Peak and Machinery Space Bulkheads.

Art. XI.—Ships shall be fitted with a forepeak bulkhead to extend to the bulkhead deck, and to the weather deck in ships having continuous super-structures. This bulkhead shall be placed at a distance of not less than 5 per cent. of the ship's length from the stem at the load water-line. An afterpeak bulkhead and bulkheads, dividing the machinery space from the cargo and the passenger spaces shall also be fitted and carried up to the bulkhead deck. The afterpeak bulkhead may, however, be stopped below the bulkhead deck, provided that it

shall at least be carried to the first deck above the load water-line, and that such deck forms a watertight flat from the afterpeak bulkhead to the stern, and also provided that the degree of safety of the ship as regards subdivision is not thereby dimished.

Fireproof Bulkheads.

Art. XII.—In parts of a ship above the margin line there shall be fitted fireproof bulkheads which will serve to retard the spread of fire. The mean distance between any two consecutive bulkheads of this description shall not be greater than 40 metres (equivalent to 131 ft.). Recesses in these bulkheads shall be fireproof, and the openings in these bulkheads shall be fitted with fireproof doors.

Double Bottoms.

Art. XXI.—(1) In ships 61 metres (equivalent to 200 ft.) and under 76 metres (equivalent to 249 ft.) in length, a double bottom shall be fitted at least from the machinery space to the forepeak bulkhead, or as near thereto as practicable. (2) In ships 76 metres (equivalent to 249 ft.) and under 91·5 metres (equivalent to 300 ft.) in length, a double bottom shall be fitted at least outside of the machinery space and shall extend to the fore and after peak bulkheads respectively, or as near thereto as practicable. (3) In ships 91·5 metres (equivalent to 300 ft.) and over in length, a double bottom shall be fitted amidships and shall extend to the fore and after peak bulkheads respectively, or as near thereto as practicable. (4) In ships over 91·5 metres (equivalent to 300 ft.) in length, the inner bottom shall be continued out to the ship's side in such manner as to protect the bilges. (5) In ships over 213 metres (equivalent to 699 ft.) in length, the double bottom, for at least half the ship's length amidships and forward to the forepeak bulkhead, shall extend up the ship's sides to a height above the top of the keel not less than 10 per cent. of the ship's moulded breadth. (6) Wells constructed in the double bottom in connection with the drainage arrangements shall not extend downwards from the inner bottom more than half the depth of the double bottom at that point. A well extending to the outer skin is, however, permitted at the after end of the shaft tunnels of screw ships.

Initial and Subsequent Surveys of Ships.

Art. XXIV.—Every ship defined in Art. 2 of the Convention shall be subjected at least to the following surveys:—(*a*) A survey before the ship is put in service; (*b*) periodical surveys, once each year; (*c*) additional surveys, as occasion arises.

Art. XXV.—(*a*) *The survey before the ship is put in service* shall include a complete inspection of the hull, machinery, and equipments, including the outside of the ship's bottom, and the inside and outside of the boilers. This survey shall be such as to ensure that the arrangements, material, and scantlings of the hull, boilers, and their appurtenances, main and auxiliary machinery, life-saving appliances and other equipments, fully comply with the requirements of this Convention and of the detailed regulations promulgated by the Government of the Contracting State to which the ship belongs for ships of the service for which it is intended. The survey shall also be such as to ensure that the workmanship of all parts of the ship and its equipments

is in all respects satisfactory. (*b*) *The periodical survey* shall include an inspection of the whole of the hull, boilers, machinery, and equipments, including the outside of the ship's bottom. The survey shall be such as to ensure that the ship, as regards the hull, boilers, and their appurtenances, main and auxiliary machinery, life-saving appliances, and other equipments, is in satisfactory condition and fit for the service for which it is intended, and that it complies with the requirements of this Convention, and of the detailed regulations promulgated as a result thereof by the Government of the State to which the ship belongs. (*c*) *A survey, either general or partial,* according to the circumstances, shall be made every time an accident occurs or a defect is discovered which affects the safety of the ship or the efficiency or completeness of its life-saving appliances or other equipment, or any important repairs or renewals are made. The survey shall be such as to ensure that the necessary repairs or renewals have been effectively made, that the material and workmanship of such repairs or renewals are in all respects satisfactory, and that the ship complies in all respects with the provisions of this Convention and of the detailed regulations promulgated as a result thereof by the Government of the State to which the ship belongs.

Certified Lifeboatmen.

Art. XLVII.—In order to obtain the special lifeboatman's certificate provided for in Art. 54 of the Convention, the applicant must prove that he has been trained in all the operations connected with launching lifeboats and the use of oars; that he is acquainted with the practical handling of the boats themselves; and, further, that he is capable of understanding and answering the orders relative to lifeboat service. There shall be for each boat or raft a number of lifeboatmen at least equal to that specified in the following table:

If the boat or raft carries—	The minimum number of certificated lifeboatmen shall be—
Less than 61 persons	3
From 61 to 85 persons	4
,, 86 to 110 ,, ...	5
,, 111 to 160 ,, ...	6
,, 161 to 210 ,, ...	7

and, thereafter, one additional certificated lifeboatman for each additional 50 persons.

Manning of Boats.

Art. XLVIII.—An officer, petty officer, or seaman shall be placed in charge of each boat or pontoon raft; he shall have a list of its crew, and shall see that the men placed under his orders are acquainted with their several duties and stations. A man capable of working the motor shall be assigned to each motor boat. The duty of seeing that the boats, pontoon rafts, and other life-saving appliances are at all times ready for use shall be assigned to one or more officers.

Fire Detection and Extinction.

Art. XLIX.—(1) A continuous patrol system shall be organized so that any outbreak of fire may be promptly detected. (2) Every

ship shall be provided with powerful pumps operated by steam or other means. On ships of less than 4,000 tons there shall be two, and on larger ships three of these pumps. The pumps shall be capable of delivering a sufficient quantity of water in two powerful jets simultaneously in any given part of the vessel, and shall be available for immediate use before the vessel leaves port. (3) The service pipes shall permit of two powerful jets of water being simultaneously directed on any given part of a deck occupied by passengers and crew, when the water-tight and fireproof doors are closed. The service pipes and hoses shall be of ample size and made of suitable material. The branches of the pipes shall be so placed on each deck that the fire hose can be easily coupled to them. (4) Provision shall be made whereby both two powerful jets of water and a sufficient supply of steam may be conveyed to every space filled with cargo. Provision for the supply of steam need not be required in ships of less than 1,000 tons. (5) A sufficient number of portable fluid fire extinguishers shall be provided, at least two being carried in each machinery space. The Governments of the Contracting Parties may accept other types of extinguishers provided it is evident after trial that such extinguishers are as effective as the type referred to above. A Government which accepts a new type of extinguisher shall send a description of the apparatus and particulars of the trial to the Governments of the other Contracting Parties. (6) Two equipments, consisting of a smoke helmet and a safety lamp, shall be carried on board and kept in two different places. (7) All the fire-extinguishing appliances shall be thoroughly examined at least once each year by a surveyor appointed by the Government.

Muster List.

Art. L.—The muster list shall assign duties to the different members of the crew in connection with:—(*a*) The closing of the watertight doors, valves, &c.; (*b*) the equipment of the boats and rafts generally; (*c*) the launching of the boats attached to davits; (*d*) the general preparation of the other boats and the pontoon rafts; (*e*) the muster of the passengers; (*f*) the extinction of fire. The muster list shall assign to the members of the stewards' department their several duties in relation to the passengers at a time of emergency. These duties shall include:—(*a*) Warning the passengers; (*b*) seeing that they are dressed and have put on their life-jackets in a proper manner; (*c*) assembling the passengers; (*d*) keeping order in the passages and on the stair ways, and, generally, controlling the movements of the passengers. The muster list shall specify definite alarm signals for calling all the crew to their boat and fire stations, and shall give full particulars of these signals.

Musters and Drills.

Art. LI.—Musters of the crew at their boat and fire stations, followed by boat and fire drills respectively, shall be held at least once a fortnight, either in port or at sea. An entry shall be made in the official log book of these drills, or of the reasons why they could not be held. Different groups of boats shall be used in turn at successive boat drills. The drills and inspections shall be so arranged that the crew thoroughly understand and are practised in the duties they have to perform, and that all the boats and pontoon-rafts on the ship with the gear appertaining to them are always ready for immediate use.

THE ALIENS ACT, 1905.

[*Came into operation, January 1, 1906.*]

Power to prevent the Landing of Undesirable Immigrants.

I.—(1) An immigrant shall not be landed in the United Kingdom from an immigrant ship except at a port at which there is an immigration officer appointed under this Act, and shall not be landed at any such port without the leave of that officer given after an inspection of the immigrants made by him on the ship, or elsewhere if the immigrants are conditionally disembarked for the purpose, in company with a medical inspector, such inspection to be made as soon as practicable, and the immigration officer shall withhold leave in the case of any immigrant who appears to him to be an undesirable immigrant within the meaning of this section.

(2) Where leave to land is so withheld in the case of any immigrant, the master, owner, or agent of the ship, or the immigrant, may appeal to the immigration board of the port, and that board shall, if they are satisfied that leave to land should not be withheld under this Act, give leave to land, and leave so given shall operate as the leave of the immigration officer.

(3) For the purposes of this section an immigrant shall be considered an undesirable immigrant—

(*a*) if he cannot show that he has in his possession or is in a position to obtain the means of decently supporting himself and his dependents (if any); or

(*b*) if he is a lunatic or an idiot, or owing to any disease or infirmity appears likely to become a charge upon the rates or otherwise a detriment to the public; or

(*c*) if he has been sentenced in a foreign country with which there is an extradition treaty for a crime, not being an offence of a political character, which is, as respects that country, an extradition crime within the meaning of the Extradition Act, 1870; or

(*d*) if an expulsion order under this Act has been made in his case; but, in the case of an immigrant who proves that he is seeking admission to this country solely to avoid prosecution or punishment on religious or political grounds or for an offence of a political character, or persecution, involving danger of imprisonment or danger to life or limb, on account of religious belief, leave to land shall not be refused on the ground merely of want of means, or the probability of his becoming a charge on the rates, nor shall leave to land be withheld in the case of an immigrant who shows to the satisfaction of the immigration officer or board concerned with the case that, having taken his ticket in the United Kingdom and embarked direct therefrom for some other country immediately after a period of residence in the United Kingdom of not less than six months, he has been refused admission in that country and returned direct therefrom to a port in the United Kingdom, and leave to land shall not be refused merely on the ground of want of means to any immigrant who satisfies the immigration officer or board concerned with the case that he was born in the United Kingdom, his father being a British subject.

(4) The Secretary of State may, subject to such conditions as he thinks fit to impose, by order exempt any immigrant ships from the provisions of this section if he is satisfied that a proper system is being maintained for preventing the embarkation of undesirable immigrants on those ships, or if security is given to his satisfaction that undesirable immigrants will not be landed in the United Kingdom from those ships except for the purpose of transit. Any such order of exemption may be withdrawn at any time at the discretion of the Secretary of State.

(5) Any immigrant who lands, and any master of a ship who allows an immigrant to be landed in contravention of this section shall be guilty of an offence under this Act, but an immigrant conditionally disembarked shall not be deemed to have landed so long as the conditions are complied with.

Immigration Board and Rules.

II.—(1) The immigration board for a port shall consist of three persons summoned in accordance with rules made by the Secretary of State under this Act out of a list approved by him for the port comprising fit persons having magisterial, business, or administrative experience.

(2) A Secretary of State may make rules generally with respect to immigration boards and their officers, and with respect to appeals to those boards, and with respect to the conditional disembarkation of immigrants for the purpose of inspection, appeals, or otherwise, and may by those rules amongst other things provide for the summoning and procedure of the board, and for the place of meeting of the board, and for the security to be given by the master of the ship in the case of immigrants conditionally disembarked. Rules made under this section shall provide for notice being given to masters of immigrant ships and immigrants informing them of their right of appeal, and also, where leave to land is withheld in the case of any immigrant by the immigration officer, for notice being given to the immigrant and the master of the immigrant ship of the grounds on which leave has been withheld.

Power of Secretary of State to make an Expulsion Order.

III.—(1) The Secretary of State may, if he thinks fit, make an order (in this Act referred to as an expulsion order) requiring an alien to leave the United Kingdom within a time fixed by the order, and thereafter to remain out of the United Kingdom—

(*a*) if it is certified to him by any court (including a Court of summary Jurisdiction) that the alien has been convicted by that court of any felony, or misdemeanour, or other offence for which the court has power to impose imprisonment without the option of a fine, or of an offence under par. 22 or 23, Section 381, Burgh Police (Scotland) Act, 1892, or of an offence as a prostitute under Section 72, Towns Improvement (Ireland) Act, 1854, or par. 11 of Section 54, Metropolitan Police Act, 1839, and that the court recommend that an expulsion order be made in his case, either in addition to or in lieu of his sentence; and

(*b*) if it is certified to him by a Court of Summary Jurisdiction after proceedings taken for the purpose within twelve months after

the alien has last entered the United Kingdom, in accordance with rules of court made under Section 29, Summary Jurisdiction Act, 1879, that the alien—

(i) has within three months from the time at which proceedings for the certificate are commenced been in receipt of any such parochial relief as disqualifies a person for the parliamentary franchise, or been found wandering without ostensible means of subsistence, or been living under insanitary conditions due to overcrowding; or (ii) has entered the United Kingdom after the passing of this Act, and has been sentenced in a foreign country with which there is an extradition treaty for a crime not being an offence of a political character which is as respects that country an extradition crime within the meaning of the Extradition Act, 1870.

(2) If any alien in whose case an expulsion order has been made is at any time found within the United Kingdom in contravention of the order, he shall be guilty of an offence under this Act.

Expenses of Return of Alien, etc.

IV.—(1) Where an expulsion order is made in the case of any alien, the Secretary of State may, if he thinks fit, pay the whole or any part of the expenses of or incidental to the departure from the United Kingdom and maintenance until departure of the alien and his dependents (if any).

(2) If an expulsion order is made in the case of any alien (not being an alien who last entered the United Kingdom before the commencement of this Act, or an immigrant in whose case leave to land has been given under this Act) on a certificate given within six months after he has last entered the United Kingdom, the master of the ship in which he has been brought to the United Kingdom and also the master of any ship belonging to the same owner shall be liable to pay to the Secretary of State as a debt due to the Crown any sums paid by the Secretary of State under this section in connection with the alien, and shall, if required by the Secretary of State, receive the alien and his dependents (if any) on board his ship, and afford them free of charge a passage to the port of embarkation and proper accommodation and maintenance during the passage.

(3) If the master of a ship fails to comply with the provisions of this section as to giving a passage to an alien or his dependents, he shall be guilty of an offence under this Act.

Returns as to Aliens.

V.—(1) The master of any ship landing or embarking passengers at any port in the United Kingdom shall furnish to such person and in such manner as the Secretary of State directs a return giving such particulars with respect to any such passengers who are aliens who may be required for the time being by order of the Secretary of State, and any such passenger shall furnish the master of the ship with any information required by him for the purpose of the return.

(2) If the master of the ship fails to make the return required by this section, or makes a false return, he shall be guilty of an offence under

this Act, and if any alien refuses to give information required by the master of the ship for the purpose of the return under this section or gives any false information for the purpose, he shall be liable on summary conviction to imprisonment for a term not exceeding three months with hard labour.

(3) The Secretary of State may by order exempt from the provisions of this section any special class of passengers or voyages, or any special ships or ports, but any such order may be withdrawn at any time at his discretion.

Appointment of Officers, and Expenses.

VI.—(1) The Secretary of State shall appoint, at such ports in the United Kingdom as he thinks necessary for the time being, immigration officers and medical inspectors, and may appoint or employ such other officers or persons as may be required for the purposes of immigration boards, or for the purpose of the returns to be given under this Act, or otherwise for carrying this Act into effect, and the salary and remuneration of any officers, inspectors, or persons so appointed or employed, and any expenses otherwise incurred in carrying this Act into effect (including such payment as may be sanctioned by the Treasury for the attendance of any person as a member of an immigration board to hear appeals), shall, up to an amount approved by the Treasury, be paid out of moneys provided by Parliament.

(2) The Secretary of State may arrange with the Commissioners of Customs or any other Government department or any port sanitary authority for the appointment or employment of officers of Customs or officers of that department or authority as officers under this Act.

(3) The Secretary of State shall make known, in such manner as he thinks best suited for the purpose, the ports at which immigration officers are for the time being appointed under this Act.

Supplemental Provisions.

VII.—(1) Any person guilty of an offence under this Act shall, if the offence is committed by him as the master of a ship, be liable, on summary conviction, to a fine not exceeding £100, and, if the offence is committed by him as an immigrant or alien, be deemed a rogue and vagabond within the meaning of the Vagrancy Act, 1824, and be liable to be dealt with accordingly as if the offence were an offence under Section 4 of that Act.

(2) Sections 684, 685, 686, Merchant Shipping Act, 1894 (which relate to the jurisdiction of courts and justices), shall apply with respect to jurisdiction under this Act as they apply with respect to jurisdiction under that Act, and Section 693, Merchant Shipping Act, 1894 (which relates to the levying of sums ordered to be paid by distress on a ship), shall apply with respect to any fines or other sums of money to be paid under this Act by the master of a ship as it applies with respect to fines and other sums of money to be paid under that Act.

(3) Any immigrant who is conditionally disembarked, and any alien in whose case an expulsion order is made, while awaiting the departure of his ship, and whilst on board the ship until the ship finally leaves the United Kingdom, and any alien in whose case a certificate has been given by a court, with the view to the making of an expulsion

order under this Act, until the Secretary of State has decided upon his case, shall be liable to be kept in custody in such manner as the Secretary of State directs, and whilst in that custody shall be deemed to be in legal custody.

(4) If any immigrant, master of a ship, or other person, for the purposes of this Act, makes any false statement or false representation to an immigration officer, medical inspector, immigration board, or to the Secretary of State, he shall be liable on summary conviction to imprisonment for a term not exceeding three months with hard labour.

(5) If any question arises on any proceedings under this Act, or with reference to anything done or proposed to be done under this Act, whether any person is an alien or not, the onus of proving that that person is not an alien shall lie on that person.

(6) In carrying out the provisions of this Act, due regard shall be had to any treaty, convention, arrangement, or engagement with any foreign country.

Definitions.

VIII.—(1) The expression " immigrant " in this Act means an alien steerage passenger who is to be landed in the United Kingdom, but does not include—

(*a*) Any passenger who shows to the satisfaction of the immigration officer or board concerned with the case that he desires to land in the United Kingdom only for the purpose of proceeding within a reasonable time to some destination out of the United Kingdom; or

(*b*) Any passengers holding prepaid through tickets to some such destination, if the master or owner of the ship by which they are brought to the United Kingdom, or by which they are to be taken away from the United Kingdom, gives security to the satisfaction of the Secretary of State that, except for the purposes of transit or under other circumstances approved by the Secretary of State, they will not remain in the United Kingdom, or, having been rejected in another country re-enter the United Kingdom, and that they will be properly maintained and controlled during their transit.

(2) The expression " immigrant ship " in this Act means a ship which brings to the United Kingdom more than twenty alien steerage passengers, who are to be landed in the United Kingdom, whether at the same or different ports, or such number of those passengers as may be for the time being fixed by order of the Secretary of State, either generally or as regards any special ships or ports.

(3) The expression " passenger " in this Act includes any person carried on the ship other than the master and persons employed in the working, or service, of the ship, and the expression " steerage passenger " in this Act includes all passengers except such persons as may be declared by the Secretary of State to be cabin passengers by order made either generally or as regards any special ships or ports.

(4) If any question arises under this Act on an appeal to an immigration board whether any ship is an immigrant ship within the meaning of this Act, or whether any person is an immigrant, a passenger, or a steerage passenger, within the meaning of this Act, or whether

any offence is an offence of a political character, or whether a crime is an extradition crime, that question shall be referred to the Secretary of state in accordance with rules made under this Act, and the Board Shall act in accordance with his decision.

(5) The Secretary of State may withdraw or vary any order made by him under this section.

Application of Act to Scotland and Ireland.

IX.—(1) In the application of this Act to Scotland and Ireland the words "be liable on summary conviction to imprisonment for a term not exceeding three months with hard labour" shall be substituted for the words "be deemed a rogue and vagabond within the meaning of the Vagrancy Act, 1824, and be liable to be dealt with accordingly as if the offence were an offence under Section 4 of that Act."

(2) Section 33, Summary Procedure (Scotland) Act, 1864, shall be substituted as respects Scotland for Section 29, Summary Jurisdiction Act, 1879; and the Lord Chancellor of Ireland may, as respects Ireland, make rules for the purposes of this Act for which rules may be made under Section 29, Summary Jurisdiction Act, 1879; and all rules so made shall be laid, as soon as may be, before both Houses of Parliament.

The Registration of Aliens Act, 1836, is hereby repealed.

FACTORY AND WORKSHOP ACT, 1901.

REGULATIONS, DATED OCTOBER 24, 1904, MADE BY THE SECRETARY OF STATE, IN RESPECT OF THE PROCESSES OF LOADING, UNLOADING, MOVING AND HANDLING GOODS IN, ON, OR AT ANY DOCK, WHARF, OR QUAY, AND THE PROCESSES OF LOADING, UNLOADING OR COALING ANY SHIP IN ANY DOCK, HARBOUR OR CANAL.

[*Came into force, January* 1, 1905, *and* 1908.]

Nothing in Parts II. to VI. inclusive of these Regulations shall apply to the unloading of fish from a vessel employed in the catching of fish.

The Secretary of State may by order in writing exempt from all or any of the Regulations and for such time and subject to such conditions as he may prescribe any docks, wharves, or quays in respect of which application for such exemption shall have been made to him by the Department of Agriculture and Technical Instruction for Ireland or by the Congested Districts Board for Ireland.

Definitions.

"Processes" means the processes above-mentioned; or any of them.

"Person employed" means a person employed in the above processes or any of them.

"Shallow canal" includes any of the following parts of a canal, canalised river, non-tidal river, or inland navigation:—(*a*) Any part having no means of excess to tidal waters except through a lock not exceeding 90 ft. in length; (*b*) Any part not in frequent use for the processes; and (*c*) Any part at which the depth of water within 15 ft. of the edge does not ordinarily exceed 5 ft.

Duties.

It shall be the duty of the person having the general management and control of a dock, wharf or quay, to comply with Part I. of these Regulations; provided that if any other person has the exclusive right to occupation of any part of the dock, wharf, or quay, and has the general management and control of such part the duty in respect of that part shall devolve upon that other person; and further provided that this part of these Regulations shall not apply to any shallow canal.

It shall be the duty of the owner, master, or officer in charge of a ship to comply with Part II. of these Regulations.

It shall be the duty of the owner of machinery or plant used in the processes, and in the case of machinery or plant carried on board a ship not being a ship registered in the United Kingdom, it shall also be the duty of the master of such ship, to comply with Part III. of these Regulations.

It shall be the duty of every person who by himself, his agents, or workmen carries on the processes, and of all agents, workmen, and persons employed by him in the processes, to comply with Part IV. of these Regulations.

It shall be the duty of all persons, whether owners, occupiers, or persons employed, to comply with Part V. of these Regulations.

Part VI. of these Regulations shall be complied with by the persons on whom the duty is placed in that Part.

PART I.

1. The following parts of every dock, wharf, or quay shall, as far as is practicable, having regard to the traffic and working, be securely fenced so that the height of the fence shall be in no place less than 2 ft. 6 in., and the fencing shall be maintained in good condition ready for use.

(*a*) All breaks, dangerous corners, and other dangerous parts of edges of a dock, wharf, or quay.

(*b*) Both sides of such footways over bridges, caissons, and dock gates as are in general use by persons employed, and each side of the entrance at each end of such footway for a sufficient distance not exceeding 5 yards.

2. Provision for the rescue from drowning of persons employed shall be made and maintained, and shall include:—

(*a*) A supply of life-saving appliances, kept in readiness on the wharf or quay, which shall be reasonably adequate having regard to all the circumstances.

(*b*) Means at or near the surface of the water at reasonable intervals, for enabling a person immersed to support himself or escape from the water, which shall be reasonably adequate having regard to all the circumstances.

3. All places in which persons employed are employed at night, and any dangerous parts of the regular road or way over a dock, wharf, or quay, forming the approach to any such place from the nearest highway, shall be efficiently lighted. Provided that the towing path of a canal or canalised river shall not be deemed to be "an approach," for the purpose of this Regulation.

PART II.

4. If a ship is lying at a wharf or quay for the purpose of loading or unloading or coaling there shall be means of access for the use of persons employed at such times as they have to pass from the ship to the shore or from the shore to the ship as follows:—

(*a*) Where a gangway is reasonably practicable a gangway not less than 22 in. wide, properly secured, and fenced throughout on each side to a clear height of 2 ft. 9 in. by means of upper and lower rails, taut ropes or chains, or by other equally safe means.

(*b*) In other cases a secure ladder of adequate length.

Provided that nothing in this Regulation shall be held to apply tc cargo stages or cargo gangways, if other proper means of access is provided in conformity with these Regulations. Provided that as regards any sailing vessel not exceeding 250 tons net registered tonnage and any steam vessel not exceeding 150 tons gross registered tonnage this regulation shall not apply if and while the conditions are such that it is possible without undue risk to pass to and from the ship without the aid of any special appliances.

5. If a ship is alongside any other ship, vessel, or boat, and persons employed have to pass from one to the other, safe means of access shall be provided for their use, unless the conditions are such that it is possible to pass from one to the other without undue risk without the aid of any special appliance. If one of such ships, vessels, or boats is a sailing barge, flat keel, lighter, or other similar vessel of relatively low freeboard, the means of access shall be provided by the ship which has the higher freeboard.

6. If the depth from the top of the coamings to the bottom of the hold exceeds 6 ft. there shall be maintained safe means of access by ladder or steps from the deck to the hold in which work is being carried on, with secure hand-hold and foot-hold continued to the top of the coamings. In particular such access shall not be deemed to be safe:

(*a*) Unless the ladders between the lower decks are in the same line as the ladder from the main deck, if the same is practicable having regard to the position of the lower hatchway or hatchways.

(*b*) Unless the cargo is stowed sufficiently far from the ladder to leave at each rung of the ladder sufficient room for a man's feet.

(*c*) If there is not room to pass between a winch and the coamings at the place where the ladder leaves the deck.

(*d*) If the ladder is recessed under the deck more than is reasonably necessary to keep the ladder clear of the hatchway.

7. When the processes are being carried on between one hour after sunset and one hour before sunrise (*a*) the places in the hold and on the decks where work is being carried on, and (*b*) the means of access provided in pursuance of Regulations 4 and 5 shall be efficiently lighted, due regard being had to the safety of the ship and cargo, of all persons employed and of the navigation of other vessels and to the duly approved by-laws or regulations of any authority having power by statute to make by-laws or regulations subject to approval by some other authority.

8. All iron fore and aft beams and thwart ship beams used for hatchway covering shall have suitable gear for lifting them on and off without it being necessary for any person to go upon them to adjust such gear.

PART III.

9. All machinery and chains and other gear used in hoisting or lowering in connection with the processes shall have been tested, and shall be periodically examined. All such chains shall be effectually softened by annealing or firing when necessary, and all half-inch or smaller chains in general use shall be so annealed or fired once in every six months. If the chains are part of the outfit carried by a seagoing ship it shall be a sufficient compliance with this Regulation as regards softening by annealing or firing of half-inch or smaller chains, that no such chains shall be used unless they have been so annealed or fired within six months preceding. As regards chains, the safe loads indicated by the test, the date of last annealing and any other particulars prescribed by the Secretary of State, shall be entered in a register which shall be kept on the premises, unless some other place has been approved in writing by the Chief Inspector.

10. All motors, cog-wheels, chain and friction-gearing, shafting and live electric conductors used in the processes shall (unless it can be shown that by their position and construction they are equally safe to every person employed as they would be if securely fenced) be securely fenced so far as is practicable without impeding the safe working of the ship and without infringing any requirement of the Board of Trade.

11. The lever controlling the link motion reversing gear of a crane or winch used in the processes shall be provided with a suitable spring or other locking arrangement.

12. Every shore crane used in the processes shall have the safe-load plainly marked upon it, and if so constructed that the jib may be raised or lowered, either shall have attached to it an automatic indicator of safe-loads or shall have marked upon it a table showing the safe-loads at the corresponding inclinations of the jib.

13. The driver's platform on every crane or tip driven by mechanical power and used in the processes shall be securely fenced, and shall be provided with safe means of access.

14. Adequate measures shall be taken to prevent exhaust steam from any crane or winch obscuring any part of the decks, gangways, stages, wharf, or quay, where any person is employed.

PART IV.

15. No machinery or gear used in the processes, other than a crane, shall be loaded beyond the safe-load; nor a crane, unless secured with the written permission of the owner by plates or chains or otherwise. No load shall be left suspended from a crane, winch, or other machine unless there is a competent person actually in charge of the machine while the load is so left.

16. A boy under 16 shall not be employed as driver of a crane or winch, or to give signals to a driver, or to attend to cargo falls on winch-ends or winch-bodies.

17. Where in connection with the processes goods are placed on a wharf or quay other than a wharf or quay on a shallow canal:—

(*a*) A clear passage leading to the means of access to the ship required by Regulation 4 shall be maintained on the wharf or quay; and

(*b*) If any space is left along the edge of the wharf or quay it shall be at least three ft. wide, and clear of all obstructions other than fixed structures, plant and appliances in use.

18. No deck-stage or cargo-stage shall be used in the processes unless it is substantially and firmly constructed, and adequately supported, and, where necessary, securely fastened. No truck shall be used for carrying cargo between ship and shore on a stage so steep as to be unsafe. Any stage which is slippery shall be made safe by the use of sand or otherwise.

19. Where there is more than one hatchway, if the hatchway of a hold exceeding 7 ft. 6 in. in depth measured from the top of the coamings to the bottom of the hold is not in use and the coamings are less than 2 ft. 6 in. in height, it shall either be fenced to a height of 3 ft., or be securely covered. Provided that this Regulation shall not apply during meal times or other temporary interruptions of work during the period of employment. And provided that until the 1st January, 1908, the fencing may be the best the circumstances will allow without making structural alteration. Hatch coverings shall not be used in connection with the processes in the construction of deck or cargo stages, or for any other purpose which may expose them to damage.

20. No cargo shall be loaded by a fall or sling at any intermediate deck unless a secure landing platform has been placed across the hatchway at that deck.

Part V.

21. No person shall, unless duly authorised, or in case of necessity, remove or interfere with any fencing, gangway, gear, ladder, life-saving means or appliances, lights, marks, stages, or other things whatsoever, required by these Regulations to be provided.

22. The fencing required by Regulation 1 shall not be removed except to the extent and for the period reasonably necessary for carrying on the work of the dock or ship or for repairing any fencing. If removed it shall be restored forthwith at the end of that period by the persons engaged in the work that necessitated its removal.

Part VI.

23. No employer of persons in the processes shall allow machinery or gear to be used by such persons in the processes that does not comply with Part III. of these Regulations.

24. If the persons whose duty it is to comply with Regulations 4, 5, and 7, fail so to do, then it shall also be the duty of the employers of the persons employed for whose use the means of access and the lights are required to comply with the said regulation within the shortest time reasonably practicable after such failure.

25. The certificate of the ship's register and any other certificate or register referred to in these Regulations shall be produced by the person in charge thereof on the application of any of H.M. Inspectors of Factories.

REGULATIONS DATED APRIL 4, 1914, MADE BY THE SECRETARY OF STATE FOR THE HOME DEPARTMENT UNDER SECTION 79 OF THE FACTORY AND WORKSHOP ACT, 1901, TO APPLY TO THE CONSTRUCTION AND REPAIR OF SHIPS IN SHIPBUILDING YARDS.

[*Came into force, May* 1, 1914.]

These Regulations shall not apply to the construction or repair of a ship not exceeding 150 ft. in length measured from the fore part of the stem to the after part of the stern-post on the range of the upper deck beams, except in awning or shelter deck vessels, in which cases the length is to be measured on the range of the deck beams next below the awning or shelter deck.

It shall be the duty of the occupier to comply with Part I of these Regulations. It shall be the duty of all persons employed to comply with Part II of these Regulations.

PART I.—*Duties of Occupiers.*

1. A sufficient supply of sound and substantial material shall be available in a convenient place or places for the construction of all stages.

2. All uprights, thwarts and other supports used for the erection of stages, and as far as reasonably practicable the stages themselves, shall be erected by competent persons specially but not necessarily exclusively employed for that purpose by the occupier: Provided that this part of the Regulation shall not apply to such adjustment or shifting of the staging from time to time by any workman as may be necessary to meet the varying requirements of his work. All stages shall be securely constructed of sound and substantial material, and shall be of sufficient width, as is reasonable in all the circumstances of the case, to secure the safety of the persons working thereon.

3. When any plank or planks forming a stage extend less than 1 foot beyond the inside edge of the support upon which they rest they shall be securely fastened to prevent slipping.

4. The main gangway giving access to the upper parts of the ship shall be securely protected by upper and lower hand-rails on each side; and there shall be safe means of access to all places in which any person is required to be employed.

5. All ladders used shall be of sound material and of sufficient length to give safe access to the part they are intended to reach. They shall be maintained in good condition and be adequately secured to prevent slipping.

6. All ventilator holes, manholes and dangerous parts of other openings in decks shall be provided with temporary covers in good repair, or other sufficient protection, which shall be maintained in position except when necessarily removed in the course of work.

7. All parts of a ship on which work is being carried on, and the approaches to such parts, shall be efficiently lighted in such manner as is reasonable in all the circumstances of the case to secure the safety of the persons employed. If portable lamps, including hand lamps carried by the workmen, are used for any part of such lighting they shall be maintained in good condition. Oil lamps shall be provided with properly fitting screw lids or stoppers.

8. When a stage has to be dismantled and in all cases where materials or articles have to be lowered from a height, adequate precautions

shall be taken to secure the safety of persons employed or passing below.

9. Suitable means of removing injured persons from the place of accident shall be provided, and suitable arrangements shall be made for first aid treatment.

10. A competent person or persons shall be appointed to exercise supervision with regard to the requirements of these Regulations, and to enforce the observance of them.

PART II.—*Duties of Persons Employed.*

11. Every person employed who becomes aware of any defect in the plant or gear which he is using or may be required to use shall forthwith report the same to the occupier or his manager or foreman or any person appointed in pursuance of Regulation 10.

12. No person employed shall leave any loose articles or materials lying about in any place from which they may fall on persons working or passing.

13. No person employed shall throw down tools, planks, or loose material from the stages, decks or other parts of the vessel, without observing the precautions required in pursuance of Regulation 8.

ORDER OF THE SECRETARY OF STATE, DATED AUGUST 23, 1912, APPLYING THE PROVISIONS OF SECTION 116 OF THE FACTORY AND WORKSHOP ACT, 1901, WITH MODIFICATIONS, TO SHIPBUILDING YARDS.

[*Came into force, October* 1, 1912.]

The provisions of the section shall apply, subject to modifications hereinafter contained, to non-textile factories and workshops which are shipbuilding yards so far as concerns the work of persons employed in the building or repairing of a ship.

The section shall be modified to read as follows:—

1. The occupier or contractor shall, for the purpose of enabling each worker who is paid by the piece to compute the total amount of wages payable to him in respect of his work, cause to be published particulars of the work and rate of wages applicable as follows:—(*a*) He shall furnish every worker with written particulars of the rate of wages applicable to the work done by him at or before the time of his first employment on the work and on every subsequent occasion when the rates are fixed or altered; or he shall exhibit such particulars on a placard in the factory or workshop. Provided that if the rates are not ascertainable before the work is given out, the particulars shall be furnished to the worker in writing when the work is completed. (*b*) Such particulars of the work done as affect the amount of wages payable to each worker shall be furnished to him in writing when the work is completed.

2. Where the work is done in common by a gang of workers it shall be sufficient if the particulars of the work done by the gang and of the rate of wages applicable thereto are furnished to the member of the gang to whom the wages of the gang are paid by the employer.

3. The particulars, either as to rate of wages or as to work, shall not be expressed by means of symbols.

4. Any placard exhibited in pursuance of the foregoing provisions shall contain no other matter than particulars of rates of wages and shall be affixed in such a position as to be easily read by all persons to whose work the particulars relate.

5. If the occupier or contractor fails to comply with the requirements of this section, he shall be liable for each offence to a fine of not more than £10, and, in the case of a second or subsequent conviction within two years from the last conviction for that offence, not less than £1.

6. If anyone engaged as a worker in any of the aforesaid class of work, having received such particulars, whether they are furnished directly to him or to a fellow workman, discloses the particulars for the purpose of divulging a trade secret, he shall be liable to a fine not exceeding £10.

7. If anyone for the purpose of obtaining knowledge of or divulging a trade secret, solicits or procures a person so engaged to disclose such particulars, or with that object pays or rewards any such person, or causes any person to be paid or rewarded for so disclosing such particulars, he shall be liable to a fine not exceeding £10.

8. The Order of December 30, 1909, relating to shipbuilding yards so far as concerns the work of platers, riveters and caulkers is hereby repealed.

WORKMEN'S COMPENSATION ACT, 1906.

DIGEST OF SECTION 7, WHICH APPLIES TO MASTERS AND SEAMEN.

7. (1) This Act shall apply to masters, seamen, and apprentices, and apprentices in the sea-fishing service, provided they are workmen and members of the crew of any ship registered in the United Kingdom, or of a British ship or vessel of which the owner, managing owner, or manager resides or has his principal place of business in the United Kingdom, subject to the following:—(*a*) Notice of accident and claim for compensation may, except where the person injured is the master, be served on the master, but where accident happened and incapacity commenced on board it shall not be necessary to give notice; (*b*) in case of death of master, seaman, or apprentice, the claim for compensation shall be made within 6 months after the news of death has been received by claimant; (*c*) where an injured master, seaman, or apprentice is discharged or left behind in a British possession or foreign country, depositions respecting injury may be taken by any judge or magistrate in British possession, and by British consular officer in foreign country, and transmitted to the Board of Trade, and depositions or certified copies thereof shall be admissible in evidence as provided by Sections 691 and 695, Merchant Shipping Act, 1894, and those sections shall apply; (*d*) in case of death of master, seaman, or apprentice leaving no dependents, no compensation shall be payable if owner is under the Merchant Shipping Act, 1894, liable to pay expenses of burial; (*e*) weekly payment shall not be payable for period during which owner is, under Merchant Shipping Act, 1894, as amended or otherwise, liable to defray expenses of maintenance of injured master, seaman, or apprentice; (*f*) any sum payable as compensation shall be paid in full notwithstanding anything in Section 503, Merchant Shipping Act, 1894, but the limitation on owner's liability imposed by that section shall apply to amount recoverable by way of indemnity under the section of this Act relating to remedies against employer and stranger as if the indemnity were damages for loss of life or personal injury; (*g*) Sub-sections 2 and 3, Section 174, Merchant Shipping Act, 1894, shall apply for recovery of compensation by dependents of masters, seamen, and apprentices lost with their ship as for recovery of wages

to seamen and apprentices; and proceedings for recovery shall be maintainable if claim is made within 18 months of the date at which ship is deemed to have been lost with all hands. (2) This Act shall not apply to members of crew of fishing vessel as are remunerated by shares in profits or gross earnings of vessel. (3) This section shall extend to pilots to whom Part X. of Merchant Shipping Act, 1894, applies, as if pilot when employed were a seaman and a member of crew.

FOREIGN ANIMALS ORDERS OF 1910 AND 1912.

It shall not be lawful, except under the authority of a licence granted by the Board of Agriculture and Fisheries and subject to any conditions thereby imposed, to bring into a port in Great Britain any cattle, sheep, goats or swine brought from a port in a scheduled country; but this article shall not apply to any vessel not bound to a port in Great Britain which comes into a port under stress of weather, or for repairs, or for any purpose other than the delivery or shipment of cargo. Any provision which relates to an animal brought from a port in a scheduled country shall apply in like manner to a foreign animal brought from a port in a country which is not a scheduled country, if the animal since it was taken on board at that port has entered a port in a scheduled country. It shall not be lawful to land in Great Britain, except under the authority, and subject to the conditions, of a licence granted by the Board, cattle, sheep, goats or swine taken from the United Kingdom, the Channel Islands, or the Isle of Man into a port in a scheduled country.

The prohibited countries and parts of countries are as follows:—

Argentine Republic, Austria-Hungary, Belgium, Bolivia, Brazil, Cape Colony, Chili, Columbia, Denmark (excluding Iceland), Ecuador, France, Germany, Gibraltar, Greece, Guiana (British), Guiana (Dutch), Guiana (French), Italy, Malta, Mexico, Montenegro, Morocco, Natal, Netherlands, Norway, Ottoman Dominions, Paraguay, Peru, Portugal (except Cape Verd Islands, Madeira and the Azores), Roumania, Russia, Servia, Spain (except the Canary Islands), Sweden, Uruguay, and Venezuela.

NATIONAL INSURANCE ACT, 1911.

Section 48 of this Act provides a special form of insurance for masters seamen and apprentices to the sea service and the sea fishing service The Section is the outcome of negotiations carried on between the Chancellor of the Exchequer (Right Hon. D. Lloyd George) and the Treasury on the one hand and the Shipowners' Parliamentary Committee on the other, and the credit of the compromise reached in it is largely due to the labours of Sir Norman Hill. We give Section 48 in its entirety as follows:—

Special Provisions as to the Mercantile Marine.

In the application of this Part of this Act to masters, seamen, and apprentices to the sea service and the sea fishing service the following provisions shall have effect:—

(1) Neither sickness benefit nor disablement benefit shall be paid to a master, seaman, or apprentice suffering from any disease or disablement in respect of any period during which the owner of the ship is under the Merchant Shipping Act, 1894, as amended by any subsequent

enactment, or otherwise, liable to defray the expense of the necessary surgical and medical advice and attendance and medicine, and of his maintenance, but, for the purpose of calculating the rate and duration of sickness benefit, such benefit shall be deemed to have been paid from the commencement of the disease or disablement until the determination of such liability as aforesaid, and he shall not be entitled to medical benefit during such period:

(2) In the case of masters, seamen, and apprentices serving on foreign-going ships or ships engaged in regular trade on foreign stations, the employed rate and the employers' contributions shall each be reduced by one penny a week, and every four weekly contributions paid in any calendar year by a master, seaman, or apprentice whilst serving on such a ship shall, for the purposes of determining the number of contributions to be paid by him in that year and for the purpose of calculating arrears, be treated as five such contributions: Provided that—

(*a*) nothing in this provision shall affect the number of employer's contributions to be paid in respect of such a master, seaman, or apprentice, but no employer's contributions paid in respect of any week in respect of which no contribution is payable by the master, seaman, or apprentice shall be taken into account in reckoning the amount of his arrears;

(*b*) there shall be credited to the approved society of which the master, seaman, or apprentice is a member, or if he is a deposit contributor to his account in the Post Office fund, a sum equal to two-fifths of the amount of the contributions actually paid in respect of him, and an equal sum shall be treated as having been expended on sickness benefit, and the proper proportion thereof shall accordingly be paid out of moneys provided by Parliament:

(3) A master, seaman, or apprentice who is neither domiciled nor has a place of residence in the United Kingdom shall not be deemed to be employed within the meaning of this Part of this Act, but the employer shall be liable to pay the same contributions in respect of him as would otherwise have been payable by him as employer's contributions, except in cases where the ship is engaged in regular trade on foreign stations:

(4) The Board of Trade shall, as soon as may be after the passing of this Act, cause a society to be formed, to be called the Seamen's National Insurance Society, of which any masters, seamen, and apprentices to the sea service and the sea fishing service who are employed within the meaning of this Part of this Act shall be entitled to become members, but nothing in this section shall prevent any such person joining another approved society instead of the society so formed:

(5) The affairs of the Seamen's National Insurance Society shall be managed by a committee constituted in accordance with a scheme to be prepared by the Board of Trade with the approval of the Insurance Commissioners, comprising representatives of the Board of Trade, of shipowners, and of members of the society in equal proportions, and the society shall, notwithstanding anything in this Part of this Act, become an approved society:

(6) All contributions paid by employers in respect of masters, seamen, or apprentices who are neither domiciled nor have a place of residence in the United Kingdom, and consequently deemed not to be employed within the meaning of this Part of this Act, shall be credited to the Seamen's National Insurance Society:

(7) In addition to medical, sanatorium, sickness, disablement, and maternity benefits, members of the Seamen's National Insurance Society shall be entitled to such other benefits as may be provided under a scheme to be prepared by the committee of management, with the approval of the Board of Trade and the Insurance Commissioners, and such other benefits shall include pensions for masters and seamen with long sea service, and the scheme may provide for preference being given to masters and seamen who have served in foreign-going ships or ships engaged in foreign trade over those who have served in the coasting and home trade ships, and such preference may be proportionate to the length of time spent in the first-mentioned service: Provided that—

(*a*) The scheme shall provide for making a proper proportion of the sums credited to the Seamen's National Insurance Society under the last foregoing subsection applicable towards the payment of pensions or superannuation allowances granted by other approved societies to members with such sea service that, had they been members of the Seamen's National Insurance Society, they would have been entitled to pensions under the scheme; and

(*b*) in the case of the transfer of a member of the society to another approved society, the transfer value payable in respect of him shall be calculated with reference to the liabilities of the society for benefits other than such pensions as aforesaid:

(8) The rules of the Seamen's National Insurance Society shall provide for allowing a member who leaves the sea service and is unable to obtain admission to another approved society on account of the state of his health to continue a member of the Seamen's National Insurance Society for the purposes of this Part of this Act, and the rules of that society may provide that a member of the society who has fulfilled the conditions entitling him to such pension as aforesaid shall not be deprived of his right to the pension by reason only that he has ceased to be a member of the society at the time when the pension first becomes payable or ceases so to be at any subsequent time:

(9) Where a master, seaman, or apprentice is at the commencement of this Act a member of a society which becomes an approved society he may, if that society and the Seamen's National Insurance Society so agree, continue to be a member of the first-mentioned society for the purposes of benefits under this Part of this Act other than pension, and become a member of the last-mentioned society for the purposes of pension only, and in such case the balance of the contributions payable in respect of him (after deducting the sums to be retained by the Insurance Commissioners towards discharging their liabilities in respect of reserve values) shall be divided between the two societies in such proportion as they may agree:

(10) Expressions in this section have the same meaning as in the Merchant Shipping Acts, 1894 to 1907, but the expressions "foreign-going ships" and "home-trade ships" include ships engaged in the sea fishing service, and the expression "ship engaged in regular trade on foreign stations" means a ship engaged regularly in trade between ports outside the British Islands when trading between such ports, but, for the purposes of this provision, a ship shall not be deemed not to be engaged in such a trade by reason only that she puts into a port in the United Kingdom for the purpose of survey or repair:

(11) The provisions of this Part of this Act affecting the employed

rate and the rates of contributions of employers and contributors in Ireland, and depriving insured persons in Ireland of medical benefit shall not apply to any such master, seaman, or apprentice, unless he has a permanent place of residence in Ireland and is not a member of the Seamen's National Insurance Society; and, in the case of a master, seaman, or apprentice serving on a foreign-going ship or a ship engaged in foreign trade to whom such provisions do apply the amount by which the employed rate and the employer's contributions are to be reduced shall be one halfpenny a week:

(12) Members of the Seamen's National Insurance Society shall for the purposes of this Part of this Act be deemed to reside in England, and the medical benefit and sanatorium benefit of such members shall be administered by the society instead of by the Insurance Committee, and the provisions of this Part of this Act relating to the administration of those benefits shall apply accordingly subject to such modifications as may be prescribed, but nothing in this provision shall prevent the society agreeing with Insurance Committees for the administration of those benefits by the Committees in relation to individual members of the society.

Unemployment Insurance.

In the Sixth Schedule of the Act, which contains a list of insured trades for the purposes of Part II. of the Act relating to Unemployed Insurance, appear—(2) Construction of works; that is to say, the construction, reconstruction, or alteration of railroads, docks, harbours, canals, embankments, bridges, piers or other works of consturction. (3) Shipbuilding; that is to say, the construction, alteration, repair or decoration of ships, boats or other craft by persons not being usually members of a ship's crew, including the manufacture of any fittings of wood of a kind commonly made in a shipbuilding yard. (4) Mechanical engineering, including the manufacture of ordnance and firearms. (5) Ironfounding, whether included under the foregoing headings or not. Consequently these trades are affected by all the Sections of Part II. of the Act.

NATIONAL INSURANCE AMENDMENT ACT, 1913.

The following amendment affects the provisions as to the Mercantile Marine:

23.—(1) In Section 48, Subsection (1) of the principal Act, the following proviso shall be inserted:—Provided that, in respect of that part of such period as aforesaid during which the owner of the ship is not liable to pay wages to the master, seaman, or apprentice so suffering from disease or disablement, sickness benefit may be paid in whole or part if such master, seaman, or apprentice has dependents, *and was serving on a home-trade ship*, and the benefit so paid shall be paid to, or applied for the relief or maintenance of, such dependents in such manner as the society or committee by which the benefit is administered, after consultation whenever possible with the master, seaman, or apprentice, thinks fit. (2) The rules of the Seamen's National Insurance Society may, notwithstanding anything in Subsections (4) and (8) of Section 48 of the principal Act, provide for the admission to the society of masters, seamen, and apprentices to the sea service or sea-fishing service who are entitled to be or become voluntary contributors, and for allowing a member who leaves the sea service and who is or continues to be a voluntary contributor to remain a member of the society.

SEAMEN'S NATIONAL INSURANCE SOCIETY.

Head Office, 80, Leman Street, London, E.

Chairman, Sir Norman Hill; treasurer, G. S. Fry, Accountant-General, Board of Trade; general secretary, Sidney H. Godfrey; representatives of the insured members on the Committee, Mr. Jos. Cotter (National Union of Stewards, Cooks, etc.), Mr. T. Lewis (British Seafarers' Union), Mr. W. L. Marshall (Marine Engineers' Association), Sir J. Wrench Towse (National Sea Fisheries' Protection Association), Captain T. V. Walker (Imperial Merchant Service Guild), Mr. John Collins (Steam Fishing Vessels' Engineers' and Firemen's Union), and Mr. A. J. Warner (National Union of Stewards, Cooks, etc.); Board of Trade representatives, Master W. F. A. Archibald, Sir A. J. G. Chalmers, Sir C. N. Dalton, K.C.M.G., Mr. G. S. Fry, Miss E. Mahler, Mr. D. McKenzie, Hon. T. H. W. Pelham, C.B.; shipowners' representatives, Mr. J. D. Botterell, Mr. Algernon Henderson, Sir Norman Hill, Mr. Cuthbert Laws, Right Hon. Russell Rea, M.P., Mr. F. Shadforth Watts. The Society has local offices in Liverpool, Glasgow, Southampton, Aberdeen, Leith, South Shields, Grimsby, Lowestoft, Barry, and elsewhere. The present membership is over 75,000.

MASTERS' AND MATES' CERTIFICATES.

Candidates for examination must fill up a form of application at a Mercantile Marine Office. The form, properly filled in, together with the candidate's testimonials and discharges, must be lodged with the Local Marine Board if there is a Local Marine Board at the port, and if there is not, with the Superintendent of the Mercantile Marine Office, not later than the day before the day of examination, except in the case of London and Liverpool, at which ports applications for examination must be made on Fridays or Saturdays during office hours; and the candidate must conform to any regulations in this respect which may be laid down by the Local Marine Board or the Board of Trade. As discharges and testimonials may have to be forwarded to the Registrar-General of Seamen for verification, it is desirable that they should be handed in, together with the form of application, as many days as possible before the date of the examination which the candidate desires to attend. In the absence of the necessary verification the candidate cannot be examined.

Examination Fees.

For Foreign-going Ships.	£	s.	d.
Second Mate	1	0	0
First or Only Mate—			
If previously possessing an inferior certificate, either granted by the Board of Trade, or by the Government of a British Possession under Order in Council	£ 0	s. 10	d. 0
If not	1	0	0
Master	2	0	0
Where a candidate is in possession of a certificate for fore and aft rigged vessels, and requires an Ordinary or a Steamship certificate of the same grade; or where a candidate is in possession of a Steamship certificate, and requires an Ordinary certificate of the same grade	Half the usual fee.		

Extra Master, if possessing an Ordinary Master's certificate; or Extra Master for steamships, if possessing a Master's certificate for steamships	*1 0 0
Where a candidate is in possession of a Colonial certificate for foreign-going ships, not granted under Order in Council; or of a provisional certificate of qualification obtained after examination on board one of His Majesty's Ships; for an Imperial certificate of same grade, for first attempt	No fee.
Every subsequent attempt	Usual fee.
For Home Trade Passenger Ships.	
Mate	0 10 0
Master	1 0 0
Voluntary Examination in Steam.	
Any Master or Mate holding a certificate of any grade whether for the Foreign or Home trade, or as Master of his own pleasure yacht	1 0 0
Voluntary Examination in Compass Deviation.	
Any Master or Mate holding a certificate of any grade, whether for the Foreign or Home trade or as Master of his own pleasure yacht	1 0 0
Voluntary Examination in Signalling.	
Any Master or Mate who holds, or has passed for, a certificate of any grade, whether for the Foreign or Home trade or as Master of his own pleasure yacht	1 0 0
For Yachts.	
Master	2 0 0
*Extra Master, if possessing a Master's certificate	1 0 0
Certificates of Efficiency for Officers of the R.N.V.R.	
Ordinary	2 0 0
*Extra, if holding an Ordinary certificate	1 0 0

NOTE.—No abatement will be made in the fee charged to a candidate for a certificate for foreign-going ships in consequence of his possessing a Master's or Mate's certificate for home trade passenger ships.

EXAMINATION DAYS.—EXTRA MASTERS', MASTERS' AND MATES' CERTIFICATES.

Places.	For Masters and Mates.
ABERDEEN	2nd and 4th Tuesday in each month.
BELFAST	1st and 3rd Tuesday in each month.
BRISTOL	1st and 3rd Tuesday in each month.
CARDIFF	1st and 3rd Tuesday in each month.
DUBLIN	2nd and 4th Tuesday in each month.
DUNDEE	1st, 3rd, and 5th Tuesday in each month.
GLASGOW	1st, 3rd, and 5th Tuesday in each month.

* If the examination for the Extra Master's certificate takes place at the same time as the examination for the Ordinary Master's certificate the usual fee for the Ordinary Master's certificate, in addition to the fee for the Extra certificate must be paid. This rule as to fees also applies to the examinations for certificates as Extra Master of steamships and yachts and for Extra certificates of Efficiency.

GREENOCK	2nd and 4th Tuesday in each month.
HARTLEPOOL, WEST .	4th Tuesday in each month.
HULL	2nd and 4th Tuesday in each month.
LEITH	2nd and 4th Tuesday in each month.
LIVERPOOL	Monday in each week.
LONDON	Monday in each week. Examination in steam held on Friday in each week.
NEWPORT, MON. . .	2nd Tuesday in each month.
PLYMOUTH	2nd and 4th Tuesday in each month.
SHIELDS, SOUTH . .	1st and 3rd Tuesday in each month.
SOUTHAMPTON . . .	1st and 3rd Tuesday in each month.
SUNDERLAND . . .	2nd and 5th Tuesday in each month.
SWANSEA	4th Tuesday in each month.

The examination days are liable to occasional alteration and candidates are advised to ascertain the actual date of examination from the Superintendent of the Mercantile Marine Office.

SIGHT TESTS.—EXAMINATION PORTS AND DAYS.

On and after January 1, 1914, the standard of form vision required by the Board of Trade will be normal vision when using both eyes together or (at his option) either eye separately. No candidate who has obtained a certificate of competency before that date will be required to pass any colour vision test on coming up for a certificate of a higher grade. The examination of officers who hold certificates of competency and who present themselves voluntarily for the sight tests only should be confined to the form vision test.

ABERDEEN.—Monday before the 2nd and 4th Tuesday in each month.
BELFAST.—Monday before the 1st and 3rd Tuesday in each month.
BRISTOL.—Monday before the 1st and 3rd Tuesday in each month.
CARDIFF.—Any Monday between 10 a.m. and 11 a.m.
DUBLIN.—Monday before the 2nd and 4th Tuesday in each month.
DUNDEE.—Monday before the 1st, 3rd and 5th Tuesday in each month.
GLASGOW.—Monday before the 1st, 3rd and 5th Tuesday in each month, between 10 a.m. and noon.
GREENOCK.—Monday before the 2nd and 4th Tuesday in each month, between 10 a.m. and noon.
GRIMSBY.—Monday before the 1st and 3rd Tuesday in each month.
HARTLEPOOL, WEST.—Monday before 4th Tuesday in each month.
HULL.—Any day during office hours.
LEITH.—Monday before 2nd and 4th Tuesday in each month.
LIVERPOOL.—Every Thursday, Friday and Saturday.
LONDON (DOCK ST., E.).—Every Friday and Saturday.
LONDON (133, E. INDIA DOCK RD., POPLAR, E.).—Any day between 10 a.m. and noon.
LONDON (TILBURY, ESSEX).—Every Thursday and Friday between 10 a.m. and noon.
LONDON (VICTORIA DOCKS).—Any day during office hours.
MANCHESTER (SALFORD).—Any day during office hours.
NEWPORT.—Any Monday at 10 a.m.
PLYMOUTH.—Monday before 2nd and 4th Tuesday in each month.
QUEENSTOWN.—Any day by special arrangement.
SOUTHAMPTON.—Every Monday, and other days by special arrangement.
SOUTH SHIELDS.—Any Monday at 10 a.m.
SUNDERLAND.—Monday before 2nd and 5th Tuesday in each month.
SWANSEA.—Any Monday at 10 a.m.

MARINE ENGINEERS' CERTIFICATES.

On and after January 1, 1915, the qualifications as regards sea service required from candidates for certificates of competency as Engineer in the mercantile marine will be as follows:—

(i.) A candidate for a second-class Engineer's Certificate will be required, in addition to the apprenticeship described in par. 23 (*a*) of the Regulations relating to the Examination of Engineers, or the alternative sea service specified in Board of Trade *Circular 1469*, to have served 18 months at sea as Engineer on regular watch on the main engines or boilers of a foreign-going steamer of not less than 66 n.h.p.; or 27 months in a home-trade steamer of not less than 66 n.h.p.

(ii.) A candidate for a first-class Engineer's Certificate, in addition to the qualifications required from a candidate for a second-class Engineer's Certificate, must (*a*) have served at sea for 18 months, with a second-class certificate of competency or service on regular watch on the main engines or boilers of a foreign-going steamship of not less than 99 n.h.p. as senior engineer in charge of the whole watch; or (*b*) have served at sea for 27 months with a second-class certificate of competency or service as first engineer of a home-trade steamer of not less than 99 n.h.p.; or 3 years with a second-class certificate of competency or service as second engineer of a home-trade steamer of not less than 99 n.h.p.; or (*c*) have served 3 years 9 months with a second-class certificate of competency or service as third Engineer of a home-trade steamer of not less than 99 n.h.p., if during the entire period he has been the senior Engineer in charge of the whole of a watch on the main engines and boilers; or (*d*) possess, or be entitled to, a first-class certificate of service.

The service described in paras. 38, 39, 40 and 41 of the Regulations may as heretofore be accepted as qualifying for examination in accordance with the conditions specified in those paragraphs.

A candidate for either a second-class or first-class certificate who within two years from date of application to be examined has attended an approved course comprising general mathematical and scientific instruction at a Technical School recognised by the Board of Trade as suitable for the training of Marine Engineers, will be allowed to count time

so spent as equivalent to sea service in the ratio of three months at the Technical School to two months at sea. Time so spent cannot be accepted as equivalent to more than one-sixth of the total sea service required for either certificate, but a candidate who has been allowed to count such time on examination for a second-class certificate, will not be debarred from counting similar subsequent time on examination for a first-class certificate. Time spent in an approved Marine Technical School subsequent to obtaining a first-class certificate and within two years from the date of application to be examined, may also be accepted as forming part of the qualifying service required under par. 28 of the Regulations, in the case of candidates for extra first-class Engineer's Certificates, but if such time is substituted for sea service, it will only count as equivalent thereto in the ratio of three months at the school to two months at sea. In every case in which an allowance is made for time spent at a Marine Technical School, the candidate will be required to produce the principal's certificate for continuous and regular attendance at all the approved classes and for satisfactory progress.

EXAMINATION DAYS AT

Place	Days.
ABERDEEN	3rd Tuesday in each month.
BARROW-IN-FURNESS	2nd Tuesday in each month.

SUNDERLAND	3rd Tuesday in each month.

The examination days are liable to occasional alteration.

EXTRA CERTIFICATES.

According to present arrangements the examinations for Extra Certificates will begin at the different ports on the 2nd Tuesday of January, April, July, and October in each year.

TABLE OF FEES.	£	s.	d.
Second-class Engineer's Certificate	1	0	0
First-class Engineer's Certificate	2	0	0
First-class Engineer's Certificate, if the candidate holds a Second-class Certificate of Competency granted by the Board of Trade or by the Government of a British Possession under the Merchant Shipping Act	1	0	0

TABLE OF FEES (*contd.*)	£	s.	d.
Extra First-class Engineer's Certificate	1	0	0
Extra First-class Engineer's Certificate if the candidate has not been examined for and obtained a First-class Certificate	3	0	0

If a candidate fails in his examination, no part of the fee he has paid will be returned to him.

SEAMEN'S CONTINUOUS DISCHARGE CERTIFICATES.

On the 1st October, 1900, a new form of Certificate of Discharge was issued by the Board of Trade. It is in book form, and will be a continuous record of service. In the first instance, it was given only to deck hands engaged or discharged in the presence of a Superintendent of a Mercantile Marine Office in the United Kingdom, or a Consular Officer at Antwerp, Hamburg, Rotterdam, Dunkirk, or Havre; but at different dates, notice of which was given, it was extended to engine-room hands, to members of the steward's department, and to officers, whether engaged at home or abroad. Early in 1901 it was extended to all hands engaged in foreign-going British ships.

It is desirable that shipmasters should, in conjunction with the Superintendents, require every seaman to produce his Continuous Certificate at the time of engagement. When the engagement is concluded, the master should take charge of the books and retain possession of them during the voyage.

Should a seaman desert or fail to join at a home port, his book should without fail, be returned to the Mercantile Marine Office, together with the Form Eng. 2, reporting the changes in crew, and, should he desert during the voyage, the book should be handed to the Consul or Colonial Officer at the port of desertion. In either case the master should be careful to make no entries or marks in the book.

On the completion of the voyage, the master should hand to the Superintendent or Consul at the port of discharge all the Continuous Certificates in his possession with the discharge columns filled in, so that no time may be lost in preparing for and proceeding with the work of discharge.

SEAMEN'S CERTIFICATES OF DISCHARGE AND REPORTS OF CHARACTER: RIGHT OF APPEAL.

The Board of Trade have decided that a reference by way of appeal to the Superintendent of a Mercantile Marine Office should be allowed to seamen in cases in which the master gives a bad character or "declines to report." Whenever the character is bad, or the master declines to report, the Superintendent should, if appealed to in writing by the seaman, investigate the case by making inquiries as to the facts upon which the master bases the bad character or declines to report. If, after inquiry, the Superintendent thinks that the seaman deserves a good or a very good character, he should inform the master accordingly, and should suggest the alteration of the report of character originally made in the official log. In the event of the master declining to make the alteration suggested, the Superintendent should enter the result of the inquiry on the form provided for that purpose, and hand a copy to the master, and a copy to the seaman. While Superintendents

should endeavour to minimise any unjustifiable hardship to seamen in respect of character reports, nothing should be done to affect the responsibility of the master in this matter. When the report given is "Good" the Superintendent should not entertain an appeal, as the Board of Trade consider that the word should be understood in its natural meaning.

FOREIGN SEAMEN IN BRITISH SHIPS.

Certificates of Naturalization.

Regulations dated 4th August, 1903, made by the Secretary of State for the Home Department for carrying into effect the provisions of the Naturalization Acts.

(1) The application of an alien serving on a British ship must be on the prescribed form, which may be obtained, free of charge, from the Home Office, or at any of the following Mercantile Marine Offices:—Aberdeen, Avonmouth, Barry, Belfast, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Greenock, Grimsby, Hull, Leith, Liverpool, London (Dock-street, Poplar, Victoria Docks, Tilbury, Gravesend), Manchester, Newcastle-on-Tyne, Newport (Mon.), Penarth, Plymouth, North Shields, South Shields, Southampton, Sunderland, Swansea. The Superintendents of the Mercantile Marine Offices at these ports will assist foreign seamen in making their applications, will take care that the form is properly filled up in each case, and that the applicants clearly understand the particulars to which they declare, and will transmit the papers to the Registrar-General of Seamen.

(2) The place of birth should be stated in the form of a postal address. It will not be sufficient for the applicant to state, *e.g.* that he was born at ———— (a village or small town) in Russia. The province, etc., should also be given.

(3) The nationality should be stated accurately, *e.g.*, a Russian Pole should be described as a Russian; a German Pole, or a Bavarian, or a Prussian, should be described as a German. If an applicant has lost the nationality he acquired at birth, such nationality of origin should nevertheless be specified, and an explanation should be given of the circumstances in which it was lost. Particulars of any naturalization of an applicant in any foreign country other than that to which he originally owed allegiance should be added.

(4) The foregoing paragraph applies equally to the particulars required of the nationality of the parents.

(5) Children only temporarily absent from home at the date of the application may be regarded as resident with the father. In any case of doubt the question should be referred through the Registrar-General of Seamen to the Secretary of State.

(6) The applicant must establish that he is qualified for naturalization either by residence in the United Kingdom or by service on British ships (which is regarded as equivalent to such residence) or partly by residence and partly by service. If the qualification is chiefly by sea-service, the applicant must, when not employed at sea, have resided mostly in the United Kingdom during the last eight years. The residence and sea-service together must cover a period of five years within the last eight. Applicants for naturalization applying on the prescribed

form must have been at sea within six months of their application, and for three years within the last eight, and are required to declare that it is their intention to continue to serve on British ships or to reside in the United Kingdom. If the applicant has had no settled abode when ashore, he must make his statements with regard to residence as fully and as accurately as he can.

(7) Particulars should be given of any certificates which the applicant holds from the Board of Trade. If he holds no certificates, his present occupation, viz., whether mate, able seaman, cook, etc., should be stated.

(8) The statutory declaration required of the applicant must be made before a magistrate or a commissioner for oaths.

(9) If the Certificate is granted by the Secretary of State, the oath of allegiance will have to be taken, subscribed and registered in accordance with instructions which will accompany the certificate.

(10) If a Superintendent feels the need of special instructions in any particular case he should submit the matter to the Registrar-General of Seamen for reference to the Secretary of State.

(11) Except as hereinafter stated, no fees will be payable to the Home Office or the Board of Trade, when duly authenticated certificates proving sea service and residence in the United Kingdom are produced but the following charges will have to be met:—

(*a*) Fee on Statutory Declaration.—If made before a Commissioner of Oaths, 1/6; if made before a Justice out of Court and unattended by the Clerk to the Justices, nil; if made before a Justice attended by the Clerk, such fee as may be in force in the County or Borough in which the Oath or Declaration is made, generally, 1/- or 1/6.

(*b*) An Impressed Inland Revenue stamp of the value of 2/6 on each declaration.

(*c*) A fee of 4d. for the verification of sea service on each voyage for which no officially authenticated Certificate of Discharge is produced.

(*d*) A fee for the administration of the oath of allegiance, 2/6, payable as follows:—In England or Ireland, if the oath is administered by a Justice of the Peace, to the clerk of such Justice, otherwise to the Officer administering the oath; in Scotland, if the oath is administered by a Sheriff or Sheriff-Substitute, to the Sheriff Clerk or any of his deputes; if by a Justice of the Peace, to the Clerk of the Peace or any of his deputes.

AIDS TO SEAMEN TO SAVE THEIR WAGES.

The following arrangements have been made by the Board of Trade to enable seamen to save their wages:—

Transmission of Wages.—A seaman discharged at a port in the United Kingdom with sufficient wages due can arrange to go direct to his home, and have his wages sent to him, free of charge, through any Mercantile Marine Office, or through any Money Order Post Office in the United Kingdom. At the following ports the Board of Trade also issue railway or steamboat warrants, and advance cash for the

journey, viz.:—Aberdeen, Avonmouth, Barry, Belfast, Blyth, Bristol, Cardiff, Cork, Dublin, Dundee, Falmouth, Fleetwood, Garston, Glasgow, Gravesend, Greenock, Grimsby, Hartlepool, Harwich, Hull, Ipswich, Leith, Liverpool, London, Manchester, Maryport, Middlesbrough, Newcastle, Newport (Mon.), Penarth, Plymouth, Queenstown, Runcorn, Sharpness, North and South Shields, Southampton, Sunderland, and Swansea. At all other ports the seaman should apply to the master of the ship for his account of wages, and for an advance in cash to enable him to get home. He should then take his account of wages to the Mercantile Marine Office, and arrange with the superintendent to send his wages after him.

SEAMEN'S MONEY ORDERS.—If a seaman has to stay at the port of discharge until paid off, and wishes to proceed to some other port, he can take out a Money Order, free of charge, for any sum he does not require for the journey, and draw it at some other Mercantile Marine Office. He can also send money to his wife and family by the same means.

SEAMEN'S SAVINGS BANK.—When a seaman receives his wages he can deposit any sum he does not then require in the Seamen's Savings Bank at any Mercantile Marine Office and can draw it out at short notice at any time and at any port in the United Kingdom. Interest is allowed, and there is Government security for the money. Accounts may also be opened in the name of a seaman's wife, or of each or any of his children.

DISCHARGES AT CONTINENTAL PORTS.—A seaman paid off at a foreign port can obtain, at a small charge, before leaving the Consul's Office, a money order payable at a Mercantile Marine Office in the United Kingdom for any sum he does not need for the passage home.

DISCHARGES AT ANTWERP, DUNKIRK, HAMBURG AND ROTTERDAM.—Special arrangements are made at Antwerp, Dunkirk, Hamburg, and Rotterdam for a seaman to proceed direct to his home in the United Kingdom, and have his wages sent to him through a Mercantile Marine Office or a Money Order Post Office. Steamboat and railway warrants are issued, and cash is advanced for the journey. The commission charged for transmitting wages from foreign ports has been reduced to 1d. for every £1 transmitted, subject to a minimum charge of 3d., and a maximum charge of 5s. on any one order.

SEAMEN RATING AS A.B.

Seamen will not be allowed to engage on board a British ship as A.B. unless they can prove three years' service before the mast, of which not more than two years' service shall have been on decked fishing vessels.

Seamen who are qualified for the rating of A.B. are urged to make early application either to a Superintendent of a Mercantile Marine Office in the United Kingdom, or to the Registrar-General of Shipping and Seamen, London, for certification of their title to be rated as A.B., producing at the same time their Continuous Discharge Books or other satisfactory proof of their service at sea and enclosing in the case of application to the Registrar-General a fee of 6d.

A SHIP'S BELLS.

TIME, A.M.		TIME, P.M.	
1 Bell	12.30	1 Bell	12.30
2 Bells	1.0	2 Bells	1.0
3 „	1.30	3 „	1.30

A sailor's day commences at 12 noon. In some foreign ships they take no notice of the dog watches.

THE RULE OF THE ROAD.

"Aids to memory in four verses," by THOMAS GRAY, C.B.

1.—*Two Steamships meeting.*

When both side lights you see ahead—
Port your helm, and show your **Red.**

2.—*Two Steamships passing.*

Green to **Green**—or, **Red** to **Red**—
Perfect safety—Go ahead.

3.—*Two Steamships crossing.* [Note.—This is the position of the greatest danger; there is nothing for it but good look-out, caution, and judgment.]

If to your starboard **Red** appear,
It is your duty to keep clear;
To act as judgment says is proper;
To Port—or Starboard—Back—or Stop her!
But when upon your port is seen
A steamer's starboard light of **Green**
There's not so much for you to do,
For **Green** to port keeps clear of you.

4.—*All Ships must keep a good look-out, and Steamships must stop and go astern, if necessary.*

Both in safety and in doubt
Always keep a good look-out;
In danger, with no room to turn,
Ease her! Stop her! Go astern!

SIGNALLING LAMPS.

The Board of Trade have received a communication from the Admiralty suggesting that, with a view to improving and facilitating night signalling in the mercantile marine, it is desirable that the flashing lamps used on board merchant vessels should comply with the following conditions:—

(1) The body of the lamp should be so constructed as to be capable of standing the heat generated inside.

(2) The light should be sufficiently powerful to read at a distance of at least two miles on a dark night with a clear atmosphere.

(3) The arc of visibility horizontally should be not less than about 130 degrees.

(4) The shutter should be worked by hand, and so arranged that, when it is closed, the light is entirely obliterated, and when it is open a full light is shown.

(5) The shutter should be capable of making eleven words a minute.

(6) It is desirable that the lamp should be so arranged as to use either an electric light or an oil burner alternatively.

LINE-THROWING APPLIANCES.

The following is a summary of the Report of the Merchant Shipping Advisory Committee, which inquired into the question of line-throwing appliances for establishing communication from a ship to the shore or from ship to ship. The Report shows that an efficient line-throwing appliance, which may be of service in saving life, can be obtained at a comparatively small cost; and while the Board of Trade have no compulsory powers in the matter, they commend the recommendations of the Committee to the attention of those concerned. It is important that any such appliance should be exercised from time to time, so that those on board may know how to work it.

(1) The line-throwing appliances examined and tested by the Committee consisted of guns, rockets, kites, buoys, etc., and the Committee came to the conclusion that it would be practically impossible for any one appliance to be equally suitable and effective under all conditions, but that any appliance to be carried on board ship should be able to meet the needs of most of the conditions likely to arise in practice. Further, that such an appliance should be inexpensive, simple in construction, and easily manipulated and used.

(2) The Committee expressed the opinion that the most suitable kind of line-throwing appliance for general use would be found in some form of rocket apparatus; but they add that, in addition to the line-throwing appliance, provision should be made for sending ashore a strong rope with a properly secured breeches buoy attached, and that the whole apparatus should be kept ready for use in some easily accessible part of the ship.

(3) In the case of small vessels, the Committee suggest that communication could in many cases be effected at a distance of 200 yards by means of a 2 lb. or 4 lb. rocket, with 500 yards of strong line about the size of an ordinary cod or mackerel line. A stronger line could then be made fast to the end of this line, and an ordinary life-buoy or a life-buoy fitted with breeches could be fastened on the bight of this stronger line.

BOARD OF TRADE INSTRUCTIONS FOR USING THE MORTAR AND ROCKET LINES.

In the event of your vessel stranding on the coasts of the United Kingdom, and the lives of the crew being placed in danger, assistance will, if possible, be rendered from the shore in the following manner:—

1.—A rocket or shot, with a thin line attached, will be fired across your vessel. Get hold of this line with all speed; and when you have secured it, let one of the crew be separated from the rest, and signal to those on shore as follows:—If in the daytime, wave his hat or his hand, or a flag or handkerchief; or, if at night, let a rocket, blue light, or a gun be fired, or let a light be shown over the side of the ship, and be again concealed.

2.—When you see one of the men on shore separated from the rest, wave a red flag; or, if at night, show a red light, and then conceal it,—you are to haul upon the rocket line until you get a tailed block with an endless fall rove through it.

3.—Make the tail of the block fast to the mast about 15 ft. above the deck, or if your masts are gone, to the highest secure part of the vessel; and when the tail block is made fast, and the rocket line unbent from the whip, let one of the crew, separated from the rest, make the signal required by Article 1 above.

4.—As soon as the signal is seen on shore, a hawser will be bent to the whip line, and will be hauled off to the ship by those on shore.

5.—When the hawser is got on board, the crew should at once make it fast to the same part of the ship as the tailed block is made fast to, only about 18 inches higher, taking care that there are no turns of the whip line round the hawser.

6.—When the hawser has been made fast on board, the signal directed by Article 1 above is to be repeated.

7.—The men on shore will then pull the hawser taut; and, by means of the whip line, will haul off to the ship a sling, cot, or life-buoy, into which the person to be hauled ashore is to get and be made fast. When he is in and secure, one of the crew must be separated from the rest, and again signal to the shore as directed in Article 1 above. The people on shore will then haul the person in the sling to the shore; and, when he has landed, will haul back the empty sling to the ship for others. This operation will be repeated to and fro until all persons are hauled ashore.

8.—It may sometimes happen that the state of the weather and the condition of the ship will not admit of a hawser being set up; in such cases a sling or life-buoy will be hauled off instead; and the persons to be rescued will be hauled through the surf instead of along the hawser.

The system of signalling must be strictly adhered to; and all women, children, passengers, and helpless persons, should be landed before the crew of the ship.

OIL ON ROUGH SEAS.

The Board of Trade desire to call attention to the following information published by the Admiralty in their Sailing Directions, on the Use of Oil at Sea for modifying the effect of Breaking Waves:—

A very small quantity of oil, skilfully applied, may prevent much damage both to ships (especially the smaller classes) and to boats, by modifying the action of breaking seas.

The principal facts as to the use of oil are as follow:—

1. On free waves, *i.e.*, waves in deep water, the effect is greatest.

2. In a surf, or waves breaking on a bar, where a mass of liquid is in actual motion in shallow water, the effect of the oil is uncertain; as nothing can prevent the larger waves from breaking under such circumstances; but even here it is of some service.

3. The heaviest and thickest oils are most effectual. Refined kerosene is of little use; crude petroleum is serviceable when nothing else is obtainable; but all animal and vegetable oils, such as waste oil from the engines, have great effect.

4. A small quantity of oil suffices, if applied in such manner as to spread to windward.

5. It is useful in a ship or boat, both when running or lying to, or in wearing.

6. No experiences are related of its use when hoisting a boat up in a sea-way at sea, but it is highly probable that much time and injury to the boat would be saved by its application on such occasions.

7. In cold water, the oil, being thickened by the lower temperature, and not being able to spread freely, will have its effect much reduced. This will vary with the description of oil used.

8. The best method of application in a ship at sea appears to be: hanging over the side, in such a manner as to be in the water, small canvas bags, capable of holding from one to two gallons of oil, such bags being pricked with a sail needle to facilitate leakage of the oil. The position of these bags should vary with the circumstances. Running before the wind they should be hung on either bow—*e.g.*, from the cathead—and allowed to tow in the water. With the wind on the quarter the effect seems to be less than in any other position, as the oil goes astern while the waves come up on the quarter. Lying to, the weather bow and another position farther aft seem the best places from which to hang the bags, with a sufficient length of line to permit them to draw to windward, while the ship drifts.

9. Crossing a bar with a flood tide, oil poured overhead and allowed to float in ahead of the boat, which would follow with a bag towing astern, would appear to be the best plan. On a bar with the ebb tide it would seem to be useless to try oil for the purpose of entering.

10. For boarding a wreck, it is recommended to pour oil overboard to windward of her before going alongside. The effect in this case must greatly depend upon the set of the current, and the circumstances of the depth of water.

11. For a boat riding in bad weather from a sea anchor, it is recommended to fasten the bag to an endless line rove through a block on the sea anchor, by which means the oil is diffused well ahead of the boat, and the bag can be readily hauled on board for refilling if necessary.

STANDING RULES FOR STEAM VESSELS AT SEA.

Should be hung up in the Chart House and Engine Room.

The Officer of the Watch to keep his look-out on the bridge. The bridge never to be left without a certified officer in charge. The Look-out Man to be stationed on the forecastle head when practicable. The Officer in charge at night will be careful to see that the regulation lights are burning brightly and kept trimmed; that the Look-out Man is at his post; and that the course set is made good.

The course steered to be entered in the Night Order Book, and the Officer relieving to examine and sign same before taking charge of bridge.

The Helmsman to report his course to the Officer in charge every time he is relieved, and the Look-out Man to report the lights briskly thus—"All's well! Lights burning bright."

Sighting Land, Ice, Wreckage, Leading Lights, Fog, or Snow to be reported immediately to the Master.

The bearing of the North Star to be noted frequently and entered in the Order Book, with the position of the ship's head by compass at the time of observation.

Amplitudes never to be neglected.

The Master must see that the Log Book is properly kept, and that the Chief Officer keeps the vessel and crew's quarters clean, and see that the food is properly cooked and served at regular meal times.

All cases of disobedience or insubordination on the part of any of the crew to be reported at once to the Master.

Boat stations should be assigned to the crew, and boat-drill should be practised.

The Master, when leaving the deck for rest, should see the Chart on the table for the use of the Officer in charge, the position of ship pointed out and course being steered, with instructions to be called on all occasions of doubt.

GENERAL RULES TO BE OBSERVED ON BOARD SHIP IN PORT OR AT ANCHOR.

The Officer to see that the Anchor Lamp is burning brightly before leaving the deck. Deck never to be left without a look-out.

The Chief Officer has general charge, and should see that a proper account of cargo and stores is kept both in taking in and discharging, and also that the Carpenter looks at limbers, and sees that the pumps are all clean and tank cocks in working order, and all scuppers clear in 'tween decks before cargo is stowed there. The Chief Officer should also see that the shackles of chain cables are in working order (white lead will be found the best thing for this purpose) and wood pins (American elm is good for pins).

The Second Officer, and also the Third, will be under directions of the Chief, either to tally cargo or to look after holds, and, if necessary to keep a hold book. Ship never to be left without an Officer on board except in Harbour or Dock, and not then until the Watchman takes charge, and Watchman not to leave until one of the Officers comes.

*** Any suggestions for further information will be appreciated. Capt. ALLISON WOOD, Secretary, British Shipmasters' and Officers' Protection Society, 32, West Sunniside, Sunderland.

TERMS AND ABBREVIATIONS USED IN SHIPPING.

A/c.—Account.
E.E.—Errors excepted.
E. & O.E.—Errors and omissions excepted.
f.o.b.—Free on board.
F.P.A.—Free of particular average.
Inst.—Instant, present month.
c.i.f.—Cost, Insurance & Freight.
Prox.—Proximo, next month.
Ult.—Ultimo, last month.
D/D.—Days after Date.
M/D.—Months after date.
D/S.—Days after sight.
%—Per cent.
@—At, to.
℔—Per.
B/L.—Bill of Lading.
f.o.r.—Free on rail.
f.o.w.—Free on wagons.
f.a.—Free alongside.
f.d.—Free delivery; also free [despatch.
f.t.—Free turn
f.o.w.—First open water.
p.p.—Picked ports.
C.P.—Charter party.
N.C.—New charter.
O.C.—Old charter.
G.F.—Government form.
B.C.—Bristol Channel.
d.b.—Deal boards.
c.o.—Case oil.
c.s.—Cotton seed.
L. H. A. R.—London, Hull, Antwerp, Rotterdam.
H. H. — Havre to Hamburg inclusive.
B. H. — Brest to Hamburg inclusive; also Bill of Health.
U.K. Cont.—United Kingdom or Continent within limits.
W. C. S. A.—West Coast South America.

Ad valorem.—According to value.
Adjustment.—The settlement of a loss incurred by the insured.
Adventure.—Goods consigned to a party to be made the most of.
Agio.—The Premium borne by a better sort of money above an inferior.
Appraise.—To value goods imported.
Assets.—A term for property and money in contradistinction to liabilities.
Assurance.—See *Insurance.*
Average.—A sacrifice made to prevent the total loss of a ship or cargo; an average of the loss insured for the benefit of all concerned, to be made good proportionately.
Award.—The decision in arbitration.
Banco.—A continental term for bank money at Hamburg and other places.
Barratry.—A fraudulent act on the part of the master or crew of a vessel, against the interest of the owners. Insurances are effected against barratry.
Bill of Health.—A certificate granted by Consuls and Customs Officers as to health of port.
Bill of Lading.—A master's acknowledgment and undertaking as to receipt and delivery of goods or cargo.
Bottomry.—Money borrowed on a ship's bottom or hull, to be repaid with interest if the ship return in safety, but if not to be lost or forfeited. Sometimes it is raised on the lading and master's personal security; see *Respondentia.*
Brokerage.—The commission charged by merchants and brokers for securing and transacting business for ships.
Charter Party.—A contract with the owner, agent, or master for the service of his vessel.
Consul.—The commercial representative of one country residing officially in another.

Credit, Letter of.—A letter written by one party to another, requesting the party addressed to advance the bearer of person named a certain sum of money.

Days of Grace.—Days allowed by law or custom for payment of Bills of Exchange (except those payable at sight or on demand) after specified day of payment; thus, when three days are allowed, as usual in England, a bill due on the 5th of the month is payable on the 8th.

Dead Freight.—The damage payable by one who engages to load a ship fully, and fails so to do.

Debenture.—An instrument of the nature of a bill or bond, by which a debt is claimable. May bear interest or confer some peculiar advantage. It is given at the Custom House to claim a drawback.

Derelict.—Goods cast away or relinquished by wreck or otherwise. Reductions in duty are also made proportionate to the damage on them.

Deviation is a divergence from the voyage insured which may release the underwriter from his risk.

Drawback.—An allowance granted by Government to encourage exportation of an article, or a return of duties paid upon certain articles on exportation.

Discount.—An allowance made for money paid before it is due. To discount a Bill is to buy from the holder the right to receive the money upon it when due.

Dunnage.—Articles used in stowing a cargo or trimming a ship.

Embargo.—An order issued by Government to prevent vessels sailing.

Flotsam.—Goods floating after a wreck. *Jetsam* are those sunk. *Logan* are those sunk but secured by a buoy.

Groundage.—Money paid in some parts for permission to anchor.

Insurance.—A contract whereby, for a stipulated consideration, called a premium, one party undertakes to indemnify the other against certain risks.

Invoice.—A document enumerating goods sold from A to B. Where the goods are exported by A to be sold on his own account, the document is a specification, and not, strictly speaking, an invoice.

Lay Days.—Days allowed by charter for loading or unloading ships.

Lighterage.—The expense of a lighter or barge.

Manifest.—The specification of a cargo made out and signed by the master of a ship.

Policy.—A document containing the contract of insurance. A *Valued Policy* is when the interest insured is valued. An *Open Policy* is one in which the amount is left for subsequent proof. In an open policy, where the value shipped does not equal the value insured, the difference is termed *over insurance ;* and the proportionate amount of premium returnable to the insurer is called a *return for short interest.*

Primage.—A small allowance for the shipmaster's care of goods now generally included in the freight.

Pro rata.—Payment in proportion to the interests concerned.

Quid pro quo.—Giving one thing for another.

Respondentia.—A contract of loan by which goods in a ship are hypothecated to the lender, as in bottomry.

Super Cargo.—A person sent with a vessel to dispose of its cargo to the best advantage.

THE BRITISH SHIP'S PAPERS.

THE FOLLOWING ARE THE PAPERS GENERALLY FOUND ON BOARD A MERCHANT VESSEL FLYING THE BRITISH FLAG.

Every merchant vessel should carry on board some official voucher of her nationality, issued by the authorities of the country to which she belongs. The official voucher of a vessel which belongs to a country possessing a Register of its mercantile marine, is a certificate of her Registry: in other cases its form varies, and is called a "Passport," "Sea-brief," etc.

THE CERTIFICATE OF REGISTRY is a document signed by the Registrar of the port to which the vessel belongs, and usually specifies the name of the vessel and such port; her tonnage, etc.; the name of her master, particulars as to her origin, and names and description of her registered owners, etc.; and is the evidence of the nationality and identification of the vessel.

THE PASSPORT purports to be a requisition on the part of a Sovereign Power or State to suffer the vessel to pass freely with her company, passengers, goods and merchandise without any hindrance, seizure, or molestation, as being owned by citizens or subjects of such State. It usually contains the name and residence of the master, with the name, description, and destination of the vessel.

THE SEA-LETTER, OR SEA-BRIEF, is issued by the civil authorities of the port where the vessel is fitted out; it entitles the master to sail under the flag and pass of the nation to which he belongs, and also specifies the nature and quantity of the cargo, by whom it is owned, and its destination.

THE CHARTER-PARTY is the written contract by which a vessel is let, in whole or in part; the person hiring being called the charterer. It is executed by the owner or master, and the charterer. Among other things it usually specifies the name of the master, the name and description of the vessel, the port where she was lying at the time of the execution of the charter, the name and residence of the charterer, the character of the cargo to be put on board, the port of loading, the port of delivery, and the freight which is to be paid. The Charter-party is almost invariably found on board a vessel which has been chartered.

THE OFFICIAL LOG-BOOK is the log-book which the master is compelled to keep in the form prescribed by the statute law of the country to which the vessel belongs. (See Digest of M.S. Acts.)

THE SHIP'S LOG is the log kept by the master or mate for the information of the owners of the vessel.

THE BUILDER'S CONTRACT is found on board a vessel which has not changed hands since she was built. It sometimes serves, in the absence of the pass or sea-letter or certificate of registry, for verification of a vessel's nationality.

A BILL OF SALE is an instrument by which a vessel is transferred to a purchaser. It should be required whenever a sale of a vessel is alleged to have been made either during a war or just previous to its commencement, and if there is any reason to suspect that the vessel is liable to detention, either as an enemy s vessel or as a British or allied vessel trading with the enemy.

BILLS OF LADING usually accompany each lot of goods. A Bill of Lading on board a vessel is a duplicate of the document given by the

master to the shipper of goods on the occasion of the shipment; it specifies the name of the shipper, the date and place of the shipment, the name and destination of the vessel, the description, quality, and destination of the goods, and the freights which are to be paid.

THE INVOICES, which should always accompany the cargo, contain particulars of each parcel of goods, with the amount of the freight, duties, and other charges thereon, and specify the name and address of the shippers and consignees.

THE MANIFEST is a list of the vessel's cargo, containing the mark and number of each separate package, the names of the shippers and consignees; a specification of the quantity of goods contained in each package, as rum, sugar, etc., and also an account of the freight corresponding with the bills of lading. In many cases packages are signed for "contents unknown." The Manifest is usually signed by the ship-broker who clears the vessel out at the custom-house, and by the master.

THE CLEARANCE is the certificate of the custom-house authorities of the last port from where the vessel touched, to show that the custom duties have been paid. The clearance specifies the cargo and its destination.

ARTICLES OF AGREEMENT are the documents signed on engagement of seamen. They should be signed by every seaman on board, and should describe accurately the voyage and the terms for which each seaman ships, and specify the provisions to be supplied.

CREW LIST AND ARTICLES OF AGREEMENT.—Upon arriving in a foreign country the master of a vessel deposits these papers with the Consul representing the flag which covers the vessel, and takes a receipt therefor; these papers are returned to the master when clearing from his Consul.

A CLEAN BILL OF HEALTH is a certificate that the vessel comes from a place where no contagious distemper prevails, and that none of her crew were infected at the time of her departure, and is endorsed that no sickness was prevalent.

CUSTOMS REGULATIONS, AND CLEARANCE OF SHIPS.

If inward cargo be reported for exportation, a copy of report must be delivered to searcher under penalty.

Ship's Content.—This document containing particulars as to cargo and voyage, with declaration attached, must be delivered to Collector before clearance outwards.

Victualling Bill.—When duly signed by Collector or other proper Officer of Customs shall be the clearance and authority for departure of ship. Master of vessel outwards, in which goods are to be taken from United Kingdom to parts beyond the sea, must, before taking any goods on board, deliver to the Collector the inward clearance and enter outwards. Ships clearing foreign, putting back to United Kingdom in distress or otherwise, penalty provided against excessive deficiency in stores, having regard to the length of time between departure and return. Penalty on departing without being cleared, £100.

Clearing in Ballast.—Ships not having any goods on board except stores borne upon the Victualling Bill, may be cleared in ballast. Vessels carrying passengers, and vessels laden with chalk to extent of

more than one-third of their registered tonnage, are chargeable with light dues.

Documents to be produced at Clearance.—For a British ship:—The register with the master's name endorsed thereon. The outward lights receipt. The AA certificate if engaged in foreign trade or C certificate if in the home trade. NOTE.—Colonial ships are subject to the same laws as those of the United Kingdom, excepting when bound to their own colony where the voyage is to terminate, in which case such ships can proceed without certificated master and officers. For a foreign ship:—The measurement certificate, excepting for vessels belonging to countries which have adopted the British system of measurement. NOTE.—The measurement certificate is only valid for three years from the date thereof. On the production of these documents the clearance label is signed and returned to master.

Vessel carrying Passengers.—If proceeding to ports out of Europe Mediterranean ports excepted, duplicate Passenger Lists must be furnished. Masters of British sailing ships carrying passengers must make the declaration that the vessel is furnished with the necessary number of boats under the Merchant Shipping Acts, Boat declaration not required from British passenger steamers, but production of Passenger Certificate necessary. Ships under Passengers' Act must in addition have a bond executed in duplicate before the Clearing Officer by master and owner or charterer.

Outward Pilotage.—For foreign vessels going beyond Brest the receipt for outward pilotage must be produced.

Bills of Health.—Issued at the clearing seat when required.

Coasting Trade Defined.—All trade by sea from any one part of the United Kingdom to another shall be deemed to be coasting trade. Penalty for coasting ship deviating from coasting voyage unless forced by unavoidable circumstances. Goods brought coast-wise may be entered outwards without landing if not liable to duty.

Cargo Books.—These must be kept by masters in the coasting trade under penalty. Transire and duplicate containing the necessary particulars signed by the master shall, in the coasting trade, before departure of vessel be delivered to the Collector, who retains the duplicate and returns the original duly signed by him. This account shall be the outward clearance of the ship and the transire or pass for the goods therein.

Transires of Foreign Vessels.—Before issue of transire the agent applying for it is to produce a declaration made by the master showing the vessel's nationality.

SHIPOWNER'S LIEN FOR FREIGHT.

Notice in writing must be given by the shipowner to the wharfinger with whom he places goods for safe custody, that the goods are subject to a lien to an amount to be mentioned in the notice.

This lien is only discharged on proof of payment or release of the amount claimed being produced to the wharfinger, or on deposit of the amount claimed with the wharfinger.

Such deposit may, after the expiry of 15 days if no notice to the contrary effect is given, be paid by the wharfinger, to the shipowner. If notice be given within the 15 days the shipowner must be apprised thereof; the amount admitted to be due (if any) is then paid to the

shipowner, and at the expiry of 30 days, unless legal proceedings have been instituted to obtain the balance, and notice in writing of such proceedings has been served on the wharfinger, the said balance shall be repaid to the owner of the goods. If the lien is not discharged within 90 days the wharfinger may sell the goods by public auction.

The moneys arising from the sale are to be applied (1) in payment of any Customs or Excise duties; (2) in payment of the expenses of the sale; (3) in payment of the rent, rates, and other charges due to the warehouse owner (apart from special agreement); (4) in payment of freight, etc.; (5) the surplus (if any) to the owner of the goods.

EFFECT OF TRANSFER OF A BILL OF LADING.

(*Bills of Lading Act*, 1855, 18 & 19 *Vict. cap.* 3.)

(1) Every consignee of goods named in a B/L to whom in the property in the goods therein mentioned shall pass, upon or by reason of such consignment or endorsement, shall have transferred to and vested in him all rights of suit, and be subject to the same liabilities in respect of such goods as if the contract contained in the B/L had been made with himself.

(2) Nothing herein contained shall prejudice or affect any right of stoppage in *transitu*, or any right to claim freight against the original shipper or owner, or any liability of the consignee or endorsee by reason or in consequence of his being such consignee or endorsee, or of his receipt of the goods by reason or in consequence of such consignment or endorsement.

(3) Every B/L in the hands of a consignee or endorsee for valuable consideration, representing goods to have been shipped on board a vessel, shall be conclusive evidence of such shipment so against the master or other person signing the same, notwithstanding that such goods or some part thereof may not have been so shipped, unless such holder of the B/L shall have had actual notice of the time of receiving the same that the goods had not been part laden on board; provided that the master or other person so signing may exonerate himself in respect of such misrepresentation by showing that it was caused without any default on his part, and wholly by the fraud of the shipper or of the holder, or of some person under whom the holder claims.

TONNAGE OF SHIPS EXPLAINED.

Before entering upon an explanation of the various formulæ used in determining the tonnage of a vessel, a brief recapitulation of the British tonnage laws may be of interest. Until 1694 no Act of Parliament enforced a rule for tonnage measurement on English ships, with the exception of " keels " and vessels loading coals on the Tyne and Wear. The earliest English tonnage law was passed in 1422, and applied exclusively to " keels " used in carrying coals at Newcastle-on-Tyne. Its object was to measure accurately the " portage " of each keel, and to mark that portage on the vessel so that the King's due of " two pence " per chaldron might be secured. In 1679 a further Act was passed, extending the law to the Wear, and in 1694 deadweight was substituted for chaldron measure. An Act of 1775 extended this law to vessels loading coal in any of the ports of the United Kingdom. The Act of 1694 was the first Act of Parliament embodying a rule for

estimating tonnage for English sea-going, and coasting ships. As the *first English Tonnage Rule*, it is worth reproducing, though the Act was repealed in 1696. It ran as follows:—

L = length of keel (so much as she treads on the ground).
B = breadth amidships (inboard, from plank to plank).
D = depth of hold (from plank below keelson to under part of plank of upper deck, up to which cargo is stowed).

$$\text{Tonnage} = \frac{L \times B \times D}{94}$$

The next English tonnage law, enacted in 1773, applied to all classes of merchant ships. It continued, legally, in force up to 1835, and is even now used, and known as the B.O.M., or

Builder's Old Measurement Rule.—In carrying out this rule, the length was taken on a straight line along the rabbet of the keel from the back of the main stern post to a perpendicular line let fall from the fore part of the main stem under the bowsprit. The breadth was the extreme breadth to the outside planking, exclusive of doubling planks or strakes that might be wrought at that part.

If L = length, B = breadth, then tonnage (B.O.M.) $= \frac{(L = \frac{4}{5}B) \times B \times \frac{B}{2}}{94}$.

Following this brief retrospect, let us now consider present-day methods of computing the tonnage of our ships.

Displacement.—To the lay mind, displacement tonnage must convey the most ready and accurate idea as to the relative sizes of ships, as it gives their *actual weights*, or, in other words, the weights of the volumes of water they displace. It is the system used in denoting the tonnage of all warships. As Sir William White says in his classic work on Naval Architecture, it is usual to express the volume in cubic feet, and for sea water to take 64 lb. as the weight of a cubic foot; so that the weight of the ship in tons multiplied by 35 gives the number of cubic foot in the volume of displacement when the ship floats in sea water. If our ships were simple parallelopipedons, the displacement in tons would, of course, be quickly arrived at, by simply multiplying the length in feet on the load line by the breadth, also in feet, on the load line by the mean draught in feet, and dividing the product by 35. But, as the under bodies of our ships are anything but simple rectangular forms, two processes are generally made use of in computing a vessel's displacement, as the calculations in each process are required to determine the position of the centre of gravity of displacement, or centre of buoyancy, and also because the two results are a check on the correctness of the calculations. One process consists in dividing the length of the ship on the load water-line by a number of equi-distant vertical sections, computing their several areas by one of Simpsons' rules, and then treating them as if they were the ordinates of a new curve, the base of which is the load water-line. In the other process the depth of the vessel below the load water-line is divided by a number of equi-distant longitudinal planes parallel to the water-line. The areas of these are computed by Simpson's rules, and are treated as if they were the ordinates of a new curve, the base of which is the vertical distance between the load water-line and the lowest longitudinal plane.

Gross Register Tonnage.—Gross register tonnage is reckoned at the rate of 100 cubic ft. of capacity, and is measured according to the Merchant Shipping Act, 1894, by taking the areas of a number of transverse sections, varying in number from 4 in ships not exceeding 50 ft. in length to 12 in vessels of over 225 ft. The areas are then treated as the ordinates of a new curve of the same length as the vessel, and the area of the new curve, found by Simpson's first rule, will be the capacity of the vessel in cubic ft., which, being divided by 100, gives the gross register tonnage. Approximately, gross register tonnage may be found by the following formula:—

L = the inside length on upper deck, from plank at stem to plank at stern.
B = the inside main breadth.
D = the inside midship depth from upper deck to ceiling, at limber strake.

$$\text{Register tonnage} \quad \frac{L \times B \times D}{100} \text{ C.}$$

C ·65 for steamers of two decks.
·68 for steamers of three decks.

The values thus obtained give the entire cubical capacity of the ship. The capacity of the poop, deck houses, and other permanently enclosed spaces is to be measured and included, but deductions are allowed for buildings erected for the shelter of passengers only, for crew space at the rate of 120 cubic ft. per man, and for propelling space. This third item, for screw steamers, is taken as 32 per cent., if the cubic content of the space is 13 per cent. and under 20 per cent. of the gross tonnage; but, if the space is less than 13 per cent. or more than 20 per cent. of the gross tonnage, then either the 32 per cent. or $1\frac{3}{4}$ times the space may be deducted. Deductions are also allowed for (i) any space, used exclusively for the accommodation of the master, (ii) any space used exclusively for the working of the helm, the capstan, and the anchor gear, or for keeping charts, signals, instruments of navigation, and boatswain's stores, (iii) the space occupied by the donkey engine and boiler, if connected with the main pumps of the ship, and (iv) any space (other than double bottom) adapted only for water ballast.

Net Register Tonnage.—This is a very elastic term, and is arrived at by deducting the various allowances specified above from the gross register tonnage, to which it bears no ratio or proportion; in fact, it may even become a minus quantity. We have now examples of coasting steamers of 270 tons gross register carrying 220 tons dead-weight, and trading on a net register of 12 tons.

Admiralty Datum.—The practice of the British Admiralty is to refer their soundings and tide-tables to "mean low-water mark of ordinary spring tides." This datum is found by taking the mean of the low-water marks of such observations at spring tide as are available; or, if the observations are very extensive, by excluding from the mean such spring tides as appear to be abnormal owing to the largeness of the moon's parallax at the time, or any other cause.

Ordnance Survey Datum.—The datum of the Ordnance Survey of Great Britain is 4.67 ft. above the level of the Old Dock Sill, Liverpool, and all altitudes on Ordnance maps are taken from this datum.

GOVERNMENT DEPARTMENTS.

THE ADMIRALTY.

ADMIRALTY OFFICE, Whitehall.

LORDS COMMISSIONERS—FIRST LORD, Right Hon. Winston L. S. Churchill, M.P. (with house), £5,000; Admiral Lord Fisher of Kilverstone, G.C.B., O.M., G.C.V.O., LL.D., £1,500 (with house); Vice-Admiral Sir Frederick Tower Hamilton, K.C.B., C.V.O., £1,500; Rear-Admiral Frederick C. T. Tudor, C.B., £1,500; Captain Cecil F. Lambert, R.N., £1,500. CIVIL LORD, Right Hon. George Lambert, M.P., £1,000. CIVIL LORD, "Admiralty Buyer and Business Manager," Right Hon. Sir Francis J. S. Hopwood, G.C.M.G., K.C.B., £3,000. The Sea Lords receive professional pay in addition to the above salaries.

PARLIAMENTARY AND FINANCIAL SECRETARY, Right Hon. T. J. Macnamara, LL.D., M.P., £2,000.

PERMANENT SECRETARY, Sir William Graham Greene, K.C.B., £2,000.

ASSISTANT SECRETARY, Oswyn Alexander Ruthven Murray, C.B., £1,400.

NAVAL SECRETARY TO THE FIRST LORD, Rear-Admiral Hon. Horace L. A. Hood, C.B., M.V.O., D.S.O.

CHIEF OF THE WAR STAFF, Vice-Admiral Sir Frederick C. Doveton Sturdee, K.C.B., C.V.O., C.M.G., £1,800.

DIRECTOR OF NAVAL ORDNANCE AND TORPEDOES, Captain Morgan Singer, A.D.C., £1,500.

HYDROGRAPHER, Capt. J. F. Parry, R.N., £1,500.

DIRECTOR OF TRANSPORTS, Rear-Admiral Herbert W. Savory, M.V.O., £1,200.

DIRECTOR OF VICTUALLING DEPARTMENT, James Henry Brooks, C.B., £1,200.

DIRECTOR OF NAVAL CONSTRUCTION, E. H. Tennyson d'Eyncourt, £2,000.

ENGINEER-IN-CHIEF, Engineer Vice-Admiral Sir Henry J. Oram, K.C.B., £1,500.

DEPUTY ENGINEER-IN-CHIEF, Engineer Capt. G. G. Goodwin, £1,200.

DIRECTOR OF DOCKYARDS, Sir J. B. Marshall, K.C.B., £1,500.

ACCOUNTANT-GENERAL OF THE NAVY, Sir Alfred Eyles, K.C.B., £1,500.

ASSISTANT SECRETARY FOR FINANCE, Vincent Wilberforce Baddeley, C.B., £1,200.

DIRECTOR OF CONTRACTS, Sir F. W. Black, C.B., £1,400.

MEDICAL DIRECTOR-GENERAL Sir Arthur W. May, K.C.B., F.R.C.S., £1,800.

ADMIRAL COMMANDING COASTGUARD AND NAVAL RESERVES, Vice-Admiral Sir Arthur M. Farquhar, K.C.B., C.V.O.

DIRECTOR OF STORES, Sir John Forsey, £1,200.

DIRECTOR OF WORKS AND CIVIL ENGINEER-IN-CHIEF, Thomas Sims, C.B., £1,500.

DEPUTY ADJUTANT-GENERAL OF ROYAL MARINES, General William C. Nicholls, K.C.B., £1,500.

Private Secretaries.

First Lord—J. E. Masterton Smith, C.B., E. H. Marsh, C.M.G., Gerald A. Steel, A. F. White, M.P. (unpaid), Hon. E. T. W. Fiennes, M.P. (unpaid). Parliamentary Secretary—L. G. Broch. First Sea Lord—James Sidney Barnes. Second Sea Lord—Philip Edward Marrack. A.D.C. Third Sea Lord—J. A. C. Campion. Junior Sea Lord—Harold Eastwood. Civil Lord—N. McLeod. Additional Civil Lord—Ceail Perham.

THE BOARD OF TRADE.

BOARD OF TRADE OFFICE, 7, Whitehall Gardens, S.W.

PRESIDENT, Right Hon. Walter Runciman, M.P., £5,000. Private Secretaries, R. W. Matthew, E. R. Eddison, Cecil Harmsworth, M.P. (unpaid).

PARLIAMENTARY SECRETARY, J. M. Robertson, M.P., £1,500. Private Secretaries, G. C. L. Maunder, A. C. Beck, M.P. (unpaid).

PERMANENT SECRETARY, Sir Hubert Llewellyn Smith, K.C.B., £2,000. Private Secretaries, W. Carter, W. W. Marsh.

SECOND PERMANENT SECRETARY, George Stapylton Barnes, C.B., £1,500.

PROFESSIONAL MEMBERS, Capt. A. F. H. Young, F.R.G.S., Capt. C. E. Monro, R.N.

SOLICITOR, Sir R. Ellis Cunliffe, £1,800.

Marine Department.

Assistant Secretary, E. G. MOGGRIDGE.

SUBJECTS.—Naval Courts. Boiler Explosions. Crew Spaces. Discipline. Relief of Distressed Seamen (Rules and Principles). Examinations of Masters, Mates, and Engineers. International Code of Signals. International Questions concerning Shipping. Life-Saving Apparatus. Ships' Lights. Lime and Lemon Juice, and Anti-Scorbutics. Load Line. Medical Scale for Merchant Ships. Mercantile Marine Offices and Local Marine Boards. Inquiries into Misconduct. Naval Reserve. Survey of Passenger Ships. Rewards for Saving Life. Measurement of Tonnage. Training Ships. Unseaworthy Ships. Inquiries into Wrecks and Casualties. Wreck Register. Liability of Shipowners. Registration of Ships.

Finance Department.

Accountant-General, Alexander Barnes.

SUBJECTS.—Accounts and Estimates of all Departments of the Board of Trade. Accounts of Lighthouse Boards. Accounts of Consuls and Colonial Shipping Masters, including Accounts of Reliefs of Distressed Seamen. Accounts of Superintendents and Receivers of Wreck. Claims on Owners of Vessels. Life Assurance Companies Returns. Merchant Seamen's Fund (Pensioners'). Seamen's Mone Orders. Pensions. Greenwich Hospital Fund. Seamen's Savings Banks. Seamen's Temporary Deposit Bank (Liverpool). Wages and Effects of Deceased Seamen.

Harbour Department.

Assistant Secretary, GARNHAM ROPER.

SUBJECTS.—Foreshores. Harbours. Lighthouses and fixed Fog-signals. Loans to Harbour Authorities. Local Charges on Shipping. Pilotage. Protection of Navigable Channels, etc. Provisional Orders, Piers and Harbours. Quarantine. Tidal Waters, Wreck and Salvage. Electric Lighting. Gas and Water.

Railway Department.

Assistant Secretary, W. F. MARWOOD, C.B.

SUBJECTS.—Art Unions. Canals. Charters. Copyright and Trade Marks. Industrial Exhibitions. Joint Stock Companies. Railways. Registry of Designs. Telegraphs, Tramways, Standards.

Commercial Department.

Assistant Secretary, H. FOUNTAIN, C.M.G.

SUBJECTS.—Commercial Questions and Statistics generally. *Board of Trade Journal.* Trade Accounts. The Commercial Intelligence Branch of the Department, 73, Basinghall Street, E.C., provides information on Tariffs, etc.

Chief Industrial Commissioner.

Chairman, Sir GEORGE R. ASKWITH, K.C.B., K.C.

SUBJECTS.—Settlement of Industrial Disputes.

Labour Exchanges.

Assistant Secretary, W. H. BEVERIDGE.

SUBJECTS.—Wages and Conditions of Labour. Labour Exchanges.

Patent Office, 25, Southampton Buildings, W.C.

Comptroller-General of Patents, Trade Marks, and Designs, W. TEMPLE FRANKS, C.B.

Bankruptcy Department.

Inspector-General in Bankruptcy, J. G. WILLIS, C.B.

SUBJECTS.—General Administration of Bankruptcy Acts and regulations and procedure thereunder.

Companies' Department.

Comptroller of Companies, H. A. PAYNE.

General Register and Record Office of Shipping and Seamen, Tower Hill, E.

Registrar-General of Shipping and Seamen, CHARLES H. JONES.
Assistant, GEORGE A. HOOKE.

SUBJECTS.—Central Register of Ships belonging to the United Kingdom and Colonies; Mercantile Navy List; International Code of Signals Book; British Code List; Sea Apprentices' Indentures. Central Indexed Register of Seamen; Custody and Record of Ships' Agreements, Official Log Books, etc.; Central Register of Sea Fishing Boats; Registration of Births, Deaths and Marriages at Sea; Continuous Certificates of Discharge. Issue and record of Certificates of Masters, Mates, Engineers, Skippers, Second Hands and Cooks. Royal Naval Reserve —General Register and Index of Force.

Consultative Establishment, Marine Department, 54, Victoria Street, S.W.

Engineer Surveyor-in-Chief and Inspector of Chain Cables and Anchor Testing Establishments, A. BOYLE.
Principal Shipwright Surveyor, W. D. ARCHER.
Principal Surveyor for Tonnage, T. F. JENKINS.
Principal Examiner of Masters and Mates, JOSEPH M. HARVEY (68, Victoria Street, S.W.).

Office for Survey and Admeasurement of Steamships, Examination of Engineers, and Superintendence of Emigration, 79, Mark Lane, E.C.

Principal Officer for London District, R. C. WARDEN.
Chief Examiner of Engineers, W. T. SEATON.
Chief Inspector of Ships' Provisions, W. L. SERVICE.

Inspector of Lime and Lemon Juice.

Dr. J. E. THORPE, C.B., Principal of the Government Laboratory, Clement's Inn Passage, Strand, W.C.

HIS MAJESTY'S CONSULAR SERVICE.

List of Places and Countries where British Consular Officers Reside, with their respective ranks.

Communications for such officers, unless of a personal nature, should be addressed to The British Minister, The British Consul-General, The British Consul (as the case may be), without the name being given. Addressing a Consular Officer by name occasionally leads to delay in the delivery of letters, and their detention, owing to the transfer or absence on leave of officers so addressed.

[The names and rank of Consular Officers resident at Ports will be found in the Port Directory of this book, corrected up to the time of going to press.]

Explanation of the abbreviations used: M. & C.G., Minister and Consul-General; A. & C.G., Agent and Consul-General; C. d'A. and V.C., Chargé d'Affaires and Vice-Consul; C.G., Consul-General; C., Consul; V.C., Vice-Consul; C.A., Consular Agent.

CUSTOMS BOARDING STATIONS.

[Published by authority of Board of Customs, granted Oct. 30, 1901.]

REVISED LIST OF PORTS AND CREEKS in the United Kingdom, showing the places approved by the Commissioners of His Majesty's Customs as Boarding Stations, with reference to Section 14 of the Customs Consolidation Act, 39 and 40 Vict., cap. 36.

NOTES.—(1) The Ports marked * are Head Ports. (2) At places marked † no Officer of Customs is stationed, but Boarding duties are undertaken either by Officers from a neighbouring Customs Station, or by Coast Guard Officers. (3) Masters of vessels on arriving at Ports of the United Kingdom from the Channel Islands must bring-to at appointed Boarding Stations.

ENGLAND.

ABERDOVEY.†—A little West of Town in River Dovey.

ABERYSTWITH.—The Harbour.

ALDEBURGH.†—Orford Haven, at entrance of Rivers Ore and Alde.

AMBLE.—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907, vessels from infected places or districts, and vessels with "dangerous infectious disorders" on board: Off the West Jetty at the buoy at dolphin.

AMLWCH.—Within Harbour.

APPLEDORE.—Skern and Watch-house.

AVONMOUTH.—King Road, and entrances to Royal Edward and Avonmouth Docks.

BARMOUTH.†—In Harbour.

BARNSTAPLE.—Skern and Watch-house, Appledore.

BARROW.*—Ramsden Dock Basin. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Order of the Local Government Board, Sept. 9, 1907, and vessels with "dangerous infectious disorders" on board: Piel Harbour, or outside the channel off Lightning Knoll Buoy, as the draught of the ship necessitates.

BARRY DOCK.—Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907: Off entrance to Barry Dock in Barry Roads. All other vessels including those with "dangerous infectious disorders" on board: Lady Windsor Lock or adjoining Barry Basin entrance.

BEAUMARIS (Bangor). — Fryar's Roads, opposite Town.

BERWICK-ON-TWEED.* — Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined in Art. 1, Part I., of Order of Local Government Board, Sept. 9, 1907: Short distance above Carr Rock Jetty in Harbour.

BIDEFORD.†—Skern and Watch-house, Appledore.

BLACKTOFT.†—See Goole.

BLAKENEY AND CLAY.†—Blakeney and Clay Harbour.

BLYTH.*—Within Blyth Harbour. Vessels "infected" or "suspected" as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907, vessels from infected places or districts, and vessels with "dangerous infectious disorders" on board: Alongside Seven Stars Jetty, on North side of Blyth Harbour.

BOSCASTLE.†—The Harbour.

BOSTON.*—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined in Art. 1, Part I., of Order of Local Gov. Board, Sept. 9, 1907, and vessels with cases of "dangerous infectious disorders" on board: Clay Hole at mouth of River Witham.

BRIDGWATER. — Between Low

Lighthouse and Pier at Burnham.

BRIDPORT.—Outer Buoy, distant about 300 yards from and abreast of Harbour.

BRISTOL.*—King Road in River Severn, and entrance to River Avon at Avonmouth. For vessels from infected countries, King Road.

BRITON FERRY.—Briton Ferry, near entrance of Neath River.

BRIXHAM.—Between Pier and Breakwater.

BURNHAM.† — Crouch River, abreast Coast Guard Watch-vessel.

BURNHAM.—Between Low Lighthouse and Pier.

CALSTOCK.†—See Plymouth.

CARDIFF.*—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907: About one mile N.N.E. of Flat Holm Island, close to a Trinity Buoy.

CARDIGAN.—Pwllcam, a little inside Harbour's mouth.

CARLISLE.—Silloth Dock.

CARMARTHEN.†—River Towy, opposite Railway Station, Ferryside.

CARNARVON.*—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I, Local Gov. Board Order, Sept. 9, 1907: Inside Abermenai.

CASTLETOWN.—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Local Government Board Regulations (Isle of Man), July 4, 1908: The Bay, within mile of Harbour.

CHARLESTOWN.—Placeof mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907, vessels from infected places or districts and vessels with "dangerous infectious disorders" on board: anchoring grounds outside Harbour.

CHEPSTOW.—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined in Art. 1, Part I., of Order of Local Gov. Board, Sept. 9, 1907, and vessels from infected places or districts: King Road in River Severn.

CHESTER.—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907, vessels from infected places or districts and vessels with "dangerous infectious disorders" on board: That part of Mostyn Roads lying a little to E. of Mostyn Gut, in River Dee.

COLCHESTER.*—In River Colne, off Mersea Stone, Mersea Island on one side and Brightlingsea on other.

CONNAH'S QUAY.—See Chester.

CONWAY.—In the Roadstead, opposite Town.

COWES.*—The Roadstead of Cowes, extending from Old Castle Point to Egypt Point, about 2½ miles from E. to W.

DARTMOUTH.*—Between mouth of Harbour and SandquayPoint.

DEAL.—In Downs, in open Roadstead.

DOUGLAS.*—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Local Government Board Regulations (Isle of Man), July 4, 1908: Inside Breakwater.

DOVER.*—The Outer Harbour.

ELLESMERE PORT.—That part of River Mersey opposite shore which lies between Tranmere Ferry and Bromborough Pool.

EXETER.*—At Passage Way, Exmouth.

EXMOUTH.—At Passage Way, Exmouth.

FALMOUTH.*—Place of anchorage, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the

Order of the Local Government Board, Sept. 9, 1907; vessels from infected places or districts; and vessels with "dangerous infectious disorders" on board: St. Just Pool, in Falmouth Harbour.

FAVERSHAM.—Place of mooring, loading or discharge. Vessels "infected" or "suspected," as defined in Art. 1, Part I, of Order of Local Gov. Board, Sept. 9, 1907, and vessels with cases of "dangerous infectious disorders" on board: In the East Swale, between mouth of Faversham Creek and Horse Sand Buoy.

FELIXSTOWE DOCK and MISTLEY.—See Harwich.

FERRYSIDE.†—River Towy, opposite Railway Station, Ferryside.

FISHGUARD and GOODWICK.†—Place of discharge. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Order of the Local Government Board, Sept. 9, 1907, and vessels from infected places and districts: North edge of the Anchorage, Fishguard Bay.

FLEETWOOD.—Alongside Harbour Quays outside Dock, or at the entrance to Dock.

FLINT.†—See Chester.

FOLKESTONE.*—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907, and vessels from infected places or districts: Point one mile S. by W. of Harbour Pier-head.

FOWEY.—Place of mooring, loading or discharge. Vessels "infected" or "suspected," as defined in Art. 1, Part I., of Local Government Board Order, Sept. 9, 1907, vessels from infected places or districts, and vessels with "dangerous infectious disorders" on board: Outside line drawn from Polruan Quay to landing place at Whitehouse.

GAINSBOROUGH.†—See Hull.

GLASSON DOCK.—Glasson Dock.

GLOUCESTER.*—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I, of Order of Local Gov. Board for Ports of Bristol and Gloucester, Feb. 18, 1909, and vessels from infected places or districts: King Road in River Severn. Vessels from infected places or districts not promptly visited at King Road, and vessels with cases of "dangerous infectious disorders" on board: Tidal Basin or Lock, Sharpness.

GOOLE.*—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907, and vessels with "dangerous infectious disorders" on board: Hull Roads, between entrances to Humber Dock and Alexandra Dock.

GRIMSBY.*—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907: North side of Middle Sand in River Humber, bearing about 3 miles N.N.E. of Grimsby Pier, about 1 mile from Yorkshire coast at low water, in vicinity of Sunk Spit Buoy No. 6.

GWEEK.†—Durgan Roads, at entrance of River Hel.

HARRINGTON.†—See Workington.

HARTLEPOOL, OLD.—At Harbour and entrances to Docks.

HARTLEPOOL, W.*—At Harbour and entrances to Docks.

HARWICH.*—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined in Art. 1, Part I., of Order of Local Gov. Board, Sept. 9, 1907, and vessels with cases of "dangerous infectious disorders" on board: That part of the Harbour eastward of the leading beacons and lights in line included between two

imaginary lines drawn from Harwich River Steam Pier to Fagborough Cliff, and from the Coastguard Station at Harwich to the Martello Tower at Walton, Suffolk.

HAYLE.—Place of mooring, discharge or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Local Government Board Order, Sept, 9, 1907: Inside Hayle Harbour after passing narrow passage.

HEYSHAM.—Vessels may proceed to their places of discharge. Vessels deemed to be "infected," as defined by Art. 1, Part I., of the Order of the Local Government Board, or those from infected places or districts, shall bring to at the upper part of Heysham Lake.

HOLYHEAD.—In Harbour.

HULL.*—Place of mooring, discharge, or loading Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907, and vessels with "dangerous infectious disorders" on board: Hull Roads, between entrances to Humber Dock and Alexandra Dock.

ILFRACOMBE.—The Harbour.

IMMINGHAM.—See Grimsby.

IPSWICH.—See Harwich.

ITCHENOR.—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907, and vessels from infected places or districts: Eleanor Point, about 2 miles W.S W. of Itchenor.

KEADBY.—See Hull.

LANCASTER.†—Glasson Dock, on River Lune.

LEIGH.†—On W. side of Southend Pierhead.

LITTLEHAMPTON.—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Local Government Board Order, Sept. 9, 1907,: Runcorn Piles.

LIVERPOOL.*—Vessels requiring Quarantine examination to bring-to as nearly in middle of River Mersey as possible, between Princes Landing Stage on Lancashire side and Alfred Dock on Cheshire side, and between Salisbury Dock on Lancashire side and Egremont Ferry on Cheshire side. Other vessels at entrance of respective Docks.

LLANELLY.*—Between Harbour Light and Customs Watchhouse.

LONDON.*—Gravesend Reach, below Custom House.

LOOE.†—Same as Charlestown, *q.v.*

LOWESTOFT.*—The Outer Harbour.

LYDNEY.—See Chepstow.

LYME REGIS.†—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., Local Gov. Board Order, Sept. 9, 1907: Outside the Pier or Cobb of Lyme Regis.

LYMINGTON.—Place of mooring, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of Order of Local Gov. Board, Sept. 9, 1907: Off Oxey Lake.

LYNN.*—The intermediate space of River Ouse, between S. or Upper end of Marsh Estuary Cut and Purfleet Quay.

MALDON.—In the River Blackwater, abreast of the Coast Guard flagstaff at Bradwell.

MALPAS.†—Place of anchorage, discharge, or loading. Vessels "infected" or "suspected," as defined by Art. 1, Part I., of the Order of the Local Government Board, Sept. 9, 1907; vessels from infected places or districts; and vessels with "dangerous infectious disorders" on board: St. Just Pool, in Falmouth Harbour.

MANCHESTER.*—That part of River Mersey opposite shore which lies between Tranmere Ferry and Bromborough Pool.

Dominion Line		

POST OFFICE PAYMENTS TO OCEAN MAIL LINES.

A fixed annual postal subsidy of £68,000, under the terms of the contract with H.M. Post Office is paid to the Cunard Steamship Company, and one of £305,000 under similar conditions to the Peninsular and Oriental Steam Navigation Company. Payments are made to the White Star Line and the American Line on the basis of the weight of mails carried, with a maximum limit of £70,000 per annum in the case of the White Star Line. The Orient Line and Union-Castle Company perform their services under Colonial contracts, and payments are made direct to the companies by the Australian and the South African postal administrations. Great Britain makes to the Colonial Governments a contribution based on its own use of the service. The Peninsular and Oriental Company's contract terminates on January 31, 1915, subject, however, to twenty-four months' notice. There is no provision for its termination before that date. The mail contract between the Government of the Union of South Africa and the Union-Castle Company, which came into force on October 1, 1912, provides for an annual payment of £171,000 with an additional £19,000 per annum if a 16 days' service is demanded.

THE CUNARD MAIL AND STEAMSHIP PAYMENTS.

The annual payment made to the Cunard Steamship Company out of the British Post Office Vote is £68,000. The main service performed

in respect of this sum is the conveyance of letter and parcel mails by the weekly mail-boats from Liverpool to New York. The company are also required, subject to certain reservations, to convey, without additional payment, letter and parcel mails from this country to the United States and parcel mails from New York to Liverpool by any steamships of the company performing the service for their own purposes. The present contract is for twenty years, terminating on November 15, 1927. A total sum of about £10,000 per annum is recouped from foreign and Colonial administrations, but it cannot be stated how much of this is in consideration of the more rapid service afforded by the ships in question. The annual subsidy paid to the Cunard Steamship Company out of the Navy Votes is £150,000—viz., £75,000 each in respect of *Mauretania* and *Lusitania*. In consideration of this payment the company are bound during the term of the agreement to hold all their vessels at the disposal of His Majesty's Government to be hired or purchased upon certain conditions. The agreement is for twenty years from November 16, 1907.

THE WEST INDIA MAILS.

The British Government and the Royal Mail Steam Packet Company in January, 1911, entered into a new mail contract, for a period of seven years. In return for a payment of £63,000 per annum, towards which the West Indies contribute £23,000 per annum, the R.M.S.P. Company undertake a fortnightly mail service between England and the West Indies. At present the R.M.S.P. Company have a contract under which they receive £25,000 a year for the inter-Colonial distribution of the mails, half of which sum is paid by the Imperial Government, and the other moiety by the West Indian Colonies.

* In Austria, Belgium, Germany, and several other countries shipbuilding bounties take the form of so much per ton, according to material and type of construction, and the total amount so paid is not ascertainable, although it is considerable. In Belgium and Germany the free entry of shipbuilding materials is permitted, and in the latter country preferential railway rates as well as special Customs facilities for shipbuilding goods are allowed.

[*Note.*—Where no mail payments are given the sums allowed are included in the preceding columns. Where blanks occur in the other columns no information is available. In several instances the figures given are approximate.]

NORTH ATLANTIC "LANE" ROUTES.

The rules adopted by the steamship companies with reference to the establishment of routes in the North Atlantic came into effect on January 15, 1899. The companies adopting the rules are:—The American Line, Atlantic Transport Company, Compagnie Générale Transatlantique, Cunard Line, Elder Dempster & Co., Furness Line, Hamburg-Amerika Line, Holland-Amerika Line, W. Johnston & Co., National Steamship Company, Norddeutscher Lloyd, Red Star Line, Wilson Line, White Star Line. The following are the rules:—

WESTBOUND.

From January 15 to August 14, both days inclusive.—Steer from Fastnet, or Bishop Rock, on Great Circle course, but nothing south, to cross the meridian of 47° west in latitude 42° north, thence by either rhumb line, or Great Circle (or even north of the Great Circle if an easterly current is encountered), to a position south of Nantucket Light-vessel, thence to Fire Island Light-vessel, when bound for New York, or to Five Fathom Bank South Light-vessel, when bound for Philadelphia.

From August 15 to January 14, both days inclusive.—Steer from Fastnet, or Bishop Rock, on Great Circle course, but nothing south, to cross the meridian of 49° west in latitude 46° north, thence by rhumb line to cross the meridian of 60° west, in latitude 43° north, thence also by rhumb line, to a position south of Nantucket Light-vessel, thence to Fire Island Light vessel, when bound to New York, or Five Fathom Bank South Light-vessel, when bound for Philadelphia.

Eastbound.

At all seasons of the year steer a course from Sandy Hook Light-vessel, or Five Fathom Bank South Light-vessel, to cross the meridian of 70° west, nothing to the northward of latitude 40° 10′.

From January 15 to August 23, both days inclusive.—Steer from 40° 10′ north, and 70° west, by rhumb line, to cross the meridian of 47° west in latitude 41° north, and from this last position nothing north of the Great Circle to Fastnet, when bound to the Irish Channel, or nothing north of the Great Circle to Bishop Rock, when bound to the English Channel.

From August 24 to January 14, both days inclusive.—Steer from latitude 40° 10′ north, and longitude 70° west, to cross the meridian of 60° west in latitude 42° 0′ north, thence by rhumb line to cross the meridian of 45° west in latitude 46° 30′ north, and from this last position nothing north of the Great Circle to Fastnet, when bound to the Irish Channel, and as near as possible to, but nothing north of, the Great Circle to Bishop Rock, always keeping south of the latitude of Bishop Rock, when bound to the English Channel.

General Instruction.

When courses are changed at the intersections of meridians any time before or after noon, you will note in your logs both distances to and from the meridians that the ship has sailed from noon to noon, and not the distance from the position at noon the day before to the position at noon the day after the meridian is crossed.

LLOYD'S COMMERCIAL MARITIME SIGNALLING.

The Society of Lloyd's, incorporated by Act of the British Parliament and the Royal Assent of Her late Majesty Queen Victoria, has, with the sanction of Parliament, the control and working of Signal Stations in Great Britain and Ireland, and in many places abroad. Various foreign Governments have also recognised the advantage of reports from Signal Stations and Semaphores being universally collected and forwarded on identical conditions. These have arranged that reports from or to their Semaphores can be obtained or forwarded through Lloyd's.

Thus one universal system of receiving and transmitting maritime reports extends over a wide area. The organisation of Signal Stations is made very favourable for shipowners and merchants, and the commerce of the world in general. If, for instance, a shipowner, charterer, or consignee wishes to transmit an order to any vessel at any point

where she may appear, one communication to Lloyd's is sufficient to ensure the message being given at any or all of these Stations, as may be desired.

The charges for forwarding information from, or transmitting advices by means of Signal Stations, are moderate. Shipowners, charterers, merchants, or consignees, can obtain telegraphic intelligence at small cost with regard to any vessel in which they may be interested, or postal advices, if so preferred, or can transmit orders to such vessels, by merely communicating with the Secretary of Lloyd's.

Harbour and dock authorities, Chambers of Commerce, Exchanges, and such Institutions that may require a large number of reports, can arrange with Lloyd's for receiving full and regular advices from Lloyd's Signal Stations on reduced terms, for when a number of reports are taken, a substantial reduction is made in the signalling fees.

Shipowners or others who wish to be supplied with reports of vessels from any Signal Stations are requested to communicate with the Secretary of Lloyd's, London, E.C.

The following is a list of Signal Stations at which signals are received from and made to merchant vessels of all nations:—

United Kingdom.

Southend (A)
*†Dover (L)
‡Sandgate (A)
*†Dungeness (A)
*†Beachy Head (A)
*†Horse Sand Fort (Spithead) (S)
*†St. Catherine's Point (I.W.) (L)
Needles (I.W.) (A)
Portland Bill (L)
‡Berry Head (Brixham) (A)
*†Prawle Point (L)
*†The Lizard (L)

St. Abb's Head (L) [(L)
*Tynemouth (L) (Hailing Station)
*†Flamborough Head (A)
Spurn Head (L)
Haisbro' Lightship (S)
Aldeburgh (A)

(L) Stations belonging to Lloyd's.

(A) Stations belonging to the Lords Commissioners of the Admiralty, but signalling is conducted at them on behalf of Lloyd's.

(S) At these Stations special arrangements have been made for signalling being conducted for Lloyd's.

* At these Stations arrangements have been made for night-watch to be kept in order to take in pyrotechnic night signals made by passing vessels whose owners have such private night signals registered by the Board of Trade. The Signal to intimate that a vessel's pyrotechnic night signal has been seen and recognised is a red flare light of 30 seconds duration.

† At these Stations arrangements have also been made to take in, in addition to the above pyrotechnic night signals, any messages made at night by means of a flashing lamp in accordance with the Morse code, as laid down in the International Code of Signals Book. Messages may be transmitted from these Stations to vessels by flashing lamp in the same manner.

‡ At these Stations communication is restricted to vessels sheltering through stress of weather.

N.B.—The Fastnet and Inishtrahull Stations are connected with the mainland by Wireless Telegraphy.

ABROAD.

EUROPE (West Coast).

	Cape Magdalen	
	Father Point	

* At these Stations arrangements have been made to take pyrotechnic night signals.

† At these Stations arrangements have also been made to take in, in addition to the above pyrotechnic night signals, any messages made at night by means of a flashing lamp in accordance with the Morse code, as laid down in the International Code of Signals Book. Messages may be transmitted from these Stations to vessels by flashing lamp in the same manner.

‡ Singapore.—At these Stations day watch only is kept, but if it is desired to keep watch for a vessel with a view to delivering orders during the night the aid of the Singapore Pilots Association's launch can be obtained. The charge for this launch at night time is $5 per hour. It is desirable that owners should state always when a vessel is due to arrive for orders and also whether the vessel will wait until daylight to obtain her orders, or whether the Pilots Association's launch is to be utilized.

Wireless Stations.

All Wireless Shore Stations which have been established in the United Kingdom for ship to shore communication have been taken over by the General Post Office, but Lloyd's receives information from these Post Office Stations in regard to the position and movements of ships and other maritime intelligence.

Gales.

The Meteorological Office sends to the Signal Stations at St. Catherine's Point, Horse Sand Fort, Prawle Point, the Lizard, Lundy Island, Flamborough Head, St. Abb's Head, Dunnet Head, Brow Head, and Old Head of Kinsale telegrams announcing atmospheric disturbances near the Coasts of the British Islands. The fact that one of these notices has been received at any Station is made known by hoisting a Cone three feet high and three feet wide at base, which appears as a triangle when hoisted. The cone is kept hoisted until dusk, and then lowered, but is hoisted again at daylight next morning.

Southerly Gale.—The SOUTH CONE (*point downwards*) is hoisted for Gales and Strong Winds from S.E., veering to S.W., W. or N.W.; from S.W., veering to W. or N.W.; from W., veering to N.W.; and also from E., veering to S. or S.W.

Northerly Gale.—The NORTH CONE (*point upwards*) is hoisted for Gales and Strong Winds from S.E., E. or N.E. backing to N.; from N.W., veering to N., N.E. or E.; from N., veering to N.E. or E.; from N.E., veering to E.

Conditions for Signalling Orders to Vessels.

The following are the conditions on which the Committee of Lloyd's, subject to the discretion reserved by Condition No. 1, allow the use

of the Corporation Signal Stations (where in operation) for the purpose of reporting vessels and giving orders:—

I. The orders to be signalled to vessels must be sent to the Secretary's Office at Lloyd's for transmission to the Signal Station. Requests for vessels to be reported are also recommended to be sent to the Secretary's Office. The Committee reserve the right to decline to allow such orders or reports to be given or received whenever by reason of the inconsistent character of the orders or requests which they may have received, or for any other reason, they may think fit so to do.

II. The Committee will endeavour to establish for the convenience of Shipowners, Merchants, and others, a routine to insure the prompt transmission of such orders and requests for reports to the Signal Stations, and their staff at the Signal Stations will have instructions to give immediate attention to the giving, receiving, and forwarding of such orders and reports, but no employé or servant of the Corporation, or the Committee, shall as regards the receipt, transmission or communication of, or omission to transmit or communicate such orders, requests for reports, or reports, be considered as acting for the Corporation or for the Committee, nor shall the Corporation or the Committee be liable for the acts, neglects, or defaults of any such employé or servant, as regards such orders or reports, or for any errors, omissions, delays, or oversight in forwarding such orders or requests for reports, or in giving or failing to give such orders or communicating or failing to communicate such reports.

III. The Committee do not undertake to advise the parties from whom orders are received, in the event of the orders not being communicated to the vessel from any cause whatever.

IV. The Committee accept no responsibility for the fitness of the Signal Station as regards situation, condition, or equipment for the communication or reception of such orders or reports, nor does the Committee undertake to keep open such Signal Stations.

V. The forwarding of an order, or of a request for report, to the Secretary's Office shall be equivalent to an undertaking by the person forwarding the same to indemnify the Corporation and the Committee of Lloyd's against any claims by third parties arising out of or in consequence of orders or reports given or communicated, or the acts or omissions of any servant or employé of the Corporation or the Committee, or the use of the Corporation's Signal Stations and arrangements in connection with such order or report. Also to pay the charge as per tariff, and any disbursements which the Committee may think is necessary or reasonable to make for telegraphic communications with shipowners or any other person on the subject of such orders or reports, but the Committee do not undertake to make any such disbursements or communications.

Those on whose behalf orders are transmitted signify *ipso facto* their assent to the above conditions by their request for the transmission of the order.

TIME, AT FULL AND CHANGE,

When the following Lightships Swing from Flood to Ebb.

NAME OF LIGHTSHIP.	LAT.	LON.	TIME.	OBSERVATIONS.
	° ′ ″	° ′ ″	h. m.	
Bahama Bank	54 20 0 N	4 12 0 W	8 15	Half flood.

TIME AND KNOT TABLE.

1 Statute knot = 1/60 of a degree = 6,082·66 feet.
1 Admiralty knot = 6,080 feet. 1 Statute mile = 5,280 feet.
The figure in this table which corresponds to the time in which a vessel passes over the measured knot is her rate of speed per hour in knots.

Secs.	2 min.	3 min.	4 min.	5 min.	6 min.	7 m.	8 m.	9 m.	10 m.	11 m.	12 m.	13 m.	14 m.

NOTE.—To find the consumption of a vessel, say, of 5,500 I.H.P. at 1·4 lb. per I.H.P. per hour, take the 5,000 in the first column, which gives 75·0 tons, then take the 500 in the same column, which gives 7·5 tons, and add the two together = 82·5 tons per 24 hours; or, for example, 5,500 I.H.P × 1·4 lb. × 24 hours ÷ 2,240 = 82·5 per day.

COAL CONSUMPTION TABLE.

I.H.P.	×	·010714	=	tons per	24	hours at the rate of	1·0	lbs. per hour.

N.B.—Vessels fitted with motor and auxiliary engines are now withdrawn from the body of the sailing vessels' volume, therefore this must be taken into account when comparing the present statistics with those for previous years. This volume, however, contains a separate list of such vessels, the tonnage of which is not included in the above figures.

SECOND-HAND BRITISH VESSELS SOLD ABROAD.

The following Table gives the number and tonnage of second-hand merchant vessels on the Register of the United Kingdom sold to foreign countries during the past 17 years. It is compiled from official statistics, and indicates the enormous extent of foreign purchases:—

THE SUEZ CANAL.

(*See also* PORT SAID, SUEZ, *and the* SUEZ CANAL *in Port Directory.*)

The Suez Canal was projected by Ferdinand de Lesseps in 1852. The cutting was commenced in 1859, and the first vessel passed from the Mediterranean to the Red Sea on August 15, 1865. In 1869 the course was declared suitable for mail steamers. The official opening took place in November, 1869. The Canal was 11 years in construction, is 99 miles long, and is now over 32 ft. deep. On November 25, 1875, the British Government acquired by purchase shares to the amount of £4,076,622, the present value of which is £34,000,000, and the yearly revenue they bring in approaches a fourth of the total price paid for them. In October, 1888, a Convention agreeing to the neutralisation of the Canal was signed at Paris by the representatives of Great Britain and France.

EXTRACTS FROM THE REGULATIONS, RE-ISSUED JANUARY, 1913.

The Suez Canal is open to ships of all nations on condition that their draught of water, as ascertained by the officials of the Company, does not exceed 30 ft. [Jan. 1, 1915], and that they are well-found in every respect for navigation in the Canal.

Towage is compulsory in the case of :—(1) Sailing ships above 50 tons gross; (2) Any ship not considered by the officials of the Company as fulfilling the conditions necessary for safe navigation; (3) Ships carrying in bulk any quantity whatever of petroleum, or by-products of petroleum, having a flash point below 23 degrees Centigrade (73 degrees Fahrenheit). In all other cases ships may demand to be towed or convoyed through the Canal, subject to certain conditions. In such cases, towing or convoying is not compulsory on the Company, who undertake it only in so far as they have any tugboats disengaged.

The maximum speed of all ships passing through the Canal, is fixed at 10 kilometres (5¼ nautical miles) per hour.

Every vessel measuring more than 100 tons gross must take on board either for entering or leaving the ports of Port Said and Port Thewfik, or for passing through the Canal, a pilot of the Company who will furnish all particulars as to the course to be steered. The captain is held responsible for all groundings and accidents of whatsoever kind, resulting from the handling and navigating of his ship by day or by night. Pilots place at the disposal of captains of vessels their experience and practical knowledge of the Canal; but as they cannot be specially acquainted with the defects or peculiarities of each steamer and her machinery in navigating, stopping, steering, etc., the responsibility as regards the handling of the ship devolves solely upon the captain.

The Company prescribe the hour of departure of each ship and all subsequent stopping and restarting, as well as all other movements of the ship, in such manner as to give full security to navigation as well as to ensure, as much as possible, the rapid passage of mail steamers.

Steamers intending to go through the Canal by night must first satisfy the officials of the Company in Port Said or Port Thewfik, that they are provided:—(1) With an electric search-light or search-lights showing the channel 1,200 metres ahead and so constructed as to admit of rapid splitting up of the beam of rays into two separate segments of 5° each with a dark sector in the middle also of 5°; (2) With electric lights powerful enough to light up a circular area of about 200 metres diameter around the ship.

The net tonnage resulting from the system of measurement laid down by the International Tonnage Commission of Constantinople (1873) and inscribed on the special certificates issued by the competent authorities or on the ship's official papers, is the basis for levying the special navigation due which is at present 6.25 fr. Every vessel not provided with a special certificate or official papers giving the net tonnage laid down by the Constantinople Commission, is measured by the Company's officials in conformity with the Constantinople rules, and must pay her dues on such measurement until she produces a special certificate issued by the authorities of her own country. Ships in ballast are allowed a reduction of 2.50 fr. per ton on the full transit rate. Any ship carrying mails or passengers or having in her holds coals or merchandise of any description, in whatever quantity, is not considered as being in ballast. The space occupied by bunker coal must not exceed in volume 75% of the engine room as measured. Transit dues are charged on all passengers at the rate of 10 fr. per passenger above twelve years of age and 5 fr. per passenger between three and twelve. Children under three years of age pay no dues.

TRAFFIC OF THE CANAL.

Note.—Greenwich time is taken for British, French, and Belgian ports; Dublin time, for Irish ports; and Amsterdam time, for Dutch ports The "tide interval" to be subtracted is sometimes greater than the quantity from which it has to be taken, in which case 12 hours must be added to the London Bridge time; the resulting difference will be the preceding day's afternoon tide where the London morning tide was used. Sometimes, again, "high water at London Bridge" plus the "tide interval" will exceed 12 hours; in this case, the excess will be the time of high water after the noon or midnight following whichever London tide is taken.

*** Pages 343 to 364 are not required in this Edition. The hiatus is intended to facilitate repaging whenever additional pages are inserted in this General Section of the YEAR BOOK.

And for every additional 500 tons or part thereof, 5 per cent. of the rates for 1,000 tons. On vessels employed in the coast-

ing trade one-half of these rates. Additional rate, for intermediate portions of a foot dft., as follows, viz. :—For 3 in. and under, no addition ; for more than 3 in., and under 9 in. the medium between the two rates ; for 9 in. and upwards, the rate for the next foot. For transporting ships from one berth to another within harb. 10/6, minimum pilotage 1/ per ft., minimum charge 10/6. If a master retain or employ a pilot whilst at anchor, the lay days to be 7/6 per day. NOTE.—The several pilotage rates herein specified are subject to a reduction of one-fourth part in respect of vessels propelled by steam and vessels towed by steam vessels, provided that if any such vessel shall be propelled by steam, or towed by a steam vessel for a part only of the distance for which any such rate may be payable, the reduction of one-fourth shall be made on such part only of the said rate as shall be proportionate to the distance so propelled or towed. If a Barrow pilot be taken to Wyre Light or Fleetwood, he shall be entitled to receive, in addition to his pilotage, 21/ for travelling expenses home, and if taken or ordered to Heysham 10/6 travelling expenses. The sum of 5/ to be paid a pilot for detention for a night tide if he attends at the request of the master of an outward bound vessel, and such vessel is detained by any other cause than stress of weather. **Towage :—**

Min. charge coasters, 2/6 ; min. charge sailing vessels under 600 tons net reg., £1 ; vessels exceeding 600 tons net reg., time scale. Time Scale : Outside tug accompanying a vessel up

or down the channel or out to sea, attending to moor or unmoor or other such service, £3 for the first hour and £1 for each additional half-hour or part thereof; min. £3. When a tug is ordered, attends, and is not employed, the vessel to pay the ordinary rate, but not to exceed time scale. Charges for the use of Tow Ropes: In dock, 5/ each tow; between docks and Piel, 10/; docks and Hilpsford, £1; docks and lightship £2; vessels under 300 tons reg., half these tow rope rates. The proprietors will not under any circumstances use wire hawsers. Any towing services not comprised in the above must be specially arranged for with the harb. master. Special charges for towing outward bound vessels beyond Haws Point may be arranged with the harb. master not less than two days before sailing at a reduced rate. Masters of vessels in dock requiring tugs should make application at the harb. office, and if outward bound, should prepay. Vessels take their turn for tugs in the order in which they book, except in special cases. Signal for tug: Pennant F (new International Code) on the main, either by itself or under the house flag. None of above charges apply to salvage services. NOTE.—Terms, Towage Contract: On the hiring of the steam tug for towage services the master and crew thereof become the servants of and are identified with the ship or tow, and are under the control of the person in charge of the ship or tow during the performance of the contract, the steam tug owners only undertaking to provide the motive power. The steam tug owners are therefore not responsible for the acts or defaults of the master or crew of the steam tug, or for any damage or loss that may arise to the ship, cargo or tow, nor for any damage caused by any defect in or accident happening to the machinery of the steam tug, or to the towing gear or tug's hawser if in use, or by any peril of the seas, rivers or navigation. Towage contract not to prejudice any claim for salvage remuneration for any extraordinary services or for salvage services. Two powerful twin-screw tugs, *Furness* and *Cartmel*, 1,000 and 1,300 h.p. respectively, are available for heavy tows. **Officials.** Sec. and Gen. Manager, A. Aslett; Goods Manager, T. Jackson; Harb. Master, Com. C. Bissett, R.N.; Coll. of H.M. Cust., M. E. Thompson. All communications as to charges for loading and unloading vessels to be made to the Goods Manager, Furness Railway, Barrow-in-Furness.

BARRY DOCKS, Glamorgan. Lat. 51° 22′ N; long. 3° 16′ W. **Pop.** 34,000. **Auth.** Barry Railway Company, under Barry Dock and Railways Act, 1884. **Tr.** I. Timber, pitwood, iron and iron-ware, building materials, &c. E. Coal. **Rys.** Barry Ry., 66 miles, connecting the Docks with the colliery districts and with the G.W., T.V., and other systems. **THW.** f. & c. 6h 50m. **Accn.** The Barry Docks are 114 acres in extent, and have a safe, easy, and well-lighted approach. Through the Deep Lock, vessels drawing 13ft water can enter or leave at LWST., increased for 15 days each month to 18ft. At HWST. the depth is 49ft 8in, and HWNT. 41ft 4in. There is accom.

for the largest vessels afloat. **LV.** s.s. *Athenic* 7,833 tons net. Tr. I. Grain, oils, marbles, ores, seeds, fruit (green and dry), provisions, flour, sugar, iron goods, motor spirit, hides, tallow, timber, deals, petroleum; E. Salt, tin-plates, railway material and machinery, iron goods, paper, manufactured oils, cotton, piece goods, spar and general goods. **D.** on bar. There is a range of tide of 36ft at ST. and 21ft at NT. **W.** prev. as follow:—City Docks: these docks, being 6½ miles inland up the river Avon, may be considered as landlocked, and not liable to damage by prev. winds. Avonmouth and Portishead Docks: the prev. winds are W., but they are not dangerous to shipping, either in or entering the dock. **Rys.** G.W., M. **LV.** City Docks: there are regular lines of steamers from New York and Baltic, Mediterranean and other Continental Ports. Avonmouth Docks: steamers with a carrying capacity of 13,000 tons, and drawing up to 26ft, trade regularly to the dock. **Accn.** The dock system comprises the *Bristol Docks* within the city; the *Avonmouth* and *Royal Edward Docks* at the junction of the rivers Avon and Severn on the Gloucester side; and the *Portishead Dock* on the Bristol Channel on the Somerset side. The chief entrance to the *City Docks* is through a lock 350ft long by 62ft wide. The total area of the City Dock is 83 acres with a wharfage space of 4,898 yds, nearly the whole of which is directly connected with the railway system; the depth of water in the City Docks being 22ft. There are two entrances to these docks, the principal

being at Cumberland Basin. The floating harb. connected with this tidal basin, extends three miles, through the centre of the city. Alongside the docks are public quays, granary capable of storing 80,000 qrs. fitted with elevating machinery, tobacco warehouses, transit and other sheds and many private wharves, factories and timber yards, with varying depths of water. Ample cranage. Dry docks, &c. :—

The Avonmouth Dock is 2,180ft long and 500ft wide, with a depth of water on sills of 38ft at HWOST., and 28ft at HWONT. Area 19 acres. Length of wharfage 1,600 yds, entered from the Avon by a lock 488ft long and 70ft wide. Floor space of about 17 acres; two large granaries capable of storing 40,000 and 75,000 quarters of grain respectively. Accom. for landing, feeding and slaughtering cattle and sheep, with chill rooms attached. Cold stores for provisions, frozen meat, &c., of 374,000 cub. ft capacity, capable of storing 130,000 packages, two stores being at quayside. **Royal Edward Dock** has 30 acres water area; an entrance 875ft long by 100ft wide; 46ft of water on outer sill, HWOST. Vessels of almost any size can enter this dock on any tide, day or night, throughout the year. Vessels of 30ft dft and of any tonnage can proceed from sea up to Kingroad anchorage within 1 mile from dock gates at any time of the day or tide. Extensive shed and warehouse accom. for import and export traffic; cool sheds and granaries connected by travelling bands with quaysides; floating elevators, electric cranes, &c. Railway station at South Pier. A graving dock 875ft long and 100ft wide at bottom, equipped with 25-ton electric and other small cranes, connects with Royal Edward Dock. **The Portishead Dock** is 1,800ft long, 360ft wide, and has an area of 12 acres. It has a large granary, fitted with elevators, and capable of storing 60,000 quarters. Depth of water on sill 34ft at HWOST., and 24ft at HWONT. Leng h of wharfage 943yds. It is entered from Kingroad by a lock 472ft long and 66ft wide. The dock is well situated under the shelter of the Portishead Hills, and is accessible from Kingroad, where there is an excellent anchorage; steamers enter

direct from the deep fairway without tugs. Extensive shed accn. alongside quay; storage capacity for grain about 180,000 quarters. A wharf and stacking ground, fitted with appliances for handling timber. **Charges.** Dues on shipping entering the port vary from 1½d to 1/1½ per net reg. ton at the Bristol, Avonmouth and Portishead Docks. Rates on goods imported, also on those exported. Labour charges and rent on goods imported, very moderate. Stevedoring and all labourage on cargo undertaken by the Docks Committee at Avonmouth, Royal Edward and Portishead Docks, at charges varying according to the nature of the cargo. Lying up dues: For every sea-going vessel which shall remain in the docks for any period exceeding one lunar month after entering the same, 1d per reg. ton per week to the expiration of the second lunar month, and 2d per reg. ton per week, for every week after the expiration of such second month. **Pilotage.** C. **District:** Defined by the Wharfage Act of 1st August, 1807, 47 Geo. III., c. 33, to be to the East of Lundy Island; and under Pilotage Provisional Orders (No. 1), 54 and 55 Vict. of 1890, Compulsory Pilotage District restricted to Eastward of Holmes.

Towage. Inwards, roads to dock, 2d per reg. ton ; outwards, dock to road, 1½d per ton. From Leith to Burntisland, 60 to 80 tons, £1 15s, and 4s for every further 20 tons up to 140 tons ; £2 12s for 160 ; 4s as above up to 200 ; 220 £3 5s ; then 5s each 20 tons up to 300, which is £4 5s. **Officials.** Harb. Master, Thomas L. Galloway ; Coll. J. Isles ; Cust. Officer, Mr. Stears ; Lloyd's Agent, W. Erskine.

BURRAY, Orkney. A pier in the Island of Burray, near the Ayre of Westermill. **Auth.** County Council.

BURRY PORT, Carmarthenshire. Lat. 51° 40′ N ; long. 4° 15′ W. **Auth.** Burry Port & Gwendreath Valley Ry. Co., under Acts of Parliament. **Tr.** I. Pitwood, copper ores, stone, and general; E. Coal, tinplates, bricks, copperas, clay. **THW.** f. an c. 6h 8m. **LV.** 1,900 tons. **Accn.** Tidal harb. 15 acres in area. **En.** 220ft wide. **D.** on sill 22ft HWST., and 14ft at HWNT. Dock 392ft by 153ft, with entrance 45ft wide, and quayage of about 250ft. There are ballast cranes delivering 30 tons per hour, and hydraulic staiths, each capable of lifting 150 tons of coal per hour. Cranes up to 2 tons. A lifeboat station. **Floating Docks :** Gates 45ft ; **D.** on sill 22ft at HWST. and 14ft at HWNT. **Charges.** Vessels seeking shelter or freight in outer harb. free, in inner harb. 2d per ton. Vessels discharging and loading 3d per ton, or discharging or loading only 2d per ton. **Towage.** From port to sea, or *vice versâ* : Under 150 tons reg. 4d per ton ; 150 and under 200, 4½d; 200 and under 250, 5d ; 250 and under 300, 5½d ; 300 and upwards, 6d. If under 125 tons, pilotage reduced 10 per cent. **Officials.** Harb. Master and General Manager, Arthur Morgan; Coll. of Harb. Dues, G. Hancock.

BURTONPORT, Co. Donegal, Ireland. Lat. 55° N ; long. 8° 45′ W. **Auth.** County Council of Donegal. **W.** prev. and most dangerous, W. and SW. **THW.** f. and c. 5h 56m. **Accn.** Area 12,000 sq yds. **D.** Dry at LWOST., 15ft at HWOST. A railway wharf. **Ry.** L. and L.S.

CAHIRCIVEEN, Co. Kerry. Lat. 51° 58′ N ; long. 10° 20′ W. **Auth.** County Council of Kerry, **Pop.** 2,050. **THW.** f. and c. 4h 2m. **Tr.** I. Bread stuffs, coal, iron, timber, slate, &c. ; E. Cattle, pigs, butter, eggs, fish, moss, &c. **Accn.** One pier, protected from the W. by

a breakwater, has berths for three steamers of from 800 to 1,000 tons each, and six sailing vessels of from 200 to 300 tons each, approachable at all times of tide. **D.** 12ft LW., and 26ft on bar at **H.W.** **Ry.** The G. S. & W. (I.) connects with harbour. **Charges.** All cargoes loaded or discharged are liable to wharfage charges at the rate of 2d per ton, except salt, undressed stones, or slates, on which the charge is 1d per ton. No tonnage dues. **Officials.** County Surveyor, S. Goodwin, C.E.; Harb. Master, John Dennehy.

CAISTER-ON-SEA. A fishing station near Great Yarmouth. No harb. works.

CALEDONIAN CANAL. Commences at Clachnaharry, near Inverness, and terminates at Corpach, near Fort William. Length from sea to sea 60 miles. The basin of the canal at Inverness forms a large dock, where ships drawing 18 to 19ft lie afloat. Quays connected with Highland Railway by branch line. Charges, Pilotage, and Officials, see Inverness. **Official.** Resident Engineer and Manager, J. L. Groves.

CALSTOCK, Cornwall. Port of Plymouth. **D.** HWST. 15ft, HWNT. 8ft. **Official.** Customs Agent, T. Grenfell, Jun.

CAMBUS, Clackmannan, Scotland. Lat. 56° 6′ N; long. 4° 0′ W. **Auth.** Proprietor, Lord Abercrombie. **THW.** f. and c. 3h 33m. **Accn. D.** dry at **LW.,** 8ft HWNT., and 13ft HWST. Agents, T. & R. B. Ranken, W.S., 68, Queen-street, Edinburgh.

CAMPBELLTOWN, Inverness. A pier in Inverness Firth, near Fort George. **Auth.** County Council.

CAMPBELTOWN, Argyllshire. Basin of the Clyde. Lat. 55° 25′ 30″ N; long. 5° 35′ 30″ W. **Pop.** 8,235. **Auth.** Town Council, under Statute, 1876. **Tr.** I. Barley, coasting coals; E. Coals, deals, and whisky. **THW.** 11h 45m; Sp. rise 8½ft; N. rise 6ft. **D.** from 8 to 10 fms. there is a rise of 8ft in ST; in harb. ST. 16ft at end of pier. **W.** prev. E and S. **Accn.** Campbelton Loch, which is almost entirely landlocked, forms a natural harb. for the port. There are no harb. works, with the exception of three piers or quays, named respectively the Old, New, and Dalintober Quay. This loch constitutes the harbour; it has an area of about 13 sq miles, and a depth of from 8 to 12 fms., and has about 500yds of quayage. Vessels of 16ft dft can come up to the quay at LWOST. There is a rise of tide from 8ft to 10ft at the end of the quay. Crane power, 12 tons. Good fresh water supplied at 1/ per 100 gallons. Daily steamer to Glasgow in winter, and twice a day in summer. **Charges.** Rates on vessels entering or using the harb. as per schedule. Vessels under 30 tons, 3d per ton; under 100 tons, 4d; under 150 tons, 5d; 150 tons upwards, 6d. Coal dues 3d per ton. Rates on goods shipped or unshipped at the harb. as per schedule. Plankage 1/ to 3/. **Pilotage.** NC. **District**

not defined. **Rates** as per agreement, but varies generally between 20/ and 30/ vessel. **Towage.** As per agreement. **Officials.** Harb. Master, A. McCorkindale; Coll. of H.M. Cust., R. Paterson; Coll. of Dues, A. Hamilton; Lloyd's Agent, R. McEachran.

CANNA, Inverness. A pier on the East side of Canna Island, constructed under the Canna Pier Order, 1892. **Auth.** Robert Thom.

CAPE CLEAR, Co. Cork, Bantry Bay. **Pop.** 500. **Auth.** Cork County Council. AST. 12ft, and 5ft at **LW.** Strangers should not enter without pilot from Island. **Official.** Harb. Constable, Patrick Cotter.

CARDIFF, Wales. Lat. 51° 27′ 48″ N; long. 3° 9′ 42″ W. **Pop.** about 195,000. **Auth.** The Cardiff Railway Co. **Tr.** I. Provisions, cattle, sheep, frozen and chilled meat, &c., grain, timber, esparto, potatoes, fruit, hay, moss litter, iron ore, and all kinds of general produce; E. Coal, iron, steel, patent fuel, Manchester goods, cutlery, and general merchandise. **Tides. HW.** f. and c. at 6h 56m local, or 7h 8m Greenwich; equin. Sp. rise 42ft; ordinary Sp. 37½ft; N. 29ft. R. of N. 20½ft. The Bute Docks are approached principally by a channel Northward of the one fathom bank. All the approaches are well marked by lights and buoys. **W.** prev. W., SW., SSE. to NE. Most dangerous in Penarth Roads is from Eastward and Southerly; but the dock entrances are sheltered from all winds. **LV.** The Bute Docks are capable of accommodating the largest vessels afloat. Vessels of 12,000 tons burden and upwards trade to these docks. Dock **Accn.** (162¾ acres). Entrance Channel:—Graving dock 615ft long, 70ft W. of E. DHW. OST. 25ft; NT. 15ft. Floating dock 330ft long by 65ft wide. Gridiron 350ft long; DHW. OST. 23ft; NT. 13ft. Graving docks 550ft by 65ft by 28ft; 440ft by 52ft by 17ft and 420ft by 52ft by 20ft. Steam Packet Harb. with 2 bridges and 2 floating pontoons, DHW. ST. 33ft 3 in; NT. 23ft 3 in. Hydraulic crane to lift 2 tons. Pier head crane to lift 4 tons. Channel coal staith, for tug-boats and coasters, worked by hydraulic power, DHW. ST. 28ft; NT. 18ft. West Bute Dock.—Entrance to basin, 45ft wide; basin (area 1½ acres) 300ft long, 200ft wide; lock 152ft long, 33ft wide; dock (area 18 acres) 4,000ft long, 200ft wide; quayage 9,400ft long; DW. in dock 19ft and 13ft, viz., 1,550ft of 19ft deep, 2,450ft of 13ft deep; DW. on sill OST. 28ft 9in; NT. 18ft 9in. There are 12 staiths for the shipment of coal. Five ballast cranes capable of discharging 100 tons per hour. Other cranes to lift up to 10 tons. Graving dock 235ft long, 40ft wide, 12ft deep. East Bute Dock.—Sea lock 220ft long, 55ft wide; basin (area 2¼ acres) 380ft long, 250ft wide; inner lock 200ft long, 49ft wide; dock (area 44¼ acres) 4,300ft long, 300 and 500ft wide, viz., 1,000ft long by 300ft wide, 3,300ft long by 500ft wide; quayage 10,120ft long. DW. in dock 25ft; DW. on sill of sea lock OST. 31ft 6in; NT. 21ft 9in. There are 15 staiths in the dock and one in the basin for the shipment of coal, with the latest improve-

ments in hydraulic machinery. Hydraulic cranes (19 in number) to lift up to 20 tons. Three graving docks 400ft long, 48ft wide, 17ft deep; 420ft long, 60ft wide, 17ft deep; 408ft long, 48ft wide, 17ft deep. Roath Basin.—Dock (area 12 acres) 1,000ft long, 550ft width in centre; quayage, 2,700ft in length; depth of water on sill, OST. 35ft 9in, ONT. 25ft 9in. Eight staiths for the shipment of coal, with the latest improvements in hydraulic machinery, including patent movable staiths, enabling a vessel to load at each hatchway without moving the vessel. Graving dock, 600ft long, with entrance 60ft wide. Vessels can be docked at any time irrespective of tides. This is a public graving dock in which shipowners may employ their own labour and find materials. Graving dock 600ft long, with entrance 55ft wide; depth of water, 28ft over blocks. Roath Dock.—Inner lock 600ft long, 80ft wide; dock (area 33 acres) 2,400 ft long, 600ft wide; quayage 7,520ft in length; depth of water in dock 32ft to 37ft. Coal is shipped by the Lewis-Hunter patent coaling cranes, whereby the least breakage occurs of any coal shipping appliances, the coal being placed in the hold at three or more hatchways simultaneously, whilst general cargo and coal can be shipped at the same time by these cranes without moving the vessel, thereby giving ships the utmost despatch; cranes (40 in number, one lifting up to 70 tons) for the discharging and loading of vessels; warehouses and transit sheds on the quayside, with railways alongside, for the storage of general merchandise. Also good accom. with plenty of quay space, for the storage of deals, iron ore, &c.; ballast cranes and barges are provided for the discharge of ballast; cattle lairs, large chill rooms, and slaughter-houses for the landing and slaughter of foreign cattle (the only ones in South Wales); also extensive cold stores for storage of dead meat, &c.; floating or pontoon dock 360ft long by 70ft wide. Queen Alexandra Dock (area, 52 acres).—The sea lock is 850ft long, 90ft broad between the gates, having 42ft over the sill at OST. and 32ft at ONT. The dock is 2,550ft long, width from 800 to 1,000ft, and the depth 50ft, thus providing about 6,500ft of additional quay space. Provision is made for the construction of two graving docks, 800ft and 850ft long. Timber ponds.—A large provision is made for the floating of timber at a reasonable rental. Railways are placed alongside the ponds, having competitive communication with all parts of the United Kingdom. Warrants are issued on all goods in the dock-owners' custody. **Rys.** G.W., R., T.V., L. & N. W., M., Rhymney and B. and M. The Windsor Slipway, between Cardiff and Penarth, is capable of taking the largest vessels. **Charges.** Dock tonnage rates from 1½d to 9d per ton. Loading charges (trimming coal) 2¾d to 6d per ton cargo. Wharfage and labour charges very reasonable. Ballast 6d to 1/1 per ton. Other charges furnished on application to the Cardiff Railway Co. **Pilotage.** NC. **District:** The port of Cardiff and that portion of the Bristol Channel eastward of Lundy Island up to and including Kingroad and the river Rhymney to Rhymney Bridge, into the port of Cardiff from any of the places

named in the following schedule, or *vice versâ*, for vessels laden or unladen. **Rates per Reg. Tonnage :—**

5/ per tide shifting; 5/ per day if detained on board within the district; 7/6 per day if taken outside district, and travelling expenses.

NOTE.—Winter season commences October 1, and ends March 31. No vessel to pay for less than 8ft dft., nor for odd inches less than half a foot. The following sailing directions were approved Nov. 7, 1904:—The Chester pilot boat is ketch rigged, with her bow coloured white, marked on the black bulwarks, "C.P. No. 1," in white letters, 2ft 6in deep, and on the mainsail with the letter "C," in black, 6ft deep. At night the Chester pilots signal by means of white flare-up lights. When wind and weather permit the pilot boat cruises within the space covered by the red sector of Great Orme light, or between the bearings of S.81° W. and S.89° W. of the light, but occasionally anchors during southerly gales westward of Chester bar, in about 6 fms., near the point "C" on Admiralty Chart No. 1170 B, from which position Rhyl Church is open a little westward of the house on Rhyl pier, S.18° E. Vessels bound to Chester river may, from off Great Orme head, distant about one mile, steer into the space embraced by the red sector, and continue eastward in it until the north-west lightship bears NE. by N., which is about 13 miles from the Great Orme. At three hours flood this route is available for vessels of 25ft draught, but at low water for vessels of 12ft draught only. It must be remembered that this course leads over Constable bank, which may be subject to change. The best route for vessels other than of light draught is northward of Constable bank buoys. By telegraphing or writing to the pilot office at Connah's Quay a pilot may be engaged to attend at Holyhead Harbour at any time, and captains who do not know this coast are advised to put into Holyhead harbour, and telegraph or write for a pilot to come there, especially when strong winds are blowing from the north and north-west. **Towage.** Vessels trading to the G.W. Ry. Co.'s wharves at Saltney, free. For others apply to G.W. Ry. Co.'s Agent at Saltney, and Messrs. Thomas Coppack & Co., tug owners, Connah's Quay. **Officials.** Clerk to Dee Conservancy Board, C. P. Smith, of Chester; Acting Conservator and Pilot Master, A. C. Williams, A.M.I.C.E., Chester; Harb. Master, Connah's Quay, Mr. Dawson; Customs Supt., Connah's Quay, E. Ll. Marriott.

CHICHESTER, Sussex. Lat. 50° 46′ N; long. 0° 55′ W. **Auth.** The Corporation. **Ry.** L.B. & S.C. Dry Dock at Wivenhoe, 240ft long, 35ft wide, depth over sill 14ft OST. Quayage at Hythe, 1,485ft, with 10ft ST. and 6ft NT., and at Wivenhoe 430ft. Patent slipway at the latter place, taking vessels 120ft long, 20ft wide, and drawing 12ft. **Cranage** to 2 tons, 9d per ton; 2 to 4 tons, 1/3 per ton; 4 to 8 tons, 2/ per ton; not to be used over 8 tons. **Ry.** G.E. **Charges.** Tonnage Rates 2d to 8d ton, according to size; vessels bringing coals only and departing in ballast pay half. Ballast 1/4 ton put on board. Wharfage moderate. **Pilotage.** C. **District**: From a line drawn from the Naze Tower to the buoy of the Gunfleet, up the Colne river to Colchester, and *vice versâ*. **Rates** (inward and outward). East buoy of Gunfleet to Eastness, sail 2/6 per ft, steam 1/11; Eastness to Pyefleet, sail 1/3 per ft, steam 11d; Pyefleet to Wyvenhoe, sail 1/6 per ft, steam 1/2; Wyvenhoe to the Hythe, Colchester, sail 1/6 per ft, steam 1/2. A pilot taken on board, or discharged eastward of the Priory Spit Buoy, is entitled to £1 in addition to the above rates. London pilots are to be paid from Orfordness to Eastness, sail 6/ per ft, steam 4/6. **Towage.** As per agreement. Boarding Station at Brightlingsea. **Officials.** Harb. Master, J. C. Bates; Coll. of Dues and Deputy Harbour Master, W. Crosby.

COLENTRAIVE, Argyll. A steamboat pier in the Kyles of Bute belonging to Mr. C. B. Campbell Southall, of Colintraive.

COLERAINE, Londonderry. On the Bann, 5m from the sea. Lat. 55° 10′ N; long. 6° 43′ W. **Pop.** 7,787. **Auth.** Harbour Commissioners, under Act, 1879. **Tr.** I. Coal and general goods, coasting trade; E. Cattle and local produce. **THW.** 6h 24m; Sp. rise 6ft; N. rise 3 to 4ft. **D.** on bar 10ft LWOST. **W.** prev. from W. to SW., most dangerous from NW. to N. **Ry.** M. (N.C.C.). **LV.** 687 reg. ton. of about 15ft dft. **Accn.** Good quays with about 650ft lin. and a depth at LWST. 12ft, NT. 14ft. Two 2-ton steam cranes on wharf. Cranage, coals, 3d ton. **Charges.** Port charges 5d reg. ton. Ballast as per agreement, usually 1/ ton. **Pilotage.** C. **District.** The River Bann. From the quays at town of Coleraine to an imaginary boundary line at sea running through a point N. of mouth of the river. 1m. from end of east pier at its mouth. **Rates.** 1/6 ft inwards, and 9d ft outwards. **Tonnage** according to schedule. **Officials.** Sec. to Com., W. Henry; Harb. Mast., Thos. Martin; Officer of H.M. Cust., E. Bennett; Lloyd's Agents, D. Fall & Son.

COLLIESTON, Aberdeenshire. Lat. 57° 22′ N; long. 1° 57′ W. **Auth.** Harbour Trustees under the Collieston Harbour Order, 1894. It is understood that the Trustees are not now acting. A small harb. Dry at **LW.**

COLWYN BAY, Denbigh. The Colwyn Bay Pier belongs to Mr. W. Horton of Rhos Colwyn. The Victoria Pier belongs to the Victoria Pier and Pavilion Co. (Colwyn Bay), Ltd.

CONNAH'S QUAY.—See Chester.

CONWAY, Carnarvon, Wales. Lat. 53° 17′ N; long. 3° 50′ W. **Auth.** Town Council, under Prov. Order, 1878. **THW.** f. and c. 11h 30m. **Accn. D.** on bar 3ft **LW.,** and 17ft HWST., affording entrance to vessels drawing 6ft at half-tide. **W.** prev. NW. to N. **Ry.** L. & N.W. Most of the trade is now done at Deganwy Quay (which see). **Charges.** ¼d per ton anchorage. Quay dues 2d per ton. **Pilotage.** As may be agreed upon. **Officials.** Town Clerk, H. Parry; Harb. Master, W. Roberts; Lloyd's Sub-agent, W. Roberts.

COOMBE MARTIN, Devonshire. Lat. 51° 13′ N; long. 4° 1′ W. **Auth.** Owner, Trustees of the late Sir Chas. Watson-Copley, Bart. There is an anchorage in 8 to 9 fms. **THW.** f. and c. 5h 50m. **Official.** Reeve of Manor, W. Burgess.

COOMBWICH, a creek under Bridgwater. **D.** HWST. 19 to 24ft, HWNT. 14 to 17ft.

CORK (including Queenstown), Munster. On the Lee, 15m from the sea. Lat. 51° 47′ 33″ N; long. 8° 15′ 14″ W. **Pop.** 80,000. **Auth.** Cork Harbour Commissioners, under Acts 1820 to 1903. **Tr.** I. General; E. Grain, timber, coal, butter, provisions, live stock, whisky, porter, &c. **THW.** f. and c. 4h 58m; Sp. rise 12¾ft; N. rise 10ft. **D.** at harb. entrance, 38ft **LW.**; in river, Sp. 29ft, N. 26ft **HW.** Alongside the jetties there are 20ft at **LW.** and vessels of 23ft

dft. can lie afloat at all times of tide at a portion of the deep-water quays and at Anderson's quay 22ft at LWST. **W.** The quays of Cork are sheltered from all winds; quays at Queenstown are exposed to S. and SE. winds. **Rys.** G.S.W., C.B. & S.C., C. & M., C.B., & P. **LV.** using the quays and discharging cargo are grain vessels, which come up to Cork and use the deep-water quays there. These enter the harb. and come up as far as Passage, which is 6½ miles from Cork, at all states of the tide. From Passage to the quays of Cork they are brought up at or near **HW.** Vessels of 24ft 7in draught have discharged at the Cork deep-water quays, lying afloat at all states of the tide. Cork harb. is most capacious and secure; the longest Transatlantic liners can enter and leave at all states of the tide. There is a large Government Dockyard and Navy Victualling Station at Haulbowline. Ferro-concrete wharf 500ft. long, by 35ft. wide, with a possible depth of 28ft. LWOST., and storage depot for timber in course of construction at Marina Cork. Water area at Cork between quays is 46½ acres, with a maximum depth of 23ft at LWST.

In respect of vessels over 1,000 tons, the following rate to be added to the above :—For every 100 tons, and fraction of 100 tons not being less than 50 tons, over 1,000 tons, the sum of 2/8 ; Queenstown to Ballinacurra Quays, or to any point above East Ferry, the same rates as Queenstown to Cork ; Ballinacurra Quays to Queenstown, or to any point between East Ferry and Queenstown, the same rates as Cork to Queenstown ; Queenstown to East Ferry, Aghada, or Crosshaven, the same rates as Queenstown to Passage ; East Ferry, Aghad or Crosshaven, to Queenstown, the same rates as Passage to Queenstown. Rates for shifting vessels within the pilotage district :—500 tons or under, 10/ ; between 500 tons and 1,000 tons, 15/ ; 1,000 tons and over, 20/. For mooring each vessel 5/, except in the case of vessels under 300 tons being moored alongside any quay or wharf, when the charge shall be only 2/6. Charges for detention :—For each day or part of a day during which pilot is detained, 5/. N.B.—All pilotage rates and charges are payable to the Cork Harbour Commissioners. They may be paid either into the harbour office at Cork, or

Queenstown, or to the pilot who rendered service, on his producing a certificate from the harbour office of amount of rates due. In the foregoing tables the reg. tonnage of vessels is referred to in each instance, except in the case of steamers not using their steam propelling power, in which case the gross tonnage is referred to. The expression "Queenstown" means the anchorage for vessels in Cork Harbour, east of a straight line drawn from White Point to the eastern shore of Fort Camden, west of a straight line drawn from the Priory to Corkbeg House, and north of a straight line joining the northern shores of Forts Camden and Carlisle. **Towage.** Tariff of rates for Cork Harbour :—From Sea to Queenstown, and *vice versâ*.—Under 200 tons, £2 ; 300, £2 10/ ; 400, £3 ; 500, £3 10/ ; 600, £4 ; 700, £4 10/ ; 800, £5 ; 900, £5 10/ ; 1,000, £6 ; adding 10/ for every 100 tons, or part of same. From Queenstown to Cork, 8d. per ton net. From Queenstown to Passage, 6d. per ton net. From Passage to Cork, 6d. per ton net. On payment of such towage, vessels are towed back to Queenstown free of further charge. Steamers : Assistance, Queenstown to Cork, or *vice versâ*, £10 per tug per tide; Queenstown or Cork to Passage and *vice versa* £7 per tug per tide. Towage, Queenstown to Passage, 3d per ton gross, min. £7. **Officials.** Sec. to Com., W. Donegan ; Engineer, Jas. Price M.I.C.E., M.I.M.E. ; Coll. of Harb. and Tonnage Dues, James Drummy ; Harb. Master, Captain N. Sutton ; Harb. Master at Queenstown, Captain G. Usborne, R.N.; Lloyd's Agent, J. W. Scott, J.P.

W. of E. 40ft, between two pier heads. **D.** 3½ft on bar at lowest tide. **W.** prev. SW., most dang. SE. A lifeboat station. **Charges.** Harbour dues : Coal 6d ton ; salt 7d ton ; other articles 1/7 per ton, including lightermen's charges ; lightermen 8d ton for coal and salt ; fishing boats, wholly decked, £1 per year ; half decked, 10/ per year ; yawls, 5/ per year ; being laid up on bank, 5/ for first year, and 1/ per month afterwards. **Official.** Harb. Master, P. Stapleton.

COVE, Berwickshire. Lat. 55° 58′ N ; long. 2° 18′ W. **Auth.** Owner, Sir Basil P. Hall, of Dunglass, Cockburnspath. **Accn.** Stone piers. No accn. for ships, only fishing boats. **D.** at **HW.** 16ft OST. **W.** prev. E. and NE. No dues.

COWES, Isle of Wight. On the Solent and river Medina. Lat. 50° 6′ N ; long. 1° 18′ W. **Pop.** 9,635. **Auth.** Cowes Harb. Commrs., under Act of 1897. **Tr.** I. Timber, grain, coals, &c. ; E. Cement, stone, bark, &c. **THW.** f. and c. 10h 45m, and 11h 45m ; Sp. rise 12½ft ; N. rise 9½ft. **D.** on bar at **LW.** 10ft ; ST. 22ft to 23ft ; N. 18ft to 19ft. **W.** prev. SW. by W. ; most dangerous are N. and NE. **Ry.** I.W.C. The roadstead affords a safe and sheltered anchorage for vessels of any tonnage. Vessels discharge at railway jetty about 300ft in length. There are several

patent heaving up slipways for vessels up to 1,500 tons. 100-ton crane owned by Messrs. J. S. White & Co., Ld. **Charges.** Harb. dues: Merchant shipping, exclusive of passenger vessels, tug-boats (except when carrying goods or passengers), and yachts: for every vessel coming into, anchoring, or making fast in the harbour, per voyage only—ton reg., 15 to 25, 1/6; 25 to 50, 2/6; 50 to 75, 3/; 75 to 100, 5/; for every additional 100 or part thereof, 5/. Any vessel entering the harbour and discharging not exceeding one-half of her cargo, one-half only of above dues will be payable, but if more than half be discharged, full dues are payable. These dues are payable only once for each voyage. Every shipowner whose vessel calls at Cowes at least once daily (Sunday, Good Friday, Christmas Day, or any Bank or other public holiday excepted) throughout the year may compound by payment of two-thirds of above dues, in advance, unless otherwise agreed with the Commissioner. Every shipowner whose vessel calls at least once weekly throughout the year may compound by payment of three-fourths of above dues, in advance, unless otherwise agreed. Passenger vessels 1d per reg. ton per voyage, or at the option of the owner a composition payable in advance of 1/ per reg. ton per annum. Merchant vessels using buoys, posts, and moorings, per day—Under 200 reg. tons, 1/; 200 to 400, 2/; 400 to 600, 3/; 600 to 800, 4/; 800 to 1,000, 5/; above 1,000, 7/6; when laid up for four months or more, by scale. Yachts using the works provided pay per day—Under 50 reg. tons, 1/; 50 to 100, 2/; 100 to 200, 3/; 200 to 300, 4/; above 300, 5/; when laid up, using the stern moorings provided, 1d per reg. ton per month; 6d per reg. ton per annum. **Pilotage.** C. See Southampton. **Officials.** Clerk to Commrs., J. C. W. Damant; Harb. Master, Capt. G. F. Goodenough; Lloyd's Agent, A. E. Marvin; Coll. of H.M. Cust., J. Stevens.

CRAIGNISH, Argyll. A pier about 100ft in length at Airds, Craignish. **Auth.** County Council.

CRAIL, Fifeshire. At N. entrance to Firth of Forth. Lat. 56° 16′ N; long. 2° 37′ W. **Pop.** 1,740. **Auth.** Burgh of Crail Commrs. **Tr.** E. Grain and potatoes. A lifeboat station. **Accn.** Three loading berths. AST. from 11 to 12ft. **W. of En.** about 24ft. **Charges.** Steamers, 3¼d per t.r.; sailers, 50 tons and under 100, 2¼d. **THW.** f. and c. 2h. **Pilotage.** NC. **W.** prev. SE to NE.

CRARAE, Argyll. A pier on W. side of Loch Fyne. **Owner.** Sir Archibald Campbell. **Lessees.** The Loch Fyne Granite Quarries Co., Ltd.

CRASTER HARBOUR, Northumberland. **Auth.** Owner, T. W. Craster, Craster Tower. The approach to harbour between the two rocks known as Little Carr and Muckle Carr is wide and safe, having a depth of 20ft at LWOST. The proper entrance is marked by two beacons with triangles on the top, one beacon being on the

north end of Muckle Carr Rock and the other on the south end of Little Carr Rock. Vessels should keep midway between these two beacons when entering the harbour. The two other beacons (with plain tops) to the northward of those first mentioned are merely to warn vessels from approaching too close to Little Carr. Vessels approaching from the north should keep 150 yards to the eastward of the three beacons on Little Carr till abreast of the harbour, and then enter midway between the two triangle-topped beacons. **D.** at entrance 14½ft HWOST.; N. Pier, 11 to 14½ft; S. Pier, 11 to 14½ft. **Accn.** Piers in use 170ft and 190ft long. No cranes or dry docks. **Charges.** Ship tonnage dues per ton reg. 2d; fishing boats, 2/; small dues on goods, stone 3d, herrings 1½d barrel import, 2d export; heavy articles, 6d per ton. **Official.** Harb. Master, A. Archbold.

CREETOWN, a sub-port of Kirkcudbrightshire.

CRINAN, at N. end of Crinan Canal, which extends from Ardrishaig to Crinan, 9 miles (see Ardrishaig) **D.** on sill of lock 9ft 6in, length of lock 96ft by 24 wide The distance from Ardrishaig to Crinan round the Mull of Cantire is upwards of 132 miles. Vessels to Glasgow using the canal save about 85 miles of exposed sea passage. **Official.** Resident Engineer and Manager, L. John Groves, C.E.

CROICH.—See Lochmaddy.

CROMARTY, Cromarty, Moray Frith. **Auth.** Trustees under Act of 1834 and Harb. Order of 1879. A small harbour having a depth of 14ft at HWST., and 10ft at HWNT. inside, and outside jetty in 22ft ST., and 18ft NT. Area 70yds by 40yds; 2 wharves; crane 3 tons. **Charges.** All boats above 24 tons reg. 2d per ton, windbound 1/ each. Ballast 6d per ton, fishing boats 1/, windbound 1/; vessels, 2d ton reg., fresh water, 1/6 ton. **Official.** Harb. Master, G. Fraser.

CROMBIE POINT, N. side of Forth 2 miles from Charlestown. **D.** HWST. 12ft, HWNT. 8ft. **Charges.** Harb. dues, 2d per ton. **Official.** Harb. Master, T. Ford.

CROMER, Norfolk. Lat. 52° 46′ N; long. 1° 19′ E. A seaside holiday resort, fishing town and lifeboat station. A pier owned by Cromer Pier Co.

The largest vessels that come up at **LW.** are steamers having 18ft dft. **Accn.** The entrance to the harb. between the North Bull and Poolbeg lighthouses is 1,000ft wide, and is formed by the channel of the Liffey, which is quayed on both sides through the city. The area available for shipping extends from the entrance of Alexandra Basin to Butt Bridge, and, inclusive of the Alexandra Basin, the Custom House, the Royal, and Grand Canal Docks, it is 205 acres in extent. The Alexandra Basin contains 50 acres of water, having a depth of 24ft at **LW.** over three-fourths of its area, 2,400ft of quay wall, on the S. and W. sides, and 1,000ft of timber jetties on N. side with 22 to 24ft in line of keel at **LW.** The Grand Canal Docks, on the S. side of the harb., have an acreage of 24 acres, and about 2,000yds of quayage. George's Dock (inner) is 650ft long by 300ft wide, and (outer) 320ft by 250ft wide; **W. of E.** 36ft. The Spencer Dock (belonging to the M. Ry. Co. of Ireland) has about one mile of quayage, is 26ft wide at entrance and has 2ft on sill at **LW.** The Custom House Old Dock is 240ft long by 210ft wide; **W. of E.** 35ft. Ringsend Dock

has a lock 145ft long and 35ft wide, 17½ft deep. There is also a smaller dock, 110ft long, not under control of the Board in which 3d per net reg, ton is charged, besides port dues, 5½d; merchants always pay the former. The river, or harb. channel, is about 7,633yds long, varying in width from 334 to 80yds. Quays on N. side, 8,126ft; **D.** at **LW.**, 8 to 22ft; cranes of 3 tons, one of 100 tons, and ten electric cranes up to 4 tons. Quays on S. side, 5,875ft; **D.** at **LW.**, 18 to 22ft; cranes of 4, 10 and 25 tons, and four electric cranes up to 4 tons. There is a length of 4,720ft of sheds, chiefly in connection with the cross Channel trade, and tramways to an aggregate length of 20,400ft on the quays, connecting these with various railways. Graving Docks, &c.:—

* For vessels weighing 200 tons. † For vessels weighing 800 reg. tons.

***Charges.** Tonnage rates, 10¼d per ton reg. on vessels from foreign or colonial ports; 5½d coastwise; when reg. tonnage of steamers is less than half gross, dues are leviable on half gross. Rates on goods, 25 per cent. of the scheduled rates, Dublin Port and Dock Act, 1902. Cranage: 100-ton crane, 1/6 per ton; min. 10/; railway wagons, 10/ each; by time, £5 for six consecutive hours or less; 6 to 12 hours, £7 10/; over 60 tons, £12, £18 respectively; each additional hour, any weight, £1 10/. Smaller cranes, 3 to 25 tons, 10/ to 30/ per day. Electric cranes, 3/6 per hour, min. charge, 10/6. ***Pilotage.** C. **District:** On the north an imaginary straight line drawn from a point between Balbriggan and Skerries, and through Rock-a-bill Lighthouse to a point at sea three leagues distant from the nearest land on that part of the Irish coast. On the south an imaginary straight line drawn from a point in the same latitude as the South Arklow Lightship, and through the lightship on the south end of the Arklow Bank, and thence to a point at sea three leagues distant from the nearest land on that part of the Irish coast. On the east by an imaginary line drawn from the seaward extremity of the northern boundary line of a point at sea three leagues eastward of the Nose of Howth, thence to a point at sea three leagues eastward of Wicklow Head, and thence until it joins the seaward extremity of the southern boundary line. Divisions of Dublin Pilotage District. No. 1—*Inner Pilotage Division:* The Inner Pilotage Division comprises the area which would be enclosed by straight lines drawn from Bray Head to the buoy on the south end of the Kish Bank, and from thence to the Kish Lightship outside the Kish Bank, and from thence on to Ireland's Eye, except so much of that area as is comprised in the Bay Pilotage Division. No. 2—

* Tonnage, goods and pilotage rates were under revision at the time of going to press.

Bay Pilotage Division : The Bay Pilotage Division comprises the whole area of Dublin Bay outside the bar, and is formed by an imaginary straight line drawn from the north headland of Dublin Bay called Howth Bailey, to the south headland of Dublin Bay, called the Land's End of Dalkey. No. 3—*Outer Pilotage Division :* The Outer Pilotage Division comprises the area which would be enclosed on the north by the northern boundary line of the Dublin Pilotage District, on the east by the eastern boundary line, on the south by the southern boundary line, and on the west by the lines forming the boundary to seaward of the Inner Pilotage Division. **Rates.** *Inner Pilotage District :* British or foreign vessels from or to foreign ports to the quays or docks of Dublin 3/ ft ; into Kingstown, Dalkey Bullock, or Sutton 2/ ft ; to the quays or docks of Dublin from Kingstown, Dalkey Bullock, or Sutton 2/6 ft ; from the bar to the quays or docks of Dublin 1/ ft. For piloting (not in ballast) outwards, to any part of this division, from the quays or docks of Dublin to Poolbeg 1/ ft ; from Poolbeg over the bar 1/ ft ; from Kingstown, Dalkey Bullock, or Sutton 2/ ft. Colliers or coasters, to the quays or docks of Dublin 1/6 ft ; into Kingstown, Dalkey Bullock, or Sutton, 1/ ft ; to the quays or docks of Dublin from Kingstown, Dalkey Bullock, or Sutton 1/6 ft ; from the bar to the quays or docks of Dublin 6d ft. For piloting (not in ballast) outwards, or to any other part of this division, from the quays or docks of Dublin to Poolbeg 1/ ft ; from Poolbeg over the bar 1/ ft ; from Kingstown, Dalkey Bullock, or Sutton 1/ ft. British or foreign vessels from or to foreign ports, and colliers or coasters, in ballast, from the quays or docks of Dublin to Poolbeg 1/ ft ; from Poolbeg over the bar 1/ ft. *Bay Pilotage Division :* British or foreign vessels from or to foreign ports to the quays or docks of Dublin 2/6 ft ; all other charges identical with the rates of pilotage of the Inner Pilotage Division. *Outer Pilotage Division :* British or foreign vessels from or to foreign ports, to the quays or docks of Dublin 4/ ft ; into Kingstown, Dalkey Bullock, or Sutton 3/ ft ; from the quays or docks of Dublin 2/ ft ; from Kingstown, Dalkey Bullock, or Sutton, 2/ ft. Colliers or coasters, to the quays or docks of Dublin 2/6 ft ; into Kingstown, Dalkey Bullock, or Sutton 2/ ft. The rates in the several divisions are charged for every foot of water the vessel draws, and in proportion for every half-foot. A fractional part of a foot less than half a foot is in all cases reckoned half a foot. **Towage.** From bay to quays, foreign, for vessels not exceeding 1,000 tons reg., 6d reg. ton. ; over 1,000 and not exceeding 2,000, 4d ; 2,000 tons and upwards, 3d per reg. ton. ; coasting 4d ton reg. **Officials.** Sec. to Port and Docks Board, N. Proud ; Coll. of Port and City dues, W. S. B. Homan ; Engineer, J. W. Griffith ; Harb. Master and Pilot Supt., Capt. J. H. Webb, R.N.R. ; Coll. of Cust. and Rec. of Wrecks, F. W. Wood ; Lloyd's Agent, G. Bell.

DUDDON RIVER, Cumberland. Lat. 54° 12′ N ; long. 3° 17′ W. **Auth.** The Hodbarrow Mining Co., Ld., of Millom. **THW.** 11h 38m. **D.** on bar **LW.** 3ft, and 30ft at **HW.** **W.** prev. S. and SW. ; most

dangerous on bar SW.; but wharf is protected by Hodbarrow Point. Crane power to 5 tons. **Charges.** Anchorage, to Lord of Manor, 4d per vessel; water rate 6d per vessel. **Official.** Harb. Master, Capt. Joseph Holmes.

DUMBARTON, Dumbartonshire, Scotland, River Leven. **Auth.** Harb. Board under Act 1881. **THW.** f. and c. oh 20m. **Accn. D.** on bar 14ft at **LW.** and 24ft at HWST. Area. Tidal river about 1 mile long by 300ft wide constitutes the harb. There are 2 tidal docks, belonging to a private firm. Harb. is used by vessels of up to 1,800 tons, but principally for shipbuilding, vessels of 8,000 tons being built. **Ry.** Lanarkshire & Dumbarton, and NB. **Charges. Rates** on vessels entering, using or passing through the harb. of Dumbarton :—

There are several large warehouses ; also steam, hydraulic, and hand cranes up to 90 tons, and hyd. jiggers for unloading jute, &c. The present area of accn. within the docks for ships and boats is 38 acres. **Charges.** Tonnage rates, foreign 4d to 1/4 reg. ton ; coasting 2d to 3d per ton ; river 1d and 1½d reg. ton, and 1/ voyage. Miscellaneous rates. Rates on goods. Lighting and buoying rates $\frac{3}{50}$d on all vessels entering or leaving the harb. **Pilotage.** NC. **District :** The limits within which vessels can be piloted by the pilots licensed by the Trustees, are from six miles outside of the Fairway buoy at the entrance to the river Tay, up the river as far as Invergowrie on the north, and Balmerinoch on the south side of the Tay. **Rates.** *Foreign.*—I. Inwards : for vessels from foreign boarded not more than 3 miles outward of the Fairway buoy, or at any point between that distance and the said buoy, to and including any point or place within the docks of Dundee or Broughty Ferry and Tayport harbs., 3/10$\frac{2}{10}$ per ft, according to the draught of water. Outwards : for vessels to foreign, boarded at any point or place within the docks of Dundee or Broughty Ferry and Tayport harbs., and discharged at the buoy of Tay 3/10$\frac{2}{10}$ per ft. II. Inwards : for vessels from foreign, boarded as above, and discharged in the roads 2/5$\frac{7}{10}$ per ft. Outwards : for vessels to foreign, boarded in the roads and discharged at the buoy of Tay 2/5$\frac{7}{10}$ per ft. III. Inwards : for vessels from foreign, boarded above Broughty Castle, to and including the docks of Dundee or Broughty Ferry and Tayport Harbs. 1/4½ per ft. Outwards : for vessels to foreign, boarded in the docks or Broughty Ferry and Tayport harbs. and discharged in the roads 1/4½ per ft. *Coasting.*—IV. Inwards and outwards : for vessels coasting, boarded and discharged as in No. I. 2/9 per ft. V. Inwards and outwards : for vessels coasting, boarded and discharged as in No. II. 2/2$\frac{4}{10}$ per ft. VI. Inwards and outwards : for vessels coasting, boarded and discharged as in No. III. 1/1$\frac{2}{10}$ per ft. Vessels boarded at Tayport and discharged in the

docks at Dundee, or boarded in the docks, and discharged at Tayport, are charged $1/5\frac{6}{10}$ per ft. During the months of Oct., Nov., Dec., Jan., Feb., and March in each year, the rates are as follows :—I. $4/5\frac{625}{1000}$; II. $3/1\frac{125}{1000}$; III. $1/4\frac{1}{2}$; IV. $3/3\frac{6}{10}$; V. 2/9; VI. $1/1\frac{2}{10}$. In addition to the above rates ½d per ton is chargeable on the excess tonnage of all vessels above 500 tons reg. In the event of vessels having to stop in Carolina roads for want of water, in the docks at Dundee, or otherwise, the pilot shall be entitled to leave the vessel; but if the master of the vessel desire to retain him on board till she can enter the harb., he shall intimate such desire to the pilotmaster, who will decide whether that can be done. In the former case, full pilotage rates shall be exigible, but another pilot will, when required, be appointed to bring the vessel into the harb. without any charge beyond the ordinary pilotage rates; in the latter, besides these rates, 10/6 shall be payable for each day or part of a day any pilot shall be so detained, in name of river fees; and in the case of outward bound vessels requiring similar service, the charge for river fees shall be the same. All vessels inward bound, boarded beyond the distance of three miles from the buoy of Tay, and not exceeding six miles, to pay 10/6 additional for distance money; and vessels boarded six miles beyond the said buoy of Tay to pay 15/. In case of dispute distance shall be ascertained by the bearings of the different headlands when vessel was boarded. **Towage.** Min. charge for sea towage £2 10/, and for harb. towage 20/. **Rates inwards** including docking (with second tug if necessary): Outside No. 3 Black Buoy, and under 6 miles outside Fairway Buoy 4d reg. ton. From No. 3 Black Buoy and below Newcome Buoy 2d reg. ton. From Newcome Buoy or inwards, under weigh or at anchor 1½d reg. ton. When two tugs are required for docking a vessel, the second tug shall receive out of the above rates one-third the total charge for towage from Newcome Buoy. When more than two tugs are necessary, the charge shall be as above for the first two tugs, and the rest shall be paid by the vessel, each one-third towage rates from Newcome Buoy. Rate inwards (by two or more tugs, including docking with same) first tug 3d; each additional tug 2d per ton. All tugs to be paid by vessel. When a vessel is towed inwards to an anchorage in the Roadstead and left there, a deduction of 1½d per reg. ton is made from towage rate; when towed inwards and berthed at Eastern Wharves or wharves at en. to Camperdown Dock, 1d per reg. ton is deducted. From Roadstead into Dock, 1½d per reg. ton; from Roadstead to either of the Wharves or *vice versâ*, 1d per reg. ton; from either of the Wharves into Dock or *vice versâ*, 1d per reg. ton. **Outward Rates.** For loaded vessels, half of inward rates. For vessels in ballast, one-third of inward rates. Towage to Tayport not ex. 150 tons £1; ex. 150 and not ex. 200 tons £1 5s; ex. 200 and not ex. 300 £1 10s; ex. 300 tons £2. Shifting docks, not ex. 200 tons £1; ex. 200 and not ex. 300 tons £1 10s; ex. 300 and not ex. 400 tons £2; ex. 400 and not ex. 600 tons £2 10s; ex. 600 and not ex. 800 tons £3; ex. 800 and not ex. 1,000 tons £3 10s; ex. 1,000 £4. Attend-

ing launches, same rates as shifting docks. Rates for hawsers, not ex. 500 tons, river £1, sea £1 10s; ex. 500 and not ex. 1,000 tons, river £1 10s, sea £2; ex. 1,000, river 35/, sea £2 10s. **Officials.** Gen. Man. and Engineer, J. Hannay Thompson, M.Inst.C.E.; Clerk to Harb. Trust., John Malloch; Harb. Master, Capt. C. Yule; Treas., J. D. Panton, C.A.; Coll. and Surv. H.M. Cust., M. J. Cahill; Board of Trade Surv., J. Williams; Lloyd's Agents, W. O. Taylor & Co.

DUNDRUM, Co. Down. A small harbour. **Auth.** The Marquis of Downshire, under the Dundrum Harbour Order, 1872.

A From sea to any navigable part of Helford River within an imaginary line drawn from the lighthouse on St. Anthony's Point, to the Block House on Pendennis Point.

B From inside an imaginary line drawn from the Manacles to the Dodman, to same.

C From inside an imaginary line drawn from the lighthouse on St. Anthony's Point, to the Block House on Pendennis Point, to Carrick Roads, Falmouth Inner Harb., St. Mawes Harb. and St. Just Pool.

A vessel brought to an anchor, or taken from her anchorage by a pilot outside an imaginary line drawn from the Lighthouse on St. Anthony's Point to the Block House on Pendennis Point, is to pay inward pilotage as above. A vessel, the master of which employs a pilot, within the district, and not anchoring or coming within such line, inward pilotage as above. Outward pilotage, 3/ per ft of the dft of water for vessels under 16ft water and 4/ per ft for vessels drawing 16ft and above that dft. From Carrick Roads and *vice versâ*, to Falmouth Inner Harb., St. Mawes Harb., S. Just Pool, and Restronguet, 2/ foot dft. From Carrick Roads and *vice versâ* to Malpas, 2/6 foot dft. For vessels exceeding 23ft, an increase for each foot or part of a foot, in the same proportion as between 22 and 23ft. Steamers putting into Falmouth for coal only are to pay for pilotage, in and out. The Pilotage Rates are subject to a reduction of one-fourth part, in respect of steamers and vessels towed by steam vessels, provided that if any such vessel shall be propelled by steam, or towed by a steam vessel for a part only of the distance for which rate is payable, the reduction shall be made on such part only. No vessel is to be brought to an anchor outside an imaginary line drawn from the Lighthouse on St. Anthony's Point to the Block House on Pendennis Point, unless at the express desire of the master, of which the Pilot is to procure a certificate to entitle him to the pilotage ; and no vessel is to be brought to an anchor between an imaginary line drawn from the Light-

house on St. Anthony's Point to the Block House on Pendennis Point, and an imaginary line drawn from the Block House on Pendennis Point to Carrick Narth Point, or between the buoys of the Narrows, unless under circumstances of unavoidable necessity. A charge of 10/ is to be made for putting a pilot on board vessels outside the Manacles. Pilots kept on board vessels under way outside the harbour, shall be entitled to the following scale of pay, viz. :—

														£	o	10	6
Not exceeding 6 hours				..	..	..	..	..	..	..	..	..	..				
6	and not ex.	24	„	..	..	..	..	..	..	..	..	..	..	1	1	0	
24	„	30	„	..	..	..	..	..	..	..	..	..	..	1	11	6	
30	„	48	„	..	..	..	..	..	..	..	..	..	..	2	2	0	
48	„	54	„	..	..	..	..	..	..	..	..	..	..	2	12	6	
54	„	72	„	..	..	..	..	..	..	..	..	..	..	3	3	0	

And so on in like proportion for such service; and pilots remaining on board vessels at anchor within the harb., when requested by the master thereof so to do, or detained on board of vessels performing quarantine, shall receive the same rate of pay for such detention. N.B.—No allowance for a pilot going on board a ship in the harbour to take her out, except in extremely bad weather, or when ships are on shore, or making signals of distress. **Towage.** Inward or outward. 5/ for every 50 tons up to 1,000 tons, and 10/ for every 100 tons above 1,000 tons. Transporting in the harbour, docking or undocking, three-fourths of above-mentioned rates. Assisting to moor after first anchor is dropped £1, if the tug has not earned inward towage. If paid by time the rate is £2 per hour under ordinary circumstances. **Officials.** Clerk to Harb. Commrs., W. J. Sharpe; Harb. Master, G. Green; Dock Sec. and Supt., F. J. Bowles; Dock Master, E. J. K. Nicholls; Lloyd's Agents, W. Broad & Sons.

FISCAVAIG BAY, I. of Skye. Lat. 58° 23′ N; long. 6° 26′ W. Private pier at Carbost, owned by Dailuaine Talisker Distilleries, Ltd, in Loch Harport

(3 miles from Fiscavaig Bay), at which vessels of 600 tons can call at any state of tide. **D.** at quay, 15ft LW. Vessels are not charged. Pier dues if allowed to remain at pier.

FISHBOURN.—See Ryde.

FISHERROW.—See Musselborough.

FISHGUARD (see also Fishguard Harbour), Pembrokeshire. Harbour recently constructed by the Fishguard and Rosslare Railways and Harbours Co. on the opposite (Goodwick) side of the bay to the old Fishguard Harbour. The Cunard and other steamship lines use this port for embarking or disembarking passengers and mails. Tenders are always under steam, and coal and water barges afloat. The Irish steamers of the G.W. Ry. Co. now run between the new port and Rosslare, and there are also services to and from Waterford and Cork. The Rosslare boats are fast turbine steamers, carrying mails and passengers, and run alongside wharves. **D.E.** 40ft, at quays 20ft LWST. **Accn.** At present 1,100ft of quays. Breakwater 2,500ft; sheltered anchorage within it. Electric cranes; 8 of 1½, 4 of 3, 1 of 21 tons. Ocean quay on inner side of breakwater for liners disembarking passengers, &c., with 30ft LWOST. **Pilotage.** C. within limits of Trinity House outport dist. of Milford by M.S. Act, 1894. **Charges.** Tonnage dues: coastwise with cargo 4d t.r.; windbound 2d, with cargo 4d; after 1 month, all vessels per month, 3d; all oversea 6d, not included in above 8d, all per n.r. ton. Fishing boats 2/6 per visit; with 6 hands and over 20/ per season, fewer hands 10/. Trawlers 6/ per visit. Vessels in ballast, but if arriving in ballast and taking cargo, full rates, returning for shelter no additions. Ballast—stone 2/, other 2/ per ton. Timber dues by scale. Cranage per ton, under 3 tons 5d., over by agreement. Storage of timber from ½d to 1d per ton per week; deals 6d per 120 per week; if piles of 600 3d. Quay dues on ships oversea 3d, coastwise 1½d per t.r. Weighing coal, 2d use of machinery. Shipping coal 3d. Cranage 2/6 to 5/, 1 ton to 6, first lift; after, 4d to 1/2 per lift. Ten ton cranes up to 7 tons, 10/, over 20/, per first lift, half after; over 10 tons by agreement. Lights ¼d per t.r.; water, ½d. **Official.** Harb. Master, Capt. R. Sharp.

FISHGUARD HARBOUR, Pembrokeshire (see also Fishguard). Lat. 51° 55′ N; long. 4° 57′ W. **Auth.** Fishguard Harb. Improvement Co. **Pop.** about 2,000. **Tr.** I. Coal, culm, manure, and general goods. **THW.** f. and c. 6h 56m. A lifeboat station. **D.** HWST 14ft and HWNT. 8ft a pier head. LWST. all dry, and LWNT. 3ft at pier head. Quays 500ft. Steamer to Bristol every 14 days. Nearest **Ry.** Goodwick, G.W.R., 1½ miles. **Charges.** 3d per ton; culm and limestone 1d; vessels windbound 1½d per ton; ballast 6d per ton. **Official.** Harb. Master and Sec., T. H. Evans.

FLADDA or PHLADDA HARBOUR, Isle of Skye. Lat. 57° 34′ N; long. 5° 57′ W. **Pop.** 100. A safe anchorage in 10 to 4 fms. There are two entrances, the safest to the S. **Official.** R. Gillies.

FLEET BAY, Kircudbrightshire (see Gatehouse). Lat. 54° 48′ N ; long. 4° 15′ W. Harb. has **D** 10ft HWST. **THW.** f. and c. 11h 30m. **Official.** J. Belford, Harb. Master.

FLEETWOOD, Lancashire. On the river Wyre, near its entrance into Morecambe Bay. Lat. 53° 55′ N ; long. 3° 0′ 20″ W. **Pop.** 16,000. **Auth.** L. & Y. and L. & N.W. Ry. (jointly), under Statute 12 and 13 Vict., c. 74. **Tr.** I. Grain, cotton, timber, iron ore, esparto, fibre, fish, cattle, dyewood, cement, steel rails, wood pulp, &c. ; E. Coal, salt, and general merchandise. **THW.** 11h 24m ; Sp. rise 27ft ; N. rise 20½ft. **D.** of water over all, 23ft OST., 17ft ONT. Sheltered from all winds and run of tides. **Rys.** L. & Y. and L. & N.W. (jointly). **LV.** *Royal Forth*, 2,919 tons reg. **En.** to docks is through a channel with a depth of 25ft OST. **Accn.** Patent slip capable of taking vessels up to 300 tons d.w. New gridiron 310ft by 50ft. Wyre Dock. L. & Y. Ry. Entrance lock 250ft long, 50ft wide at quay level, narrowing to 47ft 7in, above sill 2ft 6in. Dock 1,000ft long, 400ft wide ; area 9½ acres ; length of quayage 2,700ft. Extensive fish warehouses contiguous to quay, into which fish can be landed direct from trawlers. Cranes : one 25 tons, two 7 tons, four 4 tons, eight 3 tons, two 30 cwt., one stationary 5 ton crane for loading log timber *ex* pond. Grain elevator 300ft long, 90ft wide, and 140ft high. Storage capacity 30,000 tons. Grain discharged by means of ship's leg. Three sheds on dock quay for storage of traffic. New Fish Dock: 15 acres for steam trawlers, etc. Length 900ft, width 700ft. Quayage 1,935ft. 3 electric traversers for coaling steam trawlers. Two patent slips taking vessels up to 450 and 650 tons d.w. respectively. **Charges.** Harb. dues : Foreign—3d per ton per voyage, Wyre light dues 3d per ton per voyage, Walney light dues 3d per ton per annum. Coasting—1d per ton per voyage, Wyre light dues 3d per ton per annum. Pier dues 2d for each passenger. Walney light dues 3d per ton per annum. The Walney light dues will be collected as follows :—1½d per ton on first voyage, 1½d per ton on second voyage, within 12 months after first arrival. Mooring in the harbour or assisting into dock 10s ; for any additional time 5s. Dock dues per reg. ton : vessels from between Mull of Galloway and St. David's Head, Isles of Man and Anglesey, 1½d ; between Mull of Galloway and Duncan's Bay Head, Orkney Isles, and Islands on the W. coasts of Scotland, between St. David's Head and Land's End, the Scilly Islands and E. Coast of Ireland from Cape Clear to Malin Head, 2d ; from the E. and S. coast of Great Britain between Duncan's Bay Head and Land's End, Islands of Shetland, W. Coast of Ireland from Cape Clear to Malin Head, including the islands on the coast, 3d ; from Europe N. of Cape Finisterre and W. of the North Cape, and without the Cattegat and Baltic Sea, the Islands of Guernsey, Jersey, Alderney, and Sark, the Faroe Isles, and Iceland, 5d ; from all Spanish, Portuguese, and Algerian ports, 5d ; from all other foreign ports, 10d. Vessels arriving from any other port in ballast are exempt on entering ; should such vessels proceed to sea again in ballast, one-half rates

which would have been payable if such vessels had entered with cargo. Vessel entering Wyre Dock light, or with only part cargoes, not to discharge, but to load or complete their loading outwards, only charged half dues, according to port to which they load. Vessels discharging their inward cargo at Fleetwood Quay, and afterwards coming into dock to load cargo outwards, charged half dues, according to port to which they load. No dock rates or town dues charged on cargoes; but on goods unloaded from or loaded into vessels and conveyed from or to the port otherwise than by railway, 4d per ton is charged for use of the wharf or quay. Vessels using dock after expiration of six weeks from date of arrival 2d per ton per week. **Pilotage.** C. **District:** From sea (that is Morecambe Bay lightship) into and out of the harb. and along the coast from Formby Point to Haverigg Point of Duddon. **Rates** on vessels employed in the oversea trade:—

	Under 200 tons reg.	200 tons and under 600 tons reg.	600 tons and under 1,000 tons reg.	1,000 tons and under 1,500 tons reg.
	foot. s. d.	foot. s. d.	foot. s. d.	foot. s. d.

Whisky and live stock. **Accn.** At railway pier, 2 berths, 120 and 350ft. **D.** at both piers, outside berth, OT. 11ft **LW.,** 22ft **HW.,** inside berth, OT. 3ft **LW.,** 11ft **HW.** No cranage accn. **LV.** 353 reg. tons. **Ry.** N.B. **Charges.** Harb. dues 1d per reg. ton. No dues on cargo. Stevedore's charges 4d to 6d ton on cargo. **Official.** Harb. Master, R. Sutherland.

FOSDYKE.—See Spalding.

FOSDYKE BRIDGE, on the River Welland, 8 miles below Spalding. **Auth.** The River Welland Outfall Trustees. **HW.** f. and c. 7h om. **D.** ST. 12 to 15ft. **LV.** Vessels up to 160ft in length can swing. **Charges.** River Welland dues, same as for Spalding. **Pilotage.** Clay-hole, to or from, under 8ft 1/9 per ft, over 8ft 2/ per ft. Steam tugs from Boston, ballast and silt free. **Official.** Harb. Master, W. E. Ashton, Fosdyke Boston.

FOWEY, Cornwall. Lat. 50° 21′ N; long. 4° 38′ W. **Pop.** 2,000. **Auth.** Harb. Commissioners under Order of 1893. **Tr.** I. Patent manure, timber, coal, and limestone; E. China-clay and stone. **THW.** f. and c. 5h 14m; Sp. rise 17ft; N. rise 12ft. **D.** ST. 26ft; NT. 20ft; LST. 18ft. **W.** prev. SW. and SSE. **LV.** 5,600 tons d.w. The harb. is safe at all times of tide. The G.W. Ry. have provided seven railway jetties, viz., Nos. 1, 2, and 3, with hydraulic tips and steam cranes; No. 4, with hydraulic tip, electric conveyor, and electric crane. Ships can be loaded at latter jetty without interruption from rise and fall of tide, &c. Nos. 5, 6, and 7, with steam cranes and electric capstans. **D.** 19ft LWOST. **Charges.** Harb. dues: Steamers and sailers coastwise 1¾d per reg. ton, others 2¼d, steamers tonnage not less than 40 per cent. of gross register; ballast 9d per ton. G.W.R. Co.'s charges for discharging coal cargoes:—Steamers up to 1,000 tons 5¼d per ton, 1,000 to 2,000 5¾d, 2,000 to 3,000 6¼d, above 3,000 6¾d; sailing vessels up to 1,000 tons 5d per ton, 1,000 to 2,000 5½d, 2,000 to 3,000 6d, above 3,000 6½d. Trimming china-clay, sand, and stone, and iron ore in bulk:—Steamers up to 500 tons 1¾d per ton, 500 to 750 2d, 750 to 1,000 2¼d, 1,000 to 1,500 2¾d, 1,500 to 2,000 3¼d, 2,000 to 3,000 4¼d, above 3,000 4¾d; sailing vessels up to 500 tons 1½d per ton, 500 to 750 1¾d, 750 to 1,000 2d, 1,000 to 1,500 2½d, 1,500 to 2,000 3d, 2,000 to 3,000 4d, above 3,000 4½. Stowage of china-clay in casks and bags, and china stone runners:—Steamers up to 1,000 tons 4¼d per ton, 1,000 to 2,000 4¾d, 2,000 to 3,000 5¼d, above 3,000 6¼d; sailing vessels up to 1,000 tons 4d, 1,000 to 2,000 4½d, 2,000 to 3,000 5d, above 3,000, 6d; other merchandise in proportion. In case of vessels loading or discharging at Jetty No. 4, 2d per ton is levied on all cargoes or portions of cargoes loaded or discharged thereat in addition to these charges. **Pilotage.** C. **District:** From Looe to the Dodman. **Rates.** On vessels boarded within the Land off Looe or the Dodman, into the harb. of Fowey, Mevagissey Pier, Pentewan Basin, Charles-

town Basin, or Looe: Vessels not exceeding 100 tons reg. 2/ per ft and 6d for every additional 50 tons. On vessels boarded without the limits above defined 1/ ft, in addition to the foregoing. The pilotage outwards, from any of the said harbs. to sea, is two-thirds of the aforegoing, according to the vessel's then dft. of water. All vessel which anchor on their arrival, either in Mevagissey Bay or the Sands of Fowey, pay one-half. All vessels, inwards, anchoring in Fowey Harb., and afterwards removed to Looe Roads, and all vessels outwards removed from Looe Roads and anchored in Fowey Harb., pay 1/ per ft. extra, if drawing 14ft of water, and 9d per ft if drawing less than 14ft. Vessels removed from one harb. to another pay the same pilotage as if boarded within the headlands coming in from sea. A pilot taken on board at sea is entitled to the following additional rate of pay:—If at three leagues without a line drawn from the Looe to the Dodman £3 3/. If at six leagues without a line drawn from the Looe to the Dodman £4 4/. If at ten leagues without a line drawn from the Looe to the Dodman £6 6/ and proportionately for intermediate distances. All coasting vessels, excepting limestone barges, piloted into the harb. of Looe pay 1d ton, new registry, and the same outwards. All limestone barges piloted into the harb. pay 2/6 each and the same outwards. **Towage.** In and out and shifting to or from loading or discharging berths, 5d per reg. ton; vessels under 100 tons to pay on 100 tons. Harbour towage limits include towing inward or outward to or from an imaginary line drawn from Cannis Rocks to Pencarrow Point. Attendance on steamers in and out of harb., above 1,000 reg. tons 10/ per 200 tons; under 1,000 tons by agreement. Up to 300 tons d.w. Fowey to Par, or *vice versâ*, 25/; to Charlestown and Pentewan 35/; to Mevagissey 40/: Looe to Par, Charlestown or Pentewan 50/; Looe to Fowey, including harb. work for vessels under 100 reg. tons 60/. Above 100 tons, 5d per ton on extra tonnage. **Officials.** Clerk to Harb. Commrs., W. J. Graham; Harb. Master, E. P. Beale; Coll. of Dues, Henry Paull; Supt. H.M. Cust., J. Rouffignac; Lloyd's Agent, J. H. Hannan.

FOYNES, Co. Limerick. On the Shannon. Lat. 52° 36′ N; long. 9° 5′ W. **Auth.** Trustees under Shannon Act, 1885. **THW.** f. and c. 5h 35m. **Accn.** Area about 3 acres. 350ft quay. Berths for 3 ships. Two cranes, 2 and 5 tons. **LV.** 2,350 tons. **D.** Dry at **LW.** Springs rise 15½ft, neaps 11ft at entrance. OT. 14ft 9in. A good anchorage. Two mooring buoys in vicinity of pier. The western buoy bears from the nearest corner of the pier NNW. ¼-W. westerly about half a cable. The eastern buoy ESE. about the same distance from the eastern corner of the pier. The bearings are magnetic from the pier. Both buoys are moored in over 30ft of water. **Charges.** Ship pays 4d, merchant 5d ton for discharging. Wharfage 1½d ton. Quayage 3d reg. ton on coasters, 5d on foreign tonnage. Cranage *nil.* **Official.** Sec. to Harb. Board, S. J. McDonogh.

FRASERBURGH, Aberdeenshire. Lat. 57° 41′ N; long. 2° 0′ W. The largest herring fishing port.

Pop. in fishing season, 20,000. **Auth.** Commissioners under Fraserburgh Harbour Act, 1878, and Harbour Order, 1884. **Tr.** I. Coal, lime, iron, salt, timber, staves and fish; E. Oats, potatoes and pickled herrings. **Ry.** G.N. of Scotland. **THW.** f. and c. oh 40m. Harbour is protected by the Balaclava Breakwater and Pier, 2,265ft long, carried into 15ft depth **LW.** at end, and by a south breakwater carried into 16ft at **LW.** and enclosing about 20 acres.

The largest vessel can enter the roadstead and lie there at anchor in safety. Two wet docks, with an area of 9 acres, will accommodate vessels of 15ft dft; these can enter at OST. There is a 15-ton lifting crane. **Charges.** Dues on coasting steamers 1/ per ton on half gross reg.; oversea steamers 1/2 on net reg.; sailers respectively 8d and 1/2 net reg. **Pilotage.** C. **District:** The Port of Galway is divided into two pilotage districts, one called the outer and the other the inner. The outer district extends from a line from Gulin Head to the western point of the Arran Islands, and from thence to Hag's Head and to the roadstead of Galway. The inner district extends from the roadstead to the docks and quays. **Rates.** From a line drawn between Black Head and Spiddal to the roadstead, and *vice versâ*: 50 tons and under 75 tons 12/6, and 2/6 additional for every 25 tons. Half the above rate payable from the roadstead to the docks, and *vice versâ*. A vessel taking a pilot at or outside Arran Islands, by either Sound, pays 2/6 for every 25 tons reg., in addition to these rates. **Towage.** As per agreement. **Officials.** Sec. to Harb. Commrs., T. N. Redington; Harb. Master, M. P. Walsh; Collector of Port Dues, J. S. Campbell; Coll. of H.M. Cust, M. Healy; Engineer, W. N. Binns, B.E.; Lloyd's Agents, Richardson Bros. & Co.

GARDENSTOWN, Banffshire. Near Troup Head. Lat. 57° 40′ N; long. 2° 20′ W. **Auth.** Harbour Trustees under the Gardenstown Harbour Order, 1911. **Tr.** I. coal; E. Oats and herrings. **THW.** f. and c. noon. **W.** prev. and most dang. N. to NE. **D. at En.** 11ft HWST.; 10ft in berth; HWNT. 9ft E. and 8ft in berth. **Accn.** Harbour is of triangular shape, with WS. and E. quays, length of quayage being 1,669ft. **D.** Dry at **LW.,** 11½ft HWST, and 9ft HWNT. **Charges.** 3d per ton reg. Ballast as per agreement. **Pilotage,** 4d per ton reg. **Official** Harb. Master, G. West.

GARLIESTON, Wigtownshire. Lat. 54° 45′ N; long. 4° 20′ W. **Auth.** Harb. Committee, without Parliamentary powers. **W.** prev. S and SE. **THW.** corresponds with time of Liverpool. **Accn.** Tidal harbour, dry at **LW.,** with 18ft HWST. and 10 to 12ft HWNT. **LV.** 300 tons reg. Crane power to 5 tons. Covered sheds. **Charges.** 1½d per ton reg. on vessels discharging or loading, 1d per ton on vessels taking shelter. Dues on cargo landed Coal and lime 1d per ton, manures and feeding stuffs 3d, other goods from 1d to 1/8 per ton. Harb. boat 2/ to 10/, according to tonnage. **Pilotage.** 5/ to £2. **Officials.** Sec., D. Morrison; Harb. Master, D. B. Shaw.

GARMOUTH, or Kingston, Morayshire. Lat. 57° 41′ N; long. 3° 10′ W. There are no harb. works. Ships lie in the estuary of the River Spey.

GARSTON DOCKS, Lancashire. On the Upper Mersey, 4 miles S. of the Liverpool S. Docks, and on the same side of the river. The coalfields and manufactur-

ing districts of Lancashire, Staffordshire, Yorkshire and the Midlands are in close proximity or within short haul of the port. **Auth.** L. & N.W. Ry. Co., under Company's Acts of Parliament. **Ry.** L. & N.W. **Tr.** General I. and E., especially coals E. **LV.** Steamers of 3,330 reg. ton. and sailing vessels of 2,203 reg. ton. **THW.** f. and c. 12h om noon. **Accn:**—*Stalbridge Dock.*—This is a new dock. Water area, 14½ acres; berthing space, 3,170ft; width of entrance, 65ft; with lock 276ft long. **D.** on sill, 35ft ST.; 25ft NT. Fifteen port able hydraulic cranes to lift 2½ tons, and two to lift 4 tons. Four movable hydraulic coal tips of 30 tons capacity. The lock in connection with this dock enables craft to enter or leave any of the three docks two or three hours before or after high water, all three being connected. *North Dock.*—Water area, 8 acres; berthing space, 2,400ft; width of entrance, 55ft; **D** on sill, 28ft ST.; 18ft NT. Sheerlegs of 40 tons capacity; thirteen portable hydraulic cranes of 30 to 50 cwts. capacity; two movable hydraulic coal tips of 30 tons capacity; and four fixed high level tips of less capacity. *Old Dock.*—Water area, 6 acres; berthing space, 2,160ft; width of en., 50ft; **D** on sill, 25ft ST.; 15ft NT. Fifteen portable hydraulic cranes of 30 to 50 cwts capacity; one hand crane of 6 tons capacity; three fixed high level coal tips. **Charges.** Dock dues: Old Dock, 3d ton on quantity discharged and/or loaded, if vessel arrives light or in ballast loading outward with coal *nil*, at present; North Dock, 2d on ton on reg. ton., loaded or light; Stalbridge Dock, 4d ton on reg. ton. or 3d ton on reg. ton. if vessel arrives light or in ballast loading outwards with coal. Extensive warehouse and shed accom., including a Customs transit shed, is provided, and "floored" berths of a special character with accom. for upwards of 100,000 tons of mineral cargo; and there are about 48 acres of storage ground specially levelled for dealing with timber cargoes Coal shipments are conducted day and night, a complete electrical installation being in operation. Garston being a railway port, goods are transferred direct from ship to railway wagon. The L. & N.W. Ry Co., as owners, control the entire working of the docks, which are directly connected with their main line system and through that with the systems of all the railway companies in the country. There are some 70 miles of sidings at the port, of which eight miles are on or alongside the quays. **Pilotage.** (See Liverpool.) **Towage.** (See Liverpool.) **Officials.** District Traffic Supt. and Dock Master, J. Roughley.

GARTHORP, a wharf 20m from Gainsborough.

GATEHOUSE, or Port MacAdam, Kirkcudbrightshire, situated on the River Fleet, 3 miles above Wigtown Bay. Lat. 50° 46′ N; long. 4° 19′ W. **Auth.** Trustees of the late Col. Murray Baillie, of Cally Gatehouse. A dry harb. **LW.** 10ft at quay OST. **Charges.** Dues on cargoes imported or exported, according to schedule. Loading outwards 2d per ton reg. Pilotage as per agreement. **Official.** Harb. Master, J. Belford.

GATESHEAD.—See Newcastle-on-Tyne.

GIGHA ISLAND, Argyllshire. Lat. 55° 42′ N ; long. 5° 43′ W. There are 3 good anchorages on E. side, Gigulam Sound being the best.

GILL, Westray Island, Orkneys. Lat. 59° 18′ N ; long. 2° 58′ W. **Auth.** Orkney Harb. Commissioners, under Orkney Harbours Act, 1887. **THW.** f. and c. 9h 10m. **Accn.** A harbour with a stone pier 420ft long, 15ft HWST., and 9ft LWST. Crane power to 2 tons. **Charges.** Harb. dues according to size, 1½d to 6d per ton. **Official.** Harb. Master, J. Scott.

GILLINGHAM, Kent. On the River Medway, near Chatham. **Auth.** The Corporation of Gillingham, under the Gillingham Pier Order, 1869. A wharf or landing place near the eastern boundary of Chatham Dockyard. By the Gillingham Pier Order, 1912, the Corporation obtained power to construct an additional landing pier.

GIRVAN, Ayrshire. Lat 55° 15′ N ; long. 4° 50′ W. Situated at the mouth of the Girvan. **Auth.** Commissioners, under Harbour Orders, 1865, 1867, and 1881. **THW.** f. and c. 11h 45m. **Accn.** Area about 15 acres. Quayage about 2,100ft. **D.** on sill 2 to 4ft **LW.,** and 12ft HWST. Used by coasters and small steamers. Convenience for shipping coals. **Ry.** G. & S.W. **Charges.** Same as Ayr. **Official.** Harb. Mast., A. McCreadie.

GLANDORE, Co. Cork. Lat. 51° 33′ N ; long. 9° 5′ W. No Harb. Auth. **Tr.** I. Coal, maize ; E. Slates, cured mackerel. **THW.** f. and c. 3h 45m. **W.** prev. S. and SE. **Accn.** There is a level pier with 3ft at **LW.,** and a berth on either side for one vessel ; also small pier in bad condition (Glandore side), dry at LWOST. **D.** in harb., **HW.** 17ft; NT. 9ft; OT. 12ft. **D. of En.** 12 fms. **D. at LW.,** 13ft. **LV.** 244 tons. **Charges.** Harb. dues, 2d ton reg. ; loading, 2d ton. Pilots to be had if required. **Official.** Harb. Constable, Geo. Crispie. (See Union Hall.)

GLASGOW, Lanark. On the Clyde. Lat. 55° 52′ 10″ N ; long. 4° 15′ 51″ W. **Pop.** 1,010,000. **Auth.** Clyde Navigation Trustees. **Tr.** I. Grain, flour, timber, sugar, sulphur, hides, ores, oil, seeds, beef, pork, cheese, iron, &c. ; E. Cotton, linen, woollen and jute manufactures, iron, copper, machinery, chemicals, coal, &c. **THW.** f. and c. 1h 8m ; OSp. rise 12ft 2in ; ON. rise 9ft 9in ; extreme R. of T. 15½ft; duration of flood tide OST., 5h 56m; duration of ebb tide OST., 6h 21m ; velocity of flood tide at Elderslie 5 miles from Glasgow Bridge OST. 1¼ statute miles, ¼ tide ; velocity of ebb tide at Elderslie OST. 1⅜ statute miles, ¼ tide. **D.** in the river channel varies from about 16ft in Glasgow Lower Harb. to 24ft at Port Glasgow OLWST. **W.** prev. are from SW., and together with NW. are the most dangerous. SW. winds generally cause high tides in the river, and E. winds and frost, low tides, often to the extent of several ft higher or lower than the preceding tide. **Rys.** Cal., Glasgow and Paisley Joint (Cal. & G. & S.W.), G. & S.W., and N.B. **LV.** entering the Clyde 26¾fr dft., leaving port 29ft. **Accn.** Glasgow Harb. extends from about ½ mile above to 4 miles below

Glasgow Bridge. Total length of quayage of harb. and docks, 16,291 lin. yds; area of water space, 298 acres; area of quays, roads, sheds, &c., 150 acres; area of sheds, 56 acres; area of timber yards, 34 acres. The area of water space in Glasgow Upper Harb. opposite the quay, which is only on one side, and 502 yds long, is about 20¾ acres, the depth near to the face of the quay being from 20 to 23ft at **HW.** One 5-ton and one 3-ton steam crane on quay. The harbour below Glasgow Bridge has a water area of about 113 acres opposite the quays, and a depth of 25 to 31ft at HWOST. The total length of quays is 5,771yds. The quay space, 41 acres, is provided with goods sheds, lines of rail in connection with the Cal., N.B. and G. & S.W. Rys., one 3-ton electric crane, three 5-ton steam cranes, a 40-ton, a 50-ton, a 60-ton, a 75-ton, and a 130-ton steam crane, six 5-ton cranes for mineral traffic, four 30-ton and one 25-ton steam cranes at General Terminus Quay for loading coal, the property of Caledonian Ry. Co., one 130-ton, one 90-ton and several 40-ton, 30-ton, 20-ton and 15-ton weighing machines for cart and railway traffic. The quays and roadways are causewayed, lighted with gas and electricity, and provided with water supply for vessels, water troughs, drinking fountains, closet ranges, protection fencing, waiting-rooms at passenger wharves, and ferry landings for a complete service of cross ferry-boats; customs offices, weigh offices, accident boxes, &c. *Kingston Dock*, a tidal basin, 4⅝ acres of water area, entrance, 56ft wide. The entrance is spanned by a swing bridge, opened and shut by steam power. Quays under construction. When completed, the length of quayage will be 776 yds.; quay space, about 4 acres; with goods sheds 50 and 60ft in width; intended depth, 28 to 30ft HWOST. *Queen's Dock*, a tidal basin or dock, having an outer basin 1,000ft long by 695ft at the widest part, a north basin, 1,891ft long by 270ft wide, and a south basin, 1,668ft long by 230ft wide, with a quay between, 195ft broad; entrance 100ft wide; total water area 33¾ acres; general depth from 28 to 32ft at **HW.**, quay space, about 25 acres; total length of quayage, 3,334yds. The north quay is reserved for coal and mineral traffic, and is provided with a 25-ton steam crane, four 19-ton hydraulic cranes, and ten 5-ton portable steam cranes. There are 23 hydraulic capstans for working the wagons at the cranes. The west quay is provided with portable hydraulic cranes, a 30-cwt and a 35-cwt, and east quay with a 5-ton steam crane; the south and centre pier quays have goods sheds 60ft wide, and include several enclosed portions for transit purposes, searchers' offices, &c., the whole covering an area of nearly 8¼ acres; the dock entrance is spanned by a swing bridge which connects the north-west and south quays, and carries road and railway traffic, the lines of rails extending all round the docks. There are a customs watch-house, dock master's and superintendent's offices, &c., and several 30-ton weighing machines for cart and wagon traffic are also erected on the quays; the open quays are lighted with electric lamps and the sheds with gas, and a water main is laid along the breast of the quays for water supply to vessels and for fire extinguishing purposes. *Prince's*

Dock, a tidal basin, entering from south side of lower harbour. **En.** 156ft wide. Water area 35 acres; quay frontage 3,737 yards. and area of almost 40 acres. The dock comprises a canting basin 1,150ft long and from 676ft to 505ft broad; a north basin 1,188ft long by 222ft wide; centre basin 1,273ft long by 200ft wide; and a south basin 1,528ft long by 200ft wide; depth of canting basin 32ft to 40ft, north basin 32ft, and centre and south basins 36ft at HWOST. North and south quays of north and centre basins and north quay of south basin lined with two-storey goods sheds; west quay two single-storey sheds; east and south quays open; total shed floorage, about 23¾ acres. All quays have rails for wagon traffic. The west quay, used for fitting out large vessels of the deepest draught, has a 130-ton steam and 5-ton hydraulic crane; quays of north basin have one 5-ton steam crane and eight 35-cwt to 5-ton hydraulic cranes; centre basin has eighteen and north and east quays of south basin nine 35-cwt to 5-ton hydraulic cranes. South quay, devoted to mineral traffic, has one 25-ton hydraulic coaling hoist, 25-ton steam coaling crane, seven 3 to 5-ton hydraulic cranes and one 3-ton electric crane for ore traffic; except the 130-ton crane all cranes are movable. South quay of dock has hydraulic and electric capstans for handling wagons. The two-storey sheds have appliances for lowering goods. Sheds and roadways lighted with gas, the open quays and dock entrance with electric lamps. The dock is connected directly by rail with the General Terminus station of the Cal. Ry., into which station the N.B. Ry. and the G. & S.W. Ry. Co.'s have access. There is also an independent connection with the G. & P.J. Ry. No. 3 Graving Dock enters off the canting basin of Prince's Dock, the dimensions being as given in table. Two travelling steam cranes, 20 and 25 tons respectively. Timber storage depot, 5½ acres in extent, with nine sheds covering 1½ acres, adjacent to the dock. *Yorkhill Basins and Quays:* 2 miles below Glasgow Bridge. West basin, 555ft long by 230ft wide; east basin, 294ft long by 130ft wide; combined water area, 3¾ acres. Total length of quayage, 1,137yds. Depth of water, 37 to 40ft at HWOST. East and west quays of west basin, riverside quay and north quay of east basin, furnished with goods sheds, 90 and 100ft wide, covering 5¼ acres. Railway connections from N.B. Ry. and Cal. Ry. Quays and roadways causewayed, and equipped with electric capstans and two 5-ton steam cranes. Water main along quays. Sheds and quays lighted with gas. *Govan Wharf*, 47yds long, 2¼ miles below Glasgow Bridge, for river passenger steamers. *Meadowside Quay*, 2½ miles below Glasgow Bridge, 539yds long, with goods shed 100ft wide covering 3¾ acres. Granary behind goods shed to hold 31,000 tons of grain, with band conveyors and elevators. Railway connection from Cal. Ry. Depth in front of quay, 28ft at av. LWOST to 40ft at av. HWOST. *Merklands Quay*, about 3 miles below Glasgow Bridge, 525 yds in length. The eastern portion, 183yds in length, with buildings covering 7½ acres, is reserved for the foreign animals trade; the remainder, 342yds of quay with 6¾ acres of ground,

is used for timber trade. Goods shed, 660ft long by 100ft wide, under construction. Timber storage shed covering about one-third of an acre. Depth in front of quay 26ft to 38ft at av. LWOST. and av. HWOST. respectively. *Shieldhall Wharf.* 699yds in length, 3½ miles below Glasgow Bridge; landing place in connection with adjoining timber storage depot extending to 21¾ acres, with four timber storage sheds covering 1⅝ acres and general goods shed 396ft long and 60ft wide. Depth in front of wharf 18ft to 30ft at av. LWOST. and av. HWOST. respectively. Several canals connected with the port. Graving Docks, &c.:—

Renfrew Harbour, at the mouth of the Pudzeoch Burn 5⅜ miles below Glasgow Bridge. Harbour 660ft by 100ft wide. Quayage under reconstruction. Length of wharf, when completed, 477ft. Intended depth in front, 22 to 24ft at HWOST. 30-ton crane for vessels fitting out. **Ry.** connection with G. and S.W. Rly. *Rothesay Dock*, a tidal basin on the north side of the River Clyde, 6½ miles below Glasgow Bridge. **En.** 200ft wide. Water area 20½ acres, and quay frontage 2,045yds. Comprises an outer basin 600ft by 600 to 680ft, an inner basin 1,735ft long and from 300 to 230ft wide, and a riverside quay 597ft long. Depth of basins 33 to 36ft at av. HWOST. West, north, and south quays of outer basin have twelve 4-ton portable electric cranes; and south quay of inner basin has six similar cranes and two travelling transporters, 5-ton capacity; east quay of outer basin and north quay of inner basin have four electric coaling hoists and one electric coaling crane for wagons up to 32 tons gross. The quays and coaling hoists have electric quay capstans, and dock entrance electric ships' capstan. Dockmaster's and other offices on the west quay. Quays and dock entrance lighted by electricity; water laid along quays. **Charges.** River rates. River and harb. rates, in or out 1½d per ton for coastwise vessels, and 4d per ton for foreign. Rates for use of planks 1/ per week, and rhones 1/ per week and 1d for every wagon loaded by rhones. Rates on animals and carriages shipped or unshipped in river or at harb. vary from ½d to 1/6. Rates on goods 1d to 2/. **Pilotage.** C. **District:** Between Glasgow and the south end of Little Cumbrae. Pilotage between Glasgow and Port Glasgow compulsory if above 60 tons. **Rates.** From Glasgow to Bowling, Dumbarton, Greenock, or Tail of the Bank, or *vice versâ*:

Vessels under 10ft dft. 1/6 per ft, 10ft and under 12ft 2/, 12ft and under 15ft 2/6, 15ft and upwards 3/. Odd inches to be charged in proportion. Vessels towed and not under steam to be allowed one-fifth off these rates. When the charge under the above rates amounts to less than the minimum tonnage rates the latter rates will be charged, as follows: Vessels under 100 tons n.r., 16/, 100 and under 200 £1, 200 and under 500 £1 5/, 500 and under 1,000 £1 10/, 1,000 and under 1,500 £1 15/, 1,500 and under 2,000 £2, 2,000 and under 2,500 £2 5/, 2,500 and upwards £2 10/. From Glasgow to any place between Linthouse Burn and Dalmuir Burn, or *vice versâ*: Vessels under 200 tons n.r. 10/, 200 and under 500 15/, for every additional 100 tons up to 2,500 1/, 2,500 and upwards £1 15/. Vessels shifting within the limits of Dalmuir Burn and Linthouse Burn to be charged the same as for shifting in Glasgow Harb., with 5/ additional for expenses of pilot. Shifting in Glasgow Harb.: Trading vessels, under 500 tons n.r. 7/6, 500 and upwards 10/; new vessels fitting out, under 500 tons n.r. 10/, 500 and upwards £1. Launches, under 1,000 tons n.r. 15/, 1,000 and upwards £1. River or shifting rate to berth additional. Detention per tide, if vessel is not launched on tide for which pilot is ordered and in attendance, 7/6. Navigating the River Leven or Cart: Vessels under 100 tons n.r. 5/, 100 and under 500 7/6, 500 and upwards 10/. If pilot is detained by order of master or owner, detention per tide 7/6. Trial trips of 24 hours' duration or under: Min. charge £2, vessels up to 1,000 tons n.r. per ton 1d, for every additional 100 tons or part thereof 1/. When pilots are detained by request on service at the anchorage before or after trial trips, for every 12 hours or part of 12 hours after the first six hours: Vessels under 500 tons n.r. 7/6, 500 and upwards 10/. Firth of Clyde pilotage rates:—From Port Glasgow to the Cloch Light, or *vice versâ*, or within these limits: Vessels under 500 tons n.r. £1, 500 and under 750 £1 10/, 750 and under 1,000 £2, 1,000 and under 1,500 £2 10/, 1,500 and under 2,000 £3, 2,000 and under 3,000 £3 5/, 3,000 and under 4,000 £3 10/, 4,000 and upwards £3 15/. From Port Glasgow, or any place between that point and the Cloch Light, to Cumbrae Heads, or *vice versâ*, or within those limits: Vessels under 500 tons n.r. £2, 500 and under 1,000 £2 15/, 1,000 and under 1,500 £3 5/, 1,500 and under 2,000 £3 15/, 2,000 and under 3,000 £4 5/, 3,000 and under 4,000 £4 15/, 4,000 and upwards £5 5/. Outward vessels to pay the pilot a landing fee of £1. Shifting at Port Glasgow or Greenock:—Vessels under 500 tons n.r. 10/, 500 and upwards £1. Detention rate:—Any pilot detained at the request of the owner or person in charge of the vessel after his duties as pilot have been completed shall, where not otherwise provided for in the rates, be paid for every 12 hours, or part thereof, 7/6. Wherever mooring or unmooring is required, the service rates shall be deemed to include the same.

Towage. Steamers (under steam): Assisting into or out of Greenock or Port Glasgow, under 2,500 tons gross, £5 per tug; 2,500 tons and upwards, £6. Assisting up or down the river, first tide, £8 per tug; each succeeding tide, £5. If

steamer stops *en route* at any point to load or discharge, the tariff rate from said point to destination to be paid in addition. Into or out of Dumbarton, £8 per tug; canting or shifting in Dumbarton, £8. Docking or undocking at Rothesay Dock, under 2,000 tons gross, £5; 2,000 tons and upwards, £6. To or from Glasgow and Rothesay Dock, £7. Docking or undocking at Elderslie or Renfrew, under 1,500 tons gross, £5; 1,500 tons gross and upwards, £6. To or from Glasgow and Elderslie or Renfrew, under 1,500 tons gross, £5; 1,500 tons gross and upwards, £6. Berthing at Shieldhall, Merklands, or Meadowside, or assisting to or from Glasgow, £5; docking or undocking at Kelvin, £4. To or from Glasgow, east of Kelvin, under 1,500 tons gross, £3 per tug; 1,500 tons and upwards, £5. Second tug assisting to dock or undock at point mentioned in the foregoing paragraphs, same rates, except to or from Glasgow and east of Kelvin the overhead rate to be £3 where the full rate is paid for the first tug up or down river. Steamers (without steam): To or from Glasgow, Shieldhall, Renfrew, Rothesay Dock, Bowling or Dumbarton and Port Glasgow, Greenock, or Tail of Bank, under 1,500 tons gross, £9 per tug; 1,500 and under 3,000 tons gross, £10; 3,000 and under 5,000, £11; 5,000 and under 7,000, £12; upwards per special arrangement. To or from Glasgow and Gareloch, £14 per tug; to or from Port Glasgow or Greenock and Gareloch, £9. Two hours allowed in Gareloch for mooring or unmooring. 20/ per hour per tug thereafter. To or from Paisley and Rothesay Dock or Glasgow, £8 per tug; to or from Paisley and Greenock or Tail of Bank, £10. **Sailing Vessels, River Rates.** From Tail of Bank or Greenock to Glasgow or any intermediate point, under 1,000 tons net reg., 1/6 per ton; 1,000 and under 1,500 tons, 1/3 per ton; 1,500 and under 2,000 tons, 1/2 per ton; 2,000 tons and upwards, 1/ per ton. Sailing vessels exclusively employed in the coasting trade: From or to Tail of Bank and Greenock, 4d per net reg. ton; from or to Tail of Bank or Greenock to off Dumbarton or Bowling, 6d per net reg. ton; from or to Tail of Bank or Greenock to Dalmuir, Rothesay Dock, Renfrew, or Glasgow, 7d per net reg. ton.

Larger £1 each 100 tons additional; Innishowen Head or South Rock £5, and Inistrahull, St. John's Point, Rhynns of Islay, or Calf of Man, £10 in addition to Rathlin rates. To or from Port Glasgow to any of the above distances, £2 per tug additional. The above rates are for the services of one tug only; second tug docking or undocking a sailing vessel at Greenock, £5; and at Port Glasgow, 6. **Officials.** Gen. Man. and Sec. to Clyde Trustees and Sec^{c}. Clyde Pilot Board, T. R. Mackenzie; Assistant, D. M. Macintyre; Treasurer, J. Macfarlane; Engineer, W. M. Alston; Assistant, P. D. Donald; Mech. Eng., Geo. H. Baxter; Coll., Walter Macfarlane; Traffic Supt., Wm. Stewart; Dock and Harb. Master, Capt. T. R. Morris; Pilot Master, Capt. W. O. Warden; Coll. of H.M. Cust., S. Scott; Lloyd's Agents, Thos. Dunlop & Sons. (The River Clyde, beyond Port Glasgow, is under the jurisdiction of the Clyde Lighthouses Trust and the Clyde Pilot Board.)

GLASGOW PORT.—See Port Glasgow.

GLASSON DOCK.—See Lancaster.

GLENARM, Co. Antrim, Ireland. Lat. 54° 57′ N; long. 5° 57′ W. **Auth.** The Eglinton Limestone Co., Ltd., of Glasgow. Pier 220ft long, **D.** 12ft to 14ft at HWOT. Area of harb. 7 acres. No dues. Berthage 360ft on N. side and 261ft on W. side. Used by Eglinton vessels only, except by permission of the Co.'s Manager. There is a jetty with 90ft frontage outside the harb., but in the bay, belonging to the Eglinton Limestone Co., **D.** 16 to 18ft, HWOT. Most dangerous winds N., but harb. is well protected, except that vessels cannot lie alongside the Eglinton Limestone Co.'s jetty with wind NW. or round by N. & E. to SE. Used by vessels shipping limestone, macadam and whiting. Nearest Ry. Station, Larne. **Official.** Gen. Man., J. Thomson.

GLENCAPLE.—See Dumfries.

GLENGARIFF HARBOUR, Co. Cork, Ireland. Lat. 51° 45′ N; long. 9° 34′ W. **THW.** f. and c. 4h om. Harb. will accommodate vessels drawing up to 25ft, will be 8ft at berths when dredged. Inner anchorage 20ft; outer 7 to 11 ft. A favourite health resort.

GLOUCESTER, Auth. Sharpness New Docks and Gloucester and Birmingham Navigation Co. **Pop.** 47,943. 16 miles from Sharpness Docks by canal, without locks, for vessels drawing up to 14ft. **LV.** s.s. *Milo*, 896 tons net reg. (See Sharpness.) **Pilotage.** Canal pilotage between Sharpness and Gloucester:

South Dock and Basin	840	230	1,550	20
West Dock	1,050	290	2,880	20

There are hoists for lifting iron barges filled with 35 tons of coal and tipping the coal into vessels in the Ouse, Aldam, South and West Docks. The Railway Companies have tips and cranes of modern construction for the purpose of expeditiously loading ships with coal, &c.

There are two dry docks 255ft and 292ft 6in in length, and a patent slipway 180ft long, with lifting power of 200 tons. A canal or dock for inland craft is provided, measuring 300ft × 151ft with a water area of one acre. Length of quayage 750ft. There are also timber ponds, of one, two, and three acres respectively.

Charges. Dock dues 2d to 1/ per ton; vessels under 50 tons 5/ each. No dues on vessels coming or going through the Aire and Calder Nav. Humber Conservancy dues 1⅔d per ton, less 25 per cent. payable to Humber Conservancy Board. (See Hull.) Ouse improvement river tolls ¾d and lighting rate ⅛d per t.r. **Pilotage.** C. For all vessels piloted from or to Hull, Hull Roads or any part of the river above Hull Roads to or from Goole:—Less than 10ft draught, if piloted, 1/6 per ft; of 10ft draught and upwards, 1/9. From Hull or Hull Roads to any place below Oysterness or Ferriby Sluice, 1/ per ft. From Oysterness or Ferriby Sluice to Hull or to Hull Roads 1/6; and so in proportion for half a foot. Vessels drawing less than 6ft to pay for 6ft. Vessels of 400 tons net reg. and above drawing less than 10ft to pay for 10ft. Vessels piloted to pay, in addition to the above rates, 5/ per tide for the detention of any pilot on board at any place between Hull and Goole, except through fog. Vessels bound for Goole in charge of a pilot shall pay 5/ should they, from any unexpected cause (except fog), have to return to the Hull Roads. Vessels in charge of a pilot, moved from their berths in the Goole Docks into the river and returning from any cause (except fog) to their berths, shall pay 5/. If, in the opinion of the Sub-Commissioners of Pilotage at Goole, a pilot is ordered and attends to take a vessel out without a reasonable probability of the ship being ready, a payment of 5/ shall be made. Exemptions:—Vessels: Employed in the coasting trade; wholly laden with stone from Guernsey, Jersey, Alderney, Sark or Man, and being the production thereof; not exceeding 150 tons reg.; not exceeding 10ft draught of water. 2/ to be paid to Humber Conservancy Board if Goole pilot is put on board or taken off vessel in Hull Roads by the Board's steam launch. **Towage.** Between Goole and Hull and *vice versâ*:—

Charges. Dock and harb. rates vary from 1d to 1/ per ton. Port Commissioners charge tolls on cattle, wood, and general goods wharfage. Harbourage. **Pilotage.** NC. **District:** The Bay of Hartlepool, inside an imaginary line drawn from Black Hall Rocks, about three miles north of Hartlepool, to a point about two miles south of the mouth of the River Tees. **Rates,** per foot: For every British ship or other vessel piloted and conducted within the Hartlepool Pilotage District 1/6, except coasting vessels and vessels trading between the Elbe and Brest, both inclusive, which from April 1 to October 1 pay at the rate of 1/3. The Commrs. may charge vessels above 400 tons reg. ½d ton on such excess of reg. ton. over and above that number of tons both inwards and outwards, but this excess does not apply to vessels simply changing ports within the district. Vessels moving from harb. to docks or *vice versâ :* Dock and harb. towage, under 200 tons reg., 5/; under 500, 7/6; above, 10/. From and to each harb. within the port of Hartlepool:—When any vessel requires to change harbours in the port, the pilotage dues from and after April 1 to October 1, both inclusive, out of Hartlepool docks or harb. at the rate of 7½d foot, and into West Hartlepool docks or harb. the same rate; from and after October 1 to April 1 in the following year, both inclusive, out of Hartlepool docks or harb. 9d foot; into West Hartlepool Docks or harb. the same rate, and these dues are payable by vessels changing from the docks or harb. of West Hartlepool to the docks or harb. of Hartlepool. **Towage.** (East or West). 1⅜d per ton. **Officials.** Man. for N.E. Ry. Co., G. Nicholson; Coll. of H.M. Cust., W. Stevenson; Lloyd's Agents, Robt. Irvine & Co.

HARTLEY, Northumberland. Four miles N. of N. Shields. This harbour is not used now, the main entrance being blocked, and the north entrance only used by a few small yachts and fishing boats. **Ry.** Blyth & Tyne.

HARWICH, Essex. At the SE. extremity of the estuary of the river Stour. Lat. 51° 56′ N; long. 1° 17′ E. **Pop.** 13,623. **Auth.** Harbour Conservancy Board, under Harwich Harb. Act, 1863. Owners of quays and piers at Parkeston, G.E. Ry. Co. **Tr.** I. Coal, timber, grain, eggs, butter, cheese, fruit, vegetables, cattle, horses, and every description of general merchandise; E. Cement, stone, general goods, and horses. **THW.** 12h 6m; Sp. rise 12½ft; N. rise

10½ft. **D.** There is no bar ; the depth of **LW.** at harb. entrance is variable, but vessels of 17ft draught enter at **LW. W.** prev. E. to SE. in winter ; SW. to NW. in summer. **LV.** *Ypiranga* (s.s.) of 4,907 tons net register, and H.M.S. and Troopers drawing 25ft. **Ry.** G.E. **Accn.** The harb. is formed by the broad estuaries of the Orwell and the Stour. The entrance is between a stone breakwater which runs about 1,500ft out, and a groyne and wooden breakwater at Landguard Point, on the Suffolk shore. Depth of water in harb 30ft LWST., 27ft NT. ; min. depth in fairway, 19ft LWOST. ; at extension of quay, 20ft **LW.** *Parkeston Quay*, erected by the G.E. Ry. Co., is a free quay within the port of Harwich. By discharging at this quay vessels altogether escape the payment of any dock landing or quay dues. The quay is 2,800ft long, and provides berths for 8 steamers, with a depth of water at **LT.** of 16ft, and **HT.** 27ft 6in. It can be approached at all times. Hook of Holland daily (including Sundays), Antwerp daily (Sundays excepted), Rotterdam (cargo only) daily (Sundays included), by G.E. Ry. Co.'s fast steamers ; bi-weekly ditto to Hamburg, by G.S.N. Co.'s steamers, four times weekly to and from Esbjerg, Denmark, by steamers of the Forenede Dampskibs-Selskab of Copenhagen ; and weekly, to and from (May to Sept.) Gothenberg, by the Thule Line of steamers, Gothenburg. Railway trucks run alongside berths. Berthage space for 8 steamers, well fitted with hydraulic and electric cranes, capstans, and machinery of modern type. Extensive warehouse accn. The quay, &c., is lighted by electric light. There is a patent slip (McLearon's) 140ft long, 35ft wide, with 12ft at OST. and 9ft at NT. At the entrance of the harb., just opposite Harwich, is the Felixstowe Dock. (See Felixstowe Dock). Loading and discharging are done by steam cranes of from 1½ to 6 tons. Dock dues about 6d per ton, cranage extra. **Charges.** Harb. dues 1d per reg. ton on all steamers and vessels other than fishing vessels and yachts (but vessels making 10 payments, and steamers making 30 payments per annum are afterwards exempt); fishing vessels and yachts, ½d per ton. Quay dues. Felixstowe Dock dues, 3d to 1/, according to distance, and 1d for ballast. **Pilotage.** C. **District :** To and from the Wallet, Hoseley Bay, of the Sunk Light, into and out of Harwich Harb., and up the River Stour to Manningtree, and *vice versâ*. **Rates.** From the sea, Orfordness, Shipwash or Sunk Light Vessel to Harwich Harb., under 10ft, sail 42/, steam 31/6; 10 to 16ft, sail 68/, steam 51/; 16ft and upwards, sail 100/, steam 75/; from the Rolling Grounds to Harwich Harb., under 10ft, sail 21/, steam 15/9; 10 to 16ft, sail 31/6, steam 23/8; 16ft and upwards, sail 50/, steam 37/6; from Harwich Harb. to sea Orfordness, Shipwash or Sunk Light Vessel, under 10ft, sail 31/6, steam 23/8; 10 to 16ft, sail 42/, steam 31/6; 16ft and upwards, sail 75/, steam 56/3. **Towage.** As per agreement. **Officials.** Gen. Man., G.E. Ry., H. W. Thornton; Continental Traffic Man., C. Busk; Clerk to Harb. Board, G. D. Hugh Jones; Harb. Master, A. A. Muter; Marine Supt., G.E. Ry., Commander Coysh; Coll. and Surv., C. J. Beatty; Lloyd's Agents, Groom & Sons.

HASTINGS, Sussex. An Act to construct a harbour at Hastings was passed August 4th, 1890. The work of construction commenced May, 1896, has been discontinued, but the Corporation have obtained powers from Parliament to assist Commissioners, and it is hoped to resume the work of construction shortly. **Official** Clerk to the Commissioners, Arthur F. Watson.

HAVERFORD WEST, on the Cleddy, near Milford. **D.** HWST. 10ft, N. 4ft. **Charges.** Harb. dues, 1d per reg. ton. **Officials.** Harb. Master, R. A. G. James; Deputy H.M., W. G. Skinner.

HAUXLEY, Northumberland. Lat. 55° 19′ N; long. 1° 35′ W. Open beach. No harb. auth. Dry **LW.,** when the rocks with a gutway between them offer slight protection. **THW.** f. and c. 3h 5m. **Official.** Coastguard, M. Wade.

HAWARDEN BRIDGE. (See also Chester.) Wharves and stages owned by Messrs. John Summers & Sons, Ltd., H.B. Ironworks. Steam cranes.

HIGHBRIDGE, a creek of Bridgwater.

HOLLAND, a creek of Harwich.

HOLLESLEY, Suffolk, near Orfordness. **THW.** at f. & c. 11h 30m.

HOLM, Orkneys. **Auth.** Orkney Harbours Commrs, under Act, 1887. **W.** prev. and most dangerous SE. and SW. **Accn.** Stone pier 615ft. **D.** 7ft LWST., 16ft HWST.; 9½ft LWNT., 14ft HWNT. **Official.** Harb. Master, J. Shearer.

HOLYHEAD, Wales. Lat. 53° 18′ 14″ N ; long. 4° 37′ 1″ W. **Pop.** 9,583. **Auth.** Board of Trade (Inner Harbour, L. & N.W. Ry. Co.). **Tr.** I. General ; E. Gannister. **THW.** 10h 11m ; Sp. rise 16ft ; N. rise 12½ft. **D.** at entrance at LWM., new harb. 9 fathoms, in old harb. 17ft. **W.** SW. most prev., NW. to NE. most dangerous. The breakwater shelters the new harbour and roadstead, and is a complete protection for vessels of any size. **LV.** *Great Eastern* and Channel Squadron. **Accn.** New harb. and outer anchorage, old harb. and inner harbour, latter belonging to the

L. & N.W. Ry. Co.; 1,000ft of quayage, with depths from 10ft to 29ft HWOST. One crane in new harb. to lift 5 tons. Graving dock 307ft long by 62ft wide at entrance, 70ft across at top, and 45ft at bottom, 12ft deep on blocks at HWST, and 14ft over all. A large beaching ground, which, however, is not so good as it was, as the shingle is being washed away. Loading berth 400ft long, dry at **LW. Ry.** L. & N.W. **Charges.** Dues in old harb. ½d per ton coastwise; 1d foreign. new harb. coastwise ½d; foreign 2d; windbound, no charge. All foreign-going steamers landing or embarking mails and passengers reduced to ½d per reg. ton. **Pilotage.** C. **District:** To and from the anchorages at Great Orme's Head, along the coast of the Isle of Anglesea and Wales, as far as Bardsey Island, except the bar and harb. of Carnarvon and the Swellies. **Rates.** All vessels not exceeding 13ft draft of water, 4/ per foot; exceeding 13ft and not exceeding 15ft, 4/3 per foot; exceeding 15ft and not exceeding 18ft, 4/6 per foot; exceeding 18ft and not exceeding 20ft, 5/ per foot; exceeding 20ft, 6/ per foot. Vessels employed exclusively in the Coasting Trade to pay one half the above rates. The above Rates are due both inwards and outwards. No vessel to pay for less than 10ft. Steamers calling for any purpose other than that of loading, discharging, or bunkering cargo are to pay for pilotage in and out the rate provided above for inwards only and one quarter thereof outwards. The additional rate, for intermediate portions of a foot in the draft to be regulated as follows, viz.: 3in and under, no addition; more than 3in and under 9in, the medium between the two rates; 9in and upwards, the rate for the next foot. For removing a vessel from one harb. to the other, or for shifting the berth of a vessel in either harb. when not originally brought in from sea by a pilot, the above rates are charged. For shifting the berth of a vessel in either harb. when brought in from sea by a pilot 7/6. All ships and vessels under any circumstances of distress pay the pilot a further sum calculated according to the extent, circumstances, &c., of distress. A pilot taken on board a vessel at the distance of three leagues or further to the southward and westward of Holyhead is entitled to the following additional pay:—On having a Liverpool pilot on board, off Point Linas, and landing the the Holyhead pilot there 63/; on landing the pilot at the Great Orme's Head 84/; if beyond the limits of his licence to Chester Water, or to Liverpool, 105/. With the sum of 7/6 per tide for every day such pilot may be detained on board. **Officials.** Capt. of the Port, Rear-Admiral J. Leslie Burr, C.M.G., M.V.O.; Berthing and Boarding Master, H. Evans; Lloyd's Agent, Captain R. D. Roberts.

HOLY LOCH, a creek under port of Greenock. Same charges.

HOPEMAN, Elginshire, a creek of Inverness. **Auth.** T.D.G. Duff under Hopeman Harbour Order, 1886. A fishing port. **D.** HWS. 11ft, HWN. 8ft. **Charges.** Harb. dues, 4d per ton. **Official.** Harb. Master, J. Taylor.

HOWTH, Co. Dublin, Ireland. Lat. 53° 23′ 25″ N; long. 6° 4′ W. **Auth.** Commrs. of Public Works in Ireland, under Acts 6 and 7 William IV., c. 35, s. 40. **Tr.** I. Coal and building material; E. Fish. **THW.** f. and c. 11h 9m. **Accn.** Area at **HW.** 65 acres, at **LW.** 30 acres. **D.** at entrance on bar 6 to 9ft LWST. Discharging berths 11½ft at HWMST., dry at LWMST.; South Rowan Rock off entrance now marked by red conical buoy in 3½fms. **Ry.** G.N. (I.). **Charges.** On Fish-carrying steamers 3d per ton on n.r. tonnage; coal and general, 6d per reg. ton; rubble, limestone, &c., 2d per reg. ton; coal and general goods landed or shipped pay 3d per ton; limestone, sand, &c., 1d. **Officials.** Harb. Master, Mr. T. W. Prothero, R.N.

HOY ISLAND, Orkneys. Lat. 58° 47′ N; long. 3° 7′ W. A lifeboat station.

HUBBERSTON PILL and Roads.—See Neyland.

The King George Dock:—A deep water dock of 53 acres, capable of extension to about 85 acres, constructed by the N.E. and H. & B. Companies as a joint undertaking. Min. depth in dock, 31ft 8in. Total length of quays, 8,162 lineal ft. Two dry docks, 550ft and 450ft in length, with width of entrance of 72ft and 66ft respectively, min. depth on sills being

22ft. Grain silo with storage capacity of 40,000 tons in course of construction. Six coaling berths fitted with hoists and electric conveyors capable of shipping 800 tons per hour. Warehouses with 48,750 sq. yds. floor and roof area available for storage. Entrance lock, 750ft long, 85ft wide, depth over sill, 20ft 3in at low water and 42ft 3in at high water, ST. The H. & B. and N.E.R. Companies have constructed a jetty and oil haven at Salt End, situated about a mile to the east of the entrance to the Joint Dock. The jetty extends 1,500ft, with a depth alongside of 30ft LWOST. 120 acres of land with rail and road connections are available for storage. This Jetty is the only place on the east coast north of London at which large oceangoing tank steamers can discharge highly inflammable spirit.

Hull and Barnsley Co.'s Alexandra Docks, on the north side of the River Humber; water space 53½ acres, depth of water in dock HWST. 34½ft. Area of quays 210 acres, length of quays 2½ miles. Length of entrance lock 550ft, width 85ft. Depth of water on sill 34ft HWOST., 28ft HWONT., 18ft LWONT., 12ft LWOST. There is good anchorage in 40ft at **LW.** in the roadstead opposite the entrance. The lock gates are opened by hydraulic power. Spacious warehouses, transit sheds and storage for 70,000 qrs. of grain, and a large area of land for storage of wood goods and general merchandise. There are 7 hydraulic coal tips, each capable of shipping 370 tons per hour; 54 electric, hydraulic and steam cranes lifting up to 100 tons, and 13 jiggers. The graving docks are entered direct from the wet dock. Ry. lines all round the dock.

INELLAN, Argyll. A pier on the W. side of the Firth of Clyde, about 2 miles N. of Toward Point. **Officials.** Messrs. J. A. Campbell and Lamond, 2 Albyn Place, Edinburgh.

INNISLYRE, Co. Mayo. A deep and spacious anchorage well supplied with warping buoys in Westport Harb., Clew Bay. **Auth.** Westport Harbour Commrs. Vessels are discharged afloat in 20ft to 22ft low water. **THW.** f. and c. 5h 2m. **Pilotage.** C.; outside, NC. (For charges see Westport.) **Official.** J. M. McBride, Sec. to Westport Harb. Commrs.

INVERARY, Argyllshire. Loch Fyne. Lat. 56° 40′ N; long. 5° 0′ W. **Auth.** Town Council, under the Royal Charter of the Burgh. **Accn.** An anchorage, with a pier, used by steamers and vessels of about 100 tons. **D.** 16ft **LW.** and 24ft HWST. **THW.** f. and c. 12h om. Nearest railway station, Dalmally, 16 miles off. **Charges.** According to tonnage. **Officials.** Town Clerk, R. S. Corrigall; Harb. Master. D. Luke.

INVERGORDON, Ross-shire, Scotland. Lat. 57° 43′ N; long. 4° 15′ W. **Auth.** Owner, Capt. Macleod, of Cadboll, under Act 7 Geo. IV., c. 43. **THW.** f. and c. 11h 30m. **Accn.** Tidal harb., dry at **LW.,** formed by a pier 700ft long, carried out into 10ft at **LW.,** and 23ft at HWST., and West jetty **LW.** 7ft, **HW.** 18ft. Extensions of 200ft to jetty, with double line of rails thereon, are in progress. Crane power to 3 tons. Used by vessels of up to 1,400 tons at timber jetty. Inside up to 200 tons reg. **Charges.** Dues under 100 tons 2d per ton; 100 to 300 tons 4d per ton; 300 tons and upwards 6d per ton. **Officials.** Factor, W. G. Paterson; Harb. Master, R. Maclean.

INVERKEITHING, Fife. Lat. 56° 2′ N; long. 3° 26′ W. **Auth.** Town Council, under Crown Charter. **THW.** f. and c. 2h 37m. **Accn.** 90 acres; dry at

LW., with 10 to 14ft at HWST., 10ft HWNT., and 1ft less at quays. Quayage about 1,000ft, land-locked. Used by sailing vessels and steamers of light draught. Patent slipway and shipbuilding yard. **LV.** Steamers of 1,000 tons built here have left the harbour light. **Ry.** N.B. **Charges.** According to table in charge of the harb. master. **Officials.** Town Clerk, J. R. Menzies; Harb. Master, H. Phillips.

INVERNESS, Inverness-shire. On the Ness, about 1 mile above its confluence with the Moray Firth and at the NE. end of the Caledonian Canal. Lat. 57° 28′ N; long. 4° 13′ W. **Pop.** 22,216. **Auth.** Harb. Trust, under Harb. Acts 1808 to 1911. **Tr.** I. Grain, guano, timber, tar, bones, coal, lime, iron, slates and fish; E. Herrings, pit-props, sleepers, staves, timber, barrels, tar, turnips, potatoes, grain and whisky. **THW.** f. and c. at Kessock Pier, oh 18m; Sp. rise 12ft; N. rise 9½ft; R. of N. 7ft. **D.** No bar, about 7ft at LWST. **W.** The harb. is so situated that no wind is dangerous. **LV.** 1,140 tons, at LWST. 30 tons. **Accn.** The area of the harb., formed by the lower reach of the River Ness, is about 3 acres, and there are about 800 yards of quayage space. Depth at Upper Harb. ST. rise 13ft to 14ft; NT. 10ft to 11ft; New Quay, at Upper Harb. ST. 17ft to 18ft; NT. rise 14ft to 15ft. Thornbush Slipway, at junction of River Ness with Moray Firth, is 553ft long, can carry a vessel of 1,000 tons, and has gear for hauling one of 600. There is 19½ft water at Thornbush Harbour HWST., and 6ft at extreme low; the slipway is at the level; 17ft to 18ft ST.; 14ft to 15ft NT. Crane to 4 tons. Vessels of 160ft by 38 by 15 can be passed through the canal; 60 miles sea to sea. **Ry.** H. **Charges.** Dues 1½d ton; dues on ballast 2d ton. Vessels drawing 18ft can enter the Muirtown Basin, Inverness, at Inverness Harbour rates. Other vessels navigating the canal pay canal charges, viz., light steamers 1/3 per ton reg., sailers 1/. Canal tolls on goods 9d to 1/3. Yachts, 1/6, over 100 tons 1/ per ton gross, also mileage per scale. (See Caledonian Canal.) **Pilotage.** NC. **District:** One section is licensed for the extent of the jurisdiction of the port authorities. **Rates.** Vessels, 50 tons and under, 7/ in and the same out, and 1d ton additional for every ton over 50 tons. These rates only apply within harbour limits. **Towage.** 2/6 per horse from sea to Thornbush; and if stopped at Thornbush for one tide, then from Thornbush to Upper Harbour 2/6 per horse. Direct from sea to Upper Harbour 3/ per horse. **Officials.** Clerk to Trust, K. Macdonald, Solicitor; Harb. Mast. and Coll. of Harb. Dues, D. Munro.

IPSWICH, Suffolk. On the Orwell, about 11 miles from the sea. Lat. 53° 35′ N; long. 0° 4′ E. **Pop.** 75,000. **Auth.** Ipswich Dock Commission, under Statutes 45 Geo. III., c. 101, 1 Vic., c. 74, 15 Vic., c. 116, 40 & 41 Vic., c. 216, 61 & 62 Vic., c. 193, 4 Edwd. VII., c. 17. **Tr.** I. Grain, cheese, timber, seeds, pyrites, phosphate of lime, and coal; E. Iron, machinery, agricultural implements, grain, patent manures, bricks, oil, roots, &c. **THW.** f. and c. oh 35m; Sp. rise 13½ft at Ipswich Dock. **D.** Between the entrance lock and Pin Mill Reach there is a depth of water in the

river channel of 27½ft at OST. and 24½ft at ONT. In Pin Mill Reach there are iron screw moorings and buoys for lightering with 27ft at LWST. **W.** prev. SW. to W.; no wind can be considered actually dangerous within the port limits. **Ry.** G.E. **LV.** s.s. *Chasehill*; sailer, *Alice A. Leigh*. **Accn.** The area of the port is the whole of the estuary of the river Orwell above an imaginary line drawn between Shotley Point and Fagborough Cliff (the limits of the jurisdiction of the Harwich Harb. Conservancy Board), including therein a large floating dock. The area of the dock which is approached by an entrance lock 300ft long, 50ft wide, is about 28 acres. Depth on sill at mean HWST. 23½ft, NT. 20½ft. Warehouse accom. and every facility. The dock take vessels of 18ft to 21ft dft. Within the floating dock there are 1,600yds of walled public quay, 300yds of the same unwalled, and with earth slope, 400yds of the Commissioners' and private quays, and 150yds of the Commissioners' ballast quay. On the E. bank of the river there is a timber quay. Outside the dock there are about 1,000yds of walled tidal quay, used by vessels up to about 200 tons burthen, and 1,400yds of dwarf tidal quay on the frontages of roadways not used for trade. There are also tidal quays at Bournebridge Creek, at Pin Mill, Chelmondiston, and at Levington Creek. The new quay is 810ft long and has 23ft water alongside at mean dock level. The timber quay adjoining the last is 200ft long, and has 16ft water alongside. The ferro-concrete quay in front of the public warehouse is 320ft long, and has 20ft water alongside. The whole of the quays are equipped with cart roads, tramways, crane tramways, and travelling 5-ton electric cranes. The depth of the channel at Downham Reach is 29ft, and in Cliff Reach 27½ft at HWST. The depth of the dock at mean dock level varies from 23ft to 25ft. Crane power to 25 tons. Slips, &c.:—

Ritchie; Lloyd's Agent, E. B. Lewcock.

IRELETH, a creek under port of Lancaster. An open beach. **D.** 10ft HWST., 4ft HWNT.

IRVINE, Ayrshire. Lat. 53° 36′ 10″ N; long. 4° 42′ W. **Pop.** 10,111. **Auth.** Harbour Trust, under Irvine Harb. Act, 1873. **Tr.** I. Limestone, ores, salt, grain, timber; E. Coal, pig iron, fireclay goods, and chemical products. **THW.** f. and c. 11h 50m; Sp. rise 10ft; N. rise 8ft. **D.** on bar is generally 6ft at **LW.;** at HWST. 16 to 16½ft; N. 14ft. **W.** prev. SW. The harb. is safe for vessels in any wind. **LV.** 672 reg. tons. **Accn.** The area of the harb. is about 43,444

yards; of this area 31,752 yards have a depth from about 5ft to an average of about 9ft at **LW.** There are no docks. The length of the quay space is 1,935ft, having a depth alongside of from 7ft to 15ft LWST. There are steam hoists, and cranage up to 30 tons. **Ry.** G. & S.W. **Charges.** Harb. dues, 3d per reg. ton; ballast 8d per ton; goods 2d to 6d per ton. **Pilotage.** C. or boats' assistance, 1½d per reg. ton. **Towage.** (Compulsory.) 2d reg. ton. **Officials.** Sec., D. Gillies; Treas., J. S. Gilmour; Harb. Mast., M. Boyd; Coll. of Rates, J. Brown.

ISLE OF MAN. In the Irish Sea, 26 miles W. of England, between S. Bee's Head and the Point of Ayre, 15⅝ miles S. of Scotland between Burrow Head and the same Point. Extreme length 32½ statute miles, breadth about 11½ statute miles. Contains about 180,000 statute acres. Lat. 54° 18′ N; long. 4° 32′ W. **Auth.** Harbour Commissioners. **Tr.** I. Coal, spirits, wines, general; E. Fish, agricultural produce, lead ore, salt, gas products, rope, &c. **Accn.** The principal ports of the island are:—(*a*) **Douglas. Pop.** 22,000. Formed by the outlet of Douglas river. The inner harb. is covered in and defended by a north-eastern pier 173⅓ yards long and 13⅓ to 30 yards broad. Is well quayed for about ½ mile. There is also a transverse jetty. Area of harb. about 11 acres, nearly all dry at **LW.** The bottom is principally gravel over marl. As a rule, vessels drawing 15½ft can enter at ST., and those drawing 11ft at N. In the outer harb. are two deep-water landing piers, one extending ESE. 1,500ft, the other NNE. 700ft. Depth of water alongside the former at LWOST. 20ft, and 12ft the latter. Depth of water at entrance at OST. about 30ft. No bar. Two cranes, one 15-ton and one 5-ton. **THW.** f. and c. Douglas Bar 11h 12m; OST. rise 18ft; N. rise 12ft. **W.** prev. S. and W., but they do not affect the harb., which is open to winds from E. to SE. only. A swing bridge crosses the harb. **LV.** which has ever entered harb. was of about 1,500 tons burthen. **Charges.** Harb dues 3d per ton on all goods landed; 1½d per ton on all goods shipped; windbound 1d per reg. ton; vessels not landing cargo but loading it outwards 2d per ton. Passenger dues, 1d for each passenger landed or embarked, and a due not exceeding 1/ on passengers landed on Sundays between specified hours. (*b*) **Peel.** A tidal harb. formed by the outlet of the River Neb; is defended eastward by a pier extending in a NNE. ½ E. direction for 100 yards, continued inwards for 300 yards, and northward by a pier extending E. 700ft in 19ft LWST. Area 5 acres. Vessels drawing 12ft to 14ft can enter on ST., and those drawing 8ft to 10ft on N. **LV.** which has entered the port a steamer of 1,035 tons reg. **THW.** f. and c. 11h 8m; equi. Sp. rise 20⅛ft; ord. Sp. rise 18⅛ft; N. rise 14¾ft. **W.** S. and W. most prev.; harb. open to NE. Charges, same as Douglas. Water area, 13 acres, with 8ft to 16ft at LWST. Cranes, nil. (*c*) **Port St. Mary.** A tidal harb., covered by a pier extending out for about a cable in a N. direction, and by an outer pier 1,000ft long, extending in the same direction and terminating in 10ft water LWST.

The harb. is quayed at the head and upon the W. side, and the passage into it between the pier head and the ledges from the shore is about 200ft wide. Area about 2 acres, over a bottom of mud and clay. Vessels of 12ft to 13ft dft. can enter on ST., and those of 9 to 10ft on N. **THW.** f. and c. 11h 10m; ord. Sp. rise 22ft; N. 18ft. **W.** prev. S. and W.; harb. affected by SE. to S. winds. **LV.** 300 tons reg. One hand crane to lift 6 tons. Charges same as Douglas. (*d*) **Castletown** (on C. Bay). A swing bridge divides this harb. into an inner and outer harb. The inner basin has an area of about 2 acres, the available width of entrance being 30ft. Vessels drawing 12ft can enter the outer harb. on ST., and those of 7ft on N. Depth at entrance to bay varies from 5 to 13 fathoms. **THW.** f. and c. 11h 10m. ST. rise 20ft; N. rise 16ft. Harbour dues same as Douglas. Loading and unloading, 6d per ton. (*e*) **Ramsey Harbour.** Formed by the outlets of the River Sulby; defended at entrance by two parallel piers. **En.** 50 yards wide. Vessels drawing 16ft may reach the quay on average ST., and those of 9ft on N. **THW.** in Ramsey Bay 11h 12m; ST. rise 20¾ft; N. 16ft. **W.** prev. S and W. Harb. open to E. 600 yards south of the harb. entrance is a low water landing pier for passengers. Charges same as Douglas. (*f*) **Port Erin.** Harb. protected by a breakwater 900ft long, carried into 35ft LWOST. A pier, 11ft HWST., 7ft neaps, 70ft long. New pier under construction. **W.** most dangerous W. A lifeboat station. Harb. dues same as Douglas. **Officials.** Harb. Masters: G. E. Kelly, Douglas; J. Wilson, Peel; Wm. Elliott, Port Erin; J. Hughes, Port St. Mary; T. Kewish, Castletown; J. Clarke, Ramsey; Lloyd's Agents: Ramsey, T. A. Farghen; Peel, J. Wilson; Douglas, G. E. Kelly.

ISLE OF WHITHORN, Wigtonshire. Lat. 54° 40′ N; long. 4° 15′ W. In Wigton Bay. **Auth.** Isle of Whithorn Harbour Co., Ltd. **Tr.** I. Lime, coals, manure, feeding stuffs, and general groceries; E. Grain and produce. **D.** ST. 17ft. NT. 9ft. **Accn.** Good warehouse accommodation. **Charges.** On vessels 2d ton reg., discharging 2d ton. Dues on windbound vessels 1d per ton on reg. **Official.** Harb. Master, F. Paterson.

Vessels of 1,200 tons and upwards—Beigh Castle to Limerick, 8d. per reg. ton. Carrigaholt or Scattery to Limerick, 10d. per reg. ton.

Officials. Sec. to Commrs., J. F. Power; Harb. and Dock Master, J. Fitzmaurice; Coll. of H.M. Cust., J. H. Coleman; Harb. Engineer, H.V. Morony, B.E., M.Inst.C.E., M.Inst.C.E.I.; Lloyd's Agents, Mullock & Sons.

LITTLEFERRY, Sutherlandshire. Lat. 57° 56′ N; long. 4° 0′ W. **Auth.** Owner, Duke of Sutherland, under Act 11 and 12 Vict., c. 99. **THW.** f. and c. 11h 42m. **W.** prev. W. to SW., most dangerous ENE to ESE. **Accn.** A small harb. Used by coasters up to 140 tons. **D. at En.** ST. 18 to 20ft; NT. 12 to 14ft. **Charges.** Harb. dues, to 50

tons 1d; above, 1½d per reg. ton. **Officials.** Factor, J. Morrison, of Golspie; Harb. Master and Coll., H. Chisholm.

LITTLEHAMPTON, Sussex. On the Arun. Lat. 50° 48′ N; long. 0° 32′ W. **Pop.** (with Wick) 7,000. **Auth.** Arundel Harbour Commissioners, under Acts of Parliament Geo. III. and IV. **Tr.** I. Wood, coal, slate, cement, corn; E. Hoops, timber, &c. **THW.** 11h 20m. f. and c.; Sp. rise 16½ft.; N. rise 12½ft. **D.** on bar at **LW.** nearly dry; general depths over bar are 16½ft OHWS., and 12ft at N. **W.** prev. SW. **Ry.** L.B. & S.C. **LV.** *William Miles*, 574 reg. tons. **Accn.** Berths of soft level mud; harb. easy of access in all weathers. Messrs. Harvey & Co.'s Patent Slip is 300ft long, 40ft wide, with a depth at ST. of 16½ft, and NT. 12½ft, taking vessels of 400 reg. ton. Cranes to lift 5 tons by arrangement with Railway Co. **Charges.** Harb. dues, coasting vessels 2d reg. ton; from foreign ports 5d ton. Ballast 1/6 ton. **Pilotage.** C. **District.** Undefined. **Rates.** 2d per ton inward and 1d outwards, but if vessel goes to or beyond Ford then one-half more than the above charges. **Towage.** 4d reg. ton in and out. **Officials.** Harb. Master and Coll. of Dues, W. Sewell; Acting Coll. of H.M. Cust., J. Gray; Station Supt. and Wharfinger, E. J. Tanner; Town Clerk, A. Shelley; Lloyd's Agent, Wm. Sewell.

LITTLESTOKE, Somerset. Bristol Channel. A pier, 200 yds. long, used by coasters of about 40 tons.

LIVERPOOL. On the Mersey. Lat. 53° 24′ 57″ N; long. 3° 0′ 0″ W. **Pop.** 716,810. **Auth.** Mersey Docks and Harbour Board, under the Mersey Docks and Harb. Acts, 1857 to 1912. **Tr.** The second port in magnitude in the U.K. **THW.** f. and c. 11h 35m; Sp. rise 25ft 11¼in; N. rise 17ft 10½in. **W.** prev. are from two opposite quarters, viz., NW. and SE., about equal in days throughout the year. SE. winds are off shore and bring fog, but otherwise generally harmless. NW. winds make a lee shore, and may become dangerous. **Rys.** C.L.C., G.C., G.N., G.W., L. & Y., L. & N.W., and Mersey. **Accn.** The area of anchorage for large ships on the Mersey is about 2,000 acres, and for small boats about 500 additional acres. The least water in main channel is 30ft at **LW.** The length of quay walls on the river sides outside the docks is 8 miles. Vessels are generally docked during the time between two hours before **HW.** and one hour after, but at the Canada, Sandon Half-tide, Brunswick, and Alfred entrances can often be docked or undocked, so long as there is water enough, by arrangement with the Dockmasters. The datum of the following table is the level of "Old Dock Sill"—**HW.** levels of Springs and Neaps referred to above are 18ft 3¼in, and 14ft 1in respectively above datum. NOTE.—The particulars are supplied by the Mersey Docks and Harbour Board for general guidance only, and are believed to be

approximately correct. Notwithstanding this, the Board do not guarantee that the particulars are accurate, and cannot be responsible for any inaccuracy, mis-statement, or omission, clerical or otherwise. The width of entrances and passages and depth of sills are approximate extreme dimensions. Deductions may have to be made for peculiarities of form and for other reasons, and therefore in considering the passage of vessels, where margins are not ample, the Harbour Master should be consulted.

* The depth of water on the sills of these Docks can be increased, if desired, by the means described in note (*a*) under Liverpool docks.

† The depth of water over the sills of the Herculaneum Graving Docks can be increased by pumping into the Herculaneum Dock from the river so as to allow deep drafted vessels to enter at low neap tides.

						2,430 0
Total length of floor of the Birkenhead Graving Docks						2,430 0

* NOTE.—The Birkenhead Graving Docks share the benefit of the impounding of the Great Float, and in considering the depth of water on their sills it may be assumed that the water level is under no circumstances less than 20ft above the Old Dock sill.

Liverpool Gridiron, Clarence Graving Dock Basin.—Blocks at south end 2ft 2in at north end 3in below datum. Breadth 25ft 6in, length 313ft 6in.

The Garston Docks are in the Port of Liverpool, but are the property of the L. & N.W. Ry. Co. (See Garston.)

NOTE.—The Leeds and Liverpool Canal is in communication with Stanley Dock through four locks and five intermediate basins. The locks are each 81ft long by 16ft 6in wide, and the total rise is 46ft 6in. The level of the water in the Canal is 58ft above the Datum.

LANDING STAGES.

LIVERPOOL.—Stage 2,478ft long, by 80ft wide, has nine bridges connecting it with the shore, and one with Prince's Jetty besides a floating bridge 550ft in length and 35ft in

width, by means of which an easy incline for goods traffic is maintained at all times of the tide. For traffic purposes this stage is sub-divided, the several divisions being set apart as follows: A length of 1,368ft at the north end called the Prince's Stage, for the use of sea-going steamers, steam tenders, and tugs; a length of 305ft towards the middle called the Ferry Goods Stage, for the goods and luggage traffic of the ferries; a length of 805ft at the south end called the George's Stage, for the exclusive use of ferry passenger steamers plying on the Mersey. The transatlantic steamships berth at the Prince's Stage to disembark and embark passengers, who depart from and arrive at the Riverside Ry. Station alongside the stage. Mechanical conveyers are provided for the transfer of luggage from steamers to ry. carriages or other vehicles, and *vice versâ*. The Prince's Jetty, a fixed piled structure, and about 350ft long, extending from the north end of the floating stage to the south side of Prince's half-tide entrances, is specially arranged for the landing of cattle and goods at all states of the tide. It is provided with two movable hydraulic cranes of 5 tons and 1½ tons respectively. Adjoining it is a commodious wharf, with pens for cattle.

BIRKENHEAD.—Woodside stage, 800ft long by 80ft wide, has two bridges connecting it with the shore, besides a floating bridge, similar to that at the Liverpool stage, 678ft in length by 30ft in width.

NOTE.—The southern end of the Woodside stage, for a length of 300ft together with the southern bridge, is appropriated to the Corporation of Birkenhead, and forms the Woodside Ferry Stage.

Wallasey stage, 600ft long, 70ft wide, connected with the shore by three bridges and platforms on piers.

Charges. On vessels entering the docks, dock tonnage rates; if with certain cargoes and departing under certain conditions, and arriving in ballast and departing in ballast or with certain cargoes, half rates. Dock tonnage rates* are:—CLASS 1.—Between St. David's Head and Carlisle, including the Island of Anglesea, 2¾d per ton.

NOTE.—Steam vessels for the time being engaged in the Fishing Industry either as fishing vessels or as carriers of fish, arriving in the Port of Liverpool and entering any part of the Board's Docks, and which vessels shall not be otherwise chargeable with Rates, are charged Dock Tonnage Rates at the rate of 2¾d per ton (not subject to the 10 per cent. increase). Any vessel of a registered tonnage less than 20 tons to be charged as on 20 tons.

Between Carlisle and the Mull of Galloway, including the Isle of Man, 3d per ton. CLASS 2.—Between the Mull of Galloway and Duncan's Bay Head, including the Orkney Isles, and all the Islands on the Western Coast of Scotland, and between St. David's Head and the Land's End, including the Scilly Islands, and the East Coast of Ireland, from Cape Clear to Malling Head, 4½d per ton. CLASS 3.—All the parts of the East and Southern Coasts of Great Britain, between Duncan's Bay Head and the Land's End, including the Islands of Shetland and all parts of the West Coast of Ireland, from Cape Clear to Malling Head, including the Islands on that Coast, and during the pleasure of the Board, the Islands of Guernsey, Jersey, Alderney, and Sark, 6d per ton. CLASS 4.—All parts

* On Dec. 1, 1911, the dock tonnage rates, wharf rates and dock and town dues were advanced by 10 per cent.

of Europe to the northward of Cape Finisterre, and to the westward of the North Cape, and without the Cattegat and Baltic Sea, and including the Faro Island and Iceland, 10d per ton. CLASS 5.—All parts within the Cattegat and Baltic, including the whole of Sweden, the White Sea, and all parts to the eastward of the North Cape, all parts in Europe to the southward of Cape Finisterre, without the Mediterranean, Newfoundland, Greenland, Davis' Straits, Canaries, Western Islands, Madeira, and Azores, 1/1 per ton. CLASS 6.—All parts on the East Coast of North America, the West Indies, the East Coast of South America, to the northward of Rio la Plata inclusive; all parts of the West Coast of Africa, and Islands to the northward of the Cape of Good Hope, and all parts within the Mediterranean, including the Adriatic, the Black Sea and Archipelago, the Islands of St. Helena, Ascension, and the Cape de Verde Islands, 1/4 per ton. CLASS 7.—All parts in South America, to the Southward of the Rio la Plata; in the Pacific Ocean; and in Africa and Asia, to the eastward of the Cape of Good Hope, 1/4 per ton. Harb. rates on vessels not entering the docks, $\frac{3}{8}$d to 2d per ton according to voyage; with wharf rates* if piers, landing stages, or quays be used under certain conditions, $\frac{1}{2}$d to 4d per ton. On goods, if imported or exported, foreign, dock rates and town dues*; if coastwise, town dues* only; outward dues being generally half inward dues, and wheat, maize, guano, copper ore, and some other articles paying half dues if discharged on Birkenhead side, under certain conditions. **Pilotage.** C. Four steam pilot boats, with steam launch for river work. Rates per foot according to draft of vessel. Coasting vessels, bona fide engaged in the coasting trade of Great Britain and Ireland for a period of not less than six months, pay half rates. Pilotage is NC. for coasters in ballast or of under 100 tons burden. C. inwards: From Middle Mouse Island, on the true bearing of south, or from any point between the Middle Mouse and Great Ormshead on the same bearing 9/ per ft; from Great Ormshead on the true bearing of south, or from any point between the Great Ormshead on the above bearing and the Queen's Channel Bar, 8/ per ft. Outwards, compulsory:—To the Bar Light Vessel, if the vessel proceeds through the Queen's Channel, or to the Horse Channel Fairway buoy, if the vessel proceeds through the Rock Channel, 4/ ft; trial trip from Liverpool, not further than NW. lightship and back 9/ ft. Inwards, voluntary:—From any of the following places to the limit of compulsory pilotage:—From Beaumaris, Lancaster Sound, or Piel Harbour, 1/ ft; from Holyhead, 2/6 ft; from any point in the St. George's or Bristol Channels, not further than Tuskar or Cardiff, or from the Clyde or Belfast Lough, 5/ ft; from any point in the English Channel not further than the Start, 10/ ft; from any greater distance in the English Channel not further than Dungeness, 15/ ft. From sea to an anchorage at following places, or until taken charge of by local pilots—to Dulas Bay, Moelfra Roads, or Red Wharf

* On Dec. 1, 1911, the dock tonnage rates, wharf rates, and dock and town dues were advanced by 10 per cent.

Bay, 5/ ft ; to the River Dee, Rhyl, Beaumaris or Holyhead, 10/ ft ; to Nelson Buoy, for Preston or Boghole, 12/ ft, to Lancaster Sound or Piel Harbour, 13/ ft. Outwards; voluntary :—From the Liverpool Bar Lightship or Horse Channel Fairway Buoy to the following places (in addition to regular outward pilotage). To the River Dee or any distance to the W. not further than Great Ormshead Lighthouse on the true bearing of south, 4/ ft ; to any greater distance to the westward not further than Point Lynas Lighthouse on the true bearing of south, or to any distance to the northward not further than Whitehaven or the Point of Ayre in the Isle of Man 5/ ft ; to Beaumaris, Lancaster Sound, or Piel Harbour 6/ ft ; to Holyhead 7/6 ft ; to any point in the St. George's or Bristol Channels not further than Tuskar or Cardiff, or the Clyde or Belfast Lough 10/ ft ; to any point in English Channel not further than the Start 15/ ft ; to any greater distance in the English Channel not further than Dungeness 20/ ft.

1. Lower Mersey Compulsory River Rates :—

(*a*) For berthing an outward or inward bound vessel at any stage in the River Mersey to the northward of an imaginary straight line drawn from Dingle Point to New Ferry Slip :—

Vessels of 1,500 tons net reg. and under	£1 0 0	For each Stage
Over 1,500 tons net reg. and not ex. 3,000 tons ..	1 10 0	
Over 3,000 tons net reg.	2 0 0	

(*b*) For conducting a vessel from River or Dock to the Powder Grounds or Dynamite Grounds, for the purpose of loading or discharging, and for each time a vessel, which is neither inward nor outward bound, is transported (*i.e.*, navigated or moved) anywhere in the River Mersey, N. of the said line :—

Vessels of 300 tons net reg. and under	£0 10 0
„ 300 tons net reg. and not exceeding 1,500 tons ..	1 0 0
Over 1,500 tons net reg. and not ex. 3,000 tons	1 10 0
Over 3,000 tons net reg.	2 0 0

(*c*) For attending a vessel whilst lying at any anchorage or mooring anywhere in the River Mersey, N. of the said line :—

	Per day.
Vessels of 300 tons net reg. and under	£0 6 0
Over 300 tons net reg. and not ex. 800 tons	0 8 0
Over 800 tons net reg.	0 10 0

2. River Rates to or from the Upper Mersey :—

(*a*) Voluntary rates :—Pilotage is NC. to northward of the said line drawn from Dingle Point to New Ferry Slip for vessels bound to or from (i) Garston, Weston Point, or Ellesmere Port ; (ii) any of the Manchester Ship Canal Company's docks at Runcorn ; or (iii) any dock, quay, or wharf lying to the southward of the said imaginary line, and being within the jurisdiction of the Upper Mersey Navigation Commissioners. The rate for transporting vessels bound to or from any of such places from or to any point northward of the said imaginary line (services ending or commencing at Garston or Eastham Locks, respectively), is £2 irrespective of the tonnage of the vessel.

(*b*) Compulsory rates :—Pilotage C. to the northward of the said line for vessels bound to or from any place to the southward thereof other than those places mentioned in clause 4, *a*, (i), (ii), (iii). The rates in such cases are those set out in clause 3 (*b*) and (*c*) hereof ; but if pilots are required to pilot vessels from Garston or Eastham Locks to such line aforesaid, or from such line to Garston or Eastham Locks there will be an additional charge of 15/ irrespective of the tonnage of the vessel.

Docking a vessel inward bound in respect of which no pilotage rates have been incurred £1 ; manœuvring a vessel in the river, &c., for the purpose of adjusting compasses, vessels of 1,500 tons net reg. and under £1 ; over 1,500 and not exceeding 3,000 tons net reg. £1 10/ ; over 3,000 tons net. reg. £2.

(*c*) Rates applicable to compulsory or voluntary services :—

For each *extra* attendance of a pilot at Runcorn	£0 7 6

For each *extra* attendance of a pilot at Garston or Eastham .. £0 5 0
At Liverpool or Birkenhead, or any other places on the river .. 0 5 0
Extra days while at anchor in the river—
(i) To the southward of the Dingle and New Ferry line, per day 0 5 0
(ii) To the northward of the said line, the rates set out in clause 3 (*c*).
Booking a vessel for a pilot after office hours 0 15 0

If a pilot be carried away under circumstances of unavoidable necessity he shall be allowed 10/6 per day for every day at sea; and if he be landed elsewhere to find his way back to Liverpool, or if he be sent from Liverpool to a vessel elsewhere, he is to be allowed travelling expenses at 5/ per 25 miles or part thereof up to 200 miles, and 2/6 per 25 miles or part thereof for any further distance; or if to or from Anglesea or the Isle of Man, £1; the Committee can increase the charge in special cases.

And 1s. in addition for every 25 tons beyond 300.
There is a scale of reductions in pilotage in larger registers ranging from 2½% above 300 to 25% above 400 net reg. tons.

Rules for the payment of pilots taking charge of ships or vessels trading over the bar, and bound to Llanelly, Pembrey, Burry Port. Limit No. 1:—If a pilot be taken on board as far to the westward as to bring Rhossily Church open to the westward of the Holmes, under 40 reg. tons 1/9; with an advance of 3d foot on every additional 25 reg. tons. Limit No. 2:—If taken on board within No. 1, but to the westward of No. 4 buoy for Burry Port, or No. 6 for Llanelly, under 50 reg. tons 1/; and 3d foot for every additional 25 reg. tons. Pilots taken on board inside buoy No. 6 when bound for Llanelly, or inside No. 4 when bound for Pembrey, 2/6 each for hobble. Outwards:—Under 50 reg. tons 6d; and 3d for every additional 25 reg. tons. Each vessel to pay 1/ for the boat. Vessels proceeding above Llanelly pay as follows, in addiion to the rates inwards and outwards from Llanelly:—For all vessels under 50 reg. tons 2/; under 75, 2/6; under 100, 3/ each vessel; and 6d for every 25 reg. tons. For removing from or to Llanelly and Pembrey:—Under 50 reg. tons 3/6; under 75, 4/6; under 100, 5/6 each vessel; and 1/ for every additional 25 tons. For removing from Pembrey Harb. to Burry Port, and *vice versâ*:—Under 50 reg. tons 3/6; under 75, 4/; under 100, 4/6 each vessel; and 6d extra for every additional 25 reg. tons. **Officials.** Clerk and Solicitor to Harb. Trust, Henry W. Spowart; Gen. Supt. and Dock Master, John Rees; Coll., J. W. Lobbett; Dock Master, G.W.R. Co.'s Dock, Capt. J. May; Dock Master, Copper Works Dock, J. Gibson; Coll. of H.M. Cust., M. Penny; Lloyd's Agent, Wm. Coombs.

LOCHALINE, Argyll. A pier on the N. side of the Sound of Mull. Constructed under the Lochaline Pier Order, 1881. **Auth.** J. Davidson, Ardtornish, Morvern, Oban.

LOCH BOISDALE, Inverness. A pier, near southern end of the Island of South Uist, Hebrides. Constructed under the South Uist (Loch Boisdale and Loch Skiport) Piers Order, 1878. **Auth.** J. Macdonald, Askernish, South Uist.

LOCHMADDY HARBOUR. North Uist., Outer Hebrides. Lat. 57° 37′ N; long. 7° 35 W. **Auth.** Owner, Sir Arthur Campbell Orde, Bart., Kilmory,

Loch-Gilphead. **Tr.** I. general merchandise; E. Horses, cattle, sheep. **D.** 12ft E, and 7ft W. end at LWST. A well-sheltered harbour. Good anchorage in Loch. **Pilotage.** NC. Loading and unloading per special agreement. **Official.** Harb. Master and Coll. of Dues, A. Macdonald.

LOCH SKIPORT, Inverness. A pier in Loch Skiport, at the northern end of the Island of South Uist, Hebrides. Constructed under the South Uist (Loch Boisdale and Loch Skiport) Piers Order, 1878. **Agent.** J. Macdonald, Askernish, South Uist.

LONDON. The capital of the United Kingdom. Lat. 51° 30′ N; long. 0° 5′ W. On the River Thames about 50 miles from its mouth. The limits of the port for Customs purposes are from Teddington to the entrance of Havengore Creek in Essex and to Warden Point, Isle of Sheppey, also up the Medway to Coalmouth Creek, across the Medway to Stangate Creek, and thence to Elmley Chapel in the Isle of Sheppey. For pilotage purposes the limit is fixed at the boundary stone just below Gravesend. **Auth.** By the Port of London Act, 1908, the port and docks were placed under the jurisdiction of the Port of London Authority. The Authority also took over the powers of the Thames Conservancy in respect of the lower river, and part of the powers of the Watermen's Company. The Authority consists partly of appointed members and partly of members elected upon a register of payers of dues, wharfingers, and owners of river craft. The Port of London Authority's Head Office is at 109, Leadenhall-street, E.C. The River Department Office is at the Victoria-embankment. **HW.** f. and c. at London Bridge at 1h 58m; Sp. rise 22ft; N. rise 18ft. **Accn.** All along the river on both banks are numerous warehouses, and wharves where vessels may load and discharge. These are owned principally by private firms, Ry. Cos., &c. The shallowest part of the channel of the estuary is to the south of the Leigh Middle Bank, where the depth is 26ft at LWOST. The Authority possess the following properties:—St. Katharine Docks; London Docks; Surrey Commercial Docks; West and South West India Docks; Millwall Docks; East India Docks; Royal Victoria and Albert Docks; Tilbury Docks; Cutler-street and Commercial-road Warehouses; East Smithfield Railway Depot; West Smithfield Cold Air Stores; and land at Crossness, about 106 acres in extent. The St. Katharine Dock is immediately to the east of the Tower of London. It is accessible only to vessels of moderate size, but has large warehouses and sheds specially adapted for the storage of wool, hops, tea, marble, shells, and bark, with storage capacity equivalent to 86,000 tons, and in addition the wine and oil vaults have a capacity of 37,500 pipes. There are 70 hydraulic cranes and other lifting machinery. The London Dock adjoins the St. Katharine Dock and will be available for vessels up to 4,500 tons. Produce from every part of the world is stored here, special premises having been adapted and set apart for housing, working, and showing wool, wine, brandy, india

rubber, gutta percha, sugar, dried and green fruits, ivory, spices, gums, metals, drugs, iodine, dates, pepper, rice, coffee, cocoa, isinglass, and other valuable goods. The storage capacity of the sheds and warehouses is 220,000 tons, and the wine, spirit, and oil vaults have a storage capacity of 105,000 pipes. Cool storage accom. is also provided in this dock for cheese, butter, bacon, &c. The machinery includes 132 hydraulic and other cranes, one of 25 tons lifting power. THE SURREY COMMERCIAL DOCKS are at Rotherhithe on the south side of the Thames, about 1½ miles from Tower Bridge. The system, which includes the Surrey Canal, covers an area of 460 acres, 98 acres of which are covered with deep water and 69½ with ponds for the storage of timber. The Greenland Dock, will accommodate vessels of 10,000 tons. These docks are the chief depôt for the soft wood trade of London. The piling grounds are 200 acres in extent, and sheds with an area of 50 acres are provided for the storage of wood under cover. Special provision has been made in the Greenland Dock for the accom. of Canadian produce in warehouses of a capacity of 2,000,000 cubic feet, with cold air storage. A large trade in grain is also done at these docks. THE WEST INDIA DOCKS, situated on the northern part of the Isle of Dogs, are connected with the general railway system of the country. Vessels up to 7,000 tons capacity can be received. The storage capacity of the warehouses is 195,000 tons, and that of the wine and oil vaults 24,667 pipes, while there is refrigerated accom. for 99,000 carcases of sheep. The principal goods stored are hard woods—such as mahogany, walnut, teak, lignum vitae, satin wood, and other furniture woods; rum, sugar, grain and dates. The cranage power consists of 247 hydraulic, steam, electric and hand cranes. At the wood wharves there are also 33 electric travelling cranes. THE MILLWALL DOCK is situated on the Isle of Dogs immediately to the south of the West India Docks. It is connected with the general railway system of the country. Vessels up to 9,000 tons capacity can be docked. An important general trade is done with vessels trading to the Baltic, Northern and Southern Europe and North and South America, but the special feature is the grain trade. The Central Granary has accom. for 112,000 quarters. Immediately adjacent to this granary are four nests of silos with a storage capacity of 18,000 quarters, and there is powerful pneumatic machinery for discharging grain from ships. A considerable trade is also done in soft wood. THE ROYAL VICTORIA AND ALBERT DOCKS, which extend from Blackwall to Galleons Reach (a distance of 3 miles) are the largest docks under the control of the Port Authority, and are used by vessels up to 12,250 tons. The floor area of the sheds and warehouses is 71¼ acres. There are 192 hydraulic and other cranes of varying capacity and a floating derrick of 50 tons capacity, also one of 30 tons. The principal warehousing businesses are grain, tobacco, and meat. There are large grain silos on the south side of the Royal Victoria dock; extensive warehouse accom. for tobacco on the north side of the same dock; and when the proposed additional

accommodation is completed, the cold storage warehouses in the two docks will have a capacity equal to 802,000 carcases of sheep. These docks have extensive railway facilities, and are connected through the G.E. Ry. with all the principal railway systems of the kingdom. The Royal Albert Dock passenger line runs along the north side of the Royal Albert Dock. The Port Authority have provided electrically driven pumping plant for the purpose of raising the level of the water in the Victoria and Albert Docks by 2ft 6in. THE EAST INDIA DOCKS are about half a mile lower down the river than the West India Docks. Vessels of 8,250 tons can dock in the basin, and the warehouses have a storage capacity of some 20,000 tons. The dock is principally used by vessels of the Union-Castle Line. Adjoining the river entrance to the dock is the Brunswick Pier and Wharf. THE TILBURY DOCK is situated on the North side of the Thames opposite Gravesend. The floor area of the sheds is 24 acres, and the storage capacity equals 175,000 tons. The quays are 3 miles in length. There are 66 30-cwt hydraulic travelling cranes at the dock, together with certain steam and hand cranes, and a floating derrick capable of lifting 50 tons. WAREHOUSES, &c.—*Cutler-street Warehouses* are the largest of the Authority's group of Town Warehouses, and are situated near Houndsditch and Bishopsgate-street. They occupy $4\frac{3}{4}$ acres of ground, and are provided for the reception of the more valuable classes of goods. The principal articles stored are tea, Oriental carpets, cigars, cigarettes, chinaware and japanware, silk, silk and cotton piece-goods, drugs, ostrich feathers, fancy feathers, and bird skins. *Commercial-road Warehouse*, situate at the City end of Commercial-road, is built over the Goods Depôt of the L.T. & S. Railway, and is used for the accommodation of traffic to and from the Tilbury Dock, and for warehousing general produce. All classes of goods are dealt with, the chief being India and Ceylon tea. *East Smithfield Railway Depôt.* This railway depôt in Upper East Smithfield is directly connected with the Great Eastern Railway. Export goods for the Royal Victoria and Albert Docks are delivered here, and many goods for town delivery from the Royal Victoria and Albert Docks are forwarded through this depôt. *West Smithfield Depôt*, in St. John-street, was constructed for the storage of refrigerated meat, &c. It adjoins the Smithfield Meat Market, and has accommodation for 95,000 carcases of sheep. *Charterhouse Street Store* has accommodation for 80,000 carcases of sheep. **Charges.** Under the Act the Authority have a general maximum power of collecting 1/6 per net t.r. on all vessels docking. **Tonnage Dues** are payable to the Port Authority under Sec. 155 of the Thames Conservancy Act, 1894, as amended by the Thames Conservancy Act, 1905, and the Port of London Act, 1908. The dues are charged on the registered tonnage of the vessel, and are as follows:—(1) For every vessel trading coastwise or entering winards or clearing outwards from or to any place north of lat. 48° 30′ N. and between long. 12° W. and 65° E. of Greenwich, for every voyage both in and out, 1d per ton. (2) For

every vessel entering inwards or clearing outwards beyond those limits, 1½d per ton. The dues on vessels under 100 tons which do not pass beyond the seaward limit of the port are ½d per ton. The following vessels are exempt from the dues: —Coastwise vessels not exceeding 45 tons; vessels bringing corn coastwise, the principal part of whose cargo consists of corn; fishing smacks and lobster and oyster boats; vessels not breaking bulk and vessels in ballast (if without passengers). A schedule of Port Rates levied on goods imported and exported can be obtained from the Port Authority. **Officials.** Chairman, Right Hon. Lord Devonport; Vice-Chairman, Right Hon. Lord Ritchie of Dundee; Man., C. Lowndes; Sec., F. Ayliffe; Chief Engineer, C. R. S. Kirkpatrick, M.Inst. C.E.; Chief-Superintendent of the Docks and Warehouses, H. Norris; Comptroller, H. E. Upton. Shipping Superintendent, G. S. Maskall; *Superintendents:* R. Biscoe (London and St. Katharine Docks); G. H. Ellis (Surrey Commercial Docks); W. E. Watson (East and West India and Millwall Docks); R. E. Seabrooke (Royal Victoria and Albert Docks); J. Braithwaite (Tilbury Dock); H. I. Lefeaux (Town Warehouses); F. J. Batty (River Dept.); E. C. S. Baker (Chief Police Officer). *Harbour Masters:* Capt. D. R. Buchan (Upper District: Office—Temple Pier); Capt. F. W. Kershaw (Lower District: Office—Gravesend). *Dockmasters:* Capt. T. N. Keen (London and St. Katherine Docks); Capt. T. L. Salmon (Surrey Commerical Docks); Capt. J. L. Barrie (West India Docks); Capt. W. T. Ross (Millwall); Capt. D. G. Thomson (East India Dock); Capt. T. J. Uren (Royal Victoria and Albert Docks); Capt. G. N. Belton (Tilbury Docks).

Pilotage. C. **Rates** for pilots licensed by the Corporation of Trinity House of Deptford Strond for piloting ships and vessels within the limits in the following tables. For piloting a ship from the Galloper Light Vessel to off Dover, sail £3 6s 8d, steam £2 10/; in or out of Ramsgate, Margate, or Sandwich Harbours, sail 5/, steam 3/9 per ft dft.; in or out of Folkestone Harbour, 2/ per ft dft., sail or steam. Dover Harbour Rates—For piloting a ship in or out of the Admiralty or Commercial Harbours or Docks, including to or from the Prince of Wales Pier, sail 5/, steam 3/9 per ft dft. The charge for anchoring a ship (not bound into Dover Harbour) in or near the Examination anchorage at Dover is the Tonnage Rate for Extra Services detailed on page 526. For a ship exceeding 27 ft an increase in the rates for each foot or part of a foot, in the same proportion as between 26 and 27ft. A pilot engaged or discharged at Thames Haven is to be paid 10/ for Travelling Expenses. The following charges are payable in respect of vessels subject to compulsory pilotage bound to any port or place within the London Pilotage District, and also in respect of any other vessel supplied with a pilot, viz:—Under 150 tons reg. 15/; 150 tons reg. and under 250, £1; 250 and under 400, £1 5/; 400 and under 600, £1 15/; 600 and under 1,000 £2 5/; 1,000 and under 2,000 £2 15/; 2,000 and under 3,000, £3; 3,000 and under 4,000, £3 5/; 4,000 and under 5,000, £3 10/; 5,000 and upwards, £3 15/. Vessels bound to the Medway to pay one half the above rates when supplied with a pilot in the vicinity

LYME REGIS, Dorsetshire. Lat. 50° 43′ N; long. 2° 56′ W. **Auth.** Mayor and Burgesses under Statute 1 and 2 Geo. IV., c. 99. **THW.** f. and c. 6h 21m.

W. prev. SW. to WSW. **Accn.** Harb. is formed by a stone pier called the Cobb, and is an excellent shelter for small vessels. The ent. to harb. is on E side between two inner piers; the North called North Wall; the South called Victoria Pier; bottom mud and sand; outside short breakwater of loose stones. Springs rise 13ft, Neaps 10ft. **D.** Dry at **LW.**; at HWST. 10ft to 12ft 6in. Crane up to 2 tons. A lifeboat station. **Ry.** L. & S.W. **Charges.** Ship dues 2d reg. ton, coal 6d ton, timber 1/ load; cement 4d ton landing. Labour: coal 2d ton, stone 1½d. Export dues on stone, 2½d ton. **Pilotage.** According to Trinity Scale. **Official.** Harb. Master, T. Searle.

LYMINGTON, Hampshire. Lat. 51° 46′ N; long. 1° 32 56″ W. **Pop.** 4,329. **Auth.** Town Council, under Lymington River and Harbour Order 1913. **Tr.** I. Coals, timber. **Accn.** There are five berths, and ships of 11ft dft may be berthed at **HW.** **THW.** f. and c. 11 a.m. **W.** prev. SW. **D. at LW.** 6ft to 9ft. AST. 12ft; NT. 9ft; RN. 4ft. There is a small slipway. The L. & S.W. Ry. Co. have built a pier for the I. of Wight steamers. **Charges.** Harb. dues vary as per scale—loading and unloading, about 4d. **Pilotage.** C. See Southampton. **Officials.** Harb. Master, H. B. Harper.

LYNMOUTH, Devonshire. Lat. 51° 12′ N; long. 3° 50′ W. A small port between Coombe Martin and Porlock. **D.** 15ft HWST. **THW.** f. and c. 6h 2m. A lifeboat station. **Charges.** Harbour dues, 1/ per mast. **Official.** Harb. Master, C. Bevan.

LYNN (King's Lynn), Norfolk. On the outlet of the Ouse into the Wash. Lat. 52° 45′ N; long. 0° 15′ E. **Pop.** 20,288. **Auth.** For the Port and Harb., Conservancy Board, constituted by the King's Lynn Conservancy Act, 1897, 60 and 61 Vic., chap. 196; for the Docks, the King's Lynn Dock Company, under King's Lynn Dock Act, 1865, and Acts, 1877 and 1889. **Tr.** I. Timber, deals, sulphur, ore, coal, oilcake, grain, linseed, cotton seed, &c.; E. Corn, flour, sand, coprolites, coal, oil, &c. **THW.** f. and c. 6h; Sp. rise 23ft; N. rise 11ft. **D.** on bar or sill of dock ST. 25ft; NT. 18ft. **W.** prev. from SW. to NW. **LV.** (sailing) 2,458, (steamer) 4,144 tons, both at HT. Vessels cannot enter at **LW.** **Accn.** The harb. is about 1,000yds long, and 150yds wide at **LW.** area about 30 acres, with an av. depth at **LW.** of about 10ft, and provides accn. for at least 42 ships, besides the quay spaces; and in cases of necessity the accom. in the harb. could be greatly increased. Dredging has greatly improved the harb., there being now more uniformity of depth. There are two docks, viz., the Alexandra Dock, 6¾ acres area, entered by a lock 200ft long by 50ft wide, with depth on sill of 25ft ST. and 18ft NT.; and the Bentinck Dock, with an area of 10 acres. The quayage length is about 5,240ft; ample warehouse accn., hydraulic appliances, &c. There is a good and safe anchorage for vessels in Lynn roads, a deep channel to the docks (lighted by Pintsch's gas buoys and beacons), and there are powerful steam tugs for the assistance of vessels. **Rys.** G.E., M., G.N., L. & N.W.,

and Mid. & G.N. Joint. **Charges.** Dock dues 3d to 1/ per ton reg.; vessels loading coal only 3d per ton reg. Port dues on goods shipped or delivered :—Channel lights ¼d per ton; mooring dues ½d per ton; beaconage 1d per ton (regular traders pay only 2/ in any one year); roaring middle light, ½d per ton reg. Duchy of Cornwall, lastage on all grain shipped ½d quarter and the same to Conservancy Board. **Pilotage.** C. **District :** Into or out of the port of King's Lynn or between St. Edmund's Ness (or Gore End) and Staple Ware. In practice, the pilots conduct vessels between Lynn Harb. southward and the bell buoy, No. 1, B.G.B., in Lynn Lower Roads, northward. **Rates.** Not. ex. 10ft, 1/6, ex. 10ft and not ex. 12ft, 1/9, ex. 12ft and not ex. 14½ft, 2/, ex. 14½ft, 2/6 foot dft. when loaded. No allowance made for any number of inches not amounting to half a foot. Additional rates for docking, undocking, mooring, and unmooring vessels or other extraordinary service, viz. :—Sailing vessels oversea.—Not. ex. 100 tons reg. 4/, ex. 100 and not ex. 250 tons 5/, ex. 250 and not ex. 450 tons 6/, ex. 450 tons 7/6, for all steamers oversea 10/. Vessels coastwise.—For every service rendered beyond the ordinary pilot service 1/, for mooring a vessel 2/6, for every day after the first day a pilot is detained in the Channel on board any inwardbound vessel, 10/, for attending any outwardbound vessel which subsequently proceeds to sea without a pilot 2/6. **Towage.** To and from the No. 1 Gas Buoy to King's Lynn docks or harb.: Steamers inward and outward 2d per net reg. ton. docking only 1d; sailing vessels inward, all northern ports 4½d, southern ports 6d; outward, loaded or ballast, 3d. Other distances, &c., by agreement. Tugs owned by the Board. **Officials.** Gen. Man., King's Lynn Docks and Ry. Co., W. Ogden Taylor; Clerk to the King's Lynn Conservancy Board, W. D. Ward; Harb. Master, Captain E. Holmes; Dock Master, Capt. W. R. White; Coll. of H.M. Cust., H. Genochio; Lloyd's Agents, Garland and Flexman.

LYTHAM, Lancashire. On the N. side of the Estuary of the River Ribble. A promenade pier, owned by the Lytham Pier and Pavilion Co., Ltd. See Preston.

MACDUFF, Banffshire, Moray Firth. Lat. 57° 40′ N; long. 2° 30′ W. **Auth.** Town Council, under Macduff Harbour Acts, 1847 to 1912. **W.** On shore from W. to E.; most dangerous N.E. **Accn.** Outer basin, 430ft × 150ft; inner basin, 700ft × 200ft; entrance, 85ft wide; quayage, 1,620ft. **D.** at entrance and over all harbour, HWOST. 16ft to 17ft, and HWNT. 12 to 13ft for all vessels. There is a portable steam crane of 3 tons' power, and hand cranes lifting 1 ton. Patent slip for sailers and steam drifters. **Charges.** Harb. dues, 4d per reg. ton coastwise, 8d foreign. Ballast, receiving or dischargi g, 10d per ton; dues on ballast, 2d per ton. Berthing masters' fees—Vessels under 30 tons, 8d per vessel; vessels 30 and under 60 tons, 1/3 per vessel; vessels 60 and under 80 tons, 1/9 per vessel; vessels 80 and under 120 tons, 2/3 per vessel; vessels 120 and under 300 tons, 3/6 per vessel; vessels 300 tons and upwards, 4/6 per vessel. **Pilotage.** Inwards or out-

wards, 2d per reg. ton. Boat with kedge and warp, 5/. **Official.** Harb. Master, Alex. Wilson.

MAIDSTONE, Kent. River Medway is navigable to this place for vessels of 150 to 180 tons. **D.** 8ft. **Pop.** 35,500; belonging to port of Rochester. **Tr.** Paper, stone, fruit, and hops. **Ry.** S.E. & C. (See also Allington Lock and Medway River.) **Officials.** Lock Master, W. Smith; Cust. Agent, W. F. Wood.

MALAHIDE, Co. Dublin, Ireland. Lat. 33° 28′ N; long. 6° 8′ W. 8 miles from Dublin. **Auth.** Owner, Lord Talbot de Malahide. Used by small colliers only, which beach and discharge with own gear.

MALDON, Essex. Lat. 51° 44′ N; long 0° 40′ E. At confluence of Blackwater and Chelmer. **Auth.** Maldon Harb. Impvt. Comm. under Order 1863. **D.** Dry at LWST., vessels of 12ft dft, at HWST. **Charges.** Harb. dues 3d under 70 tons, 6d above. Customs boarding station now at Bradwell. **Pilotage.** In or out: Eastness to Stansgate, 3/6 per ft; Stansgate to Maldon, 1/3 per ft.

MALLAIG HARBOUR, Inverness-shire, W. coast of Scotland. **Auth.** N.B. Ry. Co. **D.** There are 14 ft. at **LW.** shallowing to 1ft at S. end, good harbour anchorage in 5 fms, and a good pier anchorage in 5 fms. Two steam cranes, 5 tons each. **Official.** Harb. Mast., J. McNeil; Customs Officer, J. A. Brander.

MANCHESTER, Lancashire.—**Auth.** The Manchester Ship Canal Co. The Customs Port of Manchester commences at the eastern termination of the Port of Liverpool, at an imaginary straight line across the Mersey from Dungeon Point in Lancashire to Ince Ferry in Cheshire, and includes the Mersey above the said line and the Irwell, so far as navigable, the Weaver to Frodsham Bridge, and also the Manchester Ship Canal from the entrance at Eastham (where it touches the Port of Liverpool) to Hunt's Bank in Manchester, with all channels, havens, streams, creeks, cuts and docks within the limits aforesaid. The entrance to the Canal at Eastham is 19 miles from the Bar at the mouth of the Mersey, and the access is from the sea via the lower estuary. The access channel has been excavated to a depth of 20ft below Old Dock sill, Liverpool. The Canal is 35½ miles in length, and the principal docks are at Manchester. The Ship Canal throughout and the large docks at Manchester have been excavated to a depth of 28ft, which depth is maintained by dredging. The bottom width at the full depth is 120ft, with the following exceptions:—(*a*) At the curve at the Weaver Outfall the width is 180ft. At the bend at Runcorn, below the Runcorn Rly. Bridge, the width is 175ft. Between Runcorn Rly. Bridge and Runcorn (Old Quay) Lock. the width is 150ft. (*b*) For a part of the length between Latchford Locks and Partington Coaling Basin, *i.e.*, from Warburton Bridge to the upper end of Millbank Wharf (about three-quarters of a mile in all), the width is at present only 90ft. (*c*) From Barton Aqueduct to the Manchester Docks the width is 170ft. There are three parallel locks at Eastham, forming three separate entrances, which are open to Estuary

level whenever the tide rises more than 16ft 2in above Old Dock sill. When the tide is below this level, access and egress are obtained by means of the locks. The large lock is 600ft by 80ft. the intermediate lock 350ft by 50ft, and the small lock 150ft by 30ft. A vessel can pass through the largest lock in eight minutes or less. Width of Canal at Eastham Locks, 315ft. The Lower sill of the large lock at Eastham is 23ft below Old Dock sill, the Upper sills of all the large locks are 28ft below normal water level. **HW.** at Eastham, twelve minutes after Liverpool; at Runcorn, forty minutes after Liverpool. The locks and swing bridges are all connected by telephone with each other and with the Dock Office at Manchester. The Ship Canal includes five sets of Locks, as follows:—

Name.	Small Locks.	Intermediate.	Large Lock.	Rise.	Distance from Eastham Locks.
	ft. ft.	ft. ft.	ft. ft.	ft. in.	Miles.
Eastham	150×30	350×50	600×80	..	—
Latchford	..	350×45	600×65	14 6	2r
Irlam	..	350×45	600×65	16 0	28¾
Barton.....	..	350×45	600×65	15 0	30⅜
Mode Wheel	..	350×45	600×65	13 0	33⅞

FIXED BRIDGES.—The height from the normal water level in the Ship Canal to the underside of the girders leaves a clear headway of 74ft 6in. As, however, the headway is necessarily less when high tides or floods occur, to avoid detention shipowners are recommended to arrange for funnels and masts to clear the bridges at 70ft above the water level.

ROAD SWING BRIDGES.—The following is a list of the Swing Bridges, including Barton Aqueduct, viz.:—

	Distance from Eastham Locks. Miles
Runcorn (Old Quay) Swing Bridge	13¼
Moore Lane ,, ...	17⅛
Chester Road ,, ...	18¾
Northwich Road ,, ...	19⅜
Knutsford Road ,, ...	20⅜
Barton Road ,, ...	31¼
Barton Aqueduct (carrying the Bridgewater Canal over the Ship Canal)	31¾
Trafford Road Swing Bridge	35

Eastham Lay-bye.—1,500ft long, with a depth of 28ft of water alongside, and provided with electrically-driven sheer legs capable of lifting 15 tons to a height of 105ft above water level. The sheer legs are used for lifting and replacing tops of funnels or masts.

Ellesmere Port is the terminus of the Shropshire Union Railways and Canal Company's system. In addition to their docks, the Shropshire Union Co. have constructed a long length of wharfage facing the Canal, which has 20 and 24ft of water alongside.

Stuart's Wharf, adjacent to Ellesmere Port, is 437ft long, with a depth of 20ft of water alongside.

Stanlow Wharf.—Deep water Lay-bye, 550ft long.

Salt Union Ltd. Wharf is alongside their Salt Works, and is 500ft long, with 28ft of water.

Runcorn Lay-bye abuts on the Ship Canal at Runcorn immediately below Runcorn Docks. It is 1,500ft in length, with a depth of 28ft of water alongside, and is equipped with coal tip, movable cranes, and other appliances for loading and discharging cargo.

United Alkali Co.'s Two Wharves at Old Quay, Runcorn, are respectively 400 and 700ft long, with a depth of water 26ft and 22ft.

Haydock Coal Shipping Wharf at Acton Grange, near Warrington, is 340ft long, 40ft wide, with 22ft of water alongside.

Warrington Wharf, where large vessels can be loaded and discharged, is 300ft long, with a depth of 26ft of water alongside. The equipment includes a movable hydraulic transporter and a steam crane, each of a capacity of 30 cwt.

Partington Coaling Basin.—(See Coal Shipments.)

Irlam Wharf.—300ft long, 50ft wide, with 24ft of water.

Irwell Park Wharf, Eccles.—1,000ft long, with 28ft of water.

Animals' Wharf, Mode Wheel, with wharfage on the Ship Canal of 800ft. The Canal at this point is 300ft wide. There is accom. for 1,850 cattle and 1,500 sheep.

Coastwise Cattle Wharves.—Accom. for the coastwise cattle trade has been provided below the Manchester Docks, with pens 252ft long, divided into three sorting yards, 84ft by 15ft 6in, and six pens, 42ft by 10ft. There are also jetties and accom. for the discharge of coastwise cattle at Flixton and Barton.

Oil Tankage.—The total tankage capacity at or adjacent to the Manchester Docks is now (1914) 125,091 tons or 33,988,660 gallons. Oil is conveyed to the depots through pipes direct from vessel to tanks.

Dry Docks.—The Manchester Dry Docks Co., Ltd., have at the Manchester Docks two graving docks, one 535ft by 65ft, with 22ft of water on the blocks, and the other 425ft by 65ft, with 18ft of water on the blocks; also a floating pontoon 260ft by 63ft, with 16ft of water on the blocks, capable of lifting vessels up to 4,000 tons burden. This Company have also a pontoon floating dock at Ellesmere Port 350ft by 70ft, with 16ft of water on the blocks, capable of lifting vessels up to 5,000 tons burden.

The Manchester Dock Estate above Mode Wheel Locks covers an area of 406½ acres, including a water space of 120 acres, and quays 6½ miles in length, including Trafford Wharf, 2,500ft in length, and Salford Quay, 1,198ft in length. The quay and storage are 286½ acres in extent. The dimensions of the docks are—No. 1, 700 by 120ft; No. 2, 600 by 150ft; No. 3, 600 by 150ft; No. 4, 560 by 150ft; No. 5, not yet constructed; No. 6, 850 by 225ft; No. 7, 1,160 by 225ft; No. 8, 1,340 by 250ft; No. 9, 2,700ft by 250ft. The equipment includes 247 hydraulic, steam and electric cranes, with a radius of from 16 to 40ft, and capacity of 1 to 10 tons; a 30-ton steam crane; pontoon sheers up to 250 tons, with a lift of 21ft, six

floating pontoons of d.w. carrying capacity of 800 tons each, 51 locomotives, and every appliance for quick despatch in loading and discharging; a range of thirteen single, one double, and six three-floor sheds and five four-floor sheds, and fourteen five-floor transit sheds; also thirteen warehouses seven stories each. The docks, quays, and warehouses are lighted by electricity. Fire alarms and salvage boat.

GRAIN ELEVATOR with a capacity of 40,000 tons (or 1,500,000 bushels), having 268 bins, discharging from vessels in the docks at the rate of 350 tons per hour. A powerful pneumatic apparatus capable of discharging 200 tons per hour from ships into the elevator is provided to supplement the foregoing appliances.

Cold Storage.—There is a large refrigerator store below Mode Wheel Locks, capable of holding 175,000 carcasses of mutton. In addition there is a refrigerated transit shed at No. 9 Dock for the receipt, sorting and immediate delivery of frozen meat and other produce.

The Manchester Dock Railways are 85 miles in extent, and completely intersect the Dock Estate. The total length of railways already completed at the Docks and at many points alongside the Ship Canal is upwards of 140 miles. The following railways connect with the Docks: L. & N.W., L. & Y., G.N., Midland, G.C., and Cheshire Lines. The Ship Canal Co.'s Rys. alongside the Ship Canal between Manchester and Eastham are connected with the railways of other companies as follows: With the Cheshire Lines, G.N., Midland, G.C., at Irlam and Glazebrook; with the L. & N.W. at Latchford and Runcorn Docks; with the joint line of the L. & N.W. and G.W. at Acton Grange Junction (near Warrington) and Ellesmere Port. Traffic can be conveyed in railway wagons between the loading and discharging berths at the docks and on the Canal, and over the above lines to every station in Great Britain.

STATUTORY METHOD OF ASCERTAINING THE TONNAGE OF UNREGISTERED VESSELS FOR THE PURPOSE OF CHARGING SHIP DUES THEREON.

Dead-weight Carrying Capacity of Vessel.	Assumed Register Tonnage.
Not exceeding 50 tons	20 tons
Exceeding 50 tons and not exceeding 75 tons	30 tons.
Exceeding 75 tons	10 tons (in addition to the above-mentioned 30 tons) for each 25 tons of dead-weight carrying capacity in excess of 75 tons. Any dead-weight carrying capacity in excess of a complete multiple of 25 tons to be reckoned as 25 tons.

Rent.—Rent of 1d. per net registered ton per week is chargeable on vessels remaining in the Canal after the expiration of the period allowed in the following Schedule. Should vessels remain in the Canal beyond six months from date of entry, double these rates will be charged.

SCHEDULE OF SHIP DUES payable on vessels entering the Manchester Ship Canal and chargeable upon each registered ton.	UPON VESSELS TRADING BETWEEN			Period allowed Vessel to remain in Canal, after which rent will be charged.

The above rates are now subject to an addition of 10 per cent.

Ship Dues.—(1) Ship Dues are payable on a vessel's net registered tonnage, as well as upon any space that may be occupied by deck cargo, as defined in the Merchant Shipping Act, 1894, whether the deck cargo is discharged within the Ship Canal or not. (2) The Master of every registered vessel shall, on demand, produce the certificate of the registry of such vessel. If any such Master refuse or neglect to make such production on demand, he shall be liable to a penalty not exceeding £20. (3) Vessels entering the Ship Canal and not passing beyond the Runcorn Swing Bridge will pay Ship Dues as for Section A of the Canal, and beyond Runcorn Swing Bridge to the entrance to Latchford Locks as for Section B of the Canal, and from Latchford Locks (including the Locks) to Manchester as for Section C of the Canal, as per Schedule of Dues shown on page 537. (4) Vessels entering the Ship Canal with cargo are charged as from the most distant port of lading; and when loaded Outward, as for the most distant port of destination. Vessels entering in ballast are charged as from the port whence they sailed; and when Outward in ballast, as for the port of destination. (5) Vessels having paid Dues on their Inward voyage as from the most distant port of lading will not be charged Dues on their Outward voyage when the Dues chargeable as for the most distant port of destination do not exceed the amount paid for Inward Dues on the net registered tonnage, but should the Outward Dues exceed the Inward the difference in excess will then be charged. (6) Any person applying to make payment of Dues may be questioned as to the most distant port from which such vessel has arrived or to which such vessel is bound; and if such person shall refuse to answer any reasonable question, or shall wilfully give a false or untrue answer, he shall be liable to a penalty not exceeding £50. (7) Vessels discharging cargo in more than one Section of the Canal on the way up or down will be charged Ship Dues on their Inward voyage at the rate applicable to the Section wherein the greatest portion of such cargo has been discharged. (8) Vessels discharging cargo in Sections A and/or B only, and afterwards loading cargo Outward in any other Section or Sections, will be charged on their Outward voyage at the rate applicable to the Section wherein the greatest portion of their entire cargo has been loaded. (9) Vessels coming to Section C with cargo for discharge there, and calling at any point in Sections A and/or B on the way down to load cargo Outward, will be charged Ship Dues on their Outward voyage at the Section C rate only. If such vessels load cargo in Sections A and/or B whilst on the way up to Section C, Ship Dues will be charged on their Outward voyage at the rate applicable to the Section wherein the greatest portion of their entire cargo has been loaded. (10) Vessels entering the Ship Canal in ballast, and loading cargo in more than one Section of the Canal, will be charged Ship Dues on their Outward voyage at the rate applicable to the Section wherein the greatest portion of their entire cargo has been loaded. (11) Vessels trading exclusively on the River Mersey and entering the Ship Canal

through any of the Estuary Locks, either loaded with transhipment cargo for loading to Outward seagoing vessel or, if in ballast, to load transhipment cargo from Import seagoing vessels in the Canal for lighterage to places either within or without the Canal (on the Mersey), will not be charged Ship Dues; but if such vessels enter the Canal to load cargo from any Warehouse, Grain Elevator, and/or Storage Ground therein, they will be charged Ship Dues at the rate applicable to the Section wherein such cargo is loaded.

Differential Ship Dues.—(1) Vessels entering the Canal with cargoes not less than one-half of which shall consist of all or any of the following articles, and discharging the whole of any such cargoes in the Canal, will be charged one-half of the ship dues specified in the schedule, provided they leave the Canal in ballast, or load cargoes consisting exclusively of all or any of the articles named in clause 2. The articles above referred to are: Bauxite, blende ore or black jack, copper ore, copper precipitate, copper pyrites, copper regulus, esparto grass, green fruit from Mediterranean ports, guano, iron ore, iron pyrites, lead ore, magnesite ore, manganese, manganese ore, manganiferous iron ore, phosphate, phosphate rock, sulphur ore, sulphur pyrites. (2) Vessels entering the Canal in ballast or with cargoes not less than one-half of which shall consist of all or any of the articles named in clause 1, and discharging the whole of any such cargoes in the Canal, and loading cargoes in the Canal consisting exclusively of all or any of the following articles, will be charged one-half of the ship dues specified in above schedule: Bricks, coal, coal briquettes, coke, creosote in bulk, purple ore briquettes, pig-iron, iron ore, phosphate, pitch, salt, salt cake, slag, steel rails, and superphosphate. (3) Steamers entering the Ship Canal to discharge or load cargo may call at any point for Bunker Coal without being charged any additional Ship Dues; but if entering the Canal for the purpose of bunkering only they will be charged Differential Ship Dues as if cargo coal had been loaded in the Section wherein the Bunker Coal has been taken. (4) Vessels, including yachts, launches, small steamers, and any other craft not cargo carrying (exclusive of tugs, licensed by the Co., attending on vessels), using the Canal from point to point, will in lieu of Ship Dues be liable to **Lockage Toll,** as follows:—For passing through any Lock, 5/ per Lock each way, in addition to Canal Toll on passengers carried. Min. charge for Lockage, £1 1s. Upon payment of the foregoing Lockage charge, such vessels may remain in the Canal seven clear days, after which laying-up rent will be charged thereon at the rates noted in the " rent " clause on page 536.

Upper Mersey Dues.—The Upper Mersey Commissioners have power to charge dues on vessels proceeding to, from, or through Ellesmere Port, the Weston Marsh Lock, the Weston Point Docks or Locks, or the Runcorn Docks, or along the River Weaver Navigation, or along the Bridgewater Canals, or along the Shropshire Union Canal, *but vessels loading or discharging elsewhere in the Ship Canal are*

not charged with these dues provided they enter and leave via the Eastham Locks only.

Towage.—The Co. has 13 powerful steam tugs (screw and paddle) for the towage of vessels on the Canal.

STEAMERS:	Per Tug. £ s. d.
From Eastham or any Point in Sections A or B direct to Section C, or *vice versâ*	7 10 0
Steamers stopping at Partington to take in Coal on returning from Manchester to Eastham will not be considered as breaking the direct voyage.	
From Eastham direct to any Point in Sections A or B, or *vice versâ*, also from one point to another in these sections	4 10 0
From Manchester Docks direct to any Point in Section C or *vice versâ*, also from one Point to another in that Section	4 10 0
Waiting at Eastham, per tide	2 0 0
EXCEPTIONS:	
From Manchester Docks direct to any point below Mode Wheel Locks and above Barton Aqueduct, or *vice versa*	2 10 0
From one point direct to another between Mode Wheel Locks and Barton Aqueduct;	
From one point direct to another in Manchester Docks;	
From one point direct to another within the Canal at Ellesmere Port, or at Runcorn	2 0 0
From Eastham Locks to Dolphins within the Canal at Eastham, or *vice versa*;	
From one tip to another at Partington Coal Basin	1 0 0
NOTE.—As regards services Nos. 6, 7, 8, 9, and 10, when Tugs are occupied for more than one hour an additional charge of 10/ per hour or part of an hour per Tug will be made The service to be calculated from the time the Tug is in attendance, as ordered, until the time the service is finished.	
SAILING VESSELS:	
From Eastham Locks direct to any point in Section A, B, or C in the Canal, or *vice versa*, or when proceeding from one point direct to another in the Canal, or in the Manchester Docks:	
If light, 2d per net registered ton.	
If loaded, 3d per ton upon the weight of the cargo, with a minimum as for when light.	
These rates will operate until the higher scale under the preceding table for steamers is reached by the charges payable on the tonnage of the vessel, if light, or on the weight of cargo on board, if loaded, when the charges as per the said Table will apply.	
Detention of Tugs attending steamers and sailing vessels: Per hour or part of an hour, 10/ per Tug.	
If Tug assistance or towage services other than those named above are required, the charges will be by special arrangement.	

The foregoing rates for towage are increased by 50 per cent. on Sundays, and Bank and special holidays.

Pilotage.—The Ship Canal Co. being the Pilotage Authority are empowered to collect all charges for pilotage on the Canal. Pilotage NC., but when a pilot is employed, he must hold a Pilotage Licence issued by the Co., and must not, without the Co.'s consent, claim for his services any greater or less sum than is provided for in the following scale: For vessels entering or leaving the Canal loaded or in ballast, the following initial fees are charged according to n.r.: Up to 300 tons, 10/; over 300 tons and up to 600 tons, £1; over 600 tons and up to 1,200 tons, £1 10s.; all over 1,200 tons, £2; and in addition

1/ per mile, or portion of a mile, for the distance navigated when loaded, and 6d per mile, or portion of a mile, when in ballast. For vessels piloted from one point of the Canal to another, *i.e.*, when not entering or leaving the Canal, one-half of the above-named initial fee is charged, and the full mileage rate of 1/ per mile, whether loaded or in ballast. **Extra Services.**—When vessels are detained on their journey up or down the Canal for the purpose of bunkering or otherwise for the convenience of the Owners, and proceed on their journey within 4 hours, 5/ is charged; but when detained over that time, and not exceeding 24 hours, the charge will be 10/ for detention, provided this does not exceed one-half of the full initial fee; but should it do so, only half the full initial fee will be charged. If a vessel is detained beyond 24 hours at any one point of call, she will be treated as moving from point to point in the Canal, and charged accordingly. When for the convenience of Owners, vessels are moved at Eastham from the Locks to the Sluiceway or Dolphins within the Canal, or *vice versa*, or between the Sluiceway and Dolphins, 10/ is charged for each service.

Loading and Discharging.—The revised schedule of charges payable by shipowners issued by the Ship Canal Co. operating from Nov. 1, 1911, contains full particulars as to conditions and rates, and copies may be had on application.

Coal Shipments.—Vessels entering the Ship Canal in ballast to load coal are charged one-half ship dues. (See Differential Ship Dues.) Coal can be obtained at the following places upon the Canal:—

Partington Coal Basin.—Quay space, 20 acres. Length, ¾ of a mile. Depth, 28ft. Water space, 6½ acres. Over 22 miles of railway sidings. Partington is the nearest shipping port for the South Yorkshire Collieries, and only 8 miles from the nearest Lancashire colliery, and coal from all collieries can be received there by railway. Six hydraulic tips of a capacity of 300 tons per hour each are erected, and vessels can obtain coal with the best possible despatch. The railway rates include haulage to tips and tipping, the only charge against the ship, in addition to Ship Dues, being for trimming or other service that may be requisitioned. Ordinary trimming: cargo, 3d; bunkers, 6d; bunkers to oil tank steamers, 7½d per ton.

Manchester Docks.—Loading cargo and bunkering is only permitted under specified conditions.

Weaste.—Hydraulic Coaling Crane (for cargoes and bunkers), situate just below Mode Wheel Locks. Depth of water alongside 22ft.

Runcorn.—Coal is received here by railway from collieries, and by lighter from collieries on the Bridgewater, Bolton and Bury, Leeds and Liverpool, and North Staffordshire (Trent and Mersey) Canals. It is shipped by balance tips in the

Runcorn Docks and by tip in the Ship Canal, and also direct ex railway wagon or barge at the Lay-bye. For Runcorn Dock Charges, application should be made to the Runcorn Agent of the Bridgewater Department, J. Groome, Runcorn Docks.

Haydock Wharf, Acton Grange.—Coal is received here by railway from the collieries of Messrs Richard Evans and Co., Ltd, the wagon boxes being lifted and tipped by steam crane. Messrs. Evans & Co. make their own charges for shipping the coal. Their address is: Colliery Proprietors, Haydock, St. Helens, Lancashire.

Ellesmere Port.—Coal is received here by railway from all collieries, and is loaded by the Shropshire Union Canal Co. by means of their hydraulic tip in the Ship Canal. They make their own charges for the service.

The Manchester Ship Canal Co. issue schedules of ship charges, schedules of charges payable by shipowners, and schedules of charges payable by merchants on various commodities, copies of which may be had on application. Further information may be obtained on application to the Co. *Head Office :* 41, Spring-gardens, Manchester: Chairman, J. K. Bythell; Sec. and Accountant, F. A. Eyre; Chief Engineer, H. A. The Middlesbrough Dock is the property of the N.E. Ry. Co. Area of 26 acres, depth on sill 27 to 32ft. Width of entrance 80ft. Length of quay wall, 6,700ft. Forty-seven electric and hydraulic cranes of from 3 tons to 30 tons. **Charges.** Dues on ships, dock dues, rates or tolls on goods and cattle. Dock police, 6d to 2/ according to size of vessel. Charges for assistance in mooring ships. Charges on goods. Trimming charges, &c. Port charges on ships vary from 4¼d to 7¼d per ton, less rebate (at present) of 15 per cent. Anchorage dues, 2/6 per vessel. Tolls on goods, minerals, &c. **Pilotage.** NC. **Rates** per foot draught. From the sea to the Redcar Wharf and *vice versâ*, from and including the first day of April to the first day of October in each year, 1/; and from and including the first day of October to the first day of April following, 1/3. From the sea to any point between Redcar Wharf and Acklam Wharf and *vice versâ*, from and including the first day of April to first day of October, 1/6; and from and including the first day of October to first day of April following, 1/9. From the sea to any point between Acklam Wharf and Newport Wharf and *vice versâ*, from and including first day of April to first day of October, 2/; and from and including first day of October to first day of April following, 2/3. From the sea to any point between Newport Wharf and Stockton Bridge and *vice versâ*, from and including first day of April to first day of October, 3/; and from and including first day of October to first day of April following, 3/3. Vessels of over 900 tons gross reg. shall

pay ¼d per ton on the excess of tonnage over 900 gross reg. tons, from the sea to Acklam Wharf or any intermediate distance, and *vice versâ*, and shall also pay ¼d per ton on the excess of tonnage over 900 gross reg. tons, from the Acklam Wharf to Stockton Bridge and *vice versâ*, thus making the payment ½d per ton on the excess tonnage from the sea to Stockton Bridge, or for any distance beyond Acklam Wharf. Vessels mooring or unmooring at the Fifth Buoy shall pay 7/6 in addition to the above rates. Vessels having lee boards shall pay 5/ in addition to the above rates. From Redcar Wharf to any point between Newport Wharf and Stockton Bridge or *vice versâ* 2/ for each ft of water and ¼d per ton on gross tonnage in excess of 900 gross reg. tons. From any point between Redcar Wharf and Acklam Wharf to any point between Newport Wharf and Stockton Bridge or *vice versâ*, 1/6 for each ft of water and ¼d per ton on gross tonnage in excess of 900 gross reg. tons. The rates for docking and transporting shall be as follows: from anywhere between Eston Jetty and Acklam Wharf, between Connals Wharf and Newport Wharf, or between Newport Wharf and Stockton Bridge, or *vice versâ*—Vessels not ex. 200 tons gross reg., 5/; not ex. 400 tons, 7/6; not ex. 600 tons, 10/; not ex. 800 tons, 12/6; not ex. 1000 tons, 15/; not ex. 1,500 tons, 17/6; not ex. 2,000 tons, 20/; not ex 2,500 tons, 25/; and 1/ for each additional 100 tons gross reg. or part thereof. From anywhere between Acklam Wharf and Eston Jetty to any wharf in the Newport District or *vice versâ*, and anywhere between Acklam Wharf and Eston Jetty to Redcar Wharf or *vice versâ*, and from any wharf in the Newport district to any wharf in the Stockton district or *vice versâ*—Vessels not ex. 200 tons gross reg., 10/; not ex. 400 tons, 12/6; not ex. 600 tons, 15/; not ex. 800 tons, 17/6; not ex. 1000 tons, 20/; not ex. 1,500 tons, 22/6; not ex. 2,000 tons, 25/; not ex. 2,500 tons, 30/; and 1/ for each additional 100 tons or part thereof. From anywhere in the Newport District to Redcar Wharf or *vice versâ*—Vessels not ex. 200 tons gross reg., 15/; not ex. 400 tons, 17/6; not ex. 600 tons, 20/; not ex. 800 tons, 22/6; not ex. 1000 tons, 25/; not ex. 1,500 tons, 27/6; not ex. 2,000 tons, 30/; not ex. 2,500 tons, 35/; and 1/ for each additional 100 tons or part thereof. In the case of vessels ex. 900 tons gross reg. two-thirds only of the above rates to be charged for moving vessels from tier or wharf to tier or wharf, or from tier or wharf to any dry dock or slipway within the distance of 300 yards. For pilot's attendance in harbour when required on any vessel, whether ultimately engaged for such vessel or not, 7/6 per day or part of a day. For pilot continuing in charge on request whilst a vessel's compasses are being adjusted, 10/6 extra. For pilot detained through quarantine, etc., 7/6 per tide or part of a tide, and provisions.

Towage. Sailing vessels, light, to or from sea 3½d; loaded, to or from sea, 4d ton. Steamers, if a steamer requires only one tug the charge to be 1¾d per reg. ton in and out, with the assistance of a second tug, outward, as far as Cargo Fleet, if required. If a steamer requires two

tugs the amount to be 1⅞d per reg. ton, in and out. With an addition in all cases of ¼d per reg. ton in the event of a vessel calling at Redcar Wharf or Eston Jetty. **Officials.** Gen. Manager to the Tees Commission, J. H. Amos; Engineer, H. A. Wood; N.E.R. Dock Agent, ——; Harb. Master, Capt. Livett; Coll. of H.M. Cust., J. Mortishead; Sec. Tees Pilotage Commission, Albert Spence; Pilot Supt., Stephen Clark; Lloyd's Agents, Kennedy Bros.

MILFORD HAVEN (Port of), Pembrokeshire. Lat. 51° 43′ N; long. 5° 3′ W. **THW.** f. and c. 6h 4m, and at entrance 5h 56m. An inlet of the sea, on the SW. coast of Pembrokeshire. From St. Ann's Head to Pembroke Ferry, where it becomes the Cleddau estuary, it is 12 miles long; varies in breadth from ¾ to 1¾ mile, though the ship channel is much narrower, owing to projecting mud flats and shelves. It has in the navigable parts a depth of from 5 to 14 fms., and branches off into numerous shallow bays and creeks. It is easy of entrance, affords good shelter, and forms one of the finest natural harbs. in the kingdom. On St. Ann's Head, at W. side of entrance, is one fixed light of the first order; and on Great Castle Head on N. side of haven, 4 miles W. of Milford, are two fixed leading lights for the guidance of vessels entering. There are also other leading lights further up the haven. **Ry.** G.W. See also below.

MILFORD HAVEN (Town of). Lat. 51° 42′ N; long. 5° 10′ W. **D.** HWST. 34ft, HWNT. 28ft. **Auth.** The Milford Docks Co. The Docks at Milford have an entrance lock 70ft wide and 550ft long; the depth on sill being 34ft HWST. Water area of docks is about 20 acres. Dry dock 600ft × 94ft width at coping, and 69ft 10in at entrance. Patent slipway for vessels up to 600 tons. The dock entrance gates are open for about 3 hours each HW., and there is a **LW.** landing stage outside the dock for the use of fishing and other vessels. The docks are capable of accommodating vessels of large tonnage. Cranes up to 20 tons; and a coal-shipping machine, capable of shipping 150 tons per hour. The docks' sidings are in direct communication with the G.W.R. There is a passenger station, and large iron warehouses within the docks. There are two large fish markets, two ice factories and cold storage houses, fish-curing house, and a very large and increasing fishing traffic is carried on. There is a telegraph and telephone call office on the docks, also private telephones in work. **Charges.** These will be supplied on application to the Manager, at the Docks, or Sec., 14, Queen Victoria-street, London. **Officials.** Man. & Eng., J. C. Ward; Sec., F. M. Brockelbank; Dock Master, Capt. W. J. James; Chief of Cust., J. W. Croker.

MILFORD, NEW.—See Neyland.

MILLBAY.—See Plymouth.

MILLOM. Creek of Whitehaven, on River Duddoon. **D.** HWST. 20ft, HWNT. 12ft. **Official.** Harb. Master, Capt. Morgan.

MILLPORT (Cumbrae) on Cumbrae I. in Firth of Clyde Harbour, together with Keppel pier, acquired by Town Council under Millport Piers Order, 1905. Millport Pier has been extended 11ft at **LW.** **Charges,** 2d per ton dues.

MILTON REGIS, Kent. Creek from the Swale. Port of Sittingbourne and Murston. **Auth.** Milton Creek Conservancy. **Tr.** I. Cement; E. Bricks, paper. **D.** at Milton Quay 7ft HWST., and 4ft HWNT.; at Crown Quay, Sittingbourne, 9ft HWST., and 6ft HWNT.; at Murston, 12ft HWST., and 9ft HWNT. **Official.** Harb. Master, J. Fenteman.

MINEHEAD, Somerset. Lat. 51° 12′ 45″ N; long. 3° 28′ 20″ W. **Auth.** Owner, A. F. Luttrell, under an Act of Geo. IV. **Accn.** Area 4 acres. **D.** Dry at **LW.**; at HWST. 26ft. Used by vessels of up to 300 tons. **THW.** f. and c. 6h 24m. **W.** prev. W. Crane to 3 tons. New passenger landing stage, under Minehead Pier Co. **Ry.** G.W. **Charges.** Keelages ½d per ton reg.; coal and culm 2d per ton; timber 1/ per load. **Pilotage.** As per agreement. **Official.** Harb. Master, J. H. Davis.

MINGARY, Argyll. A pier about 150ft in length, near the promontory known as "Rudha Aird-an-iasgaigh," Ardnamurchan. **Auth.** County Council.

MISTLEY, Essex. Near Manningtree, on Mistley water. (See Harwich.)

MONIFIETH, near Dundee, Forfarshire. **D.** 9 to 12ft HWST. **Charges.** Half of Dundee rates, collected at Broughty Ferry. **Official.** Harb. Master, R. H. Bell.

MONTROSE, Forfar, at the mouth of the River Esk. Lat. 56° 42′ N; long. 2° 16′ 9″ W. **Pop.** 15,000. **Auth.** Trustees of the Harb. of Montrose, under Montrose Harb. Acts and Orders, 1837 to 1899. **Tr.** I. Flax, hemp, and timber; E. Canvas, coarse linens, corn, cattle, smoked haddocks, pork, potatoes, &c. **THW.** same as Leith; Sp. rise 14ft; N. 11ft; R. of N. 8ft. Vessels recommended to take pilot inwards. Accessible to the largest ships at HW. **Accn.** The harb. is formed by the outlet of the S. Esk, which falls into the sea between Scurdy Ness on the S. and the Annat Bank, which forms a natural breakwater on the N., leaving a channel 170yds wide, with a depth of 22ft HWST., and 17½ft NT. up to abreast the quays. There is a wet dock of 3½ acres, entrance 55ft wide, depth on sill at ST. 19½ft, NT. 15ft. There is also a deep water berth 350ft long, at which there is 20ft LWST. There is likewise a berth at the buoys in the river, with 20ft to 22ft LWS. The dock and quays afford 1,200yds of wharfage. There is a new shed, 230ft long and 50ft wide, on dock quay for vessels requiring despatch. There is a patent slip with cradle 100ft long, 13ft wide at ST., 8ft at neaps. One crane of 6 tons power. Facilities for all kinds of ship and boiler repairs. **Ry.** Cal. and N.B. **Charges.** Harb. and dock rates and dues (tonnage rates) vary from 1½d to 1/6 reg. ton; plank money 1/ to 6/6 each

vessel, according to size. Ballast by agreement put into hold. **Pilotage.** NC. **Rates**:—

ST. 10ft, NT. 7ft. **Ry.** NB. **Charges.** Harb. dues 3d per reg. ton of coastwise vessels, and 4d on foreign. **Pilotage.** 1/ per ft for 8ft, and 1d for every additional ft. **Officials.** Prin. Coast Officer, J. MacNeil; Harb. Master, John Mackenzie.

NAIRN, Nairnshire. **Auth.** Corporation, under Prov. Order, 1863. **Accn.** Two piers. E. pier has 16½ft HWST. and 3ft at **LW.**, and W. pier has 11 to 14ft HWST. Bar shifts. **D.** at entrance 11 to 14ft HWST, and 8 to 9ft HWNT; 2 to 3ft LWNT. **LV.** 400 tons. **W.** prev. N. and NE. More water on bar with S. and SW. **Ry.** H. **Charges.** Anchorage 4d per ton reg.; coals 5d per ton, slates 1/ per M, manure 1/ per ton, salt 6d per ton, timber 2 per cent. on value, fish 1d per cwt. Berthing Master's fees, under 20 tons 6d, over 20 1/ per vessel. **Pilotage.** NC. **Officials.** Harb. Master, Wm. Anderson, Berthing Master and Pilot, Daniel Main.

NEATH ABBEY.—See Neath.

NEATH and BRITON FERRY, Glamorgan. **Neath.** Lat. 51° 36′ 10″ N; long. 3° 52′ 0″ W. **Pop.** 30,000. **Auth.** Harbour Commissioners, under Statutes 1843, 1874, 1878, 1880, 1884, 1886, 1889, 1891, 1897, 1900, and 1901. **Tr.** I. Copper, iron, and zinc ores, wool, flour,

pig iron, &c.; E. Coal, copper, iron spelter, fire bricks, tin plates, &c. **THW.** f. and c. 6h 31m; Sp. rise 27ft. **D.** on bar practically dry, perhaps 2 or 3ft at **LW.**; 16ft on dock sill at NT., 25ft at ST.; main Colliery Wharves, Neath Abbey, 1,500ft, and other Colliery and Works Wharves; Neath Town Wharves 11½ft below dock sill. **W.** prev. W. to SW. **LV.** about 2,400 tons at ST. **Rys.** G.W. and N. & B.

Briton Ferry. Briton Ferry dock has 13 acres floating and 10 acres tidal space at mouth of River Neath. Coal and iron can be shipped at Briton Ferry by connecting railway, same as at Cardiff and Swansea. There are hydraulic cranes for discharging ballast, ore, timber, and general goods, and hydraulic tips for shipping coal. One of the latter has a lift of 40ft.

Charges. Dock dues on steamers and sailing vessels 2d per n.r. ton in river, 3d in dock, irrespective of destination, on coal and coke ¾d per ton. Harb. dues on steamers and sailing vessels 1d per reg. ton, excepting in the case of vessels loading or unloading part of whole of cargo in the river and entering the dock, or *vice versâ*, when the charge will be 2d per reg. ton irrespective of destination: on coal and coke ¾d per ton. **Pilotage.** C. **District:** From the outside of Neath Bar into the port and harbour of Neath, or *vice versâ*. **Rates:**—

For the pilotage of any vessel per reg. tonnage.	First Station From outside of Neath Bar (Fairway Buoy) to the Layer, and to any distance between the Layer and southern end of Abbey Estate, or *vice versâ*.	Second Station From outside of Neath Bar (Fairway Buoy) to any distance lying between the inner termination of the First Station and the Abbey Pill, or *vice versâ*.	Third Station From outside of Neath Bar (Fairway Buoy) to any distance lying between the Abbey Pill and Neath Bridge, or *vice versâ*.

And 5s. for every additional 100 tons reg. or part of 100 tons.

The above pilotage rates are subject to an addition of one-fifth in respect of vessels not propelled by steam or towed by steam vessels. Any vessel taken to the Mumbles Road at the request of the master shall pay extra pilotage, at the rate of 3/6 for every 100 tons or part of 100 tons reg. For conducting vessels from one station to another within the port:—Vessels under 100 tons reg. 3/; 100 and under 150 tons 3/6; 150 and under 200 tons 4/; 200 and under 250 tons 5/; 250 and under 400 6/; 400 tons and upwards 8/. Neath is a Trinity outport. Pilotage compulsory, with liberal exemptions for home trade vessels. Pilot boat and hobblers' fees are included in the rates. **Towage.** Inwards, per reg. ton: Outer Buoy to Layer or Giant's Grave 2¼d; to Abbey Coal or Crown Copper Works 2½d; to Mines Royal

Copper Works 2¾d; to Neath 3¼d; Mumbles Roadstead to Giant's Grave, Abbey, or Neath by agreement. Outwards, per reg. ton: Giant's Grave or the Layer to sea or Outward Buoy 2¾d; Abbey Coal or Crown Copper Works to sea or Outward Buoy 3d; Abbey Pill or Mines Royal Copper Works to sea or Outward Buoy 3¼d; Neath to sea or Outward Buoy 3¼d, from Giant's Grave to Mumbles Roadstead, Abbey or Neath by agreement. Vessels that may require to be towed shorter distances, if not having been offered the steamer to tow them the whole distance from where they were laden or going to load, pay as follows:—From dock or Layer and *vice versâ* to Giant's Grave 1¼d; Abbey Coal or Crown Copper Works 1¼d; Abbey Pill or Mines Royal Copper Works 1¾d; Neath 2d. From Giant's Grave and *vice versâ* to Abbey Coal or Crown Copper Works 1¼d; Abbey Pill or Mines Royal Copper Works 1½d; Neath 1¾d. All vessels towed to or from Swansea or Port Talbot by agreement. Steamers only assisted through the temporary channel ¾d. No vessel to pay less than 5/6 in and 6/6 out. No steamer to pay less than 10/ harbour tow. No register tonnage to be considered under 50% of carrying capacity for towage rate. The tug to have one day of 24 hours (two tides) each month for the purpose of cleaning and repairs, this to be cumulative, that is, if not taken one month, two days may be taken the following month, and so on; 24 hours' warning of the tug's intention to stop to be given by written notice, to be placed in the pilot-house. Vessels or shippers requiring the services of the tug should engage her during the tide previous to that on which she will be required, the services to be rendered according to the order of engagement. Should the tug attend after engagement for the purpose required, her services to be paid for at half the tariff for which purpose she was engaged, though the work should not be performed. On such tides as the tug makes default outside these rules, every endeavour will be made to supply her place. The tug does not undertake to visit every part of the port each tide, her movements being guided by her engagements. Towage must be paid immediately on the completion of work by the tug to the agent or master of tug, or, if required, previous to the tow-rope being taken on board. Signals for the steamers to be two flags at the main mast; and any vessel making such signal (the steamer in consequence proceeding to her assistanee), will be liable to the tonnage for towing from the Outward Buoy to Giant's Grave. The Harbour Commissioners will not be responsible for any damage that may happen to or be occasioned by any vessel or craft while in tow of their tugs; and, in accepting the services of the tugs, the owners and masters of such vessels agree to these conditions. All laden vessels (steam and sailing) above 80 tons register are to employ a steam tug through the temporary channel. **Officials.** Neath Harb. Master and Coll. of Harb. Dues, C. D. Godfrey, Esq.; Briton Ferry Dock Master, W. D. Griffiths.

NEWBURGH, Aberdeenshire. On the Ythan. A small harb. belonging to J. H. Udny, Esq., used for landing lime, manure, grain, and coals. **D.** at bar at

LW., 1 to 1½ft. **W.** prev. SE. A stone pier 390ft. A lifeboat station. **Officials.** Wilsone & Duffus, advocates Aberdeen.

NEWBURGH, Fifeshire. On the Tay. **T.** Sp. rise 14ft to 16ft; N. rise 11ft to 13ft. Steamers run to Dundee and Perth in summer. There is a 4-ton crane on E. Quay. **Ry.** N.B. **Charges.** Harb. dues 1d per reg. ton.

NEWCASTLE, Co. Down, Ireland. Dundrum Bay. **Auth.** Down County Council. **Tr.** I. Coal and cement; E. Granite and timber. Harbour is now being rebuilt. **Accn.** Area 1½ acres, dry at **LW.** South pier has now been rebuilt. Used formerly by vessels up to 200 tons **D.** 10 to 12ft at present state ST. **Charges.** Tonnage dues; Vessels arriving for loading or discharging cargo, 3d per reg. ton; less in weight than her reg. tonnage, only on the actual tonnage loaded or discharged, provided the min. dues are not less than ½d per reg. ton; vessels resorting to pier or harb. to lie up, or for shelter, ½d per ton per week or for any part of a week. Boat licences: All fishing and rowboats under 5 tons to pay a licence fee of 2/ per year or any part of a year; 5 tons and upwards, including boats not registered under the Merchant Shipping Act, 6d per ton for the whole or any part of a year; strange boats entering the harbour for shelter or windbound, 1/ for any period not exceeding 30 days. Quayage, per ton: Grain, potatoes, butter, or other agricultural produce, guano, manufactured manure, timber, dressed stone, and general merchandise not otherwise specified, 3d; coal and culm, 2d; turf, manure, sand, limestone, slates, and undressed stones, 1d; each horse or head of cattle, 2d; sheep or pig, ½d; fish, 2d in the £ on sale value. **Officials.** Co. Surveyor, J. Heron, C.E.; Harb. Master, Jas. Foland.

NEWCASTLE-UPON-TYNE, Northumberland. Lat. 55° 1′ N; long. 1° 25′ W. **Pop.** 214,803. **Auth.** Tyne Improvement Commrs., by Acts 1850 and subsequent; the N.E. Ry. own the Tyne Dock. **Tr.** I. Ales, wines, and spirits, box and bale goods, canvas, jute, hemp, clay, colonial produce and wheat, grain, provisions, glass, manufactured iron, lead, livestock, ore, stones, salt, slates, oils, tallow, skins, esparto grass, timber, &c.; E. Coals, chemicals, manures, cement, copper, manufactured iron, lead, paints, oils, tar, fire-bricks, fire-clay, &c. **Tides:**—

		Springs rise	Neaps rise
Tyne R. Entrance	3h 10m	14½ft	11ft
N. Shields	3h 10m	14½ft	11ft
Newcastle	3h 26m	15ft	11½ft

The channel of the river at the entrance to the harb. is dredged from time to time to a depth of about 30ft LWOST., but depth varies owing to silting, etc. **W.** The Commissioners keep a record of the direction of the wind; most dangerous are from NNE. to SSE. **LV.** *Tyne Dock*, "Irishman," 6,158 tons. No record is kept by the Commissioners of the dft. of vessels entering, or of the time of tide when they entered. **LV.** *Commissioners' Docks*, "Mount Royal," 6,896 tons. There are the following docks:—The *Albert Edward Dock*, used for I. and E. traffic. Water area about 22¼ acres

tidal basin about 2¾ acres, tidal entrance about 80ft wide at top and about 74ft 6in at bottom (the side walls being battered). Lock (available length about 345ft) about 60ft wide at top and about 53ft at bottom (the side walls being battered). The depth of water on the centre of the sills of the tidal entrance is about 30ft at HWOST. and about 25ft at HWNT., but owing to the bottom of the entrance being curved the depth is about 3ft 6in less at the foot of the side walls. The depth on the centre of the lock and on its outer sill is about 21ft at LWOST. and about 3ft less at the foot of the side walls. The depth of the inner sill of the lock is 6ft less, being the same as that on the tidal entrance sills. Vessels about 300ft long over all and drawing about 19ft can be locked in at **L.W.** The *Northumberland Dock*, containing 10 coal shipping staiths situated about 1,200 yards south-west of the Albert Edward Dock entrance, is used for general I. and E. traffic, and well provided with steam cranes. Water area, about 50 acres; tidal basin about 2¼ acres; tidal entrance about 70ft wide at top and about 64ft wide at bottom (the side walls being curved). Lock (available length about 245ft) about 52ft wide at top and about 47ft wide at bottom (the side walls being curved). The depth of water on the centre of the sills of the tidal and lock entrances is about 24ft at HWOST. and about 19ft at HWNT., but owing to the bottoms of the entrances being curved the depths are respectively about 2ft and 5ft less at the foot of the side walls. On the north side of the dock there are jetties with a wharf behind 450ft long by 100ft broad. At the Commissioners' Whitehall Point Coal Staiths in the river between Albert Edward and Northumberland Docks, large vessels requiring to load coal and coke without entering the docks can take in full cargoes and proceed direct to sea. These docks and staiths are in direct communication by rail with the coalfields of Northumberland and Durham, and with all parts of the kingdom. The Docks Estate of the Commissioners includes a considerable area of storage ground for timber, deals, ores, and other undamageable goods. Opposite Northumberland Dock there are timber ponds covering an area of 76 acres, with direct access from the river. *Tyne Dock* (belonging to the N.E. Ry. Co.) is on the S. side of the river, opposite the Northumberland Dock, and in the county of Durham. Water area, dock 50 acres, tidal basin 10 acres. There are three entrances to this Dock; on the sill of one there is from 27ft to 33ft water. Four coal jetties equipped with 37 spouts and 5 electric conveyers for the shipment of coal and coke. Warehouse accom. for 100,000 qrs. of grain, and also for general goods. Ample accom. for storage of timber. Quays are supplied with hydraulic, electric and steam cranes for gen. merchandise; and a 30-ton electric crane. Quays—The quays at Newcastle-upon-Tyne are owned by the Corporation. Length, from the east side of the Swing Bridge to the west side of the Ouseburn, 4,700ft; on the east side of the Ouseburn there is a further length of 480ft of quayage. Deep water berths up to 25ft at LWOST. There are several single and double storey sheds, electrically illuminated, with spacious accom. Steam, electric

and hydraulic travelling cranes, lifting up to 7 tons; and a fixed hydraulic crane lifting up to 65 tons are provided. Ry. facilities for loading direct from vessel into truck, or *vice versâ*, extend the whole length of the quay. The St. Lawrence Cattle Sanatorium at St. Peters has plenty of shed accom., and river frontage with quay 390ft long. *Dunston Staiths*, owned by the N.E. Ry. Co., are situated on the south side of the river, about one mile west of the High Level Bridge. There are six loading berths, each with two spouts. The staiths are fitted with electric belts, and at the highest loading berth coal can be shipped into boats 44ft above HWOST. and 59ft above LWOST. Depth at North Staith and river, 25ft LWOST; at South Staiths and Tidal Basin, 21ft LWOST. **Rys.** N.E. and N.B. Direct communication with all the railway systems of the country. The following is a list of Dry Docks and Slipways on the River Tyne:—

Charges. (Newcastle-upon-Tyne, North Shields, and South Shields). River dues on shipping. Piers rate, ¼d to 2d per reg. ton. Moorings rate, ¼d per reg. ton. River tonnage rate, 1½d and 3d per reg. ton. Dues on vessels not breaking bulk, 1½d per reg. ton. Use of Commissioners' moorings in river for loading or discharging cargo or fuel or ballast 1d & 2d per reg. ton. Newcastle-upon-Tyne Bridge dues, 1d and 2d per reg. ton. Export dues on coal, 1¼d ton. River dues on goods shipped or unshipped. *Northumberland and Albert Edward Docks :* Dock dues, inwards, 2d to 1/ per reg. ton ; outwards, 2d to 6d per reg. ton. Rates on goods. Wharfage on goods. Tyne Harbour Lights, Buoys, and Beacons dues : Lights from 11d to 1/5, according to size ; Buoys and Beacons 4d to 1/3, according to size. *Tyne Dock :* Dock dues, inwards, 2d to 1/ ton ; outwards 2d to 6d ton. Wharfage on goods. Dues on goods and cattle. Charges for assistance in moving ships and dock police. Special rates for grain and flour, payable to Corporation, as are also the cranage charges and package dues. Payable at Customs : Fairway buoys, each vessel proceeding N. 1/ (to Trinity House). Lifeboat 1/ to 3/, according to size.

Pilotage. NC. For the purposes of the following tariff the River Tyne is divided into four sections, viz. :—(1) From sea to and bounded by an imaginary line drawn from Jarrow Quay Corner to the western boundary of the Northumberland Dock. (2) From the last-mentioned imaginary line to and bounded by an imaginary line drawn from Bill Point due south-east true to the South Shore. (3) From the last-mentioned imaginary line up to and bounded by the east side of Newcastle Swing Bridge. (4) From the east side of Newcastle Swing Bridge westwards so as to include the

remaining navigable portion of the river. **Rates** per foot of draught :—

	April 1 to Sept. 30. s. d.	Oct. 1 to March 31. s. d.
Sea to Section 1 or the reverse	1 3	1 6
Sea to Section 2 or the reverse	2 0	2 3
Sea to Section 3 or the reverse	2 6	2 9
Sea to Section 4 or the reverse	3 0	3 3
From Section 1 to Section 2 or the reverse	1 0	1 0
From Section 1 to Section 3 or the reverse	1 6	1 6
From Section 1 to Section 4 or the reverse	2 0	2 0
From Section 2 to Section 3 or the reverse	1 0	1 0
From Section 2 to Section 4 or the reverse	1 6	1 6
From Section 3 to Section 4 or the reverse	1 0	1 0

The above rates apply to cases where vessels are piloted from any part of one section into any part of another section, and any part of a ft not greater than half a ft will be charged as half a ft, and if more than half a ft will be charged as a ft. Vessels exceeding 500 tons net reg. shall in addition pay ¼d per ton on the excess of tonnage above 500 tons up to 4,000 tons net reg., and one eighth of one penny in respect of all tonnage between 4,000 and 5,000 tons net reg., and one-sixteenth of one penny in respect of all tonnage above 5,000 tons net reg. for pilotage from sea to any part of Section 1 or the reverse, and ¼d per ton extra on the excess of tonnage above 600 tons up to 4,000 tons net reg. and one-eighth of one penny extra in respect of all tonnage between 4,000 and 5,000 tons net reg., and one-sixteenth of one penny extra in respect of all tonnage above 5,000 tons net reg. for pilotage from Section 1 to any part of the river west of Section 1 or the reverse, but in no case shall this extra tonnage rate be paid more than once inwards and once outwards on each occasion of a vessel entering and leaving the port. The pilot first in charge of a vessel inward or outward bound shall be entitled to the benefit of this bye-law although such vessel does not on the first occasion of pilotage reach her final destination inwards or proceed to sea. Vessels having lee-boards pay 5/ in addition to the above rates. In the case of vessels bound from or to sea from or to any of the docks and unable from any cause to enter or proceed to sea the same tide, pilots must, if required, attend the following tide to dock such vessels, or take them to sea, as the case may require, without any additional remuneration. For docking or transporting (not covered by the above) from tier to dock or from dock to tier, not ex. 200 reg. tons, 5/ ; 400, 7/6 ; 600, 10/ ; 800, 12/6 ; 1,000, 15/ ; ex. 1,000 tons, for every 100 tons 1/ extra. In the case of vessels exceeding 400 tons, two-thirds of the above rates are charged for moving vessels from tier to tier or from tier to any dry dock within 300 yards. For pilot's attendance in harb., when required on any vessels, when not ultimately engaged as pilot to such vessel, per day 7/6 ; for attending at the launch of any vessel in the River Tyne and conducting her to her mooring in dock or otherwise,

not ex. 400 reg. tons 20/; 600, 25/; 800, 30/; 1,000, 32/6; 1,500, 35/; 2,000, 40/; ex. 2,000, 45/. **Towage.** The limits seaward, Souter Point S., Hartley Bates N., on the E. an imaginary line drawn three miles out to sea from the shore, and on the W. a line drawn southward across the river from the buoy on the Mussel Scarp, Low Lights, North Shields. Shields Harb. deemed to extend from the buoy on the Mussel Scarp to J. Young's West Dock Quay, South Shields. For the purposes of these rates, a ship one-third loaded pays the loaded towage, below one-third to pay the light towage. Vessels towing down the river and going into either dock pay the same as if going to Shields. All vessels towing down the river and going to sea direct, pay the river towage and half the sea towage. Fish-boats from Shields to Newcastle 15/; from Newcastle to Shields 12/; from Shields to sea 8/. Ships towed from sea to either dock direct—loaded $1\frac{7}{8}$d; light $1\frac{3}{4}$d, with a single boat. Ships towed out of the docks into the basin, or out of the basin into the dock, pay the shifting towage. But ships towed out of the river into the basin, or *vice versâ*, to pay for one station. An addition of twopence to the shilling to be charged upon the rates from sea to Shields, or from sea to either dock, direct. The river is divided into six stations, making Shields one starting point, Newcastle the other :—1st station, from Shields to either dock, Jarrow, or Willington Gut; 2nd station, from Shields to Hebburn and Wallsend; 3rd station, from Shields to Walker or Pelaw Main; 4th station, from Shields to Bill Quay or Felling; 5th station, from Shields to Dent's Hole or Tyne Main; 6th station, from Shields to Newcastle. Screw steamers, light, whether steaming or not, same as ships; loaded, steaming, to be allowed one-fourth off the regular rates; not steaming, same as ships. **Towage Rates** within the limits at sea into Shields Harb., and to either dock, and from either dock to sea, or a single station, for vessels below 150 tons :—

	From Sea to Shields, or Shields to Sea.				Sea to Dock or Dock to Sea.				Shields to Dock, Dock to Dock, or a single Station.

McCabe; Lloyd's Agent, G. Luckley.

NEW GRIMSBY.—See Scilly.

NEW HOLLAND.—See Grimsby.

NEWHAVEN, Edinburghshire.—See Leith.

NEWHAVEN, Sussex. On the NW. extremity of Seaford Bay, at the mouth of the River Ouse. Lat. 50° 46′ 55″ N ; long. 0° 3′ 40″ E. **Pop.** 7,500. **Auth** Newhaven Harb. Company, under Acts 10 Vict., c. 9, and 26 and 27 Vict., c. 184. **Tr.** I. Silks, wines, spirits, coal, timber corn, &c.; E. General merchandise. **THW.** 11 h 14m f. and c. **W.** prev. from SW. and SSW. **D. at En.** 10ft LWOS. Sp. rise 19ft; N. rise 14ft. **LV.** during the last 20 years s.s. *Rosefield*, 1,959 tons reg. ; steamers of 1,500 tons trading regularly. **Accn.** The area inside the entrance piers is about 30 statute acres, or a total length below bridge of 1,400yds, and an average width of 325ft. The entrance channel and the lower half, or Southern Quay, below the Customs Watch-house is 10ft deep at **LW.**, and the upper half, or Old Quay, above the Customs Watch-house 4ft deep at **LW.** There is a New Quay above the Town Bridge, the Northern Quay,

1,000ft long with a depth of 7ft LWOS. fitted with steam cranes and lighted by electricity. The harb. is formed by two piers, the East 1,400ft long, and the West 750ft long. **W. of E.** 280ft. The entrance is formed by two piers, the eastern extends 800ft further to sea than the western one, and by a breakwater, which commences 1,500ft W. of the West Pier, and extends 1,400ft further to sea than the East Pier. A lighthouse on each pier and on breakwater end. Tidal signals on the West Pier. A reed foghorn on the extremity of the Breakwater gives a blast every 30 seconds in thick or foggy weather. The depths have been made throughout the harb., but dredging is continually carried out to keep the depth in the channel, and to ensure safe berthing accom. The total length of quays inside the harb. is 1,400 yds. The Harb. Co. have purchased the lands on each side of the harb., and extending along the foreshore for 2,666yds, comprising about 228 statute acres, this large area being to a great extent available for future extension of docks, quays, &c. On the W. side of the harb. are a series of landing stages, used principally by sailing vessels in the local and coasting trade, where vessels are partly waterborne on soft mud. Shearlegs 111ft high, to lift 25 tons, and a hydraulic crane to lift 15 tons. Whole of quay supplied with steam and hydraulic cranes, and lighted by electricity. Two gridirons, 100 and 280ft long. Good accom. for coaling, ballasting, repairing, &c. A lifeboat station. Metl. storm-signals near Town Bridge. **Ry.** L.B. & S.C. **Charges.** (1) All vessels entering, using, or departing from the harb.; coasting vessels (of whatever tonnage), 3d; other vessels of 150 tons and under 3d; other vessels above 150 and not exceeding 250 tons 4d; other vessels above 250 tons 6d per reg. ton. (2) All vessels permitted to enter the harb. for safety on payment of one-half of the rates, but they if remain in the harb. or the dock beyond twenty-one days, or shall take goods on board (stores for their own use excepted) or break bulk, they shall be liable in the full rates. (3) All vessels remaining in the harb. in working berths to pay after one month 2d per reg. ton per month in advance when they are lying in the harb. (4) All vessels with fish of any kind for curing, per ton reg. or admeasurement, 2d each ton. (5) All fishing-boats entering the harb. with fresh fish, 4d each. Exemptions: (1) Vessels on which the rates in respect of the dock have been paid shall not be liable to any additional rates for entering, using, or departing from the harb. (2) All vessels leaving the harb. for the purpose of taking on board ballast in and returning to the harb. with ballast shall not be liable in rates for such return. (3) All vessels arriving and departing in ballast shall be subject only in half rates, but if such vessels after arriving in ballast shall take in cargoes or parts of cargoes before their departure they shall be liable in full rates. **Pilotage.** C. **District:** From Dungeness westward to Brighthelmstone (inclusive), and from Brighthelmstone (inclusive) to Dungeness. **Rates** (inwards and outwards). Coast pilotage from Dungeness to the west end of the Owers:—

7ft water and under	£2	16	6	16ft	£6	15	0
7 to 10	4	4	6	17	7	2	0

14	5	18	0	21	12	15	0
15	6	6	0	Above 21	13	10	0

Harb. pilotage, 8ft dft. and under, 1/6 ; above 8ft and not ex. 10ft, 1/9 ; above 10ft and not ex. 12ft, 2/6 ; above 12ft and not ex. 14ft, 3/ ; above 14ft and not ex. 16ft, 3/6 ; 16ft and upwards, 4/ foot. The rates above specified are subject to a reduction of 25% in respect of steamers and vessels towed by steam vessels, provided that if such vessels be towed by steam vessel for part only of distance for which rate may be payable the reduction shall be made for that part only. Pilotage for the beaches of Brighthelmstone, Hastings, or Bexhill : 8ft and under 1/3 ; 8 to 10ft, 1/9 ; above 10ft 2/ foot. Ships in distress pay according to circumstances. **Towage.** All vessels, except yachts and fishing smacks, under 60 tons, in or out, 12/6 ; over 60 tons, in or out only, 2½d per ton ; over 100 tons, in and out, 4d ; yachts under 70 tons, in or out, 10/ ; over 70 tons, 20/ ; fishing smacks, in or out, 5/ ; for getting up steam specially, 10/ extra ; to order and then not used, 15/ ; towage beyond harb. limits by agreement. The above rates are for towing from any part of harb. from north end of North Quay to such distance seawards as opens Beachy Head. If towed a greater offing extra will be charged. Vessels find their own tow ropes, but vessels not having any and using those belonging to tug charged 7/6 extra. All accounts to be paid at the Harb. Office (west side of river). The Harb. Co. will not be responsible for any damage occurring to or occasioned by vessels while in tow of their steam tugs. Harb. Co.'s tugs have white funnels with black tops. **Officials.** Harb. Master and Coll. Harb. Dues, Capt. Wm. Morris ; Assist. Harb. Master, A. F. Larkin ; Berthing Master, D. H. White ; Gen. Man., Wm. Forbes ; Sec., J. J. Brewer, L.B. & S.C. ; Engineer, C. L. Morgan ; Coll. of H.M. Cust., A. H. Dromgoole; Port Medical Officer, Dr. R. Parkhurst ; Lloyd's Agent, F. J. Thyer.

NEWLYN, Cornwall. Mount's Bay. Lat. 50° 5′ N ; long. 5° 30′ W. **Pop.** 6,000. **Auth.** Pier and Harbour Commission, under Newlyn Pier and Harbour Orders 1906 and 1910. **Tr.** I. Coal, ice, salt, grain, fish, &c. ; E. Broken stone, granite, clay, fish. **THW.** 4h 30m f. and c. **LV.** 1,500 tons burden. **Accn.** 500 sail. **W. of E.** 150ft. **LW.** 11ft 6in ; NT. 19ft; AST. 27ft pier heads. R. of N. from 8 to 10ft. **En.** NE. direction. First-class tidal harb. Area, 32 acres, **HW.,** 14 acres **LW. ;** average depth for berthing along pier 16ft NT. for discharging. Vessels entering at low water should keep close to North Pier. Good layer. South Pier. Average depth for loading, 13ft at LWOT. **Charges.** Harb. dues on ships, 2d per reg. ton coastwise ; windbound ships, 1½d per reg. ton. **Pilotage.** Trinity pilot, same as Penzance. **Officials.** Harb. Master, R. H. Kelynack ; Sec., H. H. Pezzack.

NEWPORT, Pembrokeshire, a small creek about 6 miles ENE. of Fishguard.

NEWPORT, Fifeshire. Lat. 56° 26′ N; long. 2° 57′ W. On the Firth of Tay, within the limits of Dundee Harb.

NEWPORT, I. of Wight. Vessels drawing up to 8ft 6in AST. get up to the quays. **THW.** f. and c. 11 55m. **Charges.** No harbour dues. Loading and unloading, coal and coke, 3½d, timber 4d, general 1/ to 1/8 per ton. **Auth.** Corporation. **Accn.** 2 cranes, 8 and 6 tons. **Officials.** Town Clerk, T. Ross Pratt; Quay Supt., F. Williams; Coll. of Dues, A. Chappell.

NEWPORT, Mayo. Lat. 53° 53′ N; long. 9° 30′ W. Owned by Mrs. M. A. J. O'Donel, of Newport. No vessels can enter at **LW.** Used by craft up to 160 tons. **W.** prev. and most dang. W. and SW. **D.** at quay 12ft ST. and 8ft NT. **Official.** Martin Garey.

NEWPORT, Monmouthshire. Lat. 51° 30′ N; long. 3° 0′ W. **Pop.** 83,000. **Auth.** Of the Dock Alexandra (Newport and S. Wales), Docks & Ry. Co.; of the Harb., the Harbour Commissioners, under Acts 6 Will. IV., c. 46; and 32 and 33 Vict., c. 118. **Tr.** I. Iron ore, pig iron, steel bars, timber, pitwood, sleepers, &c.; E. Coal, coke, bark, manufactured iron, tinplates, &c. **THW.** f. and c. 7h 10m; Sp. rise 38ft; N. rise 29ft. **W.** prev. SW. **LV.** *Ascania*, s.s., 5,699 tons. **Accn.** *Alexandra South Dock*, 1,500ft long, 640ft wide, entrance lock, length 503ft, width 72ft, area 20 acres, depth of water, AST. 35ft, ANT. 25ft. *Alexandra Dock Extension*, length 4,000ft, breadth 1,000ft, water area 76 acres. *Alexandra North Dock*, length 2,500ft, breadth 500ft, width of trumpet-mouthed entrance 300ft, entrance lock length 350ft, entrance lock width 65ft, depth of water over sills 30ft, AST. 35ft, ANT. 25ft, area 28¾ acres. *New Lock Entrance*, length, 1,000ft, breadth 100ft, giving access to *Alexandra South Dock Extension* from Bristol Channel, divided into two compartments, 600ft and 400ft in length respectively, the latter opening to the sea. *Town Dock:* Length 1,753ft, width 300ft, entrance lock, length 220ft, width 61ft, depth of water over outer sills AST. 31ft, ANT. 20ft, area 11½ acres. *Alexandra Commercial Graving Dock:* This dock is entered from the main wet dock, thus effecting a large saving of time, charges, and labour. Timber float: Area of water for stowage of timber in bulk 14 acres, average depth of water 8ft. The float is provided with ample siding accom. 22 hydraulic hoists, 37 movable and 6 fixed hydraulic cranes and 6 travelling steam cranes at Docks. Four coaling jetties on River Usk, also new wharf, 403ft long, with four 2½-ton cranes, owned by Alexandra Docks and Ry. Co. **Rys.** G.W., L. & N.W., M., Alex. Docks & Ry., and B. & M.

The Alexandra Dock and Rly. Co. own a Commercial Dry Dock, 523ft long and 74ft wide, directly connected with the Alexandra North Dock by an entrance 49ft wide, with a

depth of water on sill of 20ft. The fact that the Dry Dock is entered from the Floating Dock is the means of effecting a large saving in time, charges and labour. Owners can choose their own ship repairers to carry out repairs. There are also six private dry docks, the dimensions of which are as follows:—

Name	Length.	Width of Entrance.	Depth over sill OHW.	Owners.
	ft.	ft.	ft.	
Channel	785	65	28	Cardiff Chan. Dry Dock & Pontoon Co., Ld.
Eastern	360	57	24	Mordey, Carney & Co., Ld.
Mary	350	60	27	Do.
Alice	289	46½	25	Do.
Edith	220	36	19	Do.
Tredegar	712	65	28	Tredegar Dry Dk. & Wf. Co., Ld.

All these docks are entered from the river. In addition, there is a Gridiron 246ft by 27ft, suitable for small vessels, on the river, owned by the Harbour Commissioners.

NEWRY, Co. Down. At the head of Carlingford Bay. Lat. 54° 10′ N; long. 6° 16′ W. **Pop.** 15,500. **Auth.** Newry Port and Harbour Trust. **Tr.** I. Coal, iron, grain, timber, &c.; E. Linen, agricultural produce, granite, &c. **THW.** f. and c. at Needham Bridge 11h 43m; Sp. rise 6ft

10in. There is a channel cut through the bar 400ft wide, with a depth at LWST. of 15ft. **W.** prev. and most dangerous SE. **LV.** s.s. *Burgundy*, 2,169 reg. tons. **Accn.** is a navigable river from Warrenpoint to the sea lock at Fathom, where vessels of 3,000 tons can lie afloat in Victoria Basin, near entrance to Ship Canal; a ship canal from Fathom to Newry and a quayage through Newry for vessels drawing 10½ft, and an inland canal from Newry to Portadown. Entire length of navigation about 46 miles. The area of docks is 9 acres. There are also berths along the sides of the canal through the town of Newry for vessels drawing 9 and 10ft; the length of canal is 3,250ft. The quayage is 3,740ft, including 870ft round Ballast Bank for vessels up to 12½ft dft., and the quayage along canal for vessels up to 10ft dft. is about 3,250ft on each side. The navigation depends on a tidal river, in which there is a depth of 7ft at LWST. Vessels drawing up to 15½ft can enter at **HW.** to sea lock, but can only enter old part of canal and dock (Albert Basin) drawing 12½ft. Lock is 220ft long, 50ft wide, and 17ft deep over upper sill. **Rys.** G.N. (I.), D.N. & G. **Charges.** Harb. dues: Steamers, 1/1; sailers, 7d reg. ton; cargoes dues as per schedule. **Pilotage.** NC. **District:** From Lough Carlingford to the entrance to the Newry Canal, or river of Newry. **Rates.** River pilotage, per foot draught. **Towage.** As per agreement. **Officials.** Sec., Geo. R. Armstrong; Harb. Master, J. McVeigh; Coll. of H.M. Cust., J. Dawson.

NEYLAND (formerly New Milford), Pembrokeshire. Seaport town, on creek of Neyland Pill, opposite Pembroke Dock, 4 miles E. of Milford. Barn Lake Pill has been dredged out by the G.W. Ry. Co., and forms a well-sheltered and secure harb. with 13ft at LWST. The wharves and jetties are provided with hydraulic cranes. One hand crane of 10 tons' capacity. Neyland can boast of the finest gridiron in the United Kingdom. The pontoons and stages remain, but are no longer used for Irish traffic. **Pilotage. District:** From Caldy Island, along the Coast to St. David's Head, and thence to Cardigan Island, and *vice versâ*. **Rates** per foot. From a line drawn from St Anne's Point to Sheep's Island, to any part of the harb. below a line drawn from Newton Noyes Point to Martin's Haven, under 14ft, 2/6; 14ft and upwards, 3/6; from a line drawn from St. Anne's Point to Sheep's Island, or from Hubberston Road, to any place above a line drawn from Newton Noyes Point, to Martin's Haven, in addition, under 14ft, 2/; 14ft and upwards, 2/6. Vessels inward-bound not boarded until they have passed a line drawn from Rat Island to Watwick Point pay one-fourth less than these rates, and if not boarded until they have passed a line drawn from Thorn Island to Great Castle Head one-half only of these rates; and if not boarded until they have passed the Stack Rock to a line to Newton Noyes Point to Martin's Haven, they are not chargeable with any pilotage, unless the masters require pilotage assistance. Additional rate for ships boarded without the entrance of the harb.; From a line drawn from Linney Head to Skokam Island 2/;

if to the southward of St. Gowan's Head to Skokam Island 1/ foot; or from Caldy Island, eastward, or from the westward of the Grassholm, or 3 leagues without Linney Head, £3 3/; six leagues without Linney Head, £4 4/; ten leagues, £6 6/. For services in harb., not exceeding the following rates: For a boat carrying an anchor above 6 cwt with a hawser, if in Hubberston Road, £2 2/; each man in the boat each tide 5/; if below Hubberston Road, a line drawn from the E. Point of Gilliswick to the E. Point of Angle Bay, and above the Stack Rock, £2 12/6; each man each tide, 5/; if in Dale Road and the anchor is brought from Milford, £4 14/; or if carried off from Dale, £2 12/6; each man each tide, 5/. For a boat carrying off an anchor 3 cwt., and not ex. 6 cwt, with a hawser, the boat and men to have three-fourths of the above sums. For a boat with an anchor 2 cwt and not ex. 3 cwt, with a hawser, the boat and men to have one-half of the above sums. For unmooring a ship drawing 14ft of water, and upwards, and bringing her alongside the quay, or into Hubberston Pill, from the situation first or second mentioned, for the pilot, 21/; if with a boat, an additional sum of 10/6; each person employed, 5/. From the Third Station specified, for the pilot, 31/6; if with a boat, an additional sum of 10/6; each person employed, 5/. Ships under 14ft dft. of water, to or from the situations before-mentioned, three-fourths of the sums for the pilot; boats and men as above. Steamers (foreign-going) putting in for coals pay in and out the rate for in only. There is a reduction of 1/4 off all rates for vessels towed by steam or steamers. For new mooring a ship drawing 14ft in either of the above situations, for the pilot, 10/6; if with a boat, an additional sum not ex. 10/6; each person employed not ex. 5/. **Towage.** As per agreement. **Official.** G.W.R. Stationmaster, W. Davies.

NOB, River Exe, Devon. Eight miles from Exeter. **Accn.** Anchorage for vessels discharging phosphate rock, and loading clinkers, manure, etc.

NORTH BERWICK.—See Berwick, North.

NORTH SHIELDS. (See Newcastle, and South Shields.) Lat. 55° 0′ 30″ N; long. 1° 26′ W. **Auth.** Tyne Commrs. **Tr.** I. and E. PIEL.—See Barrow-in-Furness. **THW.** at f. and c. 11h 5m.

PITTENWEEM, Fifeshire, Firth of Forth. Lat. 56° 13′ N; long. 2° 43′ 30″ W. **Auth.** Town Council, under old Charter confirmed by Act of Charles I. and the Estates of the Parliament of Scotland, 28th June, 1633, and Harb. Order, 1881. **Tr.** I. and E. Barrel staves, potatoes, fresh fish and herrings. **Accn.** Two basins and an outer harbour; depth about 10ft **HW,** dry at **LW. W.** prev. E. and S.E. **Ry.** N.B. **Charges.** Various on fishing boats. Vessels of 100 to 150 t.r., 4½d per ton; over 150, 6d. Schedule of dues on goods; herrings, fresh, 2½d, cured 1½d per cran. **Official.** Harb. Master, R. Forbes.

PLYMOUTH, Devonshire. On Plymouth Sound, between the estuaries of the Rivers Plym and Tamar. Lat. 50° 22′ N; long. 4° 9′ W. **Pop.** with Devonport and Stonehouse about 200,000. **Tr.** I. Grain, timber, manures and provisions; E. China clay. **THW.** f. and c. at Breakwater 5h 37m; Sp. rise 15½ft; N. rise 11½ft. There is no bar at the entrance; depth in anchorage, average 30ft at **LW. W.** prev. S. and SW. **Accn.** There are three mercantile harbs. at Plymouth, viz.:—*Cattewater*, *Sutton*, and the *G.W. Docks*.

Cattewater Harb. (**Auth.** Harb. Commrs.) is formed by the mouth of the River Plym, and has an area of about 200 acres. Anchorage for large ships afloat at **LW. LV.** 5,500 tons, LWST. There are about 2,200ft of quayage space around the harb. There are two wharves on N. side with 24ft and 22ft at LWST, belonging to Messrs. Burnard & Alger, where oil and motor spirit is loaded and discharged; total length, 660ft; min. depth, 24ft at LWOST. There are four large mooring buoys in 18 to 24ft LWOST, owned by the Cattewater Harbour Commissioners. Three hydraulic cranes lifting 30 cwt each, owned by Messrs Burnard & Alger; height of jib from wharf, 60ft; radius 33ft; speed of grain discharge, 60 tons per hour. Ample fire-proof warehouses; accn. for nitrate of soda, grain, guano, &c. L. & S.W. and G.W. Ry. on wharves. Victoria Wharves and Pier, situated on the N. side of Cattewater Harbour, have a wharfage of about 900ft with 27ft of

water LWOST., about 250ft with 17ft of water LWOST., and about 400ft with 4ft of water LWOST. Stores built and building with a capacity of nearly 2,000,000 cub. ft. Several steam cranes to deal with anything up to a 10 ton lift. Coal hoists are provided. On the S. side of the harb. are the Turnchapel Wharves, the property of the Admiralty, over 300ft. with 25ft. LWOST alongside, and connected with L. & S. W. Ry.

Sutton Harb. (**Auth.** Sutton Harb. Impt. Co.) is entered from Cattewater Harb., about one-third up its entrance on N. side. The entrance to it is between two piers, 100ft apart; depth at HWOST. 22ft. It has about 4,500ft of quayage. A new quay has been built, with 22ft at HWOST. and 480ft long, with 4 rapid steam loco. cranes lifting up to 10 tons. **LV.** s.s. *Surf* over 2,000 tons burden. There is a new fish market quay, 400ft long, with deep water. **W.** prev. W. are from SE. to SW.; but the harb., being well sheltered, is at all times free from danger.

Great Western Docks (**Auth.** G.W. Ry .Co.), at Mill Bay, consist of an outer basin of 35 acres area, protected by a pier from the E. point of entrance, and a short jetty on the west; within this is a pontoon pier, the Trinity pier, and an ocean mail and passenger landing pier, the water alongside being 20ft LWOST. The Co.'s tugs are always available for towage. Liners are met in the Sound by G.W. Ry. tenders, which convey passengers, mails and specie ashore, where waiting-rooms and baggage warehouses for customs examination are provided. Depth from 12ft to 40ft at HWOST, and 8ft to 36ft at HWNT. On the W. side of Mill Bay is a wharf 800ft long, alongside which vessels of 24ft dft. can lie afloat. The Inner Basin, or wet dock, has an entrance 80ft wide, is 1,200ft long, 500ft wide, and a depth of 22ft at HWOST., 18ft at ONT.; area 13 acres. **LV.** at LWOST., s.s. *Staffordshire*, 3,818 tons net, 5,951 gross. There is about 7,000ft of quayage space, 4½ miles of railway sidings, connected with G.W. Ry., and extensive warehouses and sheds, for storage of any cargo. Hydraulic and steam cranes, capstans, and hoists up to 25 tons at docks.

The Harb. of *Hamoaze* is reserved for H.M. ships. Dry Docks, &c.:—

Charges. Rates on vessels per reg. ton arriving from and departing to a foreign port with cargo or ballast, in 4d, out 2d ; arriving from a foreign port with cargo, and departing for any coasting port in ballast or light, in 4d, out 1d ; engaged in coasting trade, arriving from and departing to a coasting port with or without cargo (one calendar month allowed), in or out 1½d ; river craft, loading or discharging cargo (one calendar month allowed), in or out, ¾d (1d per reg. ton per month, or part of a month, after the first month, will be charged in addition to above rates on all vessels) ; river craft, without loading or discharging cargo, in or out ½d ; new vessels fitted out, or other vessels brought into harb. for repairs, payable by shipbuilder (one calendar month), sailing vessel 2d, steam vessel 3d, for every week or part of a week thereafter ½d ; payable by owner—sailing or steam vessel leaving without ballast or cargo, or taking not more than one-fourth of reg. tonnage of ballast or cargo 2d ; taking more than one-fourth but not exceeding one-half reg. tonnage of ballast or cargo 4d ; more than one-half of tonnage of ballast or cargo 6d. If any vessel loads more than half her reg. tonnage of cargo, the rate payable by the shipbuilder will be reduced to one-half, the number of dates for such rates being fixed by the date on which written notice is given to the Harb. Master that the vessel is to load more than half cargo. A vessel brought to the graving dock for repairs is allowed 12 working days in the harb. free of dues, but if such vessel discharges or loads cargo, the ordinary dues are charged ; bunker coals are charged as cargo. A vessel brought to the harb. and repaired there by any other person than the lessees of the graving dock, although afterwards docked, is charged the same rates as new vessels, and will not be allowed the 12 working days granted to a vessel brought to the dock for repairs by the lessees. Loading part cargo and going to another home port to complete loading for a foreign port, will be charged "foreign rates," and cargo loaded in any such vessel

for a foreign port will also be charged " foreign rates." New steamers finishing or fitting out, or brought to harb. or to graving dock for repair, or lying up, and taking bunker coals on board before leaving the harb., the same dues as for taking coals as cargo. Steamers or other river craft coming to the harb. to lie up, to be charged by special agreement. Mussel boats, each trip, 4d. The trustees will not be liable for any damage for overflow of tides or by fire or other casualties happening at the port or harb. or works or property of the trustees, nor will they be liable for any loss or damage which any vessel may sustain if she enters the harb. without the harb. master having assigned a berth for her. Steamers arriving with iron ore, pig iron, or limestone, to be forwarded to Glasgow, can arrange to pay Glasgow rates on vessel and cargo—the Harb. Trust paying the haulage of cargo to Glasgow. **Officials.** Sec., Andrew Paton; Harb. Master, W. McNab.

PORT GORDON, Banffshire, Moray Firth. **Auth.** Duke of Richmond and Gordon, under the Port Gordon Harb. Act, 1854, and Harb. Order 1911. **W.** prev. SSW. and most dang. N. and NE. **Accn.** Area 2 acres. Dry at LWST., and 10ft at HWST. **LV.** 121 tons. **Charges.** Harb. dues, 4d per reg. ton. **Officials.** Harb. Master, A. Hay.

PORTHCAWL, Glamorgan, Bristol Channel. Lat. 51° 28′ N. long. 3° 42′ W. This harbour is now closed.

PORTH DYNLLEYN, Carnarvonshire. Lat. 52° 55′ N; long. 4° 35′ W. **THW.** f. and c. 8h 30m. AST. 16ft. N. 9ft. **W.** prev. NW. affect the harb. A lifeboat station. **Charges.** Dues, ½d loaded, ¼d light on reg. ton. Hobbling boat per agreement. Discharging coal, 1½d per ton, ballast free. **Official.** Coll. of Dues, J. E. Jones.

PORTHGAIN HARBOUR. Midway between St. David's Head and Strumble Head, Pembrokeshire. **Auth.** United Stone Firms, Ltd. **Tr.** I. Coal, &c.; E. Bricks, granite, and macadam. Harb. is well sheltered from all winds, and has a straight entrance channel with deep water up to piers. **D. at En.** 15ft. springs; 10ft neaps. The mill, works and stock yards are adjacent to wharves. Two steam cranes. Vessels load alongside free at present. **Pilotage** (including dues) £1.

PORTHILLY, Cornwall. Fishing harb. on E. side of Padstow Haven.

PORTHLEVEN, Cornwall, situated in centre of Mount's Bay. **Auth.** The Porthleven Harbour and Dock Co., under Act 1869 and Harb. Order, 1883. **Tr.** I. Coals, timber, bricks, slates, limestone, manures, salt, grain, &c.; E. China clay and china stone. **Accn.** A pier harb., with jetties in outer basin. The inner basin is protected in stormy weather by balks of timber placed across the entrance, which is 28ft wide, and affords safe discharging berths for vessels up to about 500 tons burden. ST. 16ft to 12ft, NT. 10ft to 9ft on sill of dock, but no vessel drawing

more than 12ft should charter to discharge or load here. **Charges.** Harb. dues, 3d to 6d per ton reg., but 4d is the highest actually charged. **Pilotage.** 50 tons, 10/, and so in proportion to 30/ for 250 tons. **Towage.** As per agreement. Ballast from wharf, 6d per ton; dues, 3d; putting on board, 2/ for every 10 tons. **Officials.** Sec., F. Harvey; Harb. Master, R. S. James.

PORT ISAAC, Cornwall. Lat. 50° 36′ N; long. 4° 48′ W. A small port available for small craft only. **THW.** f. and c. 5h 24m. A lifeboat station.

PORTISHEAD.—See Bristol.

PORTKNOCKIE, Banffshire, Scotland. **Pop.** 1,800. **Auth.** Town Council, under Portknockie Harbour Order 1913. **Tr.** I. Coal, salt, fish; E. Herrings. A small harb. with new breakwater. Ry. G.N. (S.) **D. at En.** 16ft at **LW.** and the average rise is 12ft. There is a deep-water berth of 11ft NT. at **LW.** **LV.** 197 tons reg. **Charges.** Harb. dues, 3d per ton reg.; **Pilotage.** The same; ballast, 1/ per ton on quay; discharging ballast, as per agreement. Local light 1/ per vessel, water 1/. Harb. Master's fee. **Officials.** Harb. Master, J. Morris; Town Clerk, J. Archibald.

PORTLAND, Dorsetshire. Approximate position, lat. 50° 35′ N; long. 2° 25′ W.; is now constituted a dockyard port under Admiralty authority. **Tr.** I. Coal; E. Stone. **W.** prev. from SW. to NW. **THW.** f. and c. 7h 1m. Lighthouse at east entrance. **Ry.** L. & S.W. **Accn.** Harb. is formed by breakwater, with three entrances, and, with the exception of a restricted area (which is likely to become more so) lying to the westward of two beacons in line and to the southward of the torpedo factory pier, is reserved for Government purposes. No bars; easy of access for all vessels, but steamers seeking shelter from westerly gales would find more room and better shelter outside the breakwater in Weymouth Bay. Vessels should not attempt to enter at night without pilot, anchorage being generally occupied by Men of War. Castleton pier has depth of 6ft to 7ft at **LW.** on north side, with 4 cranes belonging to two stone companies. **Charges.** No harb. dues. **Pilotage.** (See Weymouth.) C. for Continental traffic. **Officials.** The Senior Naval Officer (*ex officio*) and the King's Harb. Master.

PORT LETHEN, Aberdeenshire. A small harb., dry at **LW.**

PORT LETHEN, Kincardineshire, near Gridleness. A small harb., dry at **LW.**

PORT LOGAN, Wigtownshire. **Auth.** Owner, K. McDouall of Logan. **W.** prev. and most dang. NW. The only harb. between the Mull of Galloway and Corsewall Pt. that fishing boats can make for. **Accn.** Area 2 acres. Dry at entrance **LW.** Harb. is so silted up that there is only accom. for one or two smacks at present time. **Charges.** Harb. dues at option of proprietor.

PORT McADAM.—See Gatehouse.

PORTMADOC, Carnarvonshire. Lat. 52° 53′ N ; long. 4° 25′ W. **Auth.** Owner, Mr. E. B. Davidson. (Agents, Breese, Jones & Cason, Portmadoc.) **Tr.** I. Timber, coal, limestone, flour, &c ; E. Slates. **THW.** f. and c. 7h 27m. ; ST. 14ft ; NT. 10ft. **Ry.** Cam. **Accn.** A small tidal harb. with quays on N. side 3,031ft, and on S. side 1,630ft. **D.** 13ft to 15ft at berths **HW.,** dry at **LW.** alongside. **Charges.** Harb. dues on all vessels taking in or discharging cargo, 3½d per reg. ton ; foreign, 4½d per reg. ton ; windbound, 1d per reg. ton for buoyage. Strangers may get a pilot at St. Tudwall's Roads by sending to Portmadoc, at a charge of 10/. Discharging ballast, 1/ per ton. **Pilotage.** C. In ballast in, 1½d per ton, loaded 2d per reg. ton ; foreign 1d extra. **Towage.** Loaded in ballast out, 6½d per ton ; loaded in and out, 7d. Foreign, 1d. extra. **Officials.** Harb. Master, R. J. Morris ; Rec. of Harb. Dues, R. J. Morris ; Coll. of Customs, E. V. Hayman.

PORTMAGEE, Valentia Island, Co. Kerry, Ireland. Harb. Master, J. Shanahan.

PORTMAHOMACK, Ross-shire. On Dornoch Frith, E. coast of Scotland. A small tidal harb. **Auth.** Trustees of late R. B. A. E. McLeod, of Cadboll. A pier 300ft long. Dry at **LW. ;** used by vessels drawing 10ft at **HW. Official.** Factor, W. G. Paterson.

PORTMORE, Island of Colonsay, Hebrides. A safe harb., with a sandy beach, but with numerous offlying rocks.

PORT MULGRAVE, Yorkshire, between Runswick Bay and Staithes, north of Whitby and Scarborough. **Auth.** Owners, Trustees of Easington Estate, leased to the Grinkle Park Mining Co. Used by Palmer's Shipbuilding and Iron Co. only, for shipment of ironstone to Jarrow. **D. of En.** 14ft HWST.

PORT NA HAVEN, Island of Islay. A shelter for fishing vessels. **Pier Auth.** Argyll County Council. Pier recently constructed.

PORT NA LONG, Oronsay, Hebrides. There is a narrow inlet on the W. side two-thirds of a mile long, with a sandy beach, where boats can find ample security.

PORT NESS, Isle of Lewis. **Auth.** Harb. Trustees under Port Ness Harb. Order, 1889. Now in hands of Judicial Factor.

PORTOBELLO. A seaport and watering-place 3 miles E. of Edinburgh. There is a pier belonging to the Galloway Steam Packet Co.

PORT ORIEL, Co. Louth, Ireland. **Accn.** There is a fishery pier at this place, 4 miles north of Drogheda Bar, about 300ft long. HWST. about 30ft and 15ft at **LW. ;** NT. 25ft ; good anchorage. Vessels of 240 sons have discharged here afloat at **LW.** There is a small

harbour inside the pier, where a few vessels drawing not more than 11ft come in and discharge, but it is dry at **LW.** **Pilotage.** By agreement. **Charges.** Harb. dues, 3d per reg. ton, and 1d per ton wharfage of ballast. **Official.** Harb. Con., P. Neacy.

PORTPATRICK, Wigtownshire, Scotland. Lat. 54° 50′ 20″ N. long. 5° 7′ 2″ W. No harb. authority. **THW.** f. and c. 11h 10m. **D. at En.,** 18ft; at berth 10ft. The port has become dilapidated, and trade is now almost nil. **Ry.** Cal.

PORT PENRHYN. Lat. 53° 13′ N; long. 4° 10′ W. A private port belonging to Lord Penrhyn. **Tr.** Shipping slates. Dry at **LW.** 17ft HWST. **Official.** W. D. Hobson, Agent to Lord Penrhyn.

PORT QUIN, N. Cornwall. A small cove available only for rowing boats.

PORTREATH, Cornwall. Lat. 50° 15′ N; long. 5° 17′ W. **Auth.** A. F. Basset, Esq., of Tehidy, Camborne; retained in own hands, and used for importing and exporting merchandise, chiefly coal and ores. **Accn.** A tidal port, dry at **LW.** No. 1. Dock, 195 × 105ft; No. 2 Dock, 279 × 95ft; No. 3 Dock, 180 × 160ft. **En.** 26ft wide. **D.** 17ft HWST.; 9ft 6in HWNT. There are two steam cranes **Ry.** G.W. **Charges.** Harb. dues, 6d per ton reg., which includes pilotage. **Officials.** Man. and Harb. Master, F. D. Bain.

PORTREE, Island of Skye. Lat. 57° 24′ N; long. 6° 7′ W. **THW.** 6h 28m. **Auth.** Owner, Lord Macdonald. **Tr.** I. From U.K. only, coal, salt, and general merchandise; E. Cattle and sheep. **Accn.** A spacious harb. with good anchorage and pier. Harb. being dredged to 20ft ST. and 12ft NT. at pier, and 30ft at entrance. **Charges.** 4d ton on goods discharged. Harb. dues, 4d reg. ton, 31 tons and upwards; 3d, 30 tons and under. **Official.** Harb. Master, H. J. Eagles.

PORTRUSH, Co. Antrim. **Auth.** Harb. Company under Act 7 and 8 Geo. IV., cap. 103. A harb. used by coasters and cross-channel passenger steamers. **Ry.** M. (N.C.I.) **D. at En.** 14ft. **LW.,** 17 to 18ft **HW.** **Charges.** Harb. dues, foreign sailing vessels 1/ reg. ton, steamers 6d, cross-channel 6d and 4½d respectively, windbound 3d. Steam crane 3d per ton discharging coals. **Pilotage.** C. **Officials.** Sec. and Man., D. MacLaughlin; Harb. Master, Thos. Martin.

PORTSEA.—See Portsmouth.

PORT ST. MARY.—See Isle of Man.

PORT SCALLOMEE, near Cape Wrath, Sutherlandshire. There is a quay at this place in 6ft **LW**

PORT SETON, Haddingtonshire, Firth of Forth near Cockenzie. **Auth.** Harb. Commrs. Chairman, the Earl of Wemyss. Clerk, Geo. Guild. **D.** HWST. 15½ft; HWNT. 10ft. Chiefly a fishing harb. **Charges.** 2d per

t.r. on vessels, 2d per ton on merchandise. Herring boats 15/ per fishing, yawls 7/6 per quarter.

PORT SKERRA, near Thurso, Caithness. A fishing station between Armadale Port and Sandside Harb. **Auth.** Harb. Commrs. under Sutherland Piers Order, 1892.

FORTSMOUTH, Hampshire. Lat. 50° 48′ N ; lcng. 1° 6′ ft W. **Pop.** 189,907. **Auth.** Lord Commissioners of the Admiralty ; the Portsmouth Corporation own the Camber and Flathouse Wharves, under Acts 2 and 3 Vict. 72, and 31 and 32 Vict. c. 128. **Tr.** I. Timber, coal, grain, guano, and Government stores ; E. Government stores, grain, &c. **THW.** Dockyard 11h 41m ; Sp. rise 12¾ft ; N. rise 10ft. **D.** of water 17ft HWST., 15ft HWNT. **W.** prev. From Form by Point to Preston Dock or *vice versâ*	6 0	8 0	9 0	10 0
From Nelson Buoy to Bog Hole or *vice versâ*	1 6	2 6	2 6	2 6

For every additional 500 tons or part thereof, 5 per cent. of the rates for 1,000 tons.

The additional rate, for intermediate portions of a foot in the draught, to be regulated as follows :—

For 3in and under, no addition ; for more than 3in and under 9in, the medium between the two rates ; for 9in and upwards, the rate for the next foot.

Certified pilots can be boarded from the steam pilot boat *Ethel*, usually moored between Nelson and Gut Gas buoy. If neither pilot nor tug boat can be hailed, or the weather be too boisterous to come to anchor off " Nelson," either Lune Deeps, Holyhead or Ramsey Bay can be entered for refuge, then communicate with Harb. Master, Preston. But the Corporation will not be responsible for any extra expense resulting to any vessel or its cargo from entering a port or place of refuge. **Towage.** For sailing vessels only, vessels taken from other tugs by special arrangement. From Nelson Buoy to Preston, or *vice versâ :* under 100 tons reg. 6d per ton : over 100 and under 200 tons reg. 5d per ton ; 200 tons reg. and over 4d per ton. From Lytham to dock, or *vice versâ*, 4d per reg. ton. Assisting steamers under own steam to or from dock, one tug, steamers up to 1,600 tons net reg., 1½d per ton, min. £5 ; use of tow rope 20/ ; two tugs, 2d per ton, min. charge, £8 ; tow ropes, 20/ each ; second mile to Preston or *vice versâ* 1d ; min. £3 ; tow rope 10/. Assisting from Preston to sea, 1d per net reg. ton, min. charge £4, tow rope 20/ ; from lock or basin to half-mile lamp, £3, tow rope 10/. Shifting in dock, under 1,000 tons net reg., £2; over 1,000 tons, £2 10/ each shift. Signal for Tug : Stop the ensign and hoist it at gaff end. If a tug with a vessel in tow requires further assistance to bring a ship into harb. (from heavy sea, accident, or other cause) an ensign must be hoisted " forward," and kept up till assistance arrives. If a ship is intended for dock, two flags are to be put on tug " forward " or on ship's gaff. All applications for the service of tugs to be made to the Harb. Master, giving 12 hours' notice. Tow Rope: Ships towing in and out of Preston

are recommended to take the tug's rope, as if a ship's rope parts whilst towing, double charge will be made for passing the tug's hawser on board. Tugs are not allowed under any circumstances to tow solely with wire hawsers; there must be a length of rope hawser attached, equal at least to one half the length of wire used. On the hiring of a steam tug for towing services, the master and the crew thereof become the servants of and identified with the ship and are under the control of the person in charge of the ship during the performance of the contract. The Corporation are not responsible for the acts or defaults of the master or the crew of the steam tug or for any damage or loss that may arise to the ship or cargo, nor for any damage caused by any defect in or accident happening to the machinery of the steam tug or to the towing gear, or tug's hawser, or by any perils of the seas, river or navigation. A towage contract direct from the sea to Lytham or Preston, or Preston to Lytham to sea, is to commence or terminate when the steam tug has taken the ship from the sea to Preston or over the bar, or opposite Lytham Pier. This contract is not to apply to salvage services nor to claims for or in the nature of salvage. When towing by stages and through stress of weather the steam tug can make little or no headway, she is to be paid by the hour from the time of passing the last stage. Towage to be charged by the hour if the tug is taken beyond the stage agreed upon. If a tug is engaged to tow a ship to any port or station, but through stress of weather or other unavoidable circumstances she runs short of coal or is separated from the ship, the tug to be paid *pro rata* for the distance towed. When a tug is ordered, attends, and is not employed, the vessel to pay the rate of towage of such ship from Lytham to dock. The Corporation reserve to themselves the right to substitute one tug for another. One tide to be allowed for docking should vessel arrive after the dock gates are shut. If longer detained tug to have a claim for detention according to the size of the ship she may have to tow. Vessels towed from anchorage and by any means failing to get into dock to pay extra to contract, 10/ per hundred tons of their reg. tonnage or fractional part thereof. **Officials.** Corporation of Preston. Clerk and Sol., A. Howarth, Town Clerk; Res. Eng. and Gen. Supt., J. Barron, M.Inst.C.E.; Dock Supt. and Harb. Master, J. Bilsborough; Lloyd's Agents, Fisher & Iddon.

SANDSEND. A beck near the Port of Whitby.

SANDSIDE HARBOUR, W. of Thurso, Caithness. **Auth.** Owner, T. Pilkington. A small harb. with two good piers. Dry at **LW.** Only used for purposes of adjacent estate.

SANDWICH, Kent. 11 miles E. of Canterbury. **Auth.** Corporation, under Act, 1847. **Tr.** I. Corn, coal, timber, &c. **W.** most dang. SE., S. and W. Harb. is much choked, and has lost its importance. The channel is narrow and tortuous, and only available for vessels of 12ft dft. Cranage up to 5 tons. **Ry.** S.E. & C. **Charges.** Harb. dues upon vessels laden 3d per ton reg.; if out laden a further 1d.

Harb. rates and dues upon cargo according to nature of cargo. **Pilotage.** C.—See London. **Towage.** Upon vessels under 60 tons reg. £1 each way; over 60 tons reg. 4d per ton each way. **Officials.** Harb. Master, C. J. Conquest; Coll. of Cust., J. W. Wilson, Deal.

SANDYCROFT (see Chester). A small dock and wharf on the River Dee belonging to the Sandycroft Foundry Co.

SAUNDERSFOOT, Pembrokeshire. Lat. 51° 43′ N; long. 4° 42′ W. **Auth.** Saundersfoot Ry. and Harb. Co. **Tr.** Anthracite coal, nuts, beans, peas and culm. **Accn.** A small tidal harb. used by vessels up to 500 tons, and having a depth of 17ft at HWST, and 10ft at HWNT. Good quayage, with 3-ton crane. **Ry.** G.W. **Charges.** Harb. dues coastwise 2d per ton reg; foreign 4d per ton reg. Trimming coal 2½d per ton; ditto culm 2d per ton. Discharging ballast (including use of steam crane) 8d per ton. **Pilotage.** As per agreement, about 10/ per 100 tons. **Official.** Harb. Master, E. J. Harvey.

SCALLOWAY. A creek under Port of Lerwick, W. coast of Shetland. **Tr.** I. General; E. Fish, fresh and salted. **THW.** f. and c. 9h 30m. **D.** HWST. 24ft; HWNT. 17ft. Fine harb. and quay, with about 12ft at **LW.,** owned by Messrs. Hay & Co. Dues 2d to 4d per ton reg. according to size of vessel. **Pilotage** as agreed. **Official.** Piermaster, W. Rae Duncan.

SCAPA, Orkney. A pier about 640ft in length in Scapa Bay, about 1½ miles S. of Kirkwall, being extended. **Auth.** The Orkney Harbours Commissioners.

SCARBORO', Yorkshire. Lat. 54° 18′ N; long. 0° 25′ W. **Pop.** 38,190. **Auth.** Harb. Commrs. under Acts, 1843, 1876 and 1900. **Tr.** Fishing. I. wood, ice, salt. **THW.** f. and c. 4h 11m; Sp. rise 15ft; N. rise 9ft; R. of N. 8½ft. **D.** Entrance dry at ST., as are both harbours at LWST., and nearly so at neaps. **W.** prev. SW.; most dangerous SE. to E. When ball is up there is 12ft inside West Pier and more at entrance. **LV.** s.s. 715 reg. tons; dft. of largest sailing vessel 15¼ft. **Accn.** The harb. is formed by the E. Old or Vincent and W. piers enclosing two independent harbs., the outer of 4½ acres, the inner of 8 acres. The bottom throughout is mud and sand. At ST. there is about 18 to 20ft of water at pier end. Vessels of 12 to 15ft dft. can enter and be berthed during ST., and those of 10 to 13ft during NT. Steam crane to 1 ton, hand crane to 1 ton. **En.** Outer Harb., boom entrance NE. ¾ E., 33ft wide, bridge entrance E. by S. ¾ S., 42ft wide; Inner Harb., NE. ¼ N., 100ft wide. Vessels should not charter for this port unless adapted to take the ground whether at a quay berth or otherwise. **Ry.** N.E. **Charges.** Harb. dues under 50 tons 2d per ton, over 50 tons 3d per ton. Dues on coal landed 6d ton. Corporation dues 1/6 each vessel. Coal delivered 1½d ton. Vessels in ballast sheltering 1d per ton. Loading and unloading, about 6d ton, by arrangement. **Pilotage.** NC. **District** not defined. **Rates** as per agreement. No fixed rate.

Usual charge 10/ to £1 10/, according to size. **Towage.** Per agreement. **Officials.** Clerk to Commrs., F. G. Stephenson; Harb. Master, W. C. Smith; Supt. of H.M. Cust., W. J. Davies; Lloyd's Agent, W. Mosey.

SCHULL, Co. Cork. (See Skibbereen.) 8 miles NE. from Fastnet Rock. A safe harb., sheltered from SW. to SE. Good anchorage sheltered on all points is from 18ft to 21ft. **Official.** Harb. Const., Amos O'Reiley.

SCILLY. A group of islands 24 miles WSW. of Land's End. Lat. 49° 51′ and 50° N; long. between 6° 11′ and 6° 30′ W. **Pop.** 2,000. **Tr.** I. Timber, coals, flour, bread, and general merchandise; E. Potatoes, lobsters, flowers. **THW.** f. and c. 4h 30m; Sp. rise 16ft; N. rise 12ft; Equinoctial tides rise 20ft.; HS. 23ft 4in.; LS. 7ft 6in. **D.** LWST. 15ft to 30ft; LWM. 18ft to 33ft. **Accn.** The Scilly Islands consist of 48 islands, but of these only five, viz., *St. Mary's, St. Agnes, St. Martin's, Trescow,* and *Bryer* are inhabited. These five islands possess several harbs. for vessels capable of taking the ground, and also one for ships of large dft., viz., *St. Mary's Road.* This harb. affords shelter from all winds, except those from the westward between WNW. and SW. The anchorage here is between the island of St. Mary and that of Samson, and has five entrances. The general depths are from 6 to 13fms. The other harbs. of note are *Old and New Grimsby* and *St. Helen's Pool.* **Charges.** Anchor dues 2/4 per vessel. Keelage 2d per reg. ton. **Pilotage.** C. **District**: To and from, into and out of, all ports and places in and about the islands of Scilly. **Rates.** On vessels from or bound to foreign ports of 60 tons and under, £2 2s; 70 tons, £2 4s 6d; 80, £2 7s; 90, £2 9s 6d; 100 £2 12s 6d; 110, £2 15s 10d; 120, £2 19s 2d; 130, £3 2s 6d; 140, £3 5s 10d; 150, £3 9s 2d; 160, £3 12s 6d; 170, £3 15s 10d; 180, £3 19s 2d; 190, £4 2s 6d; 200, £4 4s.; 210, £4 7s 4; 220, £4 10s 8d; 230, £4 14s; 240, £4 17s 4d; 250, £5 0s 8d; 260, £5 4s; 270, £5 7s 4d; 280, £5 10s 8d; 290, £5 14s; 300, £5 15 6d; 310, £5 16s 6d; 320, £5 17s 6d; 330, £5 18s 6d; 340, £5 19s 6d; 350, £6 0s 6d; 360, £6 1s 6d; 370, £6 2s 6d; 380, £6 3s 6d; 390, £6 4s 6d; 400, £6 6s; 410, £6 10s; 420, £6 14s; 430, £6 18s; 440, £7 2s; 450, £7 6s; 460, £7 10s; 470, £7 14s; 480, £7 18s; 490, £8 2s; 500, £8 6s; 510, £8 9s; 520, £8 12s; 530, £8 15s; 540, £8 18s; 550, £9 1s; 560, £9 4s; 570, £9 7s; 580, £9 10s; 590, £9 13s; 600, £9 16s; 610, £9 18s 6d; 620, £10 1s; 630, £10 3s 6d; 640, £10 6s; 650, £10 8s 6d; 660, £10 11s; 670, £10 13s 6d; 680, £10 16s; 690, £10 18s 6d; 700, £11 1s; 710, £11 3s; 720, £11 5s; 730, £11 7s; 740, £11 9s; 750, £11 11s; 760, £11 13s; 770, £11 15s; 780, £11 17s; 790, £11 19s; 800, £12 1s; 810, £12 2s 6d; 820, £12 4s; 830, £12 5s 6d; 840, £12 7s; 850, £12 8s 6d; 860, £12 10s; 870, £12 11s 6d; 880, £12 13s; 890, £12 14s 6d; 900, £12 16s; and an additional 1s. for every 10 tons above 900. On coasting vessels of 60 tons and under, £1; 70 tons, £1 2s 6d; 80, £1 5s; 90, £1 7s 6d; 100, £1 10s; 110, £1 12s 6d; 120, £1 15s; 130, £1 17s 6d; 140, £2; 150, £2 2s 6d; 160, £2 5s; 170. £2 7s 6d; 180, £2 10s; 190, £2 11s; 200, £2 12s 6d; 210, £2 15s 10d; 220, £2 19s 2d; 230, £3 2s 6d;

240, £3 5s 10d ; 250, £3 9s 2d ; 260, £3 12s 6d ; 270, £3 15s 10d ; 280, £3 19s 2d ; 290, £4 2s 6d ; 300, £4 4s ; and in proportion or a greater tonnage. No charge for less than 5 tons. For 5 tons and upwards, the next rate to be charged. For removing a vessel within the limits of the port, 10/6. For a pilot remaining on board a vessel by request, 10/6 for every 24 hours, or any part thereof. The above rates are for the whole service, in and out, but any pilot employed to conduct a vessel inwards only is entitled to two-thirds of the said rates, the vessel having been properly moored in one of the regular harbs. **Towage.** There are no tugs or special rates. **Officials.** Steward, C. B. Maggs; Lloyd's Agents, F. Banfield & Sons.

SCRABSTER, Caithness, Thurso Bay. **Auth.** Harbour Trustees, under Act, 1841, and Harbour Order 97. **Tr.** Principal imports are general goods, groceries, ironmongery, wood, salt, coal, fish, manure, oilcake, &c., by weekly steamer, and herring fishing industry during summer season. **THW.** f. and c. 8h 30m. **D.** ST. 12ft to 25ft, NT. 15ft to 16ft. **LV.** 1,000 tons. **Accn.** 2 piers for steamers drawing from 12ft to 20ft. Harb. can accommodate twenty small vessels about 200 tons burden, and two large vessels 800 to 1,000 tons burden. A 600ft quay encloses harb. Fixed red light shown on end of new pier, and basin and harbour are being cleaned and deepened. 1-ton crane. **Ry.** H. **Charges.** From 4d to 1/6 per ton on gen. goods. Harb. dues, coasting 4d per reg. ton, foreign 6d to 1/6. **Pilotage.** As per agreement. **Official.** Harb. Master, D. Sinclair.

SEAHAM HARBOUR, Durham. A seaport about 6 miles S. of Sunderland. Lat. 54° 50′ N ; long. 1° 19′ W. **Pop.** 15,000. **Auth.** Seaham Harbour Dock Co. **Tr.** I. Pitwood, timber, &c. ; E. Coal principally, glass bottles, &c. **THW.** 3h 24m. **W.** prev. E and NE. Sp. rise 15½ft ; N. rise 11½ft ; R. of N. 6½ft. **D.** Outer harb. **HW.** at ST. 22½ft. **LV.** 5,000 tons burden. No vessel can enter at **LW.** The entrance to harb., formed by N. and S. piers, is 280ft wide. **Accn.** Two docks, the South Dock recently opened. There is cranage power up to 10 tons. **Ry.** N.E.

Crane power to 10 tons at Gloucester, and 30 tons at Sharpness. **Charges.** Rates on vessels entering canal at Sharpness. Foreign and coasting. Regulations as to tonnage, wharfage, lockage and moorage. Tonnage rates. Dock charges. **Pilotage.** NC. **District:** All pilots licensed by the Commissioners cruise to and from stations and places within the limits of the pilotage jurisdiction of the Board, that is, within that portion of the Bristol Channel which lies eastward of Lundy Island, including the River Severn to the City of Gloucester and the River Wye to Chepstow Bridge. The duties of such pilots are divided into divisions and sections, or both, and each division and section cruises to and from the following stations:—1. Sharpness Station. Comprising the River Severn between to and from and including Sharpness and Portishead and the River Wye to Chepstow Bridge. 2. Portishead Station. Comprising the Bristol Channel between to and from and including Portishead and the Holmes. 3. Holmes Station. Comprising the Bristol Channel between to and from and including the Holmes to the Nash. 4. Nash Station. Comprising the Bristol Channel between to and from and including Nash and Lundy. The pilot boats are cutter rigged with black painted hull and white bulwarks on the outside, with the number in black on each bow, and the words "Gloucester Pilots" in white on the stern, and the letters "G.S." marked in black paint of not less than 3ft in length on the mainsail, and carry the usual signals ordered by the Board of Trade, day and night, with a private signal at night of three flashes in succession, white, red, white at intervals not exceeding 15 minutes. The pilot boat in the Lundy district will cruise chiefly about 3 miles off the Bull. For **Rates** see following page. In lieu of the rates specified in the schedule the following reduced rates shall be paid from Kingroad to Sharpness or Lydney for all vessels coming light *bona fide* for coal, and for all such vessels laden with coal from Sharpness or Lydney to Kingroad subject to a reduction of one-fifth for vessels towed or propelled by steam:—

For vessels of 2000 tons and over, in addition to charges set forth in last column of above table: Lundy to the Nash, 5/-; Nash to the Holmes 5/-; Holmes to Kingroad, 5/-; Kingroad to Sharpness, 15/-

and if between the Homes and Kingroad, the same rates as from the Holmes. For pilots discharged from any vessel on the outward voyage between any of the stages mentioned in the above rates, the same rates as if they had been taken to the next stage beyond the place where they were discharged. For all vessels piloted to Chepstow or to Lydney, the same pilotage rates as to Sharpness, and *vice versâ*. For vessels piloted from Sharpness to Lydney, or from Lydney to Sharpness, and then to Kingroad, the same rates as between Sharpness and Kingroad. For vessels piloted to and from any place in the River Severn above Sharpness, one-fourth more than the rates between Sharpness and Kingroad. Vessels taking a pilot from Kingroad to any place on the River Severn must employ assistants to the pilot, whose number and payment are regulated by the 49th Pilotage Bye-law. Vessels retaining a pilot on board after he has discharged the duties for which he was engaged, or whilst waiting for water up the River Severn, or whilst delayed by contrary winds when outward bound, and vessels in charge of a pilot compelled to bear up and return from the westward from stress of weather or accident, must compensate him according to the regulations contained in the 53rd and 54th Pilotage Bye-laws. **Officials.** Gen. Man. and Sec., H. Waddy; Traffic Man., J. V. Thomas; Coll. of Dues, F. W. Harris; Dock Master (Gloucester), Capt. J. H. Evans; Harb. Master (Sharpness), Capt. F. Field; Coll. of H.M. Cust., J. Mortishead.

SHEERNESS, Kent. Lat. 51° 26′ 48″ N; long. 0° 44′ 22″ E. A seaport and naval stntion situated on the Island of Sheppey at the mouth of the Medway, 11m NE. from Chatham. **Auth.** Medway Conservancy and Admiralty. **THW.** f. and c. 12h 39m. Town quay 12ft HWST. The important Government Dockyard at this place has an area of about 60 acres. Pier, owned by the Urban District Council. **Ry.** SE. & C. **Charges.** 2½ per cent. on freight; Med. dues, coals 5d per reg. ton, oats 10d, seeds 7d. **Pilotage.** C. In or out, from Nore, average 2/6 per ft, with additional for boarding. (See also London.) **Official.** Deputy Lloyd's Agent, W. Hurst.

SHETLAND ISLANDS, situated about 50 miles NE. of the Orkney Islands, and 210 miles from Bergen in Norway. Sunborough Head, the S. promontory of the principal island, Mainlaid or Pomona, is in lat 59° 49′ N; and the most northern point of Unst, the most remote of the group, is in lat 60° 51′. The islands are about 30 in number, the principal being Mainland, Yell, Unst, Whalsay, Bressa, East Burra, West Burra, Tronda, Fetlar, Papa Stour, Muckle Roe, Mousa, and Fair Isle. Area about 558 sq. miles. The harbours are numerous, and many are easy of access.

SHIELDS. (See North Shields and South Shields.)

SHOREHAM. Lat. 50° 49′ 50″ N; long. 0° 15′ W. **Pop.** 5,000. **Auth.** Shoreham Harbour Trustees, under Acts of Parliament of 1816, 1876 and 1888. **Tr.** I. and E. General. **THW.** f. and c. in harb., 11h 20m; Sp. rise 14ft and N. rise 9ft above zero, or LWNT. There is

generally a depth of 5ft below zero. **W.** prev. from SW., most dangerous SE. when blowing a gale. **LV.** sailing vessel 1,422 tons, draught 16ft. **Accn.** The harb. is 4 miles long, and is formed by the outset of the River Adur between two piers. Width of entrance 176ft. It is divided by a third pier into the E. and W. arms. *W. arm*—Depth of water 20ft HWST., 15ft HWNT. ST. range from 13ft to 15ft, NT. from 8ft to 11ft above zero. Good wharves, chiefly used by colliers and timber-laden ships. *E. arm*—18ft at HWST., 13ft at HWNT. From this arm there is a floating canal entered by a lock 175ft long between the gates, 32ft wide at top and 28ft near bottom, with depth of water on sill, at HWST. 21ft, LWST. 2½ft, HWNT. 15ft, and LWNT. 6½ft. Depth of canal 18½ft HWST., 13ft HWNT. Vessels drawing 16ft can mostly lie afloat inside the canal. The stream between the entrance piers runs as much as 6 knots at springs and 3 knots at neaps. There is in the harbour, under the management of the harb. authority, free quay space to the extent of 1,400ft frontage; numerous private wharves having frontages to the harb. of about 2,500ft. The Adur slip is 420ft long, 54ft wide, and capable of taking a vessel drawing 11ft forward and 13ft aft. Good cranage accn. at the Ry. Co.'s Kingston wharf. **Ry.** L.B. & S.C. **Charges.** Harb. dues, vessels loading or unloading 3d to 6d ton according to size. Putting in for shelter 4/ each. Ballast 1/ and 1/2 per ton. **Pilotage.** C. **District:** From Brighthelmstone (exclusive) westward to the Owers, and from the Owers eastward to Brighthelmstone (exclusive). **Rates** per foot. Inward and outward. Harb. pilotage, 8ft dft. and under, 1/6; above 8ft and not ex. 10ft, 1/9; above 10ft, 3/. Vessels inward bound, not boarded until they are within the bar at the entrance of the harb., are charged only one-fourth of these rates. Moving vessels under 100 tons 5/, and an additional 2/6 for every 50 tons or portion, of 50 tons. **Towage.** Sailing vessels in or out, 2½d per ton reg.; steam vessels 1½d; min. charge, 12/6. Up or down canal, sailing or steam, 1½d per ton reg.; min. charge, 10/. Locks to Kingston, or *vice versa*, sailing or steam, 1½d per ton reg.; Locks to Shoreham, or *vice versa*, sailing or steam, 2d; min. charge, 10/. Fishing luggers, in or out, 5/ each. Moving vessels in harb. other than above: Under 100 tons reg., 5/ each; 100 tons and over, 10/. Use of towrope, large 10/, small 5/ each. The harb., being in close proximity to Brighton, affords excellent accom. for yachts; special berths are provided in the canal at special rates. **Officials.** Clerk to Harb. Trust., C. Baguley; Harb. Master, A. J. Catt; Coll. of Dues, the Chief Customs Officer; Lloyd's Agent, H. Brown.

SIDMOUTH, Devonshire. Lat. 50° 40′ 30″ N; long. 3° 14′ W. A small seaport situated at the mouth of the Sid, 13 miles SE. of Exeter.

SILLOTH, Cumberland, on the eastern side of Solway Firth, about 22 miles from Carlisle. **Pop.** 3,000. **Auth.** The North British Ry. Co. **THW.** f. and c. 11h 40m; Sp. rise 26ft; N. 18ft. **Accn.** consists of a tidal basin 600ft long by 300ft wide, covering about 4¼ acres, with

a jetty extending 1,000ft towards **LW. En.** 86ft wide. The new dock has a water area of 6 acres; length (W. side) 660ft (E. side) 630ft, width 400ft. Entrance to dock 60ft. Depth on sill 24ft ST. and 18ft NT. Nine hydraulic cranes, of powers up to 2 tons, one 2½-ton crane, one 6-ton, and one 25-ton steam crane to load 100 tons per hour. **Ry.** N.B. **Charges.** Buoy and light dues 1d to 3d per ton. Ballast 6d per ton inwards; 2/0½ per ton outwards. Dock rates 3d per ton coasting; 5d per ton foreign. **Pilotage.** N.C. In the English Channel of the Solway Firth between the anchorage ground off the harb. of Maryport and the entrance of Port Silloth, and Annan Water Foot, from the Firth. **Rates.** From anchorage grounds off the harb. of Maryport to Silloth or *vice versa*. Foreign Ports C.—Vessels to and from foreign ports 5/ per ft; coasters, 8ft dft. and under, 35/ per vessel; do. over 8ft, 4/6 per ft. From anchorage off Maryport to Annan Water Foot from Solway Firth and *vice versa*, from foreign ports, 7/6 per ft; coasters under 8ft dft. 52/ per vessel, above 7/ per ft. Silloth to Annan and *vice versa*, 4/ per ft. **Towage.** Coasting vessels (outwards and inwards) not exceeding 320 tons reg.:—

	72 tons reg. and under.	Above 72 tons and under 320 tons reg.
Dock and end of Jetty	5/	1d per ton
Dock and Lee Scar or No. 4 Buoy	10/	2d ,,

SKIPPOOL, Lancaster. Creek of Fleetwood. **D.** HWST. 15ft, HWNT. 10ft.

SLIGO, on the Garvogue, 5 miles from the outer roads. Lat. 54° 16′ N ; long. 8° 28′ W. **Pop** 10,764. **Auth.** Harbour Commissioners, under Sligo Harbour Acts 1870 to 1903. **Tr.** General. **THW.** f. and c. 5h 45m ; Sp. rise 11½ft ; N. rise 8ft from **LW.** **D.** on outer bar at **LW.** 16ft ; inner 14½ft. **W.** prev. SW. **LV.** Vessels of 2,481 reg. tons and 22ft dft. have entered harb. at **HW.** **Rys.** M. & G.W. and G.S. & W. (1). **Accn.** Good and safe channel up to quays. The ballast quay is about 2,000ft long, with a depth of water alongside at LWOST. of 7ft. Deep water berths 800ft, with depth of water 18ft. Depth up to upper quays, at ST. 17ft, NT. 13½ft ; to deep water berths, ST. 22ft, NT. 17½ft. Hand cranes. Tramways to deep water berths, connected with railway lines. **Charges.** Harb. dues 6d ton on rateable or reg. tonnage according to the Act, coasting vessels, and 1/ per ton all oversea vessels. Ballast 1/ to 2/6 ton. Mooring buoys, if used, 3d per ton rateable or reg. Channel lights, ¼d per ton. **Pilotage.** C. **District :** From Wheaten Rock to Quays. **Rates.** Outwards : From any place to sea, April 1 to Sept. 30, 2/ ; Oct. 1 to Mar. 31, 2/6. Inwards : From April 1 to Sept. 30 2/6 foot ; from Oct. 1 to Mar. 31, 3/ foot. Sea pilots board at Wheaten Rock, and change of pilots takes place at Bungar, where river pilot takes charge. Outwards : River pilots take vessels to sea. **Towage.** 5d per reg. ton in, and 3d out. **Officials.** Sec. and Coll. of Harb. dues, T. J. Mercer ; Harb. Master, Capt. J. Keeble.

SOLVA QUAY. Trinity Quay is the only quay at Solva, a well-known harb. of refuge in St. Bride's Bay. No Harb. Auth. **Tr.** I. Coal, culm, and general

goods; E. Grain occasionally. **D.** at quay 14ft OST. There are two commodious storehouses, and a weighing machine house. Solva is seven miles from Porthgain. Solva and Porthgain possess the only landing quays between Fishguard and Milford, and are most valuable coaling and trade depôts. Steam communication to and from Bristol fortnightly for general goods. Pilots always on the look-out. **Charges.** Harb. free; quay dues, if used. Loading and unloading per contract.

SOUTH ALLOA, River Forth, Scotland. Wharf belonging to Cal. Ry. Co., for landing coals and timber.

SOUTHAMPTON, Hampshire. On Southampton Water. Lat. 50° 54′ N; long. 1° 24′ W. **Pop.** 124,667. **Auth.** The Southampton Harbour Board. **Tr.** I. Coffee, cocoa, wine, tobacco, grain, and all kinds of foreign and colonial produce; E. Machinery, hardware, and manufactured goods. **THW.** 10h 30m, oh 45m; Sp. rise 13ft; N. rise 9½ft. **W.** prev. SW.; owing to the landlocked nature of the harb. no winds are specially dangerous. **Accn.** The Southampton Docks, 79 miles from London, owned and managed by the L. & S.W. Ry. Co., are situated within a perfectly sheltered harbour (well lighted, making the docks as accessible by night as by day), and have the natural advantage of double tides, with practically four hours of **HW.** every tide, thus affording accn. for the largest steamers afloat. The first high-water at the full and change of the moon is at 10h 30m, the second high-water at 12h 45m, and low water at 4h. To ships using the graving docks this double tide is very advantageous, as the water remains nearly stationary for a considerable time; thus, without risk, allowing vessels to come out of the dock, and others to enter, without losing a tide. The Empress Dock (18½ acres) has an entrance 165ft wide, with a min. depth of 26ft at **LW.**, and it is the only dock in Great Britain where deep water loading and discharging berths can be reached by the largest vessels at any time of the day or night, irrespective of the state of the tide. A new basin for vessels of deep draft, area 16 acres; depth, 40 ft LWOST.; quayage, 3,807ft. There is also an Outer Dock of 16 acres and an Inner Dock of 10 acres. Signals for entering and leaving dock are made from the flagstaffs at the entrance of each dock, and for berthing as well as for other movements they are now made from the Signal Tower at the end of the Prince of Wales Quay, where the number of berth or indication of part of dock for approaching vessels is hoisted. Quays at present completed equal 18,868 lineal feet. The old extension quay, 1,406ft long, the Prince of Wales Quay, 2,000ft, the South Quay, 430ft, and the Test Quays, 4,664ft, are all accessible at any time of the day or night, irrespective of the state of the tide. The Prince of Wales Quay is used by the Union-Castle, the North German Lloyd, and other liners, and the company have here erected double-storied sheds of the most modern designs. There is a min. depth of 28ft at **LW.** of OST., at the old extension, Prince of Wales and

South Quays, and of 32ft LWOST at Test Quay. The Prince of Wales Graving Dock is 750ft long by 87½ft wide at sill and 91ft at cope level. The New Trafalgar Graving Dock No. 6 is being extended, and will be 897 by 100ft at entrance, with a depth on sill of 35ft. at HWOST. There are four other large dry docks varying in length from 280ft to 520 ft. In the various docks there are spacious transit sheds for the reception of import and export cargoes; and bonded and free warehouses for the storage of every description of merchandise, including tobacco, cigars, &c.; also commodious vaults and stores for the housing of wines and spirits under bond, with every facility for bottling. There are 200,000 square ft of specially constructed shedding for wood goods. Several large warehouses for grain (capacity 2,300,000 bushels), fitted with the most modern machinery, capable of dealing with 200 tons of grain per hour, either from ship, lighter, or ry. truck. Spacious coal barge docks have been constructed on the Itchen for storing coal in lighters for the bunkering of out-going line steamers, and are capable of floating 14,000 tons of bunker coal at one time. Two coal jetties with hydraulic, electric, and steam transporters. At the Test Quay, Berth No. 40, where vessels can discharge direct, is the largest cold storage installation in Europe. There is a complete system of hydraulic and electric power (shears, cranes, hoists, elevators, capstans, &c., &c.), with lifting power varying from one to twenty tons; and also steam shears to lift up to eighty tons; a 30-ton steam-crane at No. 5 Dry Dock and a 50-ton electric crane at No. 6; the whole of the dock quays, sheds, and approaches are lighted by electricity; and a channel from the sea to the docks has been dredged to a depth of 35ft at LWOST. Rys. of some 37 miles extend to all the quays and into and alongside each warehouse, and ry. trucks pass direct to every ry. in the kingdom. Special trains from and to Waterloo station (London) run directly to and from alongside the mail or passenger steamers, on days of arrival and departure. There are also the *Town Quays*, which are the property of the Southampton Harbour Board. The *Town Quays* have a frontage of 4,500ft, are lit with the electric light, and powerful and fast-working electric cranes are provided for discharging cargoes. Berths of 600ft in length, and ample warehouse accom. with 20ft of water at LWOST. The quayage space is 260,000ft super, and there is also a pier, the largest on the South Coast, which was inaugurated by H.R.H. the Duke of Connaught, on June 2, 1892. **LV.** using the *Town Quay* the *Atlantic* 22ft dft. Many large steamers do not go into the docks, but lie in Southampton Water, and there discharge passengers, mails, and specie into tenders for landing at the docks. **Charges.** Harb, dues 1d per ton. Boomage 1/6 to 5/, according to size; harbour lights, 1/ to 5/. Wharfage various. Mooring dues 1d. Pier dues 1d. per ton. Yachts at mooring buoys 2d per ton. **Pilotage.** C. **District.** From the Owers, within and without the Isle of Wight, to Peverell, and *vice versa*, and to and from and into and out of all ports and places within those limits, excepting those within the Poole District.

For transporting vessels from Southampton to Redbridge, Eling, Northam or Chapel, or *vice versa*, 1/ per ft.; to Hamble, Bursledon, Lepe, Buckler's Hard or Beaulieu, or *vice versa*, 1/6 per ft; for any intermediate distance, a proportionate part of rates. The Pilotage Rates are subject to a reduction of one-fourth in respect of vessels propelled by steam and vessels towed by steam vessels. For piloting vessels from Southampton to a line drawn between Netley Castle and Langdown House or *vice versa*, 17ft or under, 12/6; over 17ft and not exceeding 20ft, 17/6; over 20ft and not exceeding 25ft, 25/; over 25ft, 27/6; docking or undocking, mooring or unmooring alongside the wharves at Southampton is included in the above charges for pilotage except when vessels are taken to or from the Inner Dock when vessels under 500 tons net reg. pay 10/6 in addition, and vessels of 500 tons net reg. and upwards, 21/. For transporting vessels from one berth to another in Portsmouth, Cowes, Chichester, Langston, Bembridge, or Yarmouth Harbours (but no pilot shall be entitled to claim the same in respect of any vessel which he has brought into Harbour, unless he can prove to the Sub-Commissioners that the vessel could not be placed in her berth for discharging during the tide in which she came in), for vessels not exceeding 200 tons net reg., 10/6; over 200 and not exceeding 300 tons, 15/; over 300 tons, 21/. If a master choose to retain or employ a pilot whilst at anchor, the rate for the lay day is to be 7/6 per day, not including the day coming in or going out. Ships calling for the purpose of coaling, or ships returning by distress of weather, contrary winds, or on account of accident, into ports within the Isle of Wight District, are subject to pay one-half only of the rates herein specified, but this does not apply to boarding or landing money. Ships calling for such purposes may take on board a reasonable quantity of stores, provisions or water for their own use. For putting pilots on board vessels in the vicinity of Netley Castle or for landing a pilot from an outward bound vessel not subject to compulsory pilotage:—

17ft or under, 2/6; over 17ft and not exceeding 20ft, 5/; over 20ft, 7/6. The pilots of the Isle of Wight District have authority to supersede such of the London or Cinque Ports Pilots as are licensed for the charge of Vessels to the Isle of Wight, when they arrive near the Channels leading into the Ports and Harbours within the Isle of Wight; but no Master of a vessel is compelled to take an Isle of Wight Pilot until at St. Helens, if he be piloted thereto by a duly licensed London or Cinque Ports Pilot. For transporting vessels in and about Southampton Dock, vessels under 500 tons net reg., 10/6; 500 tons net reg. and upwards, 21/.

Rate levied for the maintenance and upkeep of the pilot vessels:—The following charges are payable in respect of vessels subject to compulsory pilotage bound to any port or place within the Isle of Wight Pilotage District, and also in respect of any other vessel supplied with a pilot: for vessels under 500 tons net reg. £1; 500 and under 1,000 tons, £1 10/; 1,000 and under 1,500 tons, £2; 1,500 and under 2,000 tons, £2 5/; 2,000 and under 3,000 tons, £2 10/; 3,000 and under 4,000 tons, £2 15/; 4,000 and under 5,000 tons, £3; 5,000 and under 6,000 tons, £3 2/ 6d; 6,000 and under 7,000 tons, £3 5/; 7,000 and under 8,000 tons, £3 7/ 6d; 8,000 and under 9,000 tons, £3 10/; 9,000 and under 10,000 tons, £3 12/ 6d; 10,000 and under 11,000 tons, £3 15/; 11,000 and under 12,000 tons, £3 16/; 12,000 and under 13,000 tons, £3 17/; 13,000 and under 14,000 tons, £3 18/; 14,000 and under 15,000 tons, £3 19/; 15,000 and under 16,000 tons, £4; 16,000 and under 17,000 tons, £4 1/; 17,000 and under 18,000 tons, £4 2/; 18,000 and under 19,000 tons, £4 3/; 19,000 and under 20,000 tons, £4 4/; 20,000 and upwards, £4 5/. The charges for landing a pilot by means of the Trinity House Vessels are, vessels under 500 tons net reg., 10/; 500 tons and upwards, 20/; whether pilots land by means of the cutters or not, unless the landing is prevented by stress of weather. **Towage.** By the Southampton, Isle of Wight, and South of England Royal Mail Steam Packet Co., Ltd. Offices: Canute-road, Docks, Southampton.

Masters may employ either Pilots or Harbour Pilots for the work mentioned in columns 5 and 6 respectively.

King's Dock.—The heights of water given in tide table are those on the outer sill of the lock, the inner sill is 7ft higher. The lock is 90ft wide at coping with vertical walls, and at a distance of 32ft 6in from its centre the invert rises gradually above the level of the sill. The passage connecting the King's Dock with the Prince of Wales Dock is 70ft wide, with vertical walls, and the depth of water in the passage at OST. is 28ft. By means of pumping or admitting water from a canal, not less than 23ft of water can generally be maintained over the inner sill of the Prince of Wales Dock Lock, the inner sill of the old lock at the South Dock between the basin and the dock, and the sills of the North Dock Lock between the basin and the dock, and the 29ft of water over the inner sill of the King's Dock. *Prince of Wales Dock.*—The heights of water given in the tide tables are those on the outer sill of the lock, the inner sill is 5ft higher. The lock is 60ft wide at coping level, the walls have a batter of 1 in 12, and at a distance of 16ft 3in from its centre the invert rises gradually above the level of the sills. The effective length of the lock is 460ft. *South Dock.*—The heights of water given in the tide table are those on the outer sill of the new entrance lock, the effective length of which is 340ft. The inner sill of the old lock (now used as a passage only) between the basin and the dock is 11ft higher. The old lock is 60ft in width at coping level, the walls have a batter of 1 in 16, and at a distance of 12ft 6in from its centre the invert rises gradually above the level of the sills. *North Dock.*—The heights of water given in the tide tables are those on the sill at the entrance to the basin. The sills of the lock between the basin and the dock are 9ft higher. The width of the lock is 56ft at coping level, the walls have a batter of 1 in 16, and at a distance of 15ft 3in from its centre the invert rises gradually above the level of the sills. Dry Docks :—

TORRYBURN, Fifeshire. A creek on the Firth of Forth. 4 miles WSW. of Dunfermline. **D.** HWST. 10ft, HWNT. 8ft.

TRALEE, Co. Kerry. Lat. 52° 16′ N; long. 9° 43′ W. **Pop.** 9,600. **Auth.** Tralee and Fenit Harbour Commissioners, under Pier and Harb. Orders, 1880 to 1909. **Tr.** I. Coals, timber, iron, salt, grain, oils, cement and artificial manures; E. Barley, oats, and pitwood. **THW.** 4h 3m; Sp. rise 12½ft; N. rise 9¼ft. **D.** on bar ST. 11½ft, NT. 9½ft; in basin ST. 14ft, NT. 10ft. **Accn.** There is good accom. for shipping. Tralee is at the head of a bay, the greater part of which dries at **LW.** It is approached by a ship canal 1¾ miles long, with a depth of 10ft at OST. and 6½ft at NT. The basin at Tralee has an area of about 60,000ft, with convenience for loading and discharging. There are also a pier and harbour at Fenit sufficient for vessels drawing 23ft. Crane power to 50 tons. **Ry.** G.S. & W. (I.). **Charges.** Harb. dues 6d per ton coastwise, 1/ foreign. Ballast 1/6 per ton. **Pilotage.** N.C. **District** from Holy Island to Canal Basin. **Rates** 2/ per foot on coasters, and 4/6 on foreigners. **Officials.** Sec. to Harb. Commrs., J. Lawlor; Harb. Master, R. McCarthy. (See also Fenit.)

TRAMORE, Co. Waterford. **Auth.** Waterford C.C. Near the entrance to the Suir. " The Metal Man " is a sea mark; the figure of a sailor standing upon a round tower and pointing downwards to the rocks below, where the *Seahorse* transport vessel was wrecked in 1816. This tower is the centre one of three on the western side of the Bay of Tramore; the eastern side has two towers on Brownstoun Head. The Bay is noted for its many shipwrecks. **Ry.** W. & T.

TRESCOW.—See Scilly.

TROON, Ayrshire, on the Firth of Clyde. Lat. 55° 33′ N; long. 4° 40′ W. **Pop.** 5,113. **Auth.** G. & S.W. Ry. Co., under Statute 1 Edward VII., Session 1901. **Tr.** I. Wood, iron and other ores, and limestone; E. Coal and pig iron. **THW.** 11h 50m; Sp. rise 10ft; N. rise 7½ft. **D.** There is no bar. Depth of water at entrance is 17ft **LW. W.** prev. from SW.; most dangerous NW. **LV.** 5,000 tons loaded out, drawing 23ft. **Accn.** The harb. is formed by a breakwater running out in a N. direction. The entrance to the harb. is between the end of this breakwater and a pier, and is 330ft wide. The harb. works are as follows:—Tidal Basin or Dock, area about 2 acres; depth 21ft at **LW.** Outer Harb., area about 19 acres; depth, 14½ to 15½ft at entrance; 11 to 12ft half-way up, and 11 to 12 ft at head of harb. at **LW.** Inner Harb., area about 18 acres. Dry at **LW.** There is a large iron and wood shipbuilding yard with two Graving Docks:—No. 1, 300ft long, 37ft 6in broad, 12ft deep on OHW. New Graving Dock, 360 ft long, 48ft broad, 16½ft deep on OHW. Six 30-ton steam cranes, each capable of shipping 150 to 200 tons of coal per hour; and nine 10-ton steam cranes, each capable of discharging 45 tons per hour, and a steam crane of 60 tons capacity for bunkering and putting engines and boilers into new steamers. **Ry.** G. & S.W. **Charges.** Tonnage dues, vessels of 45 tons and over, 4½d ton. Dues on goods. **Pilotage.** Free. **Towage.** To and from the Red Buoy, N.W. of the harbour, under 250 reg. tons 2d, 250 and under 500 tons 2½d, 500 tons and upwards 3d ton. To the distance of the Lady Isle, either out or in, £1 each way extra. Should any vessel hoist a jack for a pilot at Lady Isle, they will have one put on board, and be towed in if required, for £1 extra. Notice should be given for tug at least two hours before sailing. Captains refusing to sail after the boat has been got ready by their orders will be charged 5/ additional, unless a satisfactory reason is given for not sailing. Vessels must use their own hawsers, or pay for the use of the harb. one a rate of not less than 5/ and not higher than 10/, according to the size of the vessel. **Officials.** Harb. Master, Neil MacKinlay; Principal Officer of Cust., W. A. Whyte; Lloyd's Agent, J. Clark.

TRURO, Cornwall. Lat. 50° 16′ W; long. 5° 4′ W Including Devoran, Pill Point, Restronguet, Ruan, and Tresillian. **Auth.** Town Council, under a Prov. Order, 4th April, 1883. **Tr.** I. Coal, wood, iron, and general merchandise. **Accn.** A tidal harb. in the channel of the River Truro, having **D.** dry at **LW.,** and 9ft 6in at HWST.

Town quay AST. 10ft 6in; Newham Quay (lower end), AST. 12ft 6in. Cranes at Newham Quay and Lawn Quay. There is water at Woodberry and Malpas buoys for any sized vessel always afloat and secure from all winds. Between Malpas and Truro the channel is generally improved, and buoyed on the system laid down at Trinity House. **Ry.** G.W. **Charges.** Harb. dues, 2d t.r., 20 per cent. rebate on all vessels other than river barges. Anchorage and mooring charges now abolished. **Pilotage.** Falmouth pilotage for vessels belonging to Truro, bound to or from that port, and not making signal for or otherwise requiring the services of a pilot:—From sea and *vice versa* to Carrick Roads, 1d per foot of the draught of water. Rates of pilotage between Malpas and Truro and *vice versa*, with or without steam:—

Officials. Harb. Master, Capt. Wilce; Lloyd's Agents, Waters & Son.

UIG, Inverness. A small harbour in the north of the I. of Skye. **Auth.** The Board of Agriculture for Scotland.

ULLAPOOL, Loch Broom, Ross and Cromarty. Lat. 57° 55′ N; long. 5° 10′ W. **Auth.** Pier Trustees under the Ullapool Pier Order, 1911. Maximum rates are fixed by the Order, but none are leviable until certain pier improvements have been carried out. A capacious harb. with good anchorage. There is a stone pier connected with a stone breakwater by a bridge.

UNION HALL PIER, Co. Cork. Bantry Bay. A pier belonging to County Council. (See Glandore.) **Official.** Harb. Constable, M. McCarthy.

ULVERSTON, Lancashire. Morecambe Bay. Canal belongs to Furness Ry. **D.** on canal sill 4½ft less than on Liverpool Old Dock sill. **Official.** Harb. Master,

UPHILL, Creek of Port of Bristol, in the Bristol Channel. **D.** HWST. 12ft, HWNT. 3ft.

URR NAVIGATION.—See Dalbeattie.

UYEASOUND (pronounced U-sound). A harbour at the S. end of the island of Unst, Shetland. **Tr.** I. Coal, salt, &c.; E. Herrings, ponies, cattle, wool, &c. No regular port authority. **Official.** Co. Councillor for South Unst, J. P. Sandison.

VAILA, in Parish of Walls, Zetland. **Auth.** Harbour Trustees under the Vaila Harbour Order, 1908. A small harbour with quay and piers.

VALENTIA, Co. Kerry, Ireland. Lat. 51° 56′ N; long. 10° 18′ W. A natural harb. on the SW. coast of Ireland, containing a pier belonging to the Co. Council of Kerry. **D.** of water at entrance, 13fms; at quay 2½fms ST; sheltered anchorage, 500 acres running from 3 to 9fms; 13ft 4in to 15ft at quays at ST. **LV.** *Furnessia*, 5,494 tons. **Ry.** G.S. & W. (I.) **Charges.** At wharf 2d per ton. No harb. dues. **Officials.** Harb. Master, T. O'Niel; Lloyd's Agents, J. O'Driscol & Sons.

VALLEY. A creek of Holyhead. Stone pier. **D.** HWST. 15ft, HWNT. 8ft. **Charges.** Harb. dues, 2d per ton; loading and unloading 2d per ton. **Official.** T. D. Thomas, Sec. to the Valley Pier Co.

VENTNOR, Hants. A seaside resort near the southern end of the Isle of Wight. The steamboat pier belongs to the Urban District Council.

VENTRY, Co. Kerry, Dingle Bay. A pier belonging to the Co. Council of Kerry. **D. at En.** 12fms; 2½fms at **HW.**

WADEBRIDGE, Cornwall. On the Camel, and 9 miles from its mouth; 7 miles from Padstow. **Auth.** Padstow Harb. Commrs. **Tr.** I. Coal, iron, limestone, manure, and timber; E. Slate, granite, china clay, and corn. **D.** Sp. rise 9½ft to 10ft; R. of N. 4½ft. Vessels drawing 9½ft to 10ft can come up ordinary ST. **Rys.** L. & S.W. and G.W. terminus. **Accn.** Two cranes, lifting power 20 tons. **Charges.** Crane dues, 3d per ton; loading and unloading, 1¼d per ton per man; quay dues, ½d per reg. ton. **Pilotage.** NC. **Official.** Clerk to Commrs., G. L. Ellis.

WAINFLEET, Lincolnshire. Creek of Boston. 5 miles from sea. **D.** OST 10ft at entrance, 8ft at first stage, 6ft at Clough. **Charges.** 6d ton reg. **Pilotage.** 1/ per foot. **Official.** Supt. G. Perrin.

WALNEY ISLAND, Lancashire, between Morecambe Bay and entrance to Duddon River. (See Barrow.)

WALTON-ON-THE-NAZE, Essex. A seaside resort. A pier belonging to the Coast Development Co.

WARDLEYS, Lancashire. Creek of Fleetwood. On the Wyre. **D.** HWST. 15ft, HWNT. 10ft.

WAREHAM, Dorsetshire. Mouth of the Frome, at head of Poole Harb. A commodious harb and quay for small vessels engaged in exporting pipe-clay. **Ry.** L. & S.W. (See Poole.)

WARENWATER or BUDLE CREEK, Northumberland. **D.** at Berth, HWST. 14ft, HWNT. 10ft. **THW.** 2h 40m.

WARKWORTH Harbour (Amble), Northumberland. Lat. 55° 20′ N; long. 1° 31′ W. **Auth.** Warkworth Harb. Commission, under Acts of Parliament of 1847 and 1893. **Tr.** I. Deals, timber, props, &c.; E. Coals and bricks. **THW.** at Coquet Roads, 3h; Sp. rise 14½ft; N.

rise 11ft; R. of N. 7½ft. **W.** prev. E. to NE, particularly NE. **D.** on bar 6ft at **LW.**; usual depth at ST. 18 to 20ft; at N. 15 to 16ft. At quay and berths there is 9ft at **LW.**, 22½ft to 23ft at HWST., and 19½ft to 20ft HWNT. **LV.** 1,297 net reg. tons. No vessel can enter at **LW.** of ST. **Accn.** The harb. is formed by the lower reach of the River Coquet, the entrance to the harb. being between two breakwater piers 225ft apart at the entrance. The area of the harb. below **LW.** mark is 18 acres; depth of water is about 10ft at LWST., and 24½ft at HWST. The area to which this depth extends is from the lowest berths on the S. side to the upper berths formerly belonging to the Radcliffe Coal Co. and extends to about 300ft from face of quays. Length of quay space altogether 2,000ft. A line of quays has been formed on the S. side of the river, bringing the river into a more direct and fixed course. Along these quays are formed the shipping berths of the Broomhill Collieries, Ltd., quay rys., harb. master's, staith master's, and coal-trimmer's offices, also warehouses. Steam cranes: one 3-ton and one 4-ton steam alongside quay. **Ry.** N.E. **Charges.** Harb. dues, 4d per reg. ton; for refuge only, 1d per ton. Trimming, 4/ per keel; steamers, 3/ per keel. Ballast charged, steam crane, 1/ per ton. **Pilotage.** NC. In summer 1/3; in winter 1/6 per foot. **Towage.** Steamers, ½d per reg. ton each way; sailing vessels, 3/6 per keel. **Officials.** Clerk to Commrs., J. Earnshaw; Harb. Master, Capt. T. Esson; Staith Master, A. Sanderson; Lloyd's Agent, Jas. Earnshaw.

WARRINGTON.—See Manchester Canal.

WATCHET, Somerset. Lat. 51° 10′ N; long. 3° 20′ W. **Auth.** District Council. **Tr.** I. Coal, wood pulp, grain, stone, timber; E. Paper, timber. **W.** prev. N. and NE. and NW. **THW.** f. and c. 6h 58 m. A small harb. Area 9½ acres. Quayage about 800ft. Dry at **LW. D.** at East Pier and Ry. berth, ST. 18ft, NT. 8ft. Three cranes, two 1¼-ton, one 3-ton. **LV.** 1,200 tons. A lifeboat station. **Ry.** G.W. **Charges.** Dues on shipping, 1d and 2d coasting, 4d foreign, ½d. windbound, n.r.; tolls on goods as per tariff. **Official.** Harb. Master, G. Hunt; Lloyd's Sub-agent, S. Allen.

WATERFORD, Waterford. On both banks of the Suir. Lat. 52° 7′ 25″ N; long. 6° 55′ 53″ W. **Pop.** 28,000. **Auth.** Port and Harb. Commrs., acting principally under Act 9 and 10 Vict., c. 292. **Tr.** I. Grain, timber, and coal; E. Cattle, grain, and agricultural produce. **THW.** f. and c. at W. Bridge at 6h 6m; Sp. rise 13½ft; N. rise 10¾ft. **D.** on bar at ST. 14ft, NT. 17ft. **W.** prev. SW. **LV.** s.s. 2,778 tons, deepest dft. 25¼ft. **Rys.** W. &. T., G.S. & W. (I.), and D. & S. E. **Accn.** A natural harb. formed by the channel of the Suir from the city of Waterford to its confluence with the Barrow, and thence to the sea by the estuary of these two rivers, a distance of 18 miles. Width of entrance 3 miles. The River Suir is navigable for vessels of 20ft dft. up to Waterford, where they lie afloat at the quays. Quayage space, warehouses, cranes, graving bank, &c. Depth of water at the quays 22ft LWOST. Vessels windbound anchor off Passage East. **Charges.** Tonnage Rates: Per ton of rateable tonnage of every vessel discharging or

loading cargo or passengers in the port, from or to any port or place in the U.K., 3d; per ton of rateable tonnage of every vessel discharging or loading cargo or passengers in the port from or to any port or place not in the U.K., 1/; per ton of rateable tonnage of every vessel entering the port for the purpose of seeking refuge therein, or for repairs, or for orders, and not discharging or loading cargo or passengers, 1d. Vessels bound from one port or place to any other port or place in the U.K., and entering for refuge, repairs, or orders, and not discharging or loading cargo or passengers, shall be exempt from the last-mentioned rate. Local Lights Rates: Per ton of rateable tonnage of every vessel which, having entered the port from the sea and come up the same, shall cross to the westward of an imaginary straight line drawn from Cheekpoint Promontory to Drumdowney Point, ¼d; per ton of rateable tonnage of every vessel which, having entered the port from the sea and come up the same, shall not cross to the westward of the above-mentioned imaginary straight line, ⅛d. **Pilotage.** C. **District:** On the east, an imaginary straight line drawn from a point on the coast at or near Crossfarnoge Point to a point at sea three leagues southward of same. On the west, an imaginary straight line drawn from a point on the coast at or near Great Newtown Head, to a point at sea one league southward of same. On the south, an imaginary straight line drawn from the seaward extremity of the above eastern boundary line to the seaward extremity of the western boundary line. On the north, an imaginary line drawn from Granagh Castle to Bilberry Rock, about one mile above Waterford Bridge. **Rates:—**

Inward.	To above Credan Head, and not further than Passage.	To Cheek Point and Glasshouse Reach, and no further.	Above Glasshouse Reach and up to Waterford.

Used by vessels loading coals from the Wemyss Collieries. **LV.** 600 tons. **Charges.** Dock dues, 3d per ton. Trimming coals: Cargo, 2d per ton; bunkers, 6d to 9d. **Pilotage.** 1/ per ft. in and out.

WEST HARTLEPOOL.—See Hartlepool.

WESTON POINT DOCKS, on the Upper Mersey. 11 miles above Liverpool, approached therefrom by the River Mersey and through the Weston Mersey Lock, and across the Manchester Ship Canal; or *via* Eastham and the Manchester Ship Canal. **Tr.** I. Pottery materials, sulphur ore, bone ash, &c.; E. Salt, salt-cake, chemicals, stone, purple ore, burnt ore, etc. The Docks are the terminus of the River Weaver Navigation, which is the shortest route to the Potteries, *via* the Anderton Lift and the Trent and Mersey Canal. Vessels drawing 16ft of water are always afloat in these docks. There are no dock or harb. dues on vessels or merchandise paying River Weaver Tolls. **Pilotage.**

As per agreement. **Towage.** Free inwards on vessels bringing pottery materials for subsequent passage up the Weaver Navigation; and free outwards on vessels taking salt and transferring light (after discharge) to Garston, Liverpool, or Runcorn for outward cargo. **Ballast Rates.** Discharging, 1/ per ton; ballasting, at cost of labour. Loading and discharging done by steam and hydraulic cranes. Moderate charges. Vessels bound for these docks to load salt can come up the Ship Canal from Eastham light or in ballast and go down the same free of charge if their reg. tonnage does not exceed 450 tons, and their cargo 500 tons. Vessels coming loaded with pottery materials can at present, under certain conditions, come up the ship canal free of charge; but otherwise, on payment of half the advertised Canal Dues and Tolls, if their tonnage does not exceed 450 tons reg. and their cargo does not exceed 500 tons. **Officials.** Clerk to Weaver Navigation Trustees, Northwich, E. S. Inman; Traffic Agent, L. Rosenberg, Weston Point Docks, near Runcorn.

WESTON-SUPER-MARE, Somerset. No harbour. Two piers belonging to the Weston-super-Mare (Birkbeck) Pier Co., Ltd., and the Weston-super-Mare Grand Pier Co.

WESTPORT, Mayo, Ireland (see also Innislyre). Lat. 53° 49′ N; long. 9° 30′ W. **Pop.** 5,000. **Auth.** Port and Harb. Commissioners, under Act, 1853. **Tr.** I. Timber, coal, salt, flour, maize, quartz, &c.; E. Agricultural produce, timber, clog blocks, crushed quartz, &c. **THW.** 4h 57m. S. rise 12¾ft; N. rise 9½ft. **W.** prev. W. **LV.** 1,670 tons anchor at Innislyre. Vessels entering harb. at **LW.** anchor at Innislyre or Dorinch. **Accn.** A very safe harb. Large ships bound to Westport and having to be discharged afloat always anchor in Innislyre, which is within the harb. of Westport; here there is safe anchorage in all weathers for ships of very large tonnage. At quay: warehouse, wharf, and crane accom. The quay at Westport is 3,045 ft in length; the approach to the quay is never undertaken without pilots. Vessels 15ft draught can approach quay. **Ry.** M. and G.W. **Charges.** Harb. dues, inwards, with cargo 2d per ton reg. for vessels not exceeding 100 tons; vessels 100 tons and over, 3d per ton; outwards the same. Ditto half inward or outward dues when vessels arrive or leave in ballast. Loading timber 10d per ton. Discharging coal, 9d per ton; corn and flour, 6d. **Pilotage.** NC. Outside Pilotage District: Any place between Slyne Head and Achill Head to Innisgort Lighthouse, or *vice versâ*. Harbour District (C.): From one mile outside Innisgort Lighthouse to any place within harbour, or *vice versâ*. **Rates.** Outside 3/ per ft maximum dft. Harb. as per schedule. **Towage.** As per agreement. **Officials.** Sec. to Port and Harb. Commrs. and Coll., Jos. M. McBride; Harb. Master, G. Downer; Supt. of H.M. Cust., C. Bamford; Lloyd's Agent, J. M. McBride.

WESTRAY, Orkney Islands. 59° 17′ N ; 2° 50′ W. **Auth.** Orkney Harbour Commrs., under Act of 1887. Gill Pier is 400ft long ; 10ft water outer end of pier LWOST. 11ft rise and fall. The Bay of Pierawall, in which Gill Pier is situated, affords excellent shelter for vessels of 150 tons and under, and Pierawall roadstead shelter for almost any size. **Charges.** Chief Exports, dry fish, charges 1/ per ton, and kelp 8d per ton ; eggs, 4d per box of 150 doz., and cattle 4d each ; Imports, coal, 6d per ton. Dues, 3d per ton under 100, 4d to 150, and 6d over 150. **Official.** Harb. Master, James Scott.

WEXFORD, Co. Wexford. Four miles from entrance to harb. Lat. 52° 20′ N; long. 6° 25′ W. **Pop.** 12,055. **Auth.** Harb. Commissioners, under Act, 1874. **Tr.** I. Timber, coal, corn, flour, salt, &c.; E. Pitwood, malt, oats, barley, etc. **THW.** at town 7h 21m; Sp. rise 5ft; N. rise 3½ft. **D.** on bar at LWST. 8ft. **D. at En.** 13ft OST., and 20ft abreast quays. **W.** prev. S. and SW., most dangerous E. and NE. **LV.** 14½ft to 15ft dft. at **HW.,** good ST. ; no vessels enter at **LW. Accn.** A natural harb. ; there are neither piers nor docks. There is 2,475ft of quayage, and the general depth of water is from 6ft to 13ft. Two hand cranes. There is a patent slip 360ft long and 58ft wide. **Ry.** D.W. & W. **Charges.** Tonnage dues, sailing 4d reg. ton, steamers 6d. Rates on cargo. Loading and discharging about 2d. **Pilotage.** C. **District :** The area within an imaginary line drawn straight from Blackwater Head to the northern end of the Long Bank, thence along the western edge of said bank to its southern end, and thence straight to Greenore Point. **Rates** per reg. ton. Every vessel entering district, and discharging or loading any cargo, or without discharging any cargo, taking in any additional cargo, in the harb. or in Rosslare, and then going out of the said district, inward and outward together, 5d. Entering district, and discharging any cargo in the harb. or Rosslare, but not taking in any cargo, inward, 4d. Going out of district with cargo, but not having entered with cargo, outward 4d. Entering or going out of district in ballast, not having paid any of the foregoing rates, for inward or outward, 1d. Coming within district by reason of stress of weather or other cause, but not discharging or receiving any cargo within such limits, inward or outward, 2d reg. ton. And in addition to the above rates :—From or to any point outside district, for every vessel not ex. 100 reg. tons £1 ; for every vessel ex. 100 reg. tons and not ex. 200 reg. tons £2 ; for every vessel ex. 200 reg. tons £2 for the first 200 reg. tons, and £2 additional for every 100 reg. tons beyond the first 200 reg. tons. **Towage.** Quay to bay, or *vice versâ,* 6d reg. ton. Island side to bay, or *vice versâ,* 5d. Island side to quay, or *vice versâ,* 3d. Vessels in ballast, in, out, or any portion of the way, 2d per reg. ton. Min. charge 10/. Outside of above limits by special agreement. **Officials.** Sec. to Commrs. and Coll. of Rates to Commrs., P. J. Horan ; Harb. and Ballast Master, Capt. Busher; Supt. of H.M. Cust., R. Houston ; Lloyd's Agents, Jasper Walsh & Co.

WEYMOUTH, Dorset. Lat. 50° 36′ 30″ N; long. 2° 26′ 40″ W. **Pop.** 20,000. **Auth.** Town Council, under several local Acts. **Tr.** General. **THW.** at Portland Br. 7h 1m; Sp. rise 7ft; N. rise 5ft. **D.** on bar 12ft LWST. **W.** prev. SW. **Rys.** G.W. and L. & S.W. **LV.** 1,161 net tons at **HW.** and 500 tons at **LW.** **Accn.** The River Wey divides the towns of Weymouth and Melcombe Regis, and from its mouth a stone pier runs out ENE. for about 283yds. The N. side of the entrance is protected by a stone pier running out E. by S., and from its end a pile pier extends 300ft. Depth of water in harb. 12ft **LW.** and 18ft HWST. Area of harb. E. of bridge 19¾ acres, W. of bridge 27 acres. Extensive improvements have been made to give increased depth for an improved service to the Channel Islands by the G.W. Ry., which run daily each way in summer and alternate days in winter. Two 10-ton and smaller cranes. Three small slips. **Charges.** Harb. dues 3d ton; in and out, windbound, 3/. **Pilotage.** C. District: From S. Alban's Head to Lyme, and *vice versâ*. **Rates** per foot:—Inwards or outwards. From a line drawn from Lulworth to the outer part of the Race or Shambles, into Weymouth or Portland Roads or Bay from Weymouth or Portland Roads or Bay into Weymouth Harb., from sea into Lyme Harb., 10ft and under, 2/6, above 10ft, 3/ per ft. The pilot must, if required, provide a boat with four men to attend vessel from the Roads to the quay, or *vice versâ*, to tow her in or out, or carry ropes on shore, or to the posts, &c., as may be necessary, for which each man is to be paid 4/ per tide; the owner of the boat to be paid the same as a man. A pilot taken on board at sea shall be entitled to the following additional pay:—From St. Alban's Head or Bill of Portland, to off Bridport or Lyme, £2 2/; if three leagues from the limits of Weymouth, Bridport, or Lyme £3 3/; if six leagues from the limits of Weymouth, Bridport, or Lyme £4 4/; if ten leagues from the limits of Weymouth, Bridport, or Lyme £6 6/. Steam vessels calling at Portland for coal only to pay for pilotage into and out of Roads 2/ per foot for vessel—dry of water. **Towage.** As per agreement with Messrs. Cosens & Co., Weymouth. **Officials.** Harb. and Pier Master, Robt. A. Ayles; Coll. of H.M. Cust., M. A. Learey; Lloyd's Agent, H. W. Hemmings.

WHIDDY HARB., Bantry Bay, Ireland. Secure and well sheltered for large ships.

Commrs., under Act of 1887. **W.** prev. and most dangerous NW. and NE. **Accn.** A stone pier 614ft long, carried out to 10ft **LW.** and 22ft HWST. Vessels of 7ft draught come alongside at all times of tide, and vessels of 13ft 6in at **HW.** **Official.** Harbour Master, David Chalmers, jun.

WHITEHAVEN, Cumberland. Lat. 54° 33′ N; long. 3° 35′ W. **Pop.** 19,048. **Auth.** Harb. Commrs., constituted under "The Borough and Harb. of Whitehaven Scheme," 1894. **Tr.** I. Grain, timber, cattle, hides, iron ore, coke, and general; E. Coal, iron-ore, pig-iron, steel rails, leather, quarry stone, and general. **THW.** 11h 14m; Sp. rise 26ft; N. rise 19ft. **D. at En.** 20ft OHWST., 14ft OHWNT.; at quay berths in tidal harb. 16ft OHWST., 12ft. OHWNT. **W.** prev. SW.; most dangerous W. and NW. **LV.** about 3,000 tons burden. **Accn.** A tidal harb. with wet dock, enclosed by piers, and divided into the Outer, Inner, N. and S. The Queen's Dock is 4¾ acres in extent, entrance 50ft wide at quay level, 44ft at top of invert. Quayage space, harbour and dock, 8,992ft. Extensive shed accom. **Rys.** L. & N.W., and F. Steam cranes: Three of 5 tons, four of 2 tons; hand cranes—one of 2 tons, four of 1½ tons, two of 1 ton. Steam tug. **Charges.** Tonnage rates: Inwards, for every vessel with a cargo from any port in the United Kingdom, the Isle of Man, or the Channel Islands using tidal harb. only, 3d per ton reg.; ditto, using wet dock, 4d; for every vessel with a cargo entering the harb. or dock from any other port or place, 5d; for every vessel entering the harb. or dock without cargo or in ballast, 3d. Every vessel on entering shall pay an additional tonnage rate of 2d per ton reg. for cleaning, paving and lighting. Outwards, for every vessel clearing, with a cargo on board, for any port in the United Kingdom, the Isle of Man, or the Channel Islands, 5d; for every steamer clearing with a cargo of iron or steel for any port between the River Elbe and Brest inclusive, 3½d; for every vessel clearing with a cargo for any other port or place but which entered with a cargo, 5d; for every vessel clearing with a cargo on board for any other port or place, but which entered without a cargo, 6d; for every vessel clearing without a cargo, 5d. All vessels put into harb. through stress of weather or for examination and/or repairs, shall pay half the above dues; except in the case of cleaning, paving and lighting dues, which shall be paid in full. Every steamer entering without cargo to load part cargo of iron or

steel for any port between the River Elbe and Brest shall pay half of the above dues on her net register, viz. (*d*) 1½d per ton inwards, (*f*) 1¾d per ton outwards if the cargo loaded does not exceed the ship's net register; together with full cleaning, paving and lighting dues. Every steamer entering with part cargo from any port between the River Elbe and Brest inclusive and loading part cargo of iron or steel for any port within the said limits shall be treated as entering light and pay ship's tonnage dues accordingly, namely: (*d*) 3d per ton ton inwards and (*f*) 3¼d per ton outwards when both cargoes taken together exceed the ship's net register, together with full cleaning, paving and lighting dues, and if both cargoes taken together do not exceed the ship's net register every such steamer shall pay one-half of such tonnage dues, namely—1½d per ton inwards, and 1¾d per ton outwards together with full cleaning, paving, and lighting dues. Every foreign-going vessel entering and discharging part cargo of timber not exceeding the ship's net register and leaving without loading cargo shall pay one-half of the above dues on her net register, viz.: (*c*) 2½d per ton inwards, and (*i*) 2½d per ton outwards, together with full cleaning, paving, and lighting dues. Every steamer using the outer harb. only shall pay one-half of the above dues; except in the case of cleaning, paving and lighting dues, which shall be paid in full. Every steamer entering without cargo and taking bunker coals only shall pay 2d per ton reg., and one-half of the cleaning, paving, and lighting dues. Every steamer calling for bunker coals and taking passengers only shall pay 4d per ton reg. and one-half of the cleaning, paving, and lighting dues. No vessel shall be entitled to remain in the harb. or dock for more than forty-two days, unless with the consent in writing of the Commissioners, and then only on payment of 2d per reg. ton per week or part of a week, after the expiration of the forty-two days. Every vessel entering or leaving the harb. having gunpowder or dynamite or other explosives on board will be charged for tonnage dues not less than £1. The Harb. Authority provides hoppers with which ballast can be discharged at 8d per ton. **Pilotage.** C. Rates, from 3/9 per foot and upwards according to draught, both inwards and outwards. (See also Maryport.) Harbour boat, belonging to the Harb. Authority, attends all vessels entering the harb. for which a tonnage charge is made. **Towage.** When tug is used: All coasting vessels 1½d per ton, and all foreign vessels 2d per ton within certain limits. **Officials.** Clerk to Harb. Commrs., J. Tyson; Harb. and Dock Master, A. Irving; Supt. of H.M. Cust., ————; Lloyd's Agents, J. and W. Jackson.

(I.). **Charges** 1d per ton, windbound ½d per ton. **Pilotage.** As may be agreed. **Officials.** Harb. Master, C. P. Carroll; Sec., J. J. O'Shea; Lloyd's Agent, T. Farrell.

II.—COLONIAL AND FOREIGN PORTS.

THE PORT DIRECTORY IS REVISED AND CORRECTED from the latest particulars supplied by the Port and Harbour Authorities, and from the last official sources; and every care is taken to ensure absolute accuracy. But the Editor, and those who supply him with the information, disclaim all responsibility for error.

For EXPLANATION OF ABBREVIATIONS *see page* 365.

NOTES.—Because of the War, it has not been possible to verify and perfect the information given respecting the ports of Germany, Austria and Turkey for the 1915 edition of the "Shipping World Year Book." Therefore the information given respecting accommodation for vessels, charges on shipping, etc., necessarily remains the same as before the commencement of the War.

At the time of going to press with the Ports Section of the Year Book, most of the ports of Belgium were occupied by German troops. In the current edition of the Year Book, however, these ports are still treated as Belgian ports; and the information given remains the same as before the outbreak of hostilities.

Caution when approaching Canadian ports.—The Canadian Government, having taken into consideration the fact that local or other circumstances may arise in which it may be necessary to forbid all entrance to certain ports of the Dominion, give notice that on approaching the shores of Canada or any of the ports of Halifax, N.S., Quebec, Que., or Esquimalt, B.C., a sharp look-out should be kept for the following signals. If entrance to a port is prohibited, three RED vertical lights by night, or three RED vertical balls by day, will be exhibited in some conspicuous position in or near to its approach, which signals will also be shown by vessels charged with the duty of examining ships. If these signals are displayed, vessels must either proceed to the position marked "Examination Anchorage" on the Admiralty charts and anchor there, or keep the sea.

Export charges on ore, at all Norwegian ports are payable by the vessel loading same at the rate of 25 ore per ton on net reg. tonnage.

Dues at all Queensland ports—see Brisbane.

Pilotage at all Virginian ports—see Newport News.

AALBORG, Denmark. Lat. 57° 03′ N.; long. 9° 57′ E. **Pop.** 34,000. **Auth.** Aalborg City. **Tr.**—I. Coal, salt, lumber, artificial manure, wheat, rye, maize, oilcake, and petroleum; E. Cattle, grain, wool, hides, dairy produce, cement, chalk, hay and straw, etc. **Accn.** The entrance at Hals is 24ft. and the same depth is maintained to the harb., dredged channel at bottom 180ft. wide. harb. 7 to 9 fms; numerous flat deck lighters. Port sheltered from all winds. Extensive quayage still in course of construction in the Arrière Port of L'Agha. Quay length of about 2,000ft., depth 22 to 30ft.; extensively used by vessels loading iron ore. The island of Al-Djefna, in the middle of the port, is now being joined to mainland. Quayage 1,800ft. A mole of about 1,500ft. now exists SE. from the Fort du Conde, and is being extended, enclosing an area of about 2,500ft. square, with new entrance at South, as well as the old Northern one. Two Government dry docks available for merchant vessels, one 428 ft. long, 86ft. wide, depth on sill 29½ft., the other 248ft. by 72ft., on sill 21ft. **Charges.** Health dues, 10c per reg. ton. when steamer comes from European port, 15c from other ports; Quay dues, when quantity discharged does not exceed one-tenth of steamer's reg. ton., 5c; not exceeding one-fourth, 12½c; not exceeding one-half, 25c; over one-half, 50c. **Pilotage.** 3c per ton net on all vessels inwards, half rate outwards. **Officials.** Harb. Master, La Salle; Lloyd's Agent, F. M. Burke, with jurisdiction from Tenes to Philippeville, inclusive; British Consul-General, B. Cave, C.B.; Vice-Consuls, H. S. London and L. G. Scott.

ALGOA BAY (Port Elizabeth), Africa. Lat. 33° 57′ 44″ S; long. 25° 37′ 16″ E. **Pop.** 35,000. **Auth.** South African Railways and Harbours Administration. **Tr.**—I. General; E. Wool, skins, hides, mohair, horns, ivory, feathers, aloes, maize, asbestos, fruit. **W.** From March to October NW. and W.; from October to March SE. **Accn.** Anchorage (open to SE.) in from 6 to 8 fms, good holding ground, sand over clay. Cargoes principally landed by lighters. Steamers drawing not more than 21ft. and not exceeding 350ft. in length, and sailing vessels not exceeding 1,200 reg. tons may be taken alongside the jetties to be discharged. These jetties are 1,150, 1,160 and 1,462ft. long respectively, and are equipped with hydraulic cranes of from 2½ to 7 tons, and also a 20-ton crane. There is a balast shute. Also a patent slip to take vessels up to 400 tons d.w. **Charges.** No harb. or light dues. Loading or unloading, 1/6 to 4/ per ton at jetty; in roadstead 3/ to 5/ per ton. The higher rates include delivery to or collection from merchants' warehouses in town. **Pilotage.** NC. Per tariff. **Officials.** Port Goods Supt., A. Kinmont; Marine Supt., Capt. W. E. Clift.

ALICANTE, Spain. Lat. 38° 22′ N.; long. 0° 30′ W. **Pop.** About 50,142. **Tr.**—I. Coal, iron goods, petroleum (crude), dried codfish, timber, and gen. merchandise; E. Wine, lead, almonds, liquorice root, saffron, etc. **Accn.** **D.** at **En.** and inside port 22ft. Good anchorage in the roads. Two cranes on mole, 15 and 8 tons respectively. Cargo generally loaded by lighters. Improvements progressing. **Charges.** (See Cadiz for tax on Transports). **Pilotage.** In and out, 10 to 40 pes up to 2,000 tons. Mooring by scale, 4 to 15 pes up to 1,500; over this 50c per 100 tons; foreign sailers extra. **Officials.** British Vice-Consul, J. Tato; Capt. of Port, A. Riera.

ALKMAAR, Netherlands. Lat. 52° 38′ N. ; long. 4° 43′ E. **Pop.** 20,500. This port is situated on the North Holland Canal, and has a depth of water of 16½ft. I. and E. chiefly goods in passage. **Official** and **Port Auth.** H. T. Bolhast.

ALLEPPY, India. Lat. 9° 30′ N. ; long. 76° 20′ E. **Pop.** 30,000. **Tr.**—I. Salt, grain, metals, piece goods ; E. Cocoanut oil, matting, turmeric, mats, copra, coir, ginger, fish, cocoa nuts, flour, pepper, arrowroot, croton seed, wood, etc. **Accn.** The anchorage is about 4 fms, soft mud bottom; buoyed. Pier 756ft. long. **Charges.** Port dues ¾ anna per ton for steamers once every 30 days; sailers 60 days. Vessels entering and leaving within 7 days without discharging or loading cargo or passengers pay only half port dues; those entering in ballast pay three-fourths. Pier toll 1a per Candy. **Officials.** Port Officer and Customs Inspector.

ALMERIA, Spain. Lat. 36° 51′ N.; long, 2° 32′ W. **Pop.** About 50,000. **Tr.**—I. Coal, coke, machinery, staves, timber, etc.; E. Minerals (especially iron ores), esparto, and grapes. **Accn.** The western mole extends already over 2,000yds, making a safe port, where vessels of all sizes can enter and load. There are 440yds of quayage available for vessels drawing 25ft. **D.** 8¼ fms at entrance; at end of West breakwater, 47½ft.; at pier heads, 35ft. to 37ft.; at quay, 16½ft. to 26ft.; at E. mole, 26ft. to 27ft.; and W. mole, 4ft. to 25ft. Breadth 984ft. E. mole now completed. Electric cranes will probably be erected early next year. **Charges.** (See Cadiz for transport dues.) Mole dues: Vessels from European, Mediterranean and Atlantic ports (to Mogador), 0.625pes per ton of 1,000 kgs; other ports, not Spanish, 1.25pes. These are charged: when 50 per cent. of the tran port dues exceed the mole dues; if it does not, 50 per cent. of the transport dues is charged as mole dues. Iron ore pays only 12.50c for the mole dues. **Rly.** to Madrid direct. **Pilotage.** C, inwards and outwards, each, for vessels over 50 tons; 51 to 100 tons, 9 pes; 101 to 500, 16pes; 501 to 1,000, 26 pes; 1,001 to 1,500, 35 pes; 1,501 to 2,000, 43 pes; 2,001 to 2,500, 50 pes; 2,501 tons upwards, 5 pes for each 500 tons or fraction thereof. Mooring—51 to 100 tons, 5 pes; 101 to 500, 10 pes; 501 to 1,000, 12 pes; 1,001 to 2,000, 15 pes; 2,001 tons upwards, 5 pes for each 500 tons or fraction thereof. **Officials.** Captain of the Port, D. José Quintas, 1st Naval Lieutenant, Royal Spanish Navy; British Vice-Consul, J. Murison; Health Officer, Don Eugenio Pastor.

ALTONA, Germany. Lat. 53° 32′ N.; long. 9° 56′ E. **Pop.** 168,320. **Tr.**—I. Coal, fish, timber, stone and hides; E. Grain. **Accn.** Three harbs. Westhafen, Osthafen and Fischerei-Hafen. **D.** in two first named 26ft. HWOST, 19½ LWOST. The Fischerei-Hafen is for trawlers and smacks, Numerous steam cranes up to 15 tons, and a floating dry dock capable of lifting vessels of 520 tons. **Charges.** Mooring, 10/ to 20/. Harb. dues, 2 to 10pf per cubic metre. **Pilotage** Same as Hamburg. **Towage.** £2 per shift.

ALVARADO, Mexico. Lat. 18° 52′ N.; long. 95° 50′ W. **Pop.** 5,000. **Tr.**—E. Cedar, mahogany, fustic, and cattle. **Accn.** Depth at bar at mouth of river Papoalapam 1½ miles from town, from 10 to 12ft. Large ships anchor outside bar. **Charges.** On a vessel of 200 tons, drawing 10ft., from Vera Cruz, calling in ballast, light dues having been paid at Vera Cruz, £33 3s 7d.

AMBOINA, Molucca Islands, East Indies. Lat. 3° 40′ S.; long. 128° 14′ E. **Pop.** 9,000. **Tr.**—E. Cloves. **Accn.** A good and safe anchorage in about 20 fms water, about 2 cable-lengths from the shore; and a pier with 18ft. of water at the extremity. An inner harb. almost land-locked, but not considered healthy.

AMOY, China. Lat. 24° 30′ N.; long. 118° 9′ E. **Pop.** 114,000. **Auth.** Harb. Master, under Chinese Maritime Customs. **Tr.**—I. Cotton, matches, foodstuffs, stockfish, bean cake beans, flour, kerosene oil, rice, wheat; E. Earthenware, tea, sugar, sugar-candy, paper, tobacco, grass cloth, alum, gold-leaf, etc. **Accn.** The harb. is well sheltered, and can receive vessels of the largest dft. Anchorage on south side in 14 fms, north side in 7 to 8 fms. There is a dock, 360ft. by 60ft., with 16½ft. on sill at HW. Loading and discharging by boats. **Charges.** Tonnage dues: under 150 tons, 1 mace (1-10th Haiknan tael) per reg. ton; over 150 tons, 4 mace (4-10ths Haiknan tael). Special charges made by I.M. Customs for working cargo after hours (6 p.m.), and on holidays. **Pilotage.** Sailers, under 400 tons, any pilotage operations, $10; over, 2½cts per reg. ton. Steamers, under 650 tons, $10; over 1½c per reg. ton. Steamers not under steam, same as sailers. **Officials.** British Consul, H. A. Little; Lloyd's Agents, Boyd and Co.

AMSTERDAM, Holland. Lat. 52° 22′ 17″ N.; long. 4° 53′ 15″ E. **Pop.** 577,000. **Tr.**—I. Sugar, coffee, petroleum, spices, tobacco, cotton, tea, indigo, cochineal, liquors, wool, grain, rice, seeds, timber, naval stores, hides, coal, manufactured goods, etc.; E. Produce of Holland and possessions in the E. and W. Indies, butter, margarine, cheese, liqueurs, moss litter. **Accn.** A spacious and secure harb.; the largest ships come up to the quays and warehouses. En. to harb. by North Sea Canal from Ymuiden, the depth of canal and of larger docks being 29ft. The canal has been dredged to 33ft. Vessels can enter Ymuiden at all times, night or day. The new lock at the entrance to the North Sea Canal at Ymuiden is 738ft. in length by 82ft. in breadth, with a depth on sill of 32ft. 9in. The docks belong to the Municipality. Ample repairing facilities, there being 3 floating dry docks 201ft. and 164ft. 10in. by 62ft. 8in. by 13ft. 2in.; also the Koning's Dock, 402ft. by 56ft. by 18ft.; the Koninginne, 401ft. 10in. by 63ft. by 17ft. 2in.; the Wilhelmina, 428ft. by 96ft. by 21ft.; and the Juliana, 459ft. long and 21ft. on blocks. Cranes to lift 80 tons and under. **Charges.** Harb. dues, steamers, 3c (Dutch) per cubic metre gross for timber; 2½c for coal, coke, pig-iron; 1¾c for iron ore; 4½c other cargoes. **Pilotage.** Sailing vessels drawing 19ft., £14 in summer and £18 in winter from sea to

Ymuiden Harbour; outward, £10 in summer, £11 4s in winter. Steamers drawing 19ft., sea to Ymuiden, £12 5s in summer, £15 18s in winter; outward, £9 2s in summer, £9 16s in winter. From Amsterdam to Zaandam to Ymuiden Harbour and *vice versa*: Sailing vessels drawing 19ft., £2 5s 6d in summer, £2 13s in winter; steamers drawing 19ft., £1 18s 3d in summer, £1 5s 3d in winter. **Towage.** From sea to Ymuiden, £10 per 500 tons gross tonnage or less, and 5d for every other ton; to Amsterdam, £15 per 500 tons gross tonnage or less, and 6d for every other ton. To Zaandam same tariff as Amsterdam, less 5%. **Officials.** British Consul, J. J. Broderick; Vice-Consul, E. J. Labarre; Harb. Master, C. L. J. Kotting.

ANCONA, Italy. Lat. 43° 36′ N.; long. 13° 31′ E. **Pop.** 63,000. **Tr.**—I. Coal, sugar, dry goods, drugs, jute, etc.; E. Hides, hemp, silk, walnut wood, and asphalt. **Accn.** A harb. to receive vessels of large tonnage, drawing 24ft. of water. Vessels drawing 26ft. may discharge alongside quays, which are 950ft. long. One 8-ton crane. **Charges.** Harb. dues, 1.45 lire per reg. ton. Discharging coals 75 to 85c per ton, other goods or merchandise from 0.75 to 1.20 lire. **Pilotage.** NC. From a min. of 15 to a max. of 150 lire, according to tonnage. Mooring 5 lire for each man required. **Officials.** Harb. Master, E. Mandillo; British Vice-Consul, E. A. Kane.

ANECHO, Africa. Lat. 6° 12′ N.; long. 1° 32′ E. **Tr.**—I. All kinds of goods; E. Palm oil and palm nut kernels, maize, cotton, rubber. **Accn.** The road is now closed by Govt. and all goods have to go and come by rail via Lome. Good anchorage in 6 fms of water, sand and clay bottom. From July to end of October it is safer to anchor further out in 8 or 9 fms. **Charges.** Duties on goods imported and exported at varying rates. **Official.** Lloyd's Agent, F. H. Richers.

ANGOSTURA, Venezuela. This place is now called **Ciudad Bolivar,** which see.

ANNAPOLIS, Maryland, U.S. Lat. 38° 57′ N.; long. 76° 29′ W. **Pop.** 10,000. Port of entry. **Accn.** Vessels drawing 20ft. of water can anchor in the river, and those of 12ft. dft. can lie alongside the wharves. **Towage.** See Baltimore. **Official.** Coll. of Customs, John K. Gladden.

ANTOFAGASTA, Chile. Lat. 23° 38′ S.; long. 70° 25′ W. **Pop.** About 30,000. **Tr.**—I. Coal, machinery, and all classes of merchandise for Bolivia for which this is port of entry and transit; E. Nitrate of soda, tin, silver, and copper ores, antimony, borate of lime, etc. **Accn.** The harb. is an open roadstead exposed to heavy S. to W. ocean swell, but the sea seldom breaks and strong winds are rare. During a heavy swell there is communication with the shore. The anchorage is about 15 to 40 fms of water. The bottom is very uneven and rocky; the shackles of mooring anchors should therefore be well fastened by wooden keys or pins, so as to prevent unshackling by the constant knocking on the bottom. Many vessels have lost their anchors at this port

owing to the unshackling of the chain. Discharge effected by means of launches carrying 20 to 35 tons. Discharge 40 to 75 tons per day. The heaviest weights can be landed. Eight cranes 2 to 10 tons each, and derrick up to 25 tons. **Charges.** Light dues, steamers, foreign, in or out, 60c gold (1s. 6d. = $1) per r.t. Chilian flag, and foreign coasters, one-half; ships in ballast and distress, free; sailers 40c gold. Port dues are light, and no charge for discharging or shipping, except nitrate, where £2 for every 50 tons is paid by the ship for launches. Hospital dues, payable once between January 1 and December 31, 10c in gold = 1.8d per r.t. Unloading and loading charges vary very considerably and are very excessive. **Pilotage.** NC, but vessels arriving with cargo generally engage a pilot. For rates see Valparaiso. **Towage.** For ships loaded giving them offing: 150 to 1,000 tons reg. £1 10s to £5, over 1,000 tons reg. conventional; ships in ballast 150 to 1,000 tons reg. £1 to £4 10s, over 1,000 tons conventional; taking ships from moorings to single anchorage 150 to 1,500 tons 12/ to £2 10s, over 1,000 tons from £5 ships in ballast to sea to £8 for not over 1,500 tons reg., and £11 for not over 2,000 tons reg.; loaded to sea, not over 1,000 tons reg. £6, not over 1,500 tons reg. £10, and not over 2,000 tons reg. £13; towage into moorings from £2 10s to £5 10s according to tonnage. Good rly. communications. **Officials.** Intendente, Don Gayetano Astaburuaga; Port Captain and Maritime Governor, Eduardo Stuardo; Capt. Chilian Navy; British Consul, H. W. W. Bird; Lloyd's Agents, Barnett and Co.

ANTWERP, Belgium. Lat. 51° 13′ N.; long. 4° 24′ E. **Pop.** 441,012. **Tr.**—I. Cotton, sugar, coffee, hides, grain, wool, indigo, dye-woods, spices, guano, tobacco, petroleum, indiarubber, cattle, sheep, horses, china clay, ivory, seeds, and timber; E. Coal, railway, bar and other iron, arms, glass, flax, grain, marble, machinery, matches, minerals, cutlery, cement, bricks, fruit, and manufactured goods. **Accn.** Total water surface of the docks, about 229 acres; length of quays in river, 6,012yds; including dock and river-side, 23,785yds. Width of actual gates, 78ft. Vessels of from 28ft. to 30ft. dft. can moor alongside the river quays. In the nine new docks about 27ft.; in the two old docks about 19ft. 6in., depth over sills 21ft. Irregular vessels drawing under 21ft. must enter docks direct; over 21ft. must lighten to that draught in river and then dock. New docks, included in above, have an area of 69 acres and 3,300yds of quays. Depth of water in centre of dock 33ft. 9½in.; alongside quays, 30ft. 6in. Width of entrance (not locked), 172ft. 3in. Entrance lock for these docks is in two compartments of 337ft. 6in., and 243ft. in length, which can be used as one of 580ft. 6in. Depth over sills, 18ft. 10in. at LW., 32ft. at HW. 80 electric cranes at new docks. Besides these, enormous new docks and a new cut in river, converting part of present bed into dock, are projected, and two of the docks under this scheme will be opened to traffic in 1914. Graving docks, etc.: Six dry docks belonging to the town, and four private dry docks; length of largest, 506ft. Antwerp is

the chief port of Belgium. Coal tip, 25 tons; 351 cranes, including electric sheers 50 tons; hydraulic cranes, 40, 40, and 10 tons; hand crane 20 tons, and sheer-legs 120 tons. All river quays and all docks are in connection with railway system, lines running alongside. **Charges.** Discharging and loading from 3d to 1/ according to cargo; there are also stevedores' charges. Port charges for steamers, 50c per ton reg. net, Belgian measurement. **Pilotage:**

APALACHICOLA, Florida. Lat. 29° 44′ N.; long. 85° 6′ W. **Pop.** 3,100. **Tr.**—E. Hewn and sawn timber. **Accn.** Vessels of 12½ft. dft. can cross inner bar at LW. and proceed as far as lower anchorage about 6 miles from town; vessels of 11ft. can reach upper anchorage, 2 miles from town. Town wharves can only be approached by vessels drawing 11ft. and under. Dredging in progress. Good anchorage. No quays. Vessels discharge and load by lighters. **Charges.** Tonnage dues, 3c or 6c per reg. ton, except where exemptions are made. Mooring, $10. **Pilotage.** C. In and out. Per ft.: Under 6ft., $2; 6ft. to 10ft., $3; 10oft. to 14ft., $4; 14ft. to 20ft. $5. **Towage** is a matter of arrangement and very low rate. **Officials.** Coll. of Customs, A. J. Must; President Board of Trade, W. J. Owen; Lloyd's Agent, W. J. Owen.

APENRADE, Germany. Lat. 55° 2′ 57″ N.; long. 9° 26′ 38″ E. **Tr.**—I. Timber, coal etc. E. Unimportant. **Accn.** The north harb. is alongside the quay, with 17ft.; the south harb., about 14ft. alongside the landing stages; falling 3ft. to 4ft. with strong westerly winds. Alongside

the quays run the Royal State and Circuit Rlys; vessels can unload directly into trucks. Two electric elevators for discharging small corn ships. **Charges.** Fresh water at the quay, 1/ per ton. Harb. dues, vessels up to 200c.m., steamers, 6pf per c.m. if loaded, and 3pf per c.m. if light; sailing vessels 5pf and 2pf respectively. Above 200c.m. steamers, 12pf per c.m. if loaded, and 6pf per c.m. if light; sailing vessels, 10 and 5pf respectively. **Pilotage.** NC. Charges per tariff. Tugs by arrangement. **Official.** Harb. Master, J. A. C. Bruhn.

APIA, Upolu Island, Samoan Group. Lat. 13° 52′ S.; long. 171° 43′ W. Anchorage in 5 to 7 fms, sand bottom, for vessels of large size. Cannot sail to anchorage in SE. or SSE. winds. Sp. rise 4ft. No quays or berths. **Charges.** Clearance fees, 8 marks. **Pilotage.** 4 marks per foot in, same out. **Officials.** Harb. Master and Pilot, O. Robeck; Acting British Vice-Consul, T. Trood.

ARACAJU, Brazil.—Lat. 10° 50′ S.; long. 37° 5′ W. On river Continguiba. Bar 11ft. to 15ft. **Official.** British Vice-Consul, T. Ferraz.

ARCHANGEL, Russia. Lat. 64° 33′ N.; long. 40° 33′ E. **Pop.** 27,000. **Tr.**—I. Coal, salt, fish, hardware, machinery; E. Sawn timber, props, pulpwood, oats, rye, linseed, linseed cakes, wheat, deals, flax, tow, mats, oil, pitch, train oil, turpentine, tar, and grain from Siberia. **THW.** Varies. About 1h. later each day. Sp. rise 2½ft. **Accn.** The town channel has a depth of 22ft. and the bar channel 23ft. Vessels drawing up to 21ft. must cross bar and shoal in two tides; vessels of 20ft. and less may enter in one tide. Dredging continually all summer. Navigation open from middle May to about October 20. Post to England 6 days. Govt. dry dock, largest vessel admitted, 287ft. by 40ft. by 13½ft., basin 252ft. by 12ft. to 15ft. dft. for small craft. Mourmann Dry Dock: largest vessel admitted 238ft. by 52ft. by 14ft. Two new slips (Ellings) with winter harbour. **Rlys.** Archangel-St. Petersburg and Archangel-Moscow, one train per day each way; Perm (in connection with Siberian Rly.), Viatka, Kotlass on this river, Northern Dwina. **Charges.** Tonnage dues, 30 copecks per reg. ton; covered underbridge-space is added to the quantity of reg. tons stipulated by the register certificate; address com. 55 copecks per ton. Sailing vessels discharging solid ballast, 43 copecks per ton. Ships can clear inwardly and outwardly at the port Customs-house at Solombola. **Pilotage.** C. Ships in ballast, 4 copecks per reg. ton, with cargo, 5 copecks, in or out. ½ to 3 copecks per reg. ton additional above Solombola, and ½ to 5 copecks for shiftings, according to distance. **Towage.** 50 to 100 roubles from port to sea, ships and steamers. **Lighterage.** Deals, 4½ roubles per standard; oats, 2.10 roubles; linseed, rye and wheat, 1.80 roubles per ton; tar, 30 copecks per barrel. **Stowage.** Flax, stowed by screwing, 2 roubles 20 copecks per ton; tow and codilla, 3 roubles 80 copecks per ton; tar, 7 copecks per barrel; pitch, 8 copecks per barrel; deals, 1 rouble 20 copecks per standard; oats, linseed, rye and wheat, 2.75 roubles per 1,000 poods; pulpwood and props, 1 rouble 60 copecks per

cubic fathom. Custom of the port; Per workable winch and hatch per day, oats and wheat, 20,000 poods; other grain goods, 25,000 poods; oilcakes, 10,000 poods; flax, 100 tons. Per winch per day, pitch, 300 barrels; turpentine, 200 barrels; tar, 400 barrels; deals and battens, 20 stds; boards, 15 stds; ditto under 1in., 12 stds; board ends, 10 stds; round logs, 20 tult; pulpwood and pitprops, 25 Eng. cub. fms.; sleepers, 1,000 pieces; sleeper blocks, 700 pieces. **Officials.** Governor, S. D. Bibkoff; Chief of Commercial Port, River Police, etc., A. A. Novinsky; Director of Lighthouses and Pilots of the White Sea, Col. Prestin; Director of Customs, Ostrofsky; British Vice-Consul, T. Woodhouse; Lloyd's Agent, Bruno Paetz.

ARECIBO, Porto Rico. Lat. 18° 30′ N.; long. 66° 37′ W. **Tr.**—I. Cotton goods; E. Sugar and West India produce. Harbour inside reef, **D.** 20ft. to 24ft. **Pilotage.** Under 15ft., $1; over 15ft. $1.25. Loading and unloading, 25c per man per hour. **Official.** Captain of the Port.

ARENDAL, Norway. Lat. 58° 27′ 30″ N.; long. 8° 47′ 29″ E. **Pop.** 12,000. **Tr.**—E. Iron ores, timber pulp, sawn wood, copper, iron, and lobsters. **Accn.** The harb. has from 8 to 20 fms. of water. Depth about 87ft. Great facilities for coaling steamers of any size; coals cheap. Fine slip for vessels up to 4,000 tons. **Charges.** Dues 6½d per ton reg.; when loaded in ballast, no charge. **Pilotage.** From 20 to 90 kroner (18kr.=£1) according to size. **Towage.** Charges moderate; tow boats always ready. **Official.** British Vice-Consul, E. Kallevig; Lloyd's Agent, W. Kallevig.

ARENSBURG, Russia. Lat. 58° 15′ N.; long. 22° 30′ E. (On Is. of Oesel.) **Pop.** 5,000. **Tr.**—I. Coal, dried skins, tanning wood, etc.; E. Timber. **Accn.** Good anchorage. Vessels drawing 12 to 13ft. can load at quay. **Charges.** Tonnage dues 30 cps. per reg. ton. Custom Office dues, 30 cps. **Pilotage.** 90 cps per ft. dft. in and out. **Towage.** To and from ballast ground, 5 rbls 50 cps.

ARGOSTOLI, Greece. Lat. 38° 10′ N.; long. 20° 29′ E. **Pop.** 10,000. **Tr.**—E. Currants, wine, and olive oil ; E. Grain, breadstuffs, cotton, linen and woollen fabrics, coffee, sugar, dried and pickled fish, groceries, iron, hardware, timber, hides, leather, sulphur, etc. Argostoli and Lixuri are usually considered (in charter parties) as one loading port. **Accn.** Anchorage in 3 to 5 fms close to the town, now deep near quay, depth greater and anchorage good at entrance to harb. **Charges.** Light and harb. dues, 2¾d to 9½d per reg. ton, according to quantity of cargo loaded or discharged. The charge for stowing is 1/3 per ton gross for currants, wine, and olive oil. The charge for the superintending stevedore is 8/ per day, labour dear. Coal is discharged at 1/3 per ton. **Pilotage.** Harb. pilotage NC., but if a pilot be required, the usual charge is £1. **Towage.** There are no tugs at this port, but the ferry-boat that runs between Argostoli and Lixuri is occasionally employed to tow vessels into or out of Argostoli harb., for which the usual charge is £1. **Officials.** Harb. Mast., D. Pharmakis, sub. lieut.; British Vice-Consul (Cephalonia), J. Saunders.

ARICA, Chili. Lat. 18° 28′ 5″ S.; long. 70° 20′ 30″ W. **Pop.** 4,500. **Tr.**—E. Wool, cotton, salt, sulphur, and mineral ores. **Accn.** Open roadstead. Vessels anchor in 6 to 10 fms, and are loaded and discharged by lighters. One crane on old mole to lift 3 tons. New mole with three 3-ton cranes. As this is the most northern port in Chili, vessels coming from the north should pass the sanitary authorities here if visiting any Chilian port and when n cessary they will be fumigated. Charge for fumigation, 1d per n.r. ton; min. £5. **Charges.** Loading and unloading merchandise, $4 per Spanish ton. Hospital dues, 10c gold of 18d dollar; light dues, 60c. do. steamer. Sailers same hospital, but 40c lights. Stevedoring about $6 currency per 1,000 kilogs. **Pilotage.** Not required. **Officials.** British Vice-Consul, G. de M. Mackirdy; Lloyd's Agent, A. F. Lee.

ARUBA. An island off the coast of Venezuela. Lat. 12° 31′ N.; long. 70° 2′ 30″ W. **Pop.** 10,000. The chief ports are Paardenbaai at Orangestad and St. Nicolas. **Tr.**—E. Aloe, peanuts, skins, phosphate, gold, salt, etc. **Accn.** **D.** at **En.** 22ft. OT.; at berth, 8 fms. **L.V.** ss. *Gelderland*, 1,539 tons. Iron pier which can be used free. **Charges.** No charges or dues, except 1 florin (1s 8d) for all vessels leaving port. **Official.** Harb. Master.

ARZEU, Algeria. Lat. 35° 53′ N.; long. 0° 19′ W. **Pop.** 2,500. **Tr.** E. Salt, corn, esparto grass, cattle and wine. **Accn.** Good and well-sheltered anchorage in 4 to 8 fms of water. Quays with cranes to 3 tons, and a floating derrick to 7 tons. **Charges.** Same as Oran. **Officials.** British Vice-Consul, J. Madden; Lloyd's Agent, J. L. N. Cramer.

ASTORIA, Oregon (see also Columbia River), **U.S.** Lat. 46° 16′ 29″ N.; long. 124° 3′ 11″ W. The Port of Entry for all Ports on the Columbia and Williamette Rivers; all vesels are required to make entry at Astoria. The only freshwater seaport on the Pacific Coast. Situated at the mouth of the Columbia River, 16 miles from the sea. **Pop.** 15,000. **Tr.**—I. Coal and flax twine for fish nets; E. Lumber and salmon. **Accn.** There is a lightship "Columbia River No. 88," anchored 3 miles W. and S. of en. to Columbia River, shows 2 fixed white lights visible 12 miles, steam blasts of 2 seconds three times every minute in foggy weather. Lightship Lat. 46° 11′ 50″ N.; Long. 124° 10′ 43″ W. A good anchorage at Astoria for vessels to lie at all times. **D.** at **En.** 28ft. to 30ft. at low water; width at entrance about 2 miles, but maximum depth is about ½ mile in width. Average rise of tide, 8ft. There are 2,000ft. of quayage front, with a depth of from 22ft. to 42ft. at low water. One crane for discharging coal capacity 350 tons per 10 hours. Harb. land locked. Wharfage under construction with 1¼ miles frontage and 35ft depth alongside at LW. **Charges.** No harb. dues other than U.S. Govt. tonnage dues of 6c (3d) per reg. ton. For loading, flour and wheat 35c or 1/5 per ton of 2,240lbs. preserved salmon 45c or 1/10 per ton ditto, timber or lumber $1 10c or 4/6 per 1,000ft. board measure. Discharging, coals 37½c or 1/7 per ton of 2,240lbs, general cargo 35c per ton ditto,

ballast 32½c per ton ditto, cost of lining 30/ per 1,000ft. **Towage.** To and from sea: 500 to 700 tons net reg. £53; 701 to 750, £58; 751 to 850, £58; 851 to 1,000, £58; 1,001 to 1,200, £63; 1,201 to 1,500, £68; 1,501 to 1,800, £74; 1,801 to 2,000, £79; 2,001 to 2,500, £84; 2,501 to 2,750, £89; 2,751 to 3,000, £89; 3,001 to 3,500, £99. Hawser each way, £3. **Pilotage.** N.C. From and to sea, paid in the towage, but charge is 10/ per ft. and ½d per ton. Harbour moves, £4 each move for each boat used. Steamer, £5 each harbour move. Wharfage, £3 per day. **Official.** British Vice-Consul and Lloyd's Agent, E. M. Cherry.

AUCKLAND, New Zealand. Lat. 36° 10″ S.; long. 174° 47″ E. **Pop.** with suburbs 110,000. **Tr.**—I. Manufactured goods, soft goods, groceries, oilmen's stores, ship chandlery, ironmongery, etc.; E. Gold, timber in spars and sawn, Kauri gum, flax, wool, oil, hides, tallow, rope, frozen meat, fish, fruit, butter, cheese, etc. **Accn.** Auckland Harb. consists of an extensive land-locked estuary at the southern end of the Hauraki Gulf, on the east coast of the North Island of New Zealand. The outer harb. commences at Rangitoto Reef, 3 miles from the North Head, a promontory which forms the northern boundary of the inner harb. (known as Waitemata). The inner harb., from North Head to Kauri Point, is about 5¼ miles long by a width varying from 1 mile to ⅓ of a mile on the 1 fathom line. The upper reaches of the harb. from Kauri Point extend about 8 miles. The depth in the harb. ranges up to 12 fms, with good holding ground. The range of tide is from 8ft. to 12ft. The harb. is sheltered from all winds by an outlying chain of islands and the peninsula above referred to. The deep channel at the approach has a width of over 1 mile at the Rangitoto Reef, with half a mile at the narrowest part. The least depth in the centre of the channel is 31½ft. LWST. and 41½ft. at HW. Electric capstans and twelve electric cranes of 5 tons each have been installed on the main wharves. There is an 80-ton floating crane. Rails connecting with the Govt. rly. service are laid upon several of the main wharves. Large freezing works and timber mills are in close proximity to the berths. The Board has a powerful twin-screw steam tug, and there are also steam tugs duly licensed, and several river steamers acting as tugs when required. There is also a powerful tug and salvage float. An abundance of pure water is available at all the wharves. Depth at the berths varies up to 33ft. LWOST. There are two docks the property of the Auckland Harb. Board. The dimensions of *Calliope Dock* on the morthern shore are as follows:—Length from coping at head of dock to bilge of cassion, 566ft.; length on floor, 500ft.; width over all, 110ft.; width at entrance at level of coping, 80ft.; width at level of blocks, 4ft. 6in. high, 65ft. 7½in.; depth on sill HWOST., 33ft. A complete equipment of modern machinery has been installed (to Admiralty specification) which will enable any repairs to naval or merchant vessels to be undertaken. 80-ton sheer-legs have been erected adjoining the dock. The berth at the Calliope Dock Jetty has been dredged to 33ft. Fresh water is available at the

dock and jetty. The dimensions of the *Auckland Dock* on the southern shore are as follows :—Length over all, 312ft. ; length on floor, 300ft. ; width over all, 65ft. ; width at entrance, 43ft. ; width on floor, 42ft. ; depth on sill, OST., 13ft. 6in. The Board has constructed two patent slips, one for vessels up to 200 tons, and another for vessels up to 600 tons. It has also granted the Admiralty a site adjoining the dock for the purpose of a Naval Coaling Station. Large shed accn. for cargo has been provided, with electric lifts and hoists and conveyors. Coaling facilities. **Charges.** Ballast, stone 3/; sand, etc., 2/; water 1/3 per tun (over 4,000 tuns in year 1/1). Goods wharfage, I. 1/6 and 2/; E. 1/ ; shipping wharfage ¼d per ton net reg. per day, Sundays and holidays excepted. **Pilotage.** C. Sailing vessels. 3d; employing tug, 2d; steamers 2d per ton; max. £45, half rates for second visit on same trip to Dominion. Port Charges 3d per ton (max. charge 8,000 tons) half yearly. Harb. Master's fees (not levied when pilot taken) 1d per ton (max. charge 8,000 tons). **Auth.** Harb. Board. **Officials.** Sec. and Treas., H. B. Burnett; Harb. Master, Capt. H. H. Sergeant; Traffic Manager and Wharfinger, C. C. Hutchings; Engineer, W. H. Hamer, M.Inst.C.E.

AUGUSTA, Sicily. Lat. 37° 14′ N.; long. 15° 13′ E. **Pop.** 15,000. **Tr.**—E. Salt, oil, honey, and wine. **Accn.** The harb. is difficult to enter and a pilot should be employed; once inside it is deep, spacious, and secure. Depth of water at anchorage 13ft. to 26ft. No cranes.

AUX CAYES, Hayti. Lat. 18° 16′ N.; long. 73° 48′ W. **Pop.** 18,000. **Tr.**—I. Cotton stuffs, provisions, wines, hardware, building materials, oil, etc.; E. Coffee, logwood, cocoa, cotton, hides, etc. **Accn.** Anchorages in 5 to 7 fms in bay are safe. Depth of 2 to 3 fms close to town. There is a wharf 450ft. long and 40ft. wide, with 3ft. of water at end, to be replaced by one with 20ft. water alongside. **Charges.** Pilotage and tonnage dues payable in American gold. **Pilotage.** Steamers, $29.34 Haitien currency, plus 40 per cent. in American gold; Sailing vessels, 50 to 100 tons, $11.33 Haitien currency, plus 40 per cent. American gold; 100 to 200, $16.50 and 40 per cent.; 200 to 300, $18.33 and 40 per cent.; 300 to 400, $22 and 40 per cent.; above 400, $29.33 and 40 per cent. On half the value of above rates, 20 per cent. must be added plus 10 per cent. to the Govt. Lighterage: Inwards paid by consignee, outwards coffee, per bag, 20c; logwood, per ton, $3.50; tonnage dues, $1 per ton and 50 per cent. and 33⅓ per cent. Surtax of 25 per cent. calculated on the total sum, that is to say, on the proceeds after the already existing 33⅓ per cent. and 50 per cent. have been added to the original tax. **Official.** British Vice-Consul, M. Fontaine; Lloyd's Agents, Roberts, Dutton and Co.

AVEIRO, Portugal. Lat. 40° 40′ N.; long. 8° 39′ W. **Pop.** About 7,500. **Tr.**—I. Coal, coke, iron, etc.; E. Salt, sardines, etc. **Accn.** There is on bar from 12ft. to 13ft. of water at HST. and 10ft. at HWNT. No vessel draw-

ing more than 11ft. should charter for this port. **Charges.** On a vessel of 150 cubic metres cargo in and out: Pilotage in, with boat manned by 9 men, £1 15s 6d ; pilotage in river, and mooring vessel, 14/6; Custom House, £7 10s ; unmooring vessel and going down to bar 14/6; out, with two boats manned by 18 men, £2 14s.

AVOLA, Sicily. Lat. 36° 54′ N.; long. 15° 9′ E. **Pop.** 14,500. **Tr.**—E. Wine, corn, almonds, locust beans. **Accn.** An open roadstead, anchorage in 5 to 7 fms about half a mile off shore.

AXIM, Ivory Coast, W. Africa. Lat. 4° 52′ N.; long. 2° 12′ W. **Tr.**—Mahogany, kernels, cocoa. **Accn.** There are 4 fms about 2 cable-lengths off shore, but the usual anchorage is in 8 fms, about 2 miles from shore. **Officials.** District Supervisor of Customs; Lloyd's Agent, W. R. Phillips.

BADAGRY, W. Africa. Lat. 6° 25′ N.; long. 2° 55′ E. 9ft. water at town; 8 fms at anchorage. For **Pilotage** and **Charges**, see Lagos.

BAHIA, Brazil. Lat. 13° 50′ S.; long. 38° 30′ W. **Pop.** Over 286,000. **Tr.**—I. Piece goods, yarns, earthenware, cutlery, rails, machinery, iron, general; E. Sugar, rum, tobacco, coffee, cocoa, dyes, woods, hides, cigars, tapioca, diamonds, bullion, piassava. **Accn.** 1,560ft. of quayage with 26ft. alongside at LWOST., reached by a channel 490ft. wide with 26ft. LWOST. Eight 3-ton travelling cranes on quays. **Charges.** Harb. dues and charges, light dues, up to 200 tons, $40; 400 tons, $60; 700 tons, $80; 1,000 and above, $100; payable in gold at 27d per milreis; Hospital dues, $1.920 per man; Customs pass, $8.000; stamps, about $5; clearance at Port Captn., $4; various licences, about $6; despatch fee, $25; tax on ship, per mast, $6; Translating manifest, according to length. Exchange, 10d. per milreis. Compulsory quay dues, $2.500 per ton loaded or discharged; 700rs. per meter of quay occupied per day by steamers; sailing vessels, 500rs. per meter. Lighterage $7 per ton cargo from Europe, $5 from Argentina. $2.50 to $3 per ton of cargo for stevedores; $1.8 per ton for tallying cargo on board and delivery into Custom House. Lighterage exports shipper's accounts, also coal usually. **Towage.** 300 reis per reg. ton. No pilots. **Officials.** British Consul, E. M. de Garston; Vice-Consul, F. Stevenson; Captain of the Port, A. H. Pereira.

BAHIA BLANCA, Argentine Rep. Lat. 38° 47′ S.; long. 62° 15′ W. **Pop.** 45,000 approx. **Tr.**—I. Rly. material, coal, lumber, roofing, wire; E. Wool, sheepskins, hair, and wheat. **HW.** same as Hull. **D.** 36ft. HWST., 26ft. LWST. **Accn.** Great Southern Rly. wharf, minimum depth of water at the piers 26ft., generally much higher; accommodates 14 to 16 steamers; wooden wharf on West side of steel mole used exclusively for loading grain, for two steamers; inside of this mole there is dock accn. for loading and discharging lighters. Two electric elevators on the E. side of the Original Steel Mole, running nearly N. and S.

Each elevator accommodates 4 steamers, 2 on each side, each can be loaded at any state of the tide by shoots. Depth 26ft. The Buenos Aires and Pacific Rly. Co. have constructed docks in concrete, and have at present two electric grain elevators and flour mill erected on the mole with accn. for eleven ocean-going steamers; and when all the extensions are completed there will be accn. for about twenty; depth of water at wharves 26ft.; Vessels are discharged and loaded direct from ship into wagons, and *vice versa*, with hydraulic, electric, and steam cranes. Mole at Puerto Militar terminus, owned by Rosario and Port Belgrano Rly. Co. with accom. for four vessels. **Charges.** Light and buoy dues 7c, health visit 1c per ton reg. Wharfage to rly. companies, 1c gold per ton reg. per day, including use of electric, hydraulic and steam cranes, ship finding her moorings and chain slings for cargo, time counting from hour of coming alongside until leaving pier, Sundays and holidays included. Water supplied at wharves by Rly. Co. at rate of 50c gold per 100 gallons. **Towage.** Rly. Cos. have powerful tugs for the use of shipping. **Pilotage.** Pilots on look-out near lightship at entrance to estuary, moored in 5½ fms in 39° 11½′ S., 61° 38½′ W. Charges according to a printed tariff, based upon distance and draught of vessel. Lighthouse has been erected on shore near entrance of estuary, flashing white light every five seconds, visible all round the horizon for 24 miles, and in clear weather, 45 miles on the sea coast in lat. 39° 02′ S., and long. 61° 12′ W. **Official.** British Vice-Consul and Lloyd's Agent, C. C. Cumming.

BALBOA (Port of Panama), **Rep. of Panama.** (See also Panama Canal). In the Canal Zone. Lat. 8° 57′ N.; long. 79° 28′ W. **Pop.** of Panama City and Ancon, 50,000. **Auth.** Panama Rly. Co. owns piers. **Tr.**—I. All kinds of articles, provisions, clothing, etc.; E. There are no exports shipped at Balboa to ports elsewhere. **Accn.** Vessels must not anchor near the islands of Naos, Flamenco and Perico on account of the fortifications. Vessels anchor in the roadstead outside canal entrance to await visit of health officer. The channel from entrance of the Canal to the wharves is 45ft., and vessels of any length or beam can be berthed at Balboa. The port is being greatly improved. There are under construction a new dock, oil tanks, a reservoir to store coal; a dry dock, 1,000 ft. long and 300ft. wide; and mechanical shops to manufacture or repair any sort of machinery. Operations are in progress to deepen the water at berths to 45ft. HT. 24ft., O.T., rise and fall, 18ft. **LV.** 11,546 gross tons. **Charges.** No harb. dues. $75 (£7 10s) is charged by the consignee as a port agency fee to superintend the entry and clearance of each vessel, but it is optional, and therefore owners are not bound to stipulate this charge on charter party, as they can employ a local agent for much less. The port is administered by U.S. officials, who also enforce all quarantine regulations. Expense of entry and clearing vessels, about £2 10s. Lighterage charges per ton 8/; water, 1d per gallon. **Pilotage.** C. To and from Balboa, £2. **Officials.** Captain of

the Port at Balboa, Capt. Butler, U.S.A.; British Minister and Consul-General, Sir C. C. Mallet, C.M.G.; Vice-Consul, P. Helyar.

BALTCIK, Bulgaria. A grain, salt and wine loading port. Open roadstead with unsafe anchorage. **D.** o to 100 metres. Manual cranage. **Charges.** Harb. dues, 1fr to 3frs max., according to tonnage. **Official.** Chief of the Custom House.

BALTIMORE, U.S. Lat. 39° 45′ N.; long. 76° 25′ W. **Pop.** Over 500,000. **Tr.**—I. Coffee, tin-plates, pig-iron, iron-ore, salt, chemicals, and tropical fruits, cement, earthenware, wines, sugar, rice; E. Wheat, flour, maize, cotton, petroleum, tobacco, bacon, lard, coal, resin, beef, sheep, oilcake, copper, timber, bark, canned goods, and whisky. **Accn.** Baltimore has channels 600ft. wide and 30ft. deep. Four docks. Vessels drawing 30ft. can lie safely alongside the wharves. Vessels of 30ft. dft. can reach Baltimore without lightening at LW. One dry dock, 600ft. long, 60ft. on sill, and 80ft. top, which can receive vessels drawing 23ft.; one 500ft. long, and several other docks of smaller capacity. Shears to lift 150 tons. The harb. connects with the Pennsylvania, Baltimore and Ohio and West Maryland Rlys. **Charges.** Wharfage: vessels less than 400 tons 5/2½; from 400 to 600 tons 6/3; 600 to 800 tons 7/3½; 800 and upwards 8/4 day. **Pilotage.** C. from Cape Henry to Baltimore, and *vice versa*, vessels drawing 15ft. and over, 21/1¾; 12ft. to 15ft. 16/11; less than 12ft., 14/9½ foot. If pilots are detained on board they are allowed 12/8¼ day extra. **Towage.** To and from the Cape, scale based on carrying capacity, and not on net tonnage as before. Vessels of 201 tons, $100, and up to $180 for 10,000 tons. Towing lighters in harbour now $1¼ light, and $2 loaded, an increase of $½ per lighter. **Officials.** British Consul-General, G. Fraser; Vice-Consuls, E. A. Boyd and J. Guthrie; Coll. of Cust., W. F. Stone; Lloyd's Agents, Cunningham, Coale and Co.

BANANA, Africa. Lat. 6° 0′ S.; long. 12° 23′ E. **Tr.**—E. Palm oil, palm nuts, etc. **Accn.** At low water 19ft. on bar 3½ fms off repairing yard. **Charges.** Port dues, including light dues and pilotage, vessels over 500 tons reg., 150frs; under 500 tons, 100frs.

BANDHOLM, Denmark. On the N. coast of the Isle of Lolland. **Tr.**—I. Manufactured goods, coals, timber, colonial produce, oilcake, maize, limestone, manures, feeding stuffs; E. Barley, sugar, and flour. **Accn.** 15ft. at old quays; 19ft. at new quay and in channel leading to harbour. Electric coal crane at new quay. 800ft. of new quays being constructed. A slip 40ft. wide for vessels. **Charges.** Harb. dues, with cargo in or out, 15 oro per n.r. ton; in ballast, in or out, 10 oro per n.r. ton; ballast dues 2 oro per n.r. ton. Discharging: Coal, 9d per ton; coke, 1/ per ton. **Pilotage.** From Raago to Bandholm as per tariff. **Towage.** From the roads 15 ore per ton reg. **Officials.** British Vice-Consul, H. C. L. Hoymand; Harb. Master, Th. Kölle.

BANGKOK, Siam. Lat. 13° 38′ N.; long. 100° 27′ E. **Pop.** 628,675. **Tr.**—I. Cotton goods, provisions, iron, steel and machinery, treasure, sugar, opium, silk goods petroleum, gunny bags, beer, wine and spirits, cotton yarns, jewellery, chemical products, oils other than petroleum, tobacco, hardware, carriages, cars, cycles, and parts thereof. BARBADOES.—See Bridgetown.

BARCELONA, Spain. Lat. 41° 23′ N.; long. 2° 11′ E. **Pop.** 601,000. **Tr.**—I. Cotton, coals, coffee, cocoa, sugar and other colonial produce, chemicals, salt, fish, hides, iron, wax, hardware, grain, etc.; E. Cork, glassware, soap, woollens, cottons, wine, copper, steel, paper, and ribbons. **Accn.** The harb. has a depth at **En.** 24ft. to 32ft., quays 20ft. to 21ft., berths (anchored), 22ft. A patent slip for vessels up to 800 tons. Seventeen fixed hydraulic cranes of 25 tons, three of 1½ tons, one of ¼ ton, and 16 movable hydraulic cranes, also 60-ton shears, and two 25-ton floating cranes. A floating dock has been laid down, and ships of 5,000 tons are able to enter. A breakwater is under construction on the east side of the port, with a view of affording shelter from S.E. gales, which frequently cause vessels to break from their moorings. The Dique del Este, Barcelona, is being extended S. 39° W. from the lighthouse at the end of the Dique, and a bell buoy has been moored off the end of the extension, but owing to its being constantly moved by reason of the progress of the works, its bearings cannot be given. Mariners are cautioned to take pilots by day as well as by night in entering the harb. during the progress of the new port works, and in entering by day to pass to westward of the buoy, and by night to give the end of the Dique del Este a berth of 4 cables until Cataluña float and flashing light is in line N. 39° E. with the flashing green light at the end of the Dique del Este. **Charges.** On steamer 1,000 tons coal £194 7s. Impuesto Obrus del Puerto and Port Works Tax has been reduced 25 per cent. **Pilotage.** C. On a steamer with 1,000 tons coal,

in and out (16/8 each way) £1 13s 4d, mooring pilot 10/6. **Officials.** British Consul-General, C. S. Smith; Vice-Consuls, G. M. Loly and G. R. Smither; Capt. of Port, a Captain, R.N.; chief pilot acts as harb. master. (There is also a " Judge " at the Captain of Port's office, known as the Fiscal, who presides over all cases and disputes that take place afloat.)

BARI, Italy. Lat. 41° 8′ N.; long. 16° 55′ E. **Pop.** 106,243. **Tr.**—I. Coal, codfish, grain, metals, timber, bricks; E. Wine, olive oil, almonds, carob beans, soap. **Accn.** Vessels of large dft. anchor in 17 fms, one mile off Bari; **D.** alongside quay 15ft. to 25ft. Hand crane to lift 5 to 7 tons. **Charges.** Steamers from foreign ports: 1.40 lire per ton for single calls, or 4.20 lire for 12 months, paid in advance; from Italian ports, 0.50 lire per ton for single calls; 1.50 lire for 12 months, paid in advance; sailing vessels from other than Mediterranean ports, 0.50 lire per ton for the first 100 tons, and 0.80 lire per ton in excess of the first 100 tons. Loading and unloading 1 lire per ton; stowage 1 lire per ton; watchman 3 lire per night. Moorings 20 lire. **Pilotage.** 0.05 lire per ton; min. 15 lire; max. 75 lire. **Officials.** Capt. of Port, Cav. Angelo Salem; British Vice-Consul, E. Berner

BARLETTA, Italy. **Pop.** 46,736. **Tr.**—I. Petroleum, wood, corn, coal, chemical manures, etc.; E. Wine, spirits, oil, tartar and tartaric acid, etc. **Accn.** Vessels lie alongside breakwater. **D.** at **En.** 24ft., at quay 21ft. **Charges.** Harb. dues, f. 1.40 per ton net reg. Discharging coals, 10d per ton; loading wines, 10d per hogshead. Coal discharged at 500 tons per day; wine, 500 hogsheads. **Officials.** Capt. of Port, Capt. Ubaldo Diciotti. British Vice-Consul, A. Reichlin; Lloyd's Agents, Reichlin and Co.

BASRAH.—See Bussorah.

BASSEIN, Burma. Lat. 16° 50′ N.; long. 94° 50′ E. **Pop.** 32,500. **Auth.** Commissioner of Irrawaddy Division. **Tr.**—I. Coal, salt, etc.; E. Rice. **Accn.** Vessels of 26ft. dft. can come to this port, which is 67 miles from sea, and is 5 miles from N. to S. of town. **LV.** s.s. *Manipur*, 4,928 reg. tons. Dickson; Harbour Master, Capitano di Porto.

BENGUELLA, Africa. Lat. 12° 33′ 54″ S.; long. 13° 25′ 9° E. **Pop.** About 3,000. **Tr.**—Same as St. Paul de Loanda. **Accn.** The anchorage, about a mile from town, in 4 to 6 fms, is exposed to all winds. Two Portuguese, steamers and one German per month. Connected by rail 18 miles, with Lobito Bay (where some of the Union-Castle steamers now call), terminus of rly. to Katanga. Steamers can come alongside at Lobito and discharge direct. Two cranes, one steam 3-ton. **Official.** Port Official, A. Ayres. See also St. Paul de Loanda.

BENICARLO, Spain. Lat. 40° 28′ N. ; long. 0° 25′ E. **Tr.**—I. Hardware and manufactured goods ; E.

Wine, fruit, etc. A fine roadstead of any depth of water. **Charges.** Light dues 2½d per ton. Tonnage 1/ to 2/.

BENIN, Africa. Lat. 5° 46′ 1″ N. ; long. 5° 3′ 5″ E. **Tr.**—I. Tobacco, spirits, cotton goods, and sundries ; E. Palm-oil, palm kernels, rubber, and timber. **Accn. D.** On actual bar 9ft. to 13ft., and in the channel 12ft. NT, and 17ft. ST. by creeks. Vessels drawing 17ft. can ascend river to Sepele. **Official.** Deputy-Commissioner for the Western Division of Niger Coast Protectorate, R. F. Locke ; Lloyd's Agent, J. E. Dickinson.

BENI SAF, Algeria. Lat. 35° 19′ 8″ N. ; long. 1° 20′ E. **Pop.** 8,000. **Tr.**—E. Iron ore. **Accn.** A newly constructed harb. of 45 acres. Workshop for repairing ships of all kinds, but on a small scale. **D.** at **En.** 26ft. **Charges.** None. **Pilotage.** £1 4s. in and out.

BERBICE, British Guiana. Lat. 6° 20′ N.; long. 57° 30 W. **Pop.** 8,604. **Tr.**—E. Hides, cotton, timber, sugar, rum, cocoa-nuts, balatto, etc. **Accn. D.** on bar at HW. 15ft., and 6ft. LW. ; the rise and fall of ST. are 10ft., and 5ft. NT. No docks. **Charges,** etc., see Georgetown.

BERDIANSK (Taganrog), Russia. Lat. 46° 38′ 18″ N. ; long. 36° 47′ 40″ E. **Pop.** 30,000. **Tr.**—E. Wheat, barley, linseed, hemp, wool, and skins. **Accn.** Usual anchorage 2 miles S.W. of town. Breakwater constructed in 14ft. of water, extending 1,073yds from shore. **D.** in harbour from 6ft. to 10ft., according to wind. **Charges.** On a steamer of 1,000 tons loading from 12 to 15,000 chetverts, including labourers, etc., about £65.

BERGEN, and Vaksdal Harbour, Norway. Lat. 60° 24′ N. ; long. 5° 18′ 50″ (lighthouse) E. **Pop.** 82,000. **THW.** f. and c. 10h 38m; OS. rise 4ft. **Tr.**—I. Grain, salt, iron and coal, hardware, coffee, sugar, wines, spirits ; E. Bones, codfish (dried and salted), herrings (salted and fresh in ice), cod oil, minerals, cod-roes, skins, etc. **Auth.** Bergens Havnestyre. **Accn.** Depth from 4 to 8 fms, extensive quays and mooring buoys, considered free from ice throughout the whole winter, and well sheltered from all winds. The Man of War harb., situated at the suburb Nostet, has from 10 to 50 fms of water, with good holding ground, and here all yachts and tourist steamers anchor. The port has three large and several smaller engineering works, with shipbuilding yards attached. There are also 3 patent slips and 3 dry docks, respectively 248, 269, and 360ft. long, with from 9 to 17ft. 6in. water on the sill. Fifteen fixed cranes (1 to 10 tons) and six travelling cranes (1 to 2 tons) on quays. From the sea there are four entrances S. of Bergen, viz., Skudesnes 88, Bommel Fjord 72, Saelbjorns Fjord 40, and Kors Fjord 24 nautical miles from the town, and Feiö Fjord 32 miles north. All the entrances are very deep, and from 1 to 2 miles wide, and navigation inside the islands is almost completely landlocked, with deep water, but it requires a pilot to navigate the channels in safety; large vessels generally enter by the Korsfjord channel. **Charges.** Tonnage and light dues 10½d per net reg. ton on discharged

cargo inwards, and 6½d on loaded outwards. Buoy dues, 2%. Harb. dues for passenger steamers, 1½d per net reg. ton. Vessels loading or unloading cargo to or from foreign countries, 10 ore per reg. ton of space occupied by cargo; vessels with cargo to or from Norwegian ports, 5 ore per ton of vessel's tonnage. Ballast free. Discharging coals 8d per ton; grain 7½d per 1,000 kilos by steam-winches. **Pilotage.** C. According to size and dft., besides distance:—Summer taxes: 200 tons reg., 9ft. dft, entrance money, £1 4s. 5d; distance, 18/; 3/ per mile; 500 tons reg., 12ft. dft, entrance, £1 19s 5d; distance, £1 7s; 4/6 per mile; 1,000 tons reg., 15ft dft, entrance £3 1s 1d; distance, £2; 6/8 per mile. Winter taxes respectively, same tonnage and draught, £1 10s 9d, £1 2s. 8d, and 3/9 per mile; £2 9s 9d, £1 16s 11d, and 5/9 per mile; £3 17s. 3s, £2 12s and 8/8 per mile. Pilotage outwards about one-third less.

26 miles from Bergen is the Vaksdal Harbour, where the Vaksdal mill is situated, with large silo, alongside of which moorings have been arranged for vessels of any size. Length of quay, 100 metres; **D.** alongside, 11 metres. Silo discharging capacity, 100 tons per hour. **Charges.** 9½d per 1,000 kilos; at night, 10¾d per ton, and £5 11s 1½d for extra expenses each night. Weighers' fees paid by receiver. Ships call at Bergen inward for Customs inspection. Safe channel from Bergen to Vaksdal, with depth of 100 fms. Local pilot from Bergen, in and out, £5 11s 1d for vessels of 6,000 tons. Custom house guards' fee 4/5 per day besides provisions on board and travelling expenses to Bergen. Other expenses about the same as in Bergen. **Officials.** British Consul, O. Wardrop; Supt. of Pilots, Kom. A. W. Muller; Harb. and Pilot Master, L. Iversen.

BERMUDA, North Atlantic,—Lat. (St. Georges) 32° 15′ N.; long. 64° 52′ W. Has two ports, Hamilton and St. Georges, also Naval Dockyard at Ireland Island.

Hamilton. **Auth.** Corporation of Hamilton. **Tr.**—I. General; E. Agricultural produce. **Accn. D.** at **En.** 20ft. L.W. (being deepened to 27ft.); 24ft. at wharves; 40ft. off shore, stages provided; at anchorage 5 to 7 fms. **Charges.** Harb. dues, steamers ½d per gross ton per day for 3 days, then ¼d, with min. charge of £3 per day; sailing vessels 1d per gross ton per day, min. charge of 10s. per day. Lights, 3d per ton net reg.

St. Georges. **Auth.** Corporation of St. Georges. **Tr.**—I. and E. coal. **Accn. D.** at **En** 17ft. L.W. (being deepened to 24ft.). Average depth in harb., 50ft. Ships discharge across stages 20ft from wharves. New wharf being built with 24ft. alongside. Two salvage tugs; cargo and coal lighters with steam winches; steam winches on wharves; marine railway for vessels up to 1,000 tons; machine shops with electric arc-welding outfit. At the Naval Dockyard there is a large floating dock and machine shops. **Charges.** Harb. Master's Fees 1d per net reg. ton up to 200 tons, and ½d per ton for every ton over 200 tons. Wharfage, at Corporation Wharves, ½d per gross ton for 3 days, then ¼d per ton; at private wharves, 1d per ton net reg. up to 200 tons, over 200 tons ½d per ton. Lights, 3d. per ton net reg., except vessels for coal and provisions only, when reduced to

½d per ton. Steamers calling off St. Georges for orders only pay no charges if they do not anchor nor take pilot. **Official.** Harb. Master (St. George's), E. Healy.

BETT'S COVE, Newfoundland. Lat. 49° 41′ N.; long. 57° 47′ W. **D.** at **E.** 30 fms, 13 to 27ft. at wharves. **Charges.** 6d. to 7d per ton.

BEYPORE, India. Lat. 11° 9′ 30″ N.; long. 75° 48′ 30″ E. **Tr.**—Similar to Madras. **D.** at **En.** The bar at the mouth of the river has only 6ft. at LWOST., when the rise is about 4ft. **Accn.** Vessels anchor in 5 fms, mud bottom, about 1½ miles off shore; 20ft. at quay. Open roadstead, and during strong W. winds there are heavy breakers on the bar, and ships at anchor in the roadstead should always be ready to put to sea on the approach of bad weather. **Charges.** Steamers other than coasting, harb. dues 2½ annas per ton; 3½ annas if calling more than one port, which covers 60 days; coasters, 2¾ annas for 30 days, each payment covering all ports E. or W. coast of Madras Presidency. Light dues 7 pies per ton. Boat hire loaded between beach and vessels, 6 annas to 11.8 per trip according to dft and place; over 7 fms by agreement.

BEYROOT. See Beirut.

BILBAO, Spain. Lat. 43° 15′ N.; long. 2° 45′ W. **Pop.** 90,000. **Tr.**—I. Cottons, woollens, colonials, dried cod, coal, coke, grain, iron, steel, metals, copra, chemicals, jute, chick peas. wood pulp, railway material, agricultural implements, spirits, beer, cement, petroleum, timber, etc.; E. Iron ore, pig iron, lead, fruits, oils, flour, wine, madder, liquorice, skins, chestnuts, creosote, wool, etc. **THW.** 3h; Sp. rise 14¾ft. **Accn. D.** at **E.** 17½ ft. NT. to 19½ft. ST. Fourteen tips varying from 9 to 20ft. LW. Cranes from 4 to 100 tons. Four dry docks, 320ft., 325ft., 550ft., and 426ft. respectively, with a depth of 21ft. OT; and one 604ft. with 25ft. water OT. **Charges.** Coasting—General cargo, per 1,000 kilos, loading 0.50 pes, discharging 0.75 pes; iron ore, loading 0.25 pes; pig iron, 0.375 pes; coal (Spanish), discharging 0.25 pes. Foreign—General: pig-iron and iron ore, loading 0.50 pes, discharging from America 2.50 pes, from Europe 1.25 pes; coal and coke 0.25 pes. Loading and unloading merchandise as per schedule. Tax on ore exported 0.20 pes (gold) per 1,000 kilos, payable by shipper. **Towage.** For steamers.—From outside bar with one tug, or *vice versa*, to Reach, Portugalete, and Sestao, £3 10s; Desierto, Franco-Belga and Luchana, £4; Olaveaga (up to dry dock), £5; Bilbao, £6. River towage for steamers: Within one section, 60 pes; two sections, 80 pes; three sections, 100 pes; four sections, 110 pes; five sections, 130 pes; swinging, 60 pes. The sections are five: Bilbao, Olaveaga, Desierto, Portugalete, and Mar. Tugs ordered but not used, half above rates. **Pilotage.** C. for all vessels, with the following exceptions: Spanish ships carrying as a member of the crew a certificated pilot who has not been absent for more than two months; all national coasting vessels; and vessels of less than 50 tons gross register.

Officials. Com. of Marine; British Consul, A. M. Madden, C.M.G.; Vic-Consul, J. Innes.

BIMLIPATAM, India. Lat. 17° 53′ 23″ N.; long. 83° 26′ 42″ E. **Pop.** 9,827. **Tr.**—I. Cotton yarn, twist, metals, spices, European provisions, and liquors; E. Seed, buffalo horns and hides, turmeric, jute. **Accn.** Open roadstead. Anchorage, Flagstaff West (mag.), 5 to 5½ fms, good holding ground. **Charges.** Tonnage dues, 2 annas 9 pies per t.r. in coasters, once in 30 days. Foreign ships or steamers in ballast, 2.7½rs at first port of call, and 10½ annas at next; with cargo, 3.6rs at first port only. Vessels landing passengers or stores, full rates; not carrying passengers or cargo, three-fourths. Coasters, with cargo, calling at any port, 1 anna 3 pies once in 60 days. Light dues: Coaster, 7 pies per t.r. every 60 days. No harb. dues. **Official,** Port Conservator, S. N. Lallow, who is also Coll. of Customs.

BIZERTA, Tunis. Lat. 37° 16′ N.; long. 9° 52′ E. 60 miles from Tunis. French Naval Station. **Tr.**—I. Coal; E. Corn, oil, hides. **Accn.** 2 jetties 3,300ft. long, enclosing outer harb. 230 acres. Quay walls 26ft. HW.OT. Ry. on quays belonging to Tunisian and Algerian Ry. Channel connecting sea with lake 8 fms deep. Two dry docks, 250m. by 25, one 90m. by 13. **LV.** Largest vessels of French Navy. Coals plentiful and cheap. Liquid fuel depot, with pipes laid to deliver on board. Tugs by agreement. Good facilities for repairs. **Charges.** Harb. and canal, nil. Lights and sanit. 0.18 franc reg. ton.; max. 90fcs. For coals half. Shelter and canal 0.03 franc ton reg. Dry docks: entrance for vessels of 500 tons and above, 530 francs, and for each ton over 1,000, 30 cents. Daily charge in dock, 100 francs up to 500 tons; 500 to 1,500 tons, per ton in addition, 10 cents; over 1,500, 5 cents plus expenses of the Arsenal of Sidi Abdullah, and with addition of 30 per cent. to whole for general

expenses of the Navy. **Pilotage.** C. from 10 to 20 francs ton reg. **Officials.** Harb. Master, M. Calisti; British Vice-Consul and Lloyd's Agent, Hon. T. Bourke.

BJORNEBORG, Finland. Lat. 61° 29′ N.; long. 21° 43′ E., **Pop.** 15,000. **Tr.**—I. Coals, coke, flour, general sawn wood, props, pulpwood. On the south side of Kumo river, 18 miles from its harb., Räfsö. In the river between Räfsö and Björneborg there are only 9ft. of water. Repairs to hulls and machinery. There is a patent slip suitable for small vessels of 300 or 400 tons only; larger vessels requiring repairs under water line or bottom cleaning must be careened. One crane lifting 3 tons; vessels use own winches.

Rafso. In the roads there is good holding in 31ft. of water, but vessels are exposed to SW. by W. and NW. gales, which make loading impossible as lighters cannot keep alongside. In the harb., vessels can lie in perfect safety in 12 to 20ft.; no tides. There are now three leading lights—the Sebbskär, Kallo light and lights on the E. of Räfsö Island. Vessels can enter at any time. 10 to 12ft. at quays; 14 to 28ft. at anchorage in roads. Ice from December to March, but sometimes the port is open all the year round to iron steamers. Powerful salvage tug, steam towboat and pilots always available. Coals: good supply of Grimsby and West Hartlepool bunker coal at wharf or in roads at current prices. Risby, Brändöhamn, Hamnholm, and Antora are wood loading places, in the Björneborg Customs district. **Charges.** Harb. dues, 40 penni per t.r. When loading in other places than Räfsö and Mantyluto, 20p. Vessels bunkering only or calling for orders pay 10 penni (= 1d) per reg. ton. Ballast: sand, 1.25 marks; stones, 2.50 marks per ton. Vessels entering with ballast pay 13½ penni per reg. ton, so that a vessel of 630 t.r., which is supposed to have 200 tons of ballast, pays 80 marks for the privilege of discharging same at Räfsö alongside wharf free of wharfage, but vessels drawing more than 10ft. must lie out in the harb. and pay an additional charge for lighterage to the shore, varying from 0.90 to 1.50 marks per reg. ton. Inwards: beacon 138.60 marks, expedition (at Custom House) 65 marks; outwards: beacon 277.20 marks, expedition (at Custom House) 65 marks; tonnage (once a year), 63 marks; harb., 190.80 marks; boat assistance, 30 marks; stevedore stowing lumber, 3 marks per std., loading deals, battens and boards, 2½ to 4 marks per standard; cargo 0.70 to 1m. per ton; brokerage in and out (50.75 marks), 75 marks. **Pilotage.** On draught; average 25 marks in and 45 marks out. **Officials.** British Vice-Consul, C. G. Sundell. Harb. Commission at Björneborg, Harb. Master at Räfsö, J. E. Groenblom; Lloyd's Agents, Oscar Heine & Co., Ltd.

BLACK RIVER, Jamaica. Lat. 17° 30′ N.; long. 77° 30′ W. **Tr.**—I. Stoves, machinery, etc.; E. Sugar, rum, molasses. logwood. **Accn.** Good holding ground and facilities for loading in 18ft. LW. Anchorage 40 to 50ft. **Charges.** See Kingston. **Pilotage.** C.

BLUFF HARBOUR, New Zealand. Lat. 46° 36′ 17″ S.; long. 168° 21′ 55″ E. 17 miles from Invercargill. **Pop.** 2,000. **Auth.** Harb. Board constituted under the N.Z. Harbours Act, 1878. **Tr.**—I. Guano, timber, coal, general; E. Wool, hides, flax, frozen mutton, fats, cased meats, skins and pelts, tallow, timber, fish, oysters, cheese, butter, and preserved rabbits. **Accn. D.** at anchorage, a mile inside the entrance, 24ft. to 30ft. Four hoisting engines. There are 3,725ft. of wharfage. **W.** of **E.** 300ft. at narrowest part of channel. **D.** alongside wharves varies from 18ft. to 31ft. **R.** of **T.** OT. 6ft., NT. 5ft., ST. 7ft. 6in. **LV.** *Ionic*, 7,826 tons net. 5- and 10-ton cranes. **Ry.** Main Trunk Line of South Island. Vessels discharge direct into trucks. **Charges.** Port charges 2d ton, or a maximum of 6d per ton in any six months. Ballast from 3/- to 4/6 ton; stevedores 1/5 hour, and 2/2 hour overtime. Light dues on all steamers arriving, foreign, 4d ton; on sailing vessels arriving from Australian colonies, 4d ton; on sailing vessels arriving foreign, 6d ton; ¼d ton coastwise. **Pilotage.** Steamers in or out 2½d reg. ton. For towage assistance to steamers using their own steam, over 3,000 tons £5; 2,000, £4; under 2,000, £3; sailing vessels, in or out, without tug 4½d ton, with tug 2½d ton each way; vessels in ballast, in or out, 2½d reg ton. **Towage.** From sea to wharf or *vice versa* 5d reg. ton; vessels in ballast in or out (including pilotage), 6d ton. These charges to cover any distance up to three miles. For every additional mile or portion thereof, ½d ton additional. Min. rate for towage £3; min. rate for removal 1d ton. **Officials.** Harb. Master, C. H. Lovett; Sec. to Board, Geo. R. George; Customs Officer, R. Hunter.

BODO, Norway. Lat. 67° 17′ N.; long. 14° 25′ E. **Pop.** 4,500. **Tr.**—I. Coal, salt; E. Fish, herrings, herring oil, herring meal. **Accn. D.** at **E.** 12 to 14 fms. **W.** of **E.** 125 fms. One quay; good anchorholds. One wharf, pier. Steamers discharge direct into stores. **Officials.** British Vice-Consul, M. Christoffersen; Lloyd's Agent, J. N. Aagaard, Narvik.

BOMBAY, India. Lat. 18° 54′ N.; long. 72° 49′ E. **Pop.** 860,000. **Auth.** Board of Trustees. **Tr.**—I. Coal, iron, wines, dry goods, kerosene oil, tea, glassware, grain, sugars, and teak; E. Wheat, seeds, cotton, opium, cloves, coffee, dates, gums, ginger, gunny bags, horns, ivory, wood, mother-of-pearl shells, pepper, yarn, manganese ore. **Accn.** Fine harb. from 12 to 14 miles long, from N. to S., with a general width of from 4 to 6 miles. Anchorage is on W. side of harb. Extra. Sp. rise 17ft., ordinary 14 to 15ft.; N. rise 11ft. There are three wet docks, the Prince's (30 acres), Victoria (25 acres) and Alexandra Docks (49 acres), and two dry docks, the Merewether Dry Dock (500ft. long × 65ft 6in. wide) entered from Prince's Dock, and Hughes Dry Dock (1,000ft. long × 100ft. wide divided near the centre so that it can be used as one or two docks) entered from the Alexandra Dock. Hydraulic cranes available for use in the Wet Docks: one to lift 100 tons, one to lift 30 tons, one to lift 5 tons, 85 at present to lift 35 cwts, and 113 to lift 30 cwts. There

are besides seven other dry docks, belonging to Government, the P. and O. and B.I.S.N. Co., and a patent slip privately owned. **Charges.** Port dues 1 anna per reg. ton per month; Prince's, Victoria, and Alexandra Dock dues $1\frac{1}{6}$ pie per ton per diem on vessels; cranes (30 and 35 cwts.) hired at rs 5 per diem. Charges at the docks on goods vary according to class. The import wharfage on cotton piece goods is 4ans a bale; iron from rs 1-2 to rs 1-10 per ton; grain, 9ans per ton; seeds (oil), 10ans per ton; other than oil seeds, rs 1-12 per ton; cotton raw, Indian, pressed, 2ans per bale; American or other pressed, bale of 4 cwt. or over, 3ans 6 pies; Egyptian, 6 cwt bales, 5ans; kerosene oil and coal are discharged, into lighters in the stream; kerosene in bulk is discharged at the bulk oil installation pier; non-dangerous petroleum in bulk can be discharged in docks at a special berth, 6 pies per eight gallons. Pilotage. In and out of harb., for sailing vessels and steamers from 100 tons uwpards, during the fair season and during the SW. monsoon; the SW. monsoon commences from June 1 and ends September 30.

	Steamers.		Sailing Vessels.	
	Fair Season.	Monsoon. Season.	Fair Season.	Monsoon Season.
Minimum, 100 to 300 reg. tons .	Rs. 25.	Rs. 37.	Rs. 41.	Rs. 62.
Maximum, 2,100 to 2,200 reg. tons	Rs. 72.	Rs. 84.	Rs. 120.	Rs. 140.

And an increase of rs 4-2 for every 100 tons or part, on sailing ships, and rs 2-8 for every 100 tons, or part, on steamers above this tonnage during fair season ; and in addition thereto an extra rate of rs 20-10 on sailing ships, and rs 12-6 on steamers during SW. monsoon. Transporting fees on ships :— 1,500 tons and upwards, rs 30 ; 1,000 tons to 1,500 tons, rs 25 ; under 1,000 tons, rs 20. Steamers using their own engines : from one berth to another south of Cross Island or to or from any of the docks or to any berth north of Cross Island, or *vice versa*, rs 20 ; transporting north of Cross Island rs 15 ; sailing ships or steamers towed to or from any dock north of Cross Island from or to fixed moorings north of Cross Island will be charged rs 15. Fees at the above rate shall cover the services of a pilot for all duties connected with the movement, anchorage or mooring of a vessel entering or leaving the port for a period of 12 hours from the time of joining the vessel, but if his services are required for more than 12 hours, an additional transporting or attendance fee, as the case may be, shall be charged. For taking a vessel from Butcher Island, Pir Pao, Hog Island or Nocar Point to sea, or to any point or mooring in the harb., or *vice versa*, and for vessels proceeding on a trial-trip, a single pilotage fee shall be charged ; but, where a vessel proceeding to sea from Butcher Island, Pir Pao, Hog Island or Nocar Point is at the wish of the master anchored in the harb. to complete ship's business, then a pilotage fee and a half shall be charged. Vessels arriving with gunpowder, if not moored

in the harb. on the day of arrival, shall pay an attendance fee of rs 20. Water is supplied to shipping in harb. at rs 1-12 per ton. **Towage.** Steam or sail. Assisting a vessel at the dock entrance, rs 50 ; if tug attends but is not used, rs 30 ; towing a vessel through the dock channel to or from a berth north of Cross Island, of 1,500 tons reg. and under, rs 75, exceeding 1,500 tons reg., rs 100 ; towing from the docks to anchorage south of Cross Island or *vice versa*, similarly, rs 100 and 150 ; towing from dock or stream to Sunk Rock or *vice versa*, similarly, rs 150 and 200 ; towing from dock or stream to Floating Light or *vice versa*, rs 200 and 250 ; detention of tug per half hour, rs 25 ; remooring a vessel, rs 100 ; attending a vessel on fire, first 24 hours, rs 150 ; second do., rs 120. Note.—Rupee = 1/4. **Officials.** Chairman of Trust, The Hon. F. L. Sprott; Sec. to Trust, H. E. Hart; Chief Accountant, J. Tyers; Port Officer, Commander St. L. S. Warden, R.I.M.; Chief Engineer, P. G. Messent; Traffic Manager, A. Panton; Lloyd's Agents, Finlay, Muir and Co.

BONA, Algiers. Lat. 36° 53′ 38″ N. ; long. 7° 46′ 4″ E. **Pop.** 45,000. **Tr.**—I. General merchandise and manufactures ; E.
